THE HISTORY

# INDIAN LITERATURE

VIBUECHT MEQUA

VARANASI
CHOWKHAMBA SANSKRIT SERIES OFFICE

# PUBLISHER'S NOTE

Among the Western Orientalists, name of Prof Weber occupies a very prominent place. His edition of Shatpath Brahman, and contributions in Indische Studien & Indische Streifen, are still held in the highest esteem both by Western & Indian scholars. But the present work is Prof. Weber's crowning contribution to the Indian Literature. It deals very exhaustively, in two parts respectively, the histories of Vedic. Literature & the Sanskrit Literature, incorporating theroin informations regarding latest researches and newest publications bearing upon the subject. The great crudition and original thinking of Prof. Weber has made the treatment of the subject matter very comprehensive, and at the same time, new light has been thrown on many of the disputed faces of our ancient literature.

Such an illuminating and valuable work had long been out of print and not available to the scholars. We, as publishers of Indological books, had been constantly expertencing the great demand of the book and of the resultant frustration due to its nonavailability. Therefore with a view to make it available once again, we decided to reprint it. We are now extremely glad to see our ambituon fulfilled.

We earnestly hope that our venture would be welcomed by scholars and lovers of Indian thought, so that we may derive further encouragement to undertake the reprinting of other valuable, yet out of print works

## TRANSLATORS' NOTE.

According to the original intention, the English trans lation of this work was to have appeared shortly rater the second German edition, which came out in the end of 1875, and which, as mentioned by the author in his preface, was in part prepared with a view to this translation. In consequence, however, of the death of Professor Childers, under whose direction it was in the first instance begun, and of whose aid and supervision it would, hid he lived, have had the benefit, the work came to a stand still, and some time elapsed before the task of continuing and completing it was entrusted to those whose names appear on the titlepage The manuscript of the translation thus interrupted embraced a considerable part of the text of the first division of the work (Vedic Literature) It had not undergone any revision by Professor Childers, and was found to be in a somewhat imperfect state, and to require very material modification Upon Mr Zachariae devolved the labour or correcting it, of completing it as far as the close of the Vedic Period, and of adding the notes to this First Purt none of which had been translated. From the number of changes introduced in the course of revision, the portion of the work comprised in the manuscript in question has virtually been re-translated. The rendering of the second division of the volume (Sanskrit Lateriture) is entirely and exclusively the work of Mr Mann

The circumstances under which the translation has been

produced have greatly delayed its appearance. But for this delay some compensation is afforded by the Supplementary Notes which Professor Weber has written for incorporation in the volume (p 311 ff), and which supply information regarding the latest researches and the newest publications bearing upon the subjects discussed in the work. Professor Weber has also been good enough to read the sheets as they came from the press, and the translators are indebted to him for a number of suggestions

A few of the abbreviations made use of in the titles of works which are frequently quoted perhaps require explanation eg, I St for Weber's Indische Studien, I Str for his Indische Streifen, I AK for Lassen's Indische Alterthumshande, Z D M G for Zeitschrift der deutschen

rrorgerländischen Geeillschaft, de,

The system of translitaration is in the main identical with that followed in the German original, as, however, it varies in a few particulars, it is given here instead of in the Author's Proface. It is as follows -

## PREFACE TO THE SECOND EDITION.

THE work of my youth, which here appears in a new edi tion, had been several years out of print To have republished it without alteration would scarcely have done, and, owing to the pressure of other labours it was impossible for me, from lack of time, to subject it to a complete and systematic remodelling. So the matter rested. At last, to meet the urgent wish of the publisher, I resolved upon the present edition, which indeed leaves the original text unchanged, but at the same time seeks, by means of the newly added notes, to accommodate itself to the actual position of knowledge. In thus finally decidong, I was influenced by the behel that in no other way, could the great advances made in this field of learning since the first appearance of this work be more clearly exhibited than precisely in this way, and that, consequently, this edition might at the same time serve in some measure to present, in nuce, a history of Sanskrit studies during the last four-and-twenty years Another consideration was, that only by so doing could I furnish a critically secured basis for the English translation contemplated by Messrs Trubner & Co., which could not possibly pow give the original text alone, as was done in the French transla-

tion,\* which appeared at Paris in 1859. It was, indeed, while going over the work with the view of preparing it for this English translation, that the hope, nay, the conviction, grew upon me, that, although a complete reconstruction of it was out of the question, still an edition like the present might advantaceously appear in a German dress also I rejoiced to see that this labour of my youth was standing well the test of time. I found in it little that was absolutely erroneous, although much even now remains as uncertain and unsettled as formerly, while, on the other hand, many things alread, stand clear and sure which I then only doubtfully conjectured, or which were at that time still completely enveloped in obscurity

The obtaining of critical data from the contents of Indian literature, with a view to the establishment of its infernal chronology and history-not the setting forth in detail of the subject-matter of the different works-was, from the beginning, the object I had before me in these lectures, and this object, together with that of specifying the publications which have seen the light in the interval, has continged to be my leading point of view in the present annotation of them. To mark off the new matter, square brackets are used.+

The number of fellow-workers has greatly increased dumne the last twenty four years. Instead of here running over their names. I have preferred-in order thus to faci-

litate a general view of this part of the subject-to add to

the Index, which in other respects also has been considerably enlarged, a new section, showing where I have

availed myself of the writings of each, or have at least referred to them One work there is, however, which, as it underlies all recent labours in this field, and cannot possibly be cited on every occasion when it is made use of, calls for special mention in this place-I mean ...e Sanskrit Dictionary of Bohtlingk and Roth, which was completed in the course of last summer \* The carrying through of this great work, which we owe to the patronage of the St Petersburg Academy of Sciences, over a period of a quarter of a century, will reflect lasting honour upon that body as

. The second edition bears the in cription 'Dedicated to my friends, Bobtlingk and Roth, on the complet on of the Sarsky: D ctionary -Tr.

well as upon the two editors

BERLIN, A ovem'er 1875

# PREFACE TO THE FIRST EDITION.

THE lectures herewith presented to the narrow circle of my fellows in this field of study, and also, it is hoped, to the wider circle of those interested in researches into the history of literature generally, are a first attempt, and as such, naturally, defective and capable of being in many respects supplemented and improved. The material they deal with is too vast, and the means of mastering it in general too maccessible, not to have for a lengthened period completely checked inquiry into its internal relative chronology-the only chronology that is possible. Nor could I ever have ventured upon such a labour, had not the Berlin Royal Library had the good fortune to possess the fine collection of Sanskrit MSS formed by Sir R. Chambers, the acquisition of which some ten years ago, through the liberality of his Majesty, Frederick William IV, and by the agency of his Excellency Baron Bunsen, opened up to Sanskrit philology a fresh path, upon which it has already made vigorous progress. In the course of last year, commissioned by the Royal Library, I undertook the work of catalogung this collection, and as the result a detailed catalogue will appear about simultaneously with these lectures, which may in some sense be regarded as a

zir. commentary upon it. Imperfect as, from the absolute

point of view, both works must appear, I yet chemin the hope that they may render good service to learning. How great my columns are in the spenial investign-

tions, to the writings of Colempoke, Wilson, Lamen, Burrouf, Both, Remard, Stensler, and Holtzmann, I only mention here generally, as I have uniformly given ample

references to these anthomies in the proper place. The form in which these lectures appear is extentially

the same in which they were delivered," with the exception of a few modifications of styles thus, in particular, the transitions and recommissions belonging to amil dehvery have been easer curtailed or omitted, while, on the other hand, to the moderatel remarks—here given as foot-notes-much new matter has been added.

4. W Expert, July, 1312.

\* In the "inter-Security of things.

# TABLE OF CONTENTS

#### INTRODUCTION.

1-7

Antiquity of Indian literature, 2, proved by geographical evidence, 3-4, by internal evidence from the lintery of the Hindú religion, 5, by evidence drawn from the linguage, 6, want of external chronology, 7

FIRST PERIOD-VEDIC LITERATURE.

#### PRELIMINARY SURVEY, (1) The Sandrids, 8-11

E~30

Earthium of the three older Vedas, S-9, mutual relation of the ethree Vedas, 9-10, period of their final compilation, 10, Sambitá of the Atharvan, 11

(2.) The Brokenzrus, 11-15

Their character, 12, and origin, 13, mutual relation of the Brahmanas of the several Vedas, 14, their common name Sruti, 15

(3.) The Sut-as, &c

The Survey, &c.
There character and origin, 16, Strauta Sótras, 17, Grhyaco Sanfara Sutras, 17, gradual transformation of the
origin. I Smrt, (Outson and Law), 17, 18, origin of
cas'e, 18, connection between the Grhya-Sótras and
the legal iterature, 19-20, longuistic Sátras, their
crigin, 20, 21, character of the time in que.Lon, 21,
22, Prétidélitys-Soitina, 23, metric 23, Anuermonné,
42, trudition—Bhinddevid, 24, Nighanja, Nivikt,
the Veldras, 25, sences of grammar, 26, philosophical specialisting, 26 ff., panes apphele to the siry-gee, 28, Upsanishda, Arayyakas, 25, 29, satronomy
and incidence, 20, 30.

A -RIGVEDA, . . . 31-62

(a) Sanhud, 31-44.

Its divisions, 31, 32, Eakala and Vashka'a recensions.

29. Yokalı, the school of the Sunaka, 33, Saunaka, Palchda Edibrarya, 34, mythology of the primitive Glood-Germanic time, 35; Persana and Indian cycles of legend, 36, 37, mode of life of the Indians in their secient home, 77, 38, reasons why they left their ancient homes, 58, 39, different constituents of Rigorda Samintá, 39, godo to whom the bymns are addressed, 40, engatic literature connected with the Samint' Zásia, 41, Sighan, 41, 42, edibron, £ar.

43, 44-(b) Bráhmanas, 44-52

Atterys and Sikhkigans Befinnans, 443, data therein bearing on him of their composition, 45, they recur pose earlier compositions with similar contents, 45-47, tables and legands contained; in these two Befinnans, 47, the Aranyakas of the filk Attaraya Aranyaka, 48 ff. Kan bishkarrayak, Reschiktasyanishad, 50 ff. Simlarius commentanes on the Upanished, 51, Vidikala Usunishad. 52

(e) Sutras 52, 62

The Srauts Stars of Avaldyana and Süühhdyana, 52 ff : commentances thereon 5.4, 55. the Gribya Startas of Afraldyana and Süühhdyana, 5.ff., vho literature presupposed in these, 55 ff, Rik Prätisäthyr, Upalcikla, 59, 60, Sikhals, Ohlandas, Jyotuha, 50, 61, Aruktamant's 61, Phalddavata, Rayrddóna, Pariabstas, 62

R-SÁMAN EDA.

(a) Sanhit2, 63-66

Its arrangement, 63, the Gánaz, 64, antiquity of the readings of the Sáma Samhitá, 64, 65, recensions, 65, editions, &c, 65, 66

63 85

(b) Brahmanas, 65-75

The Tandys Pakebavnés-Brabmana, 65 ff , geographical and other data contained therein, 67-68, Shadinna Brithmana, 69, Chipśadogyannishad, ita relation to the Vinkad Armyaka, 70, 71, hterary and other data in the Chahadogrop, 71, 72, Kenopanuhad, 73, the smiller Brahmana of the Stdonu—Stdmardhdan, &c. 74, 75

(c) Sutras, 75-85

branta Sutras, the Kalpa Sútra of Masaka, 75-76, L4tydyana-Sútra, 76 ff., literature therein presupposed, 76, 77, position of non Brahmanical tribea in this work, 77 existence of Buddham presupposed, 78, Sútra of Drúbylyana, 79, its relation to the Sutras of the other

85-145

Vedss, 80 , Anopada Sútra, 80, 81 , Nidána-Sutra, 81, \$2 the Puzhoa-Sútra of Gobhila, \$2, Sama Tantra, Panchay dhi , Pratihara , Tandilakanana , and Upagrantha Sútras, 83, the Gribya-Sútra of Gobbila, 84 the Karma pradipa of Katyayana, 84, Paddha'is and Parifishtas, 85.

C—YAJURYEDA.

I .-- THE BLACK YAJUS, 85-103 (a) Samhuds 85-01

Difference between the Black and the White Yanua 86 . names of the Black Yaius, 86 ff. r Charaka, Tarturiva. and Khandikiva, 87, 88, schools of the Black Yarus Taittiriya Sambita (Apastamba), the Kathaka, and the Atreyi Sakha, 83 . Samhitas of the Apastamba and Atreys schools, and the Kathaka, 89, data contained therein, 90 . Yaka s connection with the arrangement of the Samhita of the Black Yajus, 91, the Manaya and

the Mastra, 91 (b) Erdhmenas, 93-99

The Brahmanas of the Apastamba and Atreys schools, the Kathaka portion of the Taitt Bahmana, 92, Taittiriya Aranyaka, ex. Up-Di-hade of the Taut. Ar. oz. Qs. schools of the Bhallavins, Satyayanina, Sakayanina, &c. 95. Svetásvetaropanishad, 96, Maitráyana-Upanishad, no modern date, 97, the plane's, &u., in the Mastr Up., 98 poss ble relation of the work to Buddhs, 99

(e) Sitras, 90-101

Srauta-Sutras, co-101, Gribya-Satras, 101, 102, Pratiélihya Sútra, 102, Anukramania, 103

II .- THE WRITE YATUS.

The name explained, 103 f , the name 'Vájasaneva, IQI f. . the two schools of the Kinyas and Midhyamdinas. 105, posable connection of the Middlyamdinas with the Madardord, 106.

(a) Sambitt, 107-116 Division of the Varangevi Sambita, 107, later origin of the last fifteen add of our 108, relation of the several parts of the Vár S to the Black Yajus 103, to its own Brilmana, and to each other, 109-110, probable date of the Pudra-book, 110, the mixed castes, 111. position of the Maradha, III. his position in the Atharva-Veda, 112, astronomical and o her data in the Váj S. 113, position of the Kurus and Pañchálas, the names Subhadri and Kimpila, 114, Arjuna and

103-145

Phalguna as (secret) names of Indra, 115, the richas incorporated in the Yajus, 115, 116, editions, commen taries, 116

#### (b) Brdhmana, 116-139

The Satapatha Brahmans, 116, its name and extent, 117. relation of the Brihmana of the Kanva school to that of the Madhyamdinas, 117, 118; relation of the several kindas to the Samhiti and to each other, 118, 119. posteriority of the last five kandas, 120 , Agrirahasyakánda, 120, 121, Azhtádbyávi kánda, 121, subjects of study named therein, 121, 122, other data, 122, 123, Asvamedha kanda, 124 ff , Gathas, 124, 125, position of Janamejaya, 125, of the Parikshitigas, 126; the Aranyaka-kanda, 126, the Vrihad Aranyaka - Madhukánda, 127, its name and list of teachers, 128, Yáinavalkiya Landa, 129 . Khila kanda, 130 , the concluding rands of the Satapatha Brahmana, 131 , probable north western onem of kindes ve-z of the Satar Br. 132 the whole blended together by one arranging hand, 133 . teachers mentioned in the Satap Br , 133, 134 . legends, 134 ff., relation of these to the Epic legends, 135, position of the Kuru Pafichilas compared with that of the Parikshitas, 136, the Pandavas not mentioned, 137, points of contact with the Samkhya tradition, 137, with Buddhist legend, 138, commentaries on the Satar Br . editions. &c . 139

#### (c) Sutras, 139-145

The Sranta-Sütra of Kátyáyana, teachers mentioned therain, 139, other data, 140, commentanes, 141, Franchista Migume Paradista, Pravará-dhydya, Charana vydha, the Vaiyadap Sütra, 142, the Kátya-Ghyha-Sütra of Rankara, 142, 143, the Práti-táthya-Sütra of the Vijasneyi Samh, 143, 144, Anu kramani, 144, 145

# D — ATHARVAVEDA, . . . . . . . 145-171

# (a) Samhiid, 145–150

Extent and division of Atherwards Sambité, 145, 146, 146, 146 at contents and arrangement, 146, it probably originated in park with the unbrimmanued Aryans of the West, 147, data furnished by the Ath. S., the name "Atharvan," 148, earliest mention of this name, 149, the name "Brahmaveds," its meaning, 140, 150, ed. turn, &c. of the Ath S., 150.

(b) Brdhmana

The Goratha Brahmana, 150-151

(.) Sutras, 151-157

The Saunakivá Chaturadhyéyeké, 151 . Anokramani, 152 . the Kausika-Sutra, 152, Kalpas and Parisishtas, 153

UPANISHADS, 153-171

Number of the Upanishads, 154, 155, Upanishads be longing to the three older Vedas, 155, 156, special divi mon of the Atharvopanishads into three groups Vedanta. Yoga, and Sectaman Upanishada, 156, Atharvan recension of Upanishada borrowed from the other Vedas, ICT THE ATHARVOPANISHADS PROPER (1) those of the Veddata class-the Mundakopanishad, 158, 150, Pras nopanishad, 159, 160, Garbhopanishad, 160. Brahmopa ni had, 160 161 . Márdákvepanishad, 161 . remaining Upanishads of the Venanta class Pranaznihotrop., Arshi Lop . 151, 162 (2) Atharvopanishads of the Yoga class Jabala, Kathaaruti, Arumka Bhal'avi, and others, 163 range of ideas and style in this class of Upanishads, 165, (3) the Sectarian Upani hade, 165 ff , (a) those in which worship of Viehnu (under the names Nárávana, &c ) is in culcated, 166. Neumhatapaniyopani had, 167. Ramata panivopanishad, 168, Gopálatápan'vopanishad, 169, (5) Upanishada of the Siva sects Satarudriya, Kaivalyo panishad, 169. Atharvasiras, 169, 170, remaining Upani hade of the Siva ee ts, 170 171

#### SECOND PEPIOD-SANSKRIT LITERATURE

VEEREIN DISTINGUISHED FROM FIRST PEPIOD,

. 175-183 Distinction in respect of language, 175, gradual development of Indo-Arvan Bidshd, 176, influence of Indian aborigines thereon, 177 , separation of written language from popular dialects-ancient dislectic differences, 178, rock inscriptions in popular dialects, 179, internal evidence for posteriority of second period, 180, critical condition of texts in this period-see of MSS . 181 . distinction as regards subject ma ter. 182 . classi fication of Sanskrit liferature, 181.

# A .- WORKS OF POETPY.

183-215

I Epic Poetry, 184-196.

(a) Ridden, 183-189 forerunners of Epic poetry in Vedic

percel, 183, the Makh Bhirtan, 184, exustence of a work resembling in first century Au, 186, 196, and of Mich Bhirtan, in relation to Satapatha Bribrana, &c., 186, text of Mahh Bhirtan, me spu constituents, 187, Karr translation, Jamuni Bhirtan, 189, (6) Purdans these codes and promenses of ritual elements absence of spus and promenses of ritual elements regular purification of properties, 199, 191, (6) Kd-1945, 191-195 the Rümdyan, 191, 11st allegencial character, 192, colemanton of Southern Inde, 1913, Rümdyan, the work of a single author, 193, different receasions of the text, 194; remaining Kayas, artificial Equ., 195

#### 2. DRAMATIC POETRY, 196-208

DRIMITE Grown, 190-200 Origin of Drama from danong, 196, Nata Sátras mentioned in Pfanun, 197, danoing at the great scarnical featurals, 195, alleged mention of dramas in oldest (f) Buddhatte writings, 199, age of surriving dramas, 200, no foundation for the river which places Edjaldan in the first century R.v., 201, 202, internal evidence from Kliddan's dramas themselves on this point, 203 authenticity of the Midavikgamairs, 204, age of Sudrakas Mychāhatķi, 205, subject-matter and special peculianties of the Hindu drama, 206, possibility of Greek influence on 1st development, 207.

3 Lyrical Postry, 208-210.

Religious lyric, 208, Erotic lyric Megba dúta, &c., 209, mystical character of some of these poems—the Gita govinds, 210

4 ETHICO DIDACTIC POZIET, 210-213
Niti-féstrus, 210, 'Beast Fable, 211, Paücha tantra, Hitopadeśa, 212, popular tales and romances, 213

5 HISTORY AND GEOGRAPHY, 213-215

Réja-tarangini, 213, inscriptions, grants, and coins, 215

. . 215-276

## I SCIENCE OF LANGUAGE, 216-232

(e) Grummer, 216-22; Menni's Grammar, its peculiar termunology, 216, P\u00e4mon i date-statements of the Chuses triveller Biman Tisang, 217, weakness of the evidence on which Doktlingka view rests, 218, cent ense of Makhbakaya in the time of Abhumayu, 219, acquantance with Greeks preupposed in P\u00e4mun, 220, "Yarxadi' 221, commentages or Enum-Puthbakas. Vártitus, Mahdhádys, 222, date of Kátyfsun, 222, of the Máthhádys, 223, eritael condition of the man of the Máthhádys, 223, eritael condition of the condition of the condition of the Mathhádys, 225, eVIL encopyrely, 237, other gram matical systems, 226, 69 Letcopyrely, 237, other gram in the first entire yas, 228, internal syndamous gram thus rows, 229, ago of the work still uncertain, 239, Dhitu yithus, 230 (6) Mitrae, Petrice, Richtors, 232, 232 (Chandich folten of Pitgils, Almhára-dóstra of Biarrat, Sálhyard-dryans, 231

#### 2 PRILOSOPHY, 232-246

High satiquity of Philosophical speculation among the Hindén, 232. Development, 'Arrangement, 'Creatura' theories of the world, 233, gradual growth of these theories into philosophical systems, 234, the Sighthya system, 235, 236, the Yogo-system, 237, Dan 5 sects, 238, influence of Sighthya Yogo on Avelopment of Goosteam and Sidem, 239, the two Minchasta, 239, Karen Minchast Satra of Januna, 240, Parham Minchast Satra of Edirifyspa, 242, 850 of Eddardyana, 243, the two logical systems, Nydya and Vanfashka, 244, Heterokov systems, 246

## 3 ASTRONOMY A"D AUXILIARY SCIENCES, 246-264.

Antiquity of a tronomy, 246, solar year, quirquennial eyels. Yugas, 247, the lunar asterisms 247, mention of these in R.k Samhita, 248 . Jvoticha, 249, the planets, 240 their peculiar Indian names and number, 250 importance of Greek influence here, 257, relations of Greeks with India, 241 , the Yayanas, teachers of the ancient Indiana tronomers, 252, 'Ptolemaios, 'Asura Maya, 243 . Romaka Siddhanta, Paulisa Siddlanta, 253, Greek terms in Variba Mihira, 254, 253, further development of Indian astronomy Hundas the teachers of the Arabs, 255 (also in algebra and arithmetic,—the erithmetical figures, 256), and through the Arabs, of Euro pean mediaval as ronomers, 257, Aryabhata, 257, the five S ddhintas, 218. Brahmagupta, Varaba Mihira, 259 , date of Varaba habirs, Satananda, and Bhaskara, 260, 261, Albiruni s statements regarding Bháskara (1), 252 Later period Arabs in turn the teachers of the Hindús in astrology, 267, Arabic technical terms in Indian and European astrological works, 263 264, Iore of omens and portents, 254, magne, &c , 264.

4. Medica. Science, 265-271

Its earliest representatives, 265, Charaka, Safruta, Dhan vanitra, 265, Shihotra, Vdinyayan, 267, uccertain date of estant medical works, 268, Hindd medicine apparently an independent development, 269, questionable authenticity of existing texts, 269, importance of Indian medicine, 269, its influence on Arabi, 270

5. And of War, Music, Formative and Techn cal Arto, 271-276

Art of war (Dhanur veda) · Viársémitta, Bharadvá,a, 271, ma is (Cladharra veda), 271 (musical notation, 272), Artha Marta, 273 painting and sculprure, 273, archi tecture, 274, technical arts, 275

C -- WOPES ON LAW, CUSTOM, AND RELIGIOUS WOP SHIP. 276-231

#### P -BUDDHISTIC SANSKRIT LITERATURE,

# HISTORY OF INDIAN LITERATURE

At the very outset of these lectures I find myself in a certain degree of perplexity, being rather at a loss how best to entitle them. I cannot say that they are to treat of the history of "Indian Literature," for then I should have to consider the whole body of Indian languages, including those of non-Aryan origin. Nor can I say that their subject is the history of "Indo-Aryan Literature," for then I should have to discuss the modern languages of India also, which form a third period in the development of Indo-Aryan speech. Nor, lastly, can I say that they are to present a history of "Sanskrit Literature," for the Indo-Aryan language is not in its first period "Sanskrit," ie, the language of the educated, but is still a popular dialect, while in its second period the people spoke not Sanskrit, but Prakritic dialects, which arose simultaneously with Sanskrit out of the ancient Indo-Arvan vernacular In order, however, to reheve you from any doubt as to what you have to expect from me here. I may at once remark that it is only the literature of the first and second periods of the Indo-Aryan language with which we have to do For the sake of brevity I retain the name "Indian Literature"

I shall frequently in the course of these lectures be forced to draw upon your forbearance. The subject they discuss may be compared to a yet incultivated tract of

country, of which only a few spots have here and there been cleared, while the greater part of it remains covered with dense forest, impenetrable to the eye, and obstructing the prospect A clearance is indeed now by degrees being made, but slowly, more especially because in addition to the natural obstacles which impede investigation, there still prevails a dense must of prejudice and preconceived opinions hovering over the land, and enfolding it as with a veil.

The Interature of India passes generally for the most ancient literature of which we possess written records, and justly so 1 But the reasons which have hitherto been thought sufficient to establish this fact are not the correct ones, and it is indeed a matter for wonder that people should have been so long contented with them In the first place, Indian tradition itself has been adduced in support of this fact, and for a very long time this was considered sufficient It is, I think, needless for me to waste words upon the futile nature of such evidence. In the next place, astronomical data have been appealed to, according to which the Vedas would date from about 1400 BC But these data are given in writings, which are evidently of very modern origin, and they might consequently be the result of calculations 2 instituted for the express purpose Fur-

In so far as this claim may not now be disputed by the Egyptian monumental records and papyrus rolls or even by the As yrian litera ture which has but recently been

brought to hight.

Besides, these calculations are of a very vague character and do not yield any such definite date as that given above, but only some epoch lying between 1820-360 R.C., see 11 St. x 236 Whitney in Journ R. A S. 1 317, ff. (1864) True the circumstance that the oldest records begin the series of nakshatras with the sign Krittika, carries us back to a considerably earlier period even than there dates, derived from the so-called Veduc Calendar, vis., to a period between 2780-1820 B C since the vernal equipox coincided with a Tauri (Krittika), in round numbers, about the year 2300 BC . ses / 81 , x 234 2,6 But, on the

other hand, the opinion expressed in the first edition of this work (1852) to the effect that the Indians may either have brought the knowledge of these lunar managons headed by Krittald. with them into India, or else have obtained it at a later period th ough the commercial relations of the Phon nicians with the Panjab, has recently gained considerably in probability, and therewith the suggestion of Babylon as the mother country of the observations on which this date is established. See the second of my two treatises, Die veducken Nachrichien ron den Nakshaira (Berlin, 1862) pp 4 362-400, my paper, Ueber den Veda-kalender Namens Jyotuha (1862), p 15 / St , x 429 1x 241 ff Whit ney Oriental and Linquistic Studies (1874) 11. 418 - Indeed a direct refarence to Babylon and its sea trade. in which the exportation of peacocks m mentioned, has lately come to light

ther, one of the Buddhust eras has been relied upon, according to which a reformer is supposed to have arisen in the sixth century BC, in opposition to the Brahmuncal hierarchy, but the authenticity of this particular era is still extremely questionable. Lastly, the period when Panini, the first systematic grammarian, flourished, has been referred to the fourth century BC, and from this, as a starting-point, conclusions as to the period of literary development which preceded him have been deduced. But the arguments in favour of Panini's having lived at that time are allogether weak and hypothetical, and in no case can they furnish us with any sort of solid basis

The reasons, however, by which we are fully justified in regarding the literature of India as the most ancient lite rature of which written records on an extensive scale have

been handed down to us, are these -

In the more ancient parts of the Rigveda-Samhita, we find the Indian race settled on the north-western borders of India, in the Panjab, and even beyond the Panjab, on the Kubha, or  $K\omega\phi^i p_i$ , in Kabul.<sup>4</sup> The gradual spread of

in an Indian text, the Biverupitaka, see Minayeff in the Mclanges Asiationes (Imperial Pussian Academy). TL 577 ff (1871), and Monatsberrehte of the Berlin Academy p 622 (1871) As, however, this testimony belongs to a comparatively late period, no great importance can be attached to it -Direct evidence of ancient com mercial relations between India and the West hat recently been found in hierogly phic texts of the seventeenth century at which time the Arvas would appear to have been already settled on the Indus. For the word kapi, 'ape which occurs in I Kings x 22, in the form gof, Gr sigros is found in these Egyptian texts in the form kafu see Joh. Dumichen, Die Plotte einer egypt Königin aus dem 17 Jahrh (Leipzig, 1868) table ii p 17 Lastly, tokhim the Hebrew name for peacocks (1 Kings x. 22, 2 Chron. 1x. 21) necessarily implies that all ready in Solomon's time the Phoni cian ophir merchants "ont ou affaire sort au pays même des Abbira sort sur un autre point de la côte de

Inde avec des peuplades dravide ennes," Julien Vinson, Reeue de Linguistique, vi 120 ff (1873) See also Burnell, Elements of South Indian Palacography, p 5 (Mangalore 1874)

Or even, as Goldstucker sup

poses, earlier than Buddha. 4 One of the Vedic Rishis, asserted to be Vatsa, of the family of Kanya, extols, Rik, vin 6. 46-48, the splen did presents, consisting of horses cattle, and ushiras yoked four toge ther-(Roth in the St. Petersburg Dict explains ushfra as 'buffilo, humped bull generally it means 'camel')—which, to the glory of the Yadvas, he received whilst residing with Tirimdira and Parsu. Or have we here only a single person, Tirim dua Parsu i In the Saukhiyana Srauta Sutre, xvi. II 20, at least, he is understood as Turindira Para savys. These names suggest liridates and the Permans, see I St , 1v 379 n but compare Girard de Rislle, Rerue de Linguist, 17 227 (1872) course, we must not think of the

the race from these seats towards the east, beyond the Sarasyati and over Hindustan as far as the Ganges can be traced in the later portions of the Vedic writings almost step by step The writings of the following period, that of the epic, consist of accounts of the internal conflicts among the conquerors of Hindustan themselves as, for instance, the Maha-Bharata, or of the farther spread of Brahmanism towards the south, as, for instance, the Ramayana. If we connect with this the first fairly accurate information about India which we have from a Greek source, viz., from Megasthenes,\* it becomes clear that at the time of this writer the Brahmanising of Hindustan was already completed, while at the time of the Peuplus (see Lassen, I AK, n. 150, n., I St, n. 192) the very southernmost point of the Dekhan had already become a seat of the worship of the wife of Siva. What a series of years. of centuries, must necessarily have elapsed before this boundless tract of country, inhabited by wild and vigorous tribes, could have been brought over to Brahmanism! It may perhaps here be objected that the races and tribes found by Alexander on the banks of the Indus appear to stand entirely on a Vedic, and not on a Brahmanical footing As a matter of fact this is true, but we should not be justified in drawing from this any conclusion whatever with regard to India itself For these peoples of the Panlab never submitted to the Brahmanical order of things. but always retained their ancient Vedic standpoint, free and independent, without either priestly domination or system of caste. For this reason, too, they were the objects of a cordial hatred on the part of their kinsmen, who had wandered farther on, and on this account also Buddhsm gained an easy entrance among them.

Persians after Cyrus that would bring us too far down. But the Persians were so called and had their own princes even before the time of Cyrus. Or ought we rather, as sugfected by Olshausen in the Berliner Montatheriche (1874), p. 708, to think of the Parthissas, s.e., Parthinae who as well as Párdsa are mentioned in the time of the Achieme mds ? The derivation, hitherto mds ? The derivation, hitherto current, of the word Tirim Tiridates, &c., from the Pahlavi tir=Zend tistrya (given eg, by M Brésl, De Persicis nominibus (1863), pp 9 10), is hardly justified

• Who as ambassador of Seleucus resided for some time at the court of Chandragupta. His reports are preserved to us chiefly in the Liked of Arrian, who lived in the second century AD.

And while the claims of the written records of Indian literature to a high antiquity—its beginnings may per-haps be traced back even to the time when the Indo Aryans still dwelt together with the Persa-Aryans-are thus indisputably proved by external, geographical tests mony, the internal evidence in the same direction which may be gathered from their contents, is no less conclusive In the songs of the Rik, the robust spirit of the people gives expression to the feeling of its relation to nature with a spontaneous freshiness and simplicity, the powers of nature are worshipped as superior beings, and their kindly aid besought within their several spheres Beginning with this nature-worship, which everywhere recognises only the individual phenomena of nature, and these in the first instance as superhuman, we trace in Indian literature the progress of the Hindu people through almost all the phases of religious development through which the human mind generally has passed. The individual pheno mena of nature, which at first impress the imagination as being superhuman, are gradually classified within their different spheres, and a certain unity is discovered among them. Thus we arrive at a number of divine beings, each exercising supreme sway within its particular province whose influence is in course of time further extended to the corresponding events of human life, while at the same time they are endowed with human attributes and organs The number-already considerable-of these natural deties, these regents of the powers of nature, is further increased by the addition of abstractions, taken from ethical relations, and to these as to the other deities divine powers, personal existence, and activity are ascribed. Into this multitude of divine figures, the spirit of inquiry seeks at a later stage to introduce order, by classifying and co-ordinating them according to their principal bearings The principle followed in this distribution is, like the con ception of the deities themselves, entirely borrowed from the contemplation of nature We have the gods who act in the heavens, in the air, upon the earth, and of these the sun, the wind, and fire are recognised as the main repre-sentatives and rulers respectively. These three gradually obtain precedence over all the other gods, who are only looked upon as their creatures and servants Strength

ened by these classifications, speculation presses on and seeks to establish the relative position of these three desties, and to arrive at unity for the supreme Being This is accomplished either speculatively, by actually assuming such a supreme and purely absolute Being, viz, "Brahman" (neut), to whom these three in their turn stand in the relation of creatures, of servants only, or arbitrarily, according as one or other of the three is worshipped as the supreme god The sun-god seems in the first instance to have been promoted to this honour, the Persa-Aryans at all events retained this standpoint, of course extending it still further, and in the older parts of the Brahmanas also-to which rather than to the Samhitás the Avesta is related in respect of age and contents-we find the sun-god here and there exalted far above the other destres (prasaritá devánám) We also find ample traces of this in the forms of worship, which so often preserve relics of antiquity 5 Nay, as "Brahman" (masc), he has in theory retained this position, down even to the latest times, although in a very colourless manner His colleagues, the air and fire gods, in consequence of their much more direct and sensible influence, by degrees obtained complete possession of the supreme power, though constantly in conflict with each other Their worship has passed through a long series of different phases, and it is evidently the same which Megasthenes found in Hindustan, and which at the time of the Periplus had penetrated, though in a form already very corrupt, as far as the southernmost point of the Dekhan

But while we are thus justified in assuming a high antiquity for Indian literature, on external geographical grounds, as well as on internal evidence, connected with the history of the Hindú religion, the case is sufficiently unsatisfactory, when we come to look for definite chrono-

<sup>5</sup> Cf my paper. Zues redische Texte über Omina und Porienta (1859), pp

<sup>392-393</sup> To these, thirdly, we have to add evidence derived from the lan guage The edicts of Psyadasa, whose date is fixed by the mention therein of Greek kings, and even of Alexander himself, are written in shift (Indre, Vishnu) in the plain.

popular dialects, for whose gradual development out of the language of the Vedic hymns into this form it is absolutely neces.ary to postulate the

lapae of a series of centuries \* According to Strabo, p 117, According to Strabo, p 117, worshipped in the mountains, Hon-

logical dates We must reconcile ourselves to the fact that any such search will, as a general rule, be absolutely finities. It is only in the case of those branches of therature which also became known abroad, and also in regard to the last few centuries, when either the dates of manuscripts, or the data given in the introductions of closing observations of the works themselves, furnish us some guidance, that we can expect any result. Apart from this, an internal chronology based on the character of the works themselves, and on the quotations, &c, therein contained, is the only one possible.

Indian literature divides itself into two great periods, the Vedic and the Sauskrit Turning now to the former, or Vedic period, I proceed to give a preliminary general outline of it before entering into the details

## FIRST PERIOD

## VEDIC LITERATURE

We have to distinguish four Vedas-the Rig-Veda, the Sama-Veda, the Yajur-Veda, which is in a double form, and the Atharva-Veda. Each of these is again subdivided into three distinct parts-Samhita, Bráhmana, and Sútra

Their relation to each other is as follows -

The Samhitá \* of the Rik is purely a lyrical collection, comprising the store of song which the Hindus brought with them from their ancient homes on the banks of the Indus, and which they had there used for "invoking prosperity on themselves and their flocks, in their adoration of the dawn in celebration of the struggle between the god who wields the lightning and the power of darkness, and in rendering thanks to the heavenly beings for pre-servation in battle"† The songs are here classified according to the families of poets to which they are ascribed. The principle of classification is consequently, so to speak, a purely scientific one. It is therefore possible. though more cannot be said, that the redaction of the text may be of later date than that of the two Samhitas which

endyd, enddhydya, adhyayana, sleo 'Veda alone It is in the Sútres that we first find the term Chhandas specially applied to the Samhitas, and more particularly in Panini, by whom Rishi, Nigama, Mantra (1) are also employed in the same

<sup>\*</sup> The name Sambita (collection) first occurs in the so-called Aran yakas, or latest supplements to the Brahmanas, and in the Sutras, but whether in the above meaning, is not as yet certain. The names by which the Sambitis are designated in the Brahmanas are-e ther richal. similar, yajuneta,—or Rigveda, Sá + Seo Roth, Zur Litteratur und mareda, Yajurreda,—or Pahrtiches, Gardechie des Wale, p 8 (Stutt-Chhandogas, Adhraryus,-or trayi gart, 1846) -

will come next under our consideration, and which, providing as they do for a practical want, became necessary immediately upon the institution of a worship with a fixed ritual For the Samhita of the Saman, and both the Samhitas of the Yajus, consist only of such richas (verses) and sacrificial formulas as had to be recited at the ceremonies of the Soma offering and other sacrifices, and in the same order in which they were practically used, at least, we know for certain, that this is the case in the Yajus The Samhitá of the Saman contains nothing but verses (richas), those of the Yajus, sentences in prose The former, the richas, all recur, with a few exceptions, in the Rik-Samhita, so that the Sama-Samhita is nothing more than an extract from the songs of the latter, of the verses applied to the Soma offering Now the richas found in the Sama-Samhita and Yajuh-Samhita appear in part in a very altered form, deviating considerably from the text of the Rik, the Rik-Samhita this a triple explanation is possible. First, these readings may be earlier and more original than those of the Rik, liturgical use having protected them from alteration. while the simple song, not being immediately connected with the sacred rite, was less scrupulously preserved. Or, secondly, they may be later than those of the Rik, and may have arisen from the necessity of precisely adapting the text to the meaning attributed to the verse in its application to the ceremony Or, lastly, they may be of equal authority with those of the Rik, the discrepancies being merely occasioned by the variety of districts and families in which they were used, the text being most authentic in the district and family in which it originated, and less so in those to which it subsequently passed All three methods of explanation are alike correct, and in each particular case they must all be kept in view if we look more closely at the relation of these verses, it may be stated thus. The richas occurring in the Sama-Samhita generally stamp themselves as older and more original by the greater antiquity of their grammatical forms, those in the two Samhitas of the Yajus, on the contrary, generally give the impression of baving undergone a secondary alteration Instances which come under the third method of explanation are found in equal

numbers, both in the Sama-Sambita and the Yajub-Sambita Altegether, too much stress cannot be laid on this point, namely, that the alterations which the songs and hymns underwent in the popular mouth during their oral transmission, must in any case be regarded as very considerable, since preservation by means of writing is not to be thought of for this period. Indeed we can hardly admit it for the time of the Brahmanas either, otherwise it would be difficult to account for the numerous deviations of the various schools with regard to the text of these works also, as well as for the great number of different schools (Sákhás) generally

But although the songs of the Rik, or the majority of them, were composed on the banks of the Indus, their final compilation and arrangement can only have taken place in India proper, at what time, however, it is difficult to say Some portions come down to an age so recent, that the system of caste had already been organised, and tradition itself, in ascribing to Sakalya and Panchála Babhravya a leading part in the arrangement of the Rik-Samhitá, points us to the flourishing epoch of the Videhas and Panchalas, as I shall show hereafter The Samhita of the Saman, being entirely borrowed from the Rik, gives no clue to the period of its origin, only, in the fact that it contains no extracts from any of the later portions of the Rik, ve have perhaps an indication that these were not then in existence This, however, is a point not yet investigated. As for the two Samhitas of the Yajus we have in the prose portions peculiar to them, most distinct proofs that both originated in the eastern parts of Hindustan," in the country of the Kurupanchalas, and that they belong to a period when the Brahmanical element had already gained the supremacy, although it had still to encounter many a hard struggle, and when at all events the hierarchy of the Brahmans, and the system of caste, were completely organised Nay, it may be that we have even external grounds for supposing that the present redaction of the Samhita of the White Yajus dates from the third century BC For Megasthenes mentions a people called Madiavolvol, and this name recurs in the Ma-

Or rather to the east of the Indus, in Handustin.

dhyamdinas, the principal school of the White Yajus More of this later on

The origin of the Atharva-Sambita dates also from the period when Brahmanism had become dominant. It is in other respects perfectly analogous to the Rik-Samhita and contains the store of song of this Brahmanical epoch Many of these songs are to be found also in the last, that is, the least ancient book of the Rik-Samhita. In the latter they are the latest additions made at the time of its compilation, in the Atharvan they are the proper and natural utterance of the present. The spirit of the two collections is indeed entirely different. In the Rik there breathes a lively natural feeling a warm love for nature, while in the Atharvan there prevails, on the contrary, only an anxious dread of her evil spirits, and their magical In the Rik we find the people in a state of free activity and independence, in the Atharvan we see it bound in the fetters of the hierarchy and of superstition But the Atharva-Samhita likewise contains pieces of great antiquity, which may perhaps have belonged more to the people proper, to its lower grades, whereas the songs of the Rik appear rather to have been the especial property of the higher families \* It was not without a long struggle that the songs of the Atharyan were permitted to take their place as a fourth Veda. There is no mention made of them in the more ancient portions of the Brahmanas of the Rik, Saman, and Yajus, indeed they only originated simultaneously with these Brahmanas, and are therefore only alluded to in their later portions

We now come to the second part of Vedic literature.

the Brahmanas

The character of the Brahmanas + may be thus gene-

<sup>.</sup> This surmise, based upon cer ta n passages in the Atharran, would certainly be at variance with the name 'Ataarrangurosas, horne by the Sanhata, according to which would belong on the contrary to the most ancient and noble Brah man families But I have elsewhere advanced the conjecture, that this name was samply assumed in order to impart a greater exactity to the sontents, see I St., 1 295 [Zues Yajus, and especially in its thir

vedische Texte über Omina und Por tenta pp 346-348 ]

<sup>+</sup> This term signifies that which relates to prayer, brahman Brah manuteell means drawing forth, as well in a physical sense 'producing 'creating, as in a spiritual one 'lift-

ing ' The first mention of the name Brahmana, in the above sense, is Lat at le Brahmana of the White

rally defined Their object is to connect the sacrificial songs and formulas with the sacrificial rite, by pointing out, on the one hand, their direct mutual relation, and, on the other, their symbolical connection with each other In setting forth the former, they give the particular ritual in its details in illustrating the latter, they are either directly explanatory and analytic, dividing each formula into its constituent parts, or else they establish that con-nection degmatically by the aid of tradition or speculation We thus find in them the oldest rituals we have. the oldest linguistic explanations, the oldest traditional narratives, and the oldest philosophical speculations This peculiar character is common generally to all works of this class, yet they differ widely in details, according to their individual tendency, and according as they belong to this or that particular Veda. With respect to age they all date from the period of the transition from Vedic civilisation and culture to the Brahmanic mode of thought and social order Nay, they help to bring about this very transition, and some of them belong rather to the time of its commencement, others rather to that of its termination.\* The Brahmanas originated from the opinions of individual sages, imparted by oral tradition, and preserved as well as supplemented in their families and by their disciples The more numerous these separate traditions became, the more urgent became the necessity for bringing them into harmony with each other To this end, as time went on, compilations, comprising a variety of these materials, and in which the different opinions on each subject were uniformly traced to their original represen-

tenth book. In cases where the degentical explanation of a cere monal or other precept has already been given, we there find the expression of the cere with the set Bridwann has already been stated, "whereas in the books pre-cating the threadth, we find in such cases targeto to braidwalf it ten mettin has already been set further than the stated been set further than the state stated been set further than the state states are stated to the state state and the state states are stated to the state stated to the states are stated to the state stated to the state stated to the state stated to the sta

commentary, in the same sense, they also mention Anubrahmana, a term which does not occur elsewhere except in Panini.

P. Minni, w 3 105, directly mentions of older (puringerolds) Brian images, and in controllatantion to these there must, of course have been in existence in his day 'more modern (or as the scholast says, the golden produced produ

tatives, were made in different districts by individuals peculiarly qualified for the task. But whether these compilations or digests were now actually written down, or were still transmitted orally only, remains uncertain The latter supposition would seem probable from the fact that of the same work we here and there find two texts entirely differing in their details. Nothing definite, howmay possibly have been some fundamental difference in the original, or even a fresh treatment of the materials It was, moreover, but natural that these compilers should frequently come into collision and conflict with each Hence we have now and then to remark the exhibition of strong animosity against those who in the author's opinion are heterodox. The preponderant in-fluence gradually gained by some of these works over the rest—whether by reason of their intrinsic value, or of the fact that their author appealed more to the hierarchical spirit\*—has resulted, unfortunately for us, in the preservation of these only, while works representative of the disputed opinions have for the most part disappeared Here and there perhaps in India some fragments may still be found, in general, however, here as everywhere in Indian literature, we encounter the lamentable fact that the works which, in the end, came off victorious, have almost entirely supplanted and effaced their predecessors After all, a comparatively large number of Brahmanas is still extant-a circumstance which is evidently owing to their being each annexed to a particular Veda, as well as to the fact that a sort of petty jealousy had always prevailed among the families in which the study of the different Vedas was hereditarily transmitted Thus in the case of each Veda, such works at least as had come to be considered of the highest authority have been preserved, although the practical significance of the Brahmanas was

writing in India, it is important to point out that the want of suitable materials, in the North at least, be fore the introduction of paper, must have been a great obstacle to its general use—Burnell, Elements of Sunth leader Polycopysty, p. to 1

<sup>\*</sup> The difficulty of their preservation is also an important factor in the case, as at that time writing either did not exit at all, or at any fatte was but seldom employed ["In considering the question of the age and extent or be use of

gradually more and more lost, and passed over to the Saitras, &c To the number of the Brahmanas, or recensions of the Samhitas, which were thus lost, belong those of the Vsshkalas, Pangins, Bhallavins, Sätrayanins, Kalabavins, Lamkasyanins, Samburs, Khadayanins, and Salankáyanins, which we find quoted on various occasions in writings of this class, besides all the Chhandas works (Samhitas) specified in the gama 'Sainaka' (Pan, 1v 3 106), whose names are not so much as mentioned elsewhere

The difference between the Brahmanas of the several Vedas as to subject-matter is essentially this. The Brah manas of the Rik, in their exposition of the ritual, generally specify those duties only which fell to the Hotar, or reciter of the richas, whose office it was to collect from the various hymns the verses suited to each particular occasion, as its sastra (canon) The Brahmanas of the Saman confine themselves to the duties of the Udgatar, or singer of the camans, the Brahmanas of the Yajus, to the duties of the Adhyaryu, or actual performer of the sacrifice In the Brahmanas of the Rik, the order of the sacrificial performance is on the whole preserved, whereas the sequence of the hymns as they occur in the Rik-Sambita is not attended to at all. But in the Brahmanas of the Saman and Yaius, we find a difference corresponding to the fact that their Samhitas are already adapted to the proper order of the ritual. The Brahmana of the San enters but seldom into the explanation of individual verses, the Brahmana of the White Yajus, on the contrary, may be almost considered as a running degmatic commentary on its Samhita, to the order of which it adheres so strictly, that m the case of its omitting one or more verses, we might perhaps be justified in concluding that they did not then form part of the Samhita. A supplement also has been added to this Brahmana for some of those books of the Samhita which were incorporated with it at a period subsequent to its original compilation, so that the Brahmana comprises 100 adhydyas instead of 60, as formerly seems to have been the case The Brahmana of the Black Yajus does not, as we shall see further on, differ in its contents, but only in point of time, from its Samhita. It is, in fact, a supplement to it. The Brahmana of the Atharvan is up to the present time unknown though there are manuscripts of it in England.

The common name for the Brahmana hterature is Srut, bearing, i.e., that which is subject of hearing, subject of perposition, of teaching, by which name their learned, and consequently exclusive, character is sufficiently intimated. In accordance with this we find in the works themselves frequent warnings against intrusting the knowledge contained in them to any profine person. The name Sruti is not indeed mentioned in them, but only in the Sútras, though it is perfectly justified by the corresponding use of the verb Ser which occurs in them frequently.

The third stage in Vedic literature is represented by the Sútras\* These are, upon the whole, essentially founded

\* It has since been published, see below. It presents no sort of direct internal relation to the Ath. Samhita.

\* The word Satra in the above sense occurs first in the Madhukánds. one of the latest supplements to the Brahmana of the White Yaius, next in the two Grihya Sútras of the Rik, and finally in Panine. It means 'thread,' band,' of Lat, sucre Would it be correct to regard it as an expression analogous to the German band (volume) ! If so, the term would have to be understood of the fastening together of the leaves and would necessarily presuppose the existence of writing (in the same way, perhaps as grantha does, a term first occurring in Panini !) Inquiry into the origin of Indian writing has not, unfortunately, led to much result as yet. The oldest inscriptions, according to Wilson, date no earlier than the third century BO Nearchus however, as is well known, m-utions writing, and his time corresponds very well upon the whole to the period to which we must refer the origin of the Sútras. But as these were composed chiefly with a view to their being committed to memory-a fact which follows from their form, and partly accounts for it—there might be good grounds

for taking exception to the ctymology just proposed, and for regard ang the signification 'guiding line, 'clue' as the original one [This is the meaning given in the St Petersburg Dictionary - The writing of the Indians is of Semitic origin , see Benfey Indien (in Ersch and Gruber's Encyclopædia 1840), p 254 my Indische Slizzen (1856), p 127 ff. Burnell, Elem. of South Indian Pal, p 3 ff Probably it served in the first instance merely for secular purposes, and was only applied subsequently to literature See Muller Ane S Lat, p 507, I St, v 20 ff, I Str, n. 339 Goldstucker (Panini, 1860 p. 26, ff.) contends that the words stitre and erantha must absolutely be connected with writing See, however ! St , v 24, ff. , xiii 476 ]- Nor does etymology lead us to a more certain result in the case of another word found in this connection, viz., akshara, syllable This word does not seem to occur in this sense in the Samhiti of the Rik (or Saman), at there rather signifies impershable. The connecting link between this primary signification and the meaning syllable which is first met with in the Sambita of the Yajus, might perhaps be the idea of writing, the latter being the making

ımperishable, as it were, çi otherwi 🕫

on the Brahmanas, and must be considered as their necessary supplement, as a further advance in the path struck out by the latter in the direction of more rigid system and formalism 9 While the Brahmanas, with the view of explaining the sacrifice and supporting it by authority, &c, uniformly confine themselves to individual instances of 11tual, interpretation, tradition, and speculation, subjecting these to copious dogmatic treatment, the object of the Sútras is to comprehend everything that had any reference whatever to these subjects The mass of matter became too great, there was risk of the tenor of the whole being lost in the details, and it gradually became impossible to discuss all the different particulars consecutively Diffuse discussion of the details had to be replaced by concise collective summaries of them. The utmost brevity was, however, requisite in condensing this great mass, in order to avoid overburdening the memory, and this brevity ultimately led to a remarkably compressed and enigmatical style, which was more and more cultivated as the literature of the Sutras became more independent, and in proportion as the resulting advantages became apparent. Thus the more ancient a Sútra, the more intelligible it is, the more enignistical it is, the more modern will it prove \*

But the literature of the Sutras can by no means be said to rest entirely upon the Fridmanas, for these, as rule, give too exclusive a prominence to the ritual of the sacrifice Indeed, it is only one particular division of the Sutras—viz, the Kalpa-Sutras, aphorisms exclusively devoted to the consideration of this ritual 12—which bears

Beeing and eraserem words and subbles (I) Or is the notion of the imperiabile Myrs at the root of this significance of this significance of the Service of the significance of the Service of the Service

vin 76 77, ix 353, 354.

Precisely as in the case of the Brithmanas, so also in the case of the Kalpas, i.e., Kalpa Sutras Pénin, iv 3 105, distinguishes those composed by the ancients from those that are nearer to his own time

On the mutual relations of the Brahmapasand Sútras see also I St.

the spec al name of Śrau'a-Sutras, a.e., "Sútras founded on the Sruct." The sources of the other Sútras must be

sought elsev here

Side by side with the Sranta-Sútras we are met by a second family of ritual Sútras, the so-called Grihya-Sutras, which treat of domestic ceremonies, those celebrated at birth and before it, at marriage, as well as at death and after it. The origin of these works in sufficiently indi-cated by their title, since, in addition to the name of Grihya-Sútras, they also bear that of Smarta-Sútras, 14, "Sutras founded on the Sririti" Smriti, 'memory,' 10, that which is the subject of memory, can evidently only be distinguished from Sruti, 'hearing,' ie, that which is the subject of bearing, in so far as the former impresses itself on the memory directly, without special instruction and provision for the purpose It belongs to all, it is the property of the whole people, it is supported by the consciousness of all, and does not therefore need to be specially inculcated Custom and law are common property and accessible to all, ritual, on the contrary, though in like manner arising originally from the common consciousne.s. is developed in its details by the speculations and suggestions of individuals and remains so far the property of the few, who, favoured by external curcumstances, unders'and how to inspire the people with a die awe of the importance and sanctity of their institutions. It is not, however, to be assumed from this that Smriti, custom and law, did not also undergo considerable alterations in the course of time The mass of the immigrants had a great deal too much on their hands in the subjugation of the aborigmes to be in a position to occupy themselves with other matters Their whole energies had, in the first instance, to be concentrated upon the necessity of holding their own against the enemy When this had been effected, and resistance was broken down, they awoke suddenly to find themselves bound and shackled in the hands of other and far more powerful enemies, or rather, they did not awake at all, their physical powers had been so long and so exclusively exercised and expended to the detriment of their intellectual energy, that the latter had gradually dwindled away altogether The history of these new enemies was this The knowledge of the ancient songs

with which, in their ancient homes, the Indians had worshipped the powers of nature, and the knowledge of the ritual connected with these songs, became more and more the exclusive property of those whose ancestors perhaps composed them, and in whose families this knowledge had been hereditary. These same families remained in the possession of the traditions connected with them, and which were necessary to their explanation. To strangers an a foreign country, anything brought with them from home becomes invested with a halo of sacredness, and thus it came about that these families of singers became families of priests, whose influence was more and more consolidated in proportion as the distance between the people and their former home increased, and the more their ancient institutions were banished from their minds by external struggles The guardians of the ancestral customs, of the primitive forms of worship, took an increasingly prominent position, became the representatives of these, and, finally, the representatives of the Divine itself For so ably had they used their opportunities, that . they succeeded in founding a hierarchy the like of which the world has never seen To this position it would have been scarcely possible for them to attain but for the enervating climate of Hindustan, and the mode of life induced by it, which exercised a deteriorating influence upon a race unaccustomed to it. The families also of the petty kings who had formerly reigned over individual tribes held a more prominent position in the larger kingdoms which were of necessity founded in Hindustan, and thus arose the military caste. Lastly, the people proper, the Visas, or settlers, united to form a third caste, and they in their turn naturally reserved to themselves prerogatives over the fourth caste, or Sudras This last was composed of various mixed elements, partly, perhaps, of an Aryan race which had settled earlier in India, partly of the aborigines themselves, and partly again of those among the immigrants, or their Western kinsmen, who refused adherence to the new Brahmanical order. The royal

<sup>\*</sup> Who were distinguished by their colour, for casts. [See I SL, x 4 very colour from the three other 10 ] easies, hence the name warms, i.e.

families, the warnors, who, it may be supposed, strenuously supported the priesthood so long as it was a question of robbing the people of their rights now that this
was effected turned against their former illies, and sought
to throw off the yoke that was likewise laid upon them.
These efforts were, however, unavailing, the colossus was
too firmly established Obscure legends and isolated
ellusions are the only records left to us in the later
writings, of the sacrilegious hands which ventured to attack the sacred and divinely consecrated majesty of the
Brahmans, and these are careful to note, at the same
time, the terruble punishments which befell those improus
offenders. The fame of many a Barbarossa has here
passed away and been forgotten!

The Smarta-Sútras, which led to this digression, generally exhibit the complete standpoint of Brahmanism Whether in the form of actual records or of compositions orally transmitted, they in any case date from a period when more than men cared to lose of the Smriti-that precious tradition passed on from generation to generation-was in danger of perishing Though, as we have just seen, it had undergone considerable modifications, even in the families who guarded it, through the influence of the Brahmans, yet this influence was chiefly exercised with reference to its political bearings, leaving domestic manners and customs 11 untouched in their ancient form, so that these works cover a rich treasure of ideas and conceptions of extreme antiquity. It is in them also that we have to look for the beginnings of the Hindu legal literature,12 whose subject-matter, indeed, in part corresponds exactly to theirs, and whose authors bear for the most part the same names as those of the Grihva-Sútras With the strictly legal portions of the law-books, those dealing with

(1854) and M Müller, ibid. IX. 1.-xxxvi (1855) and listly, O Din ner's Pindapuriyama (1870)

<sup>11</sup> For the nitual relating to birth see Spajer abook on the Jádairma (Leyden, 1872)—for the marriage ceremonies, Haas a spajer, Jóder due Haurchyglörduche der alten Inder, with additions by myself in I St, v 267, ff, also my paper Viducehe Hochzutgrafich, told, p. 177, ff (1862)—on the burial of the dead, Roch nut property.

<sup>18</sup> Besides the Griliya Sutras we find some texts directly called Dhar ma-Sutras, or Samayachárika Sutras which are specified as portions of Sranta Saftras, but which were no doubt subsequently inserted into these.

civil law, criminal law, and political law, we do not, it is true, find more than a few points of connection in these Sutras, but probably these branches were not codified at all until the pressure of actual imminent danger made it necessary to establish them on a secure foundation risk of their gradually dving out was, owing to the constant operation of the factors involved, not so great as in the case of domestic customs. But a far more real peril threatened them in the fierce assaults directed against the Brahmanical polity by the gradually increasing power of Buddhism. Euddhism originally proceeded purely from theoretical heterodoxy regarding the relation of matter to spirit, and similar questions, but in course of time it addressed itself to practical points of religion and worship, and thenceforth it imperilled the very existence of Brahmanism, since the military caste and the oppressed classes of the people generally availed themselves of its aid in order to throw off the overwhelming voke of priestly The statement of Megasthenes, that the domination Indians in his time administered law only and pumpys, from memory, I hold therefore to be perfectly correct, and I can see no grounds for the view that proper is but a mistranslation of Smriti in the sense of Smriti-Sastra, 'a treatise on Smrti. \* For the above-mentioned reason. however-in consequence of the development of Bundhism into an anti-Brahmanical religion-the case may have altered soon afterwards, and a code, that of Manu, for example (founded on the Manava Gribva-Sutra), may have been drawn up But this work belongs not to the close of the Vedic, but to the beginning of the following neriod.

As we have found, in the Smitt, an independent basis for the Grhya-Suttras—in addition to the Enthmana, where but few points of contact with these Sutras can be traced—so too shall we find an independent basis for those Sutras the contents of which relate to language. In this case it is in the recitation of the songs and formulas at the sorifice that we shall find it. Although accordingly, these

Sútras stand on a level with the Brahmanas, which ove their crigin to the same source, yet this must be under stood as applying only to those views on linguistic rela-tions which, being presupposed in the Sutras, must be long anterior to them It must not be taken as applying to the works themselves, masmuch as they present the results of these antecedent investigations in a collected and systematic form Obviously also, it was a much more natural thing to attempt, in the first instruce, to elucidate the relation of the prayer to the sacrifice, than to make the form in which the prayer itself was diawn up a subject of investigation. The more sacred the sacrificial performance grew, and the more fixed the form of worship granually became, the greater became the importance of the prayers belonging to it, and the stronger their claim to the utmost possible purity and safety. To effect this, it was necessary, first, to fix the text of the prayers, secondly to establish a correct pronunciation and recitation, and, lastly, to preserve the tradition of their origin. It was only after the lapse of time, and when by degrees their literal sense had become foreign to the phase into which the language had passed—and this was of course much later the case with the priests, who were familiar with them, tlan with the people at large-that it became necessiry to take precautions for securing and establishing the sense also To attain all these objects, those most conversant with the subject were obliged to give instruction to the ignorant, and circles were thus formed around them of travelling scholars, who made pilgrimages from one teacher to another according as they were attracted by the fame of special learning. These researches were naturally not confined to questions of language, but embiaced the whole range of Brahmanical theology, extending in like manner to questions of worship, dogma, and speculation, all of which, indeed, were closely interwoven with each other We must at any rate, assume among the Brahmans of this period a very stirring intellectual life, in which even the women took an active part, and which accounts still further for the superiority maintained and exercised by the Brahmus over the rest of the people Nordid the infli-tary caste hold aloof from these inquiries, especially after they had succeeded in securing a time of repose from

external warfare. We have here a faithful copy of the scholastic period of the Middle Ages, sovereigns whose courts form the centres of intellectual life, Brahmans who with lively emulation carry on their inquiries into the highest questions the human mind can propound, women who with enthusiastic ardour plunge into the mysteries of speculation impressing and astonishing men by the depth and loftiness of their opinions, and who-while in a state which, judging from description, seems to have been a kind of somnambulism—solve the questions proposed to them on sacred subjects. As to the quality of their solutions, and the value of all these inquiries generally, that is another matter. But neither have the scholastic subtleties any absolute worth in themselves, it is only the striving and the effort which ennobles the character of any such period

The advance made by linguistic research during this epoch was very considerable. It was then that the text of the prayers was fixed, that the redaction of the various Samhitas took place. By degrees, very extensive precautions were taken for this purpose. For their study (Patha), as well as for the different methods of preserving them—whether by writing or by memory, for either is possible "—such special injunctions are given, that it seems

by the rest of the Brahmans On the other hand, Coldstucker Bolit lingk, Whitney, and Roth (Der Athareaveda in Kashmir, p 10), are of the opposite opinion holding in particular, that the authors of the Pratialkhyas must have had written texts before them Benfey also formerly shared this view but recently (Einleitung in die Gramma tik der ved Spracht p 31) he has expressed the belief that the Vedic texts were only committed to writ ing at a late date, long subse quent to their 'diastenans But nell also I c, p 10 18 of opinion that, amongst other things the very scarcity of the material for writing in ancient times "almost precludes the existence of MSS of books or long documents.

<sup>13</sup> All the technical terms, how ever, which occur for analy of the Veda and the like, uniformly refer to speaking and reciting only and thereby point to exclusively oral tradition. The writing down of the Vedic texts seems indeed not to have taken place until a compara tively late period See ! St v 18, ff (1861) Muller Anc S Let p 507, ff (1859) Westergaard, Ueber den ältesten Zeitraum der induchen Geschichte (1860, German transla tion 1862 p 42, ff ) and Haug, Leber das Wesen des vedischen Ac cents (1873 p 16, ff ), have declared themselves in favour of this theory Hang thinks that those Brabmans who were converted to Buddham were the first who come goed the Veda to writing-for polemical pur poses-and that they were followed

all but impossible that any alteration in the text, except in the form of interpolation, can have taken place since These directions, as well as those relating to the pronunciation and recitation of the words, are laid down in the Pratisakhya-Sútras, writings with which we have but recently been made acquainted \* Such a Pratisakhya-Sútra uniformly attaches itself to the Samhita of a single Veda only but it embraces all the schools belonging to it, it gives the general regulations as to the nature of the sounds employed, the euphonic rules observed, the accent and its modifications, the modulation of the voice, &c Further, all the individual cases in which peculiar phonetic or other changes are observed are specially pointed out, 14 and we are in this way supplied with an excellent critical means of arriving at the form of the text of each Samhita at the time when its Pratisakhya was composed find in any part of the Samhita phonetic peculiarities which we are unable to trace in its Prátišákhya, we may rest assured that at that period this part did not yet belong to the Samhita. The directions as to the recital of the Veda, te, of its Samhita, in the schools-each individual word being repeated in a variety of connections- present a very lively picture of the care with which these studies were pursued

For the knowledge of metre also, nch materials have been handed down to us in the Sútras: The sungers of the hymns themselves must naturally have been cognisant of the metrical laws observed in them. But we also find the technical names of some metres now and then mentioned in the later songs of the Rik. In the Brahmanas the oddest tricks are played with them, and their harmony is in some mystical fashion brought into connection with the harmony of the world, in fact stated to be its funda-

By Roth in his essays Jur Litteratur und Geschichte des II eds., p 53 ff (translated in Journ As Soc Bengal, January 1848, p 6, ff)

14 This indeed is the real purpose
of the Prausikhyas namely, to
show how the continuous Samhita
text is to be reconstructed out of
the Pada text, in which the individual words of the text are given

separately in their original form unaffected by zend'h, a., the influence of the words which immediately precede and follow. Whatever clee, over and above this, is found in the Praisiakhyas is merely acces zory matter. See Whitney in Journal Am Or Sec iv 250 (1853)

<sup>+</sup> Strictly speaking only these (the Samhitas) are Veds.

mental cause. The simple minds of these thinkers were too much charmed by their rhythm not to be led into these and similar symbolisings The further development of metre afterwards led to special inquiries into its laws Such investigations have been preserved to us, both in Satras 15 treating directly of metre, eg, the Nidana Sutra. and in the Anukramanis, a peculiar class of works, which, adhering to the order of each Sambita, assign a poet, a metre, and a deity to each song or prayer They may, therefore, perhaps belong to a later period than most of the Sútras, to a time when the text of each Samhita was already extant in its final form, and distributed as we there find it into larger and smaller sections for the better regulation of its study. One of the smallest sections formed the pupil's task on each occasion.-The preservation of the tradition concerning the authors and the origin of the prayers is too intimately connected herewith to be dissociated from the linguistic Sutras, although the class of works to which it gave rise is of an entirely different character The most ancient of such traditions are to be found, as above stated, in the Brahmanas themselves. These latter also contain legends regarding the origin and the author of this or that particular form of worship, and on such occasions the Brahmana frequently appeals to Gathas, or stanzas preserved by oral transmission among the people It is evidently in these legends that we must look for the origin of the more extensive Itihasas and Puranas, works which but enlarged the range of their subject, but which in every other respect proceeded after the same fashion, as is shown by several of the earlier fragments preserved, eg, in the Maha-Bharata. The most ancient work of the kind hitherto known is the Brihaddevata by Saunaka, in slokas, which, however, strictly follows the order of the Rik-Samhita, and proves by its very title that it has only an accidental connection with this class of works Its object properly is to specify the deity for each verse of the Rik-Samhita. But in so doing, it supports its views with so many legends, that we are fully justified in classing it here. It, however, like the other Anukramanis belongs to a much later period than most

<sup>&</sup>quot; See Part I of my paper on Indian Propody, I St, vin. 1, ff (1863)

of the Sútras, since it presupposes Yaska, the author of the Nirukti, of whom I have to speak presently, it is, in fact, essentially based upon his work [See Adalb Kuhn

in I St, 1 101-120]

It was remarked above, that the investigations into the literal sense of the prayers only began when this sense had gradually become somewhat obscure, and that, as this could not be the case among the priests, who were fami har with it, so soon as amongst the rest of the people, the language of the latter may at that time have undergone considerable modifications. The first step taken to render the prayers intelligible was to make a collection of synonyms, which, by virtue of their very arrangement, explained themselves, and of specially obsolete words, of which separate interpretations were then given orally. These collected words were called, from their being "ranked' "strung together ' Nigranthu corrupted into Nighantu," and those occupied with them Naighantukas One work of this kind has been actually preserved to us 16. It is in five books, of which the three first contain synonyms, the fourth, a list of specially difficult Vedic words, and the fifth, a classification of the various divine personages who figure in the Veda. We also possess one of the ancient expositions of this work, a commentary on it, called Nirulti. "interpretation,' of which Yaska is said to be the author It consists of twelve books to which two others having no proper connection with them were afterwards added It is reckoned by the Indians among the so-called Vedangas, together with Siksha Chliandas, and Jvotisha -three very late treatises on phonetics, metre, and astronomical calculations-and also with Kalpa and Vyakarana, se, ceremonial and grammar, two keneral categones of literary works. The four first names likewise originally signified the class in general,17 and it was only later that they were applied to the four individual works

<sup>\*</sup> See Roth, Introduction to the Nirukti, p xu 18 To this place belong further, the Nichantu to the Atharya S men

Nighantu to the Atharva 8 men tioned by Haug (if I St ix 175 176,) and the Nigama Paris ship of the White Yajus

<sup>&</sup>quot; Sik-hd still continues to be the name of a species. A conviderable number of treatives so contiled have recently been found, and more are constant y being brought to light. Ct. Kielborn J. St., xiv too.

now specially designated by those titles It is in Yaska's work, the Nirukti, that we find the first general notions of grammar Starting from the phonetic rules the observance of which the Pratisakhva-Sútras had already established with so much minuteness-but only for each of the Veda-Samhitas-advance was no doubt gradually made, in ' the first place, to a general view of the subject of phonetics, and thence to the remaining portions of the domain of language Inflection, derivation, and composition were recognised and distinguished, and manifold reflections were made upon the modifications thereby occasioned in the meaning of the root Yaska mentions a considerable number of grammatical teachers who preceded him, some by name individually, others generally under the name of Nairuktes, Vaiyakaranas, from which we may gather that a very brisk activity prevailed in this branch of study To judge from a passage in the Kaushitaki-Brahmana, linguistic research must have been carried on with peenhar enthusiasm in the North of India, and accordingly, it is the northern, or rather the north-western district of India that gave birth to the grammanan who is to be looked upon as the father of Sanskrit grammar, Panini. Now, if Yaska himself must be considered as belonging only to the last stages of the Vedic period, Panini-from Yaska to whom is a great leap-must have lived at the very close of it, or even at the beginning of the next period Advance from the simple designation of grammatical words by means of terms corresponding to them in sense, which we find in Yaska, to the algebraic symbols of Panini, implies a great amount of study in the interval. Besides Panini humself presupposes some such symbols as already known, he cannot therefore be regarded as having invented, but only as having consistently carried out a method which is certainly in a most eminent degree suited to its ournose

Lastly, Philosophical Speculation also had its peculiar development contemporaneously with, and subsequently ' to, the Brihmanns It is in this field and in that of grammar that the Indian mind attained the highest pitch of its marcellous fertility in subtle distinctions, however abstruce or naive, on the other hand, the method may occasionally be.

Several hymns of a speculative purport in the last host, of the Rik Samhita testify to a great depth and concentration of reflection upon the fundamental cause of things, necessarily implying a long period of philosophical research in a preceding age. This is borne out by the old renown of Indian wisdom, by the reports of the companions of Alexander as to the Indian gymnosophists, &c.

It was mevitable that at an early stage, and as soon as speculation had acquired some vigour, different opinions and starting-points should assert themselves, more especially regarding the origin of creation, for this, the most mysterious and difficult problem of all, was at the same time the favourite one Accordingly, in each of the Brahmanas, one at least, or it may be more, accounts on the subject may be met with, while in the more extensive works of this class we find a great number of different conjectures with regard to cosmogony One of the principal points of difference naturally was whether indiscrete matter or spirit was to be assumed as the First Cause The latter theory became gradually the orthodox one, and is therefore the one most frequently, and indeed almost exclusively represented in the Brahmanas. From among the adherents of the former view, which came by degrees to be regarded as beterodox there arose, as thought developed, enemies still more dangerous to orthodoxy, who, although they confined themselves in the first place solely to the province of theory before long threw themselves into practical questions also, and eventually became the founders of the form of belief known to us as Buddhism The word buddha "awakened enlightened," was originally a name of honour given to all sages including the orthodox This is shown by the use both of the root budh in the Brahmanas, and of the word buddha itself in even the most recent of the Vedantic writings The technical application of the word is as much the secondary one as it is in the case also of another word of the kind, sramana, which was in later times appropriated by the Buddhists as peculiarly their own. Here not merely the correspond ing use of the root fram, but also the word framana itself as a title of honour, may be pointed out in several passages in the Brahmanas Though Megasthenes, in a passage quoted by Strabo, draws a distinct line between two sects

of philosophers, the Braxuares and the Zapuavas, yet we should hardly be justified in identifying the latter with the Buddhist mendicants at least, not exclusively; for he expressly mentions the ὑλόβιοι-τε, the Brahmachains and Vanaprasthas, the first and third of the stages into which a Brahman's life is distributed -as forming part of the Zapuárar The distinction between the two sects probably consisted in this, that the Boaynaves were the" phil osophers" by birth, also those who lived as householders (Grihasthas), the Zapuávas, on the contrary, those who gave themselves up to special mortifications and who might belong also to other castes The Ilnauvas, mentioned by Strabo in another passage (see Lassen, I AK 1 836), whom, following the accounts of Alexander's time, he describes as accomplished polemical dialecticians, in contradistinction to the Braxuairs, whom he represents as chiefly devoted to physiology and astronomy, appear either to be identical with the Σαρμάναι—a supposition favoured by the fact that precisely the same things are asserted of both-or else, with Lassen, they may be regarded as Pramanas, ve. founding their belief on pramana, logical proof, instead of revelation As, however, the word is not known in the writings of that period, we should in this case hardly be justified in accepting Strabo's report as true of Alexander's time, but only of a later age Philosophical systems are not to be spoken of in connec-tion with this period, only isolated views and speculations are to be met with in those portions of the Brahmanas here concerned, viz, the so-called Upanishads (upanishad, a session, a lecture) Although there prevails in these a very marked tendency to systematise and subdivide, the investigations still move within a very narrow and limited Considerable progress towards systematising, and expansion is visible in the Upanishads found in the Aranyakas,\* ze, writings supplementary to the Brahmanas, and specially designed for the υλοβιοι, and still greater progress in those Upanishads which stand by themselves, 10,

<sup>\*</sup> The name Arapyaka occurs first pusages in contradistinction to the circular to Page 1 to 2 to 29 and in the thins, I St v 49 then in Manu Atharvonanishad (see I St. ii 179) to the wiritika to Pan 19 2 129 [see on this, / St : 49] then in Maou iv 123 Yijnavalkya i 145 (in both

those which, although perhaps originally annexed to a Brahmana or an Aranyaka of one of the three older Vedas, have come down to us at the same time-or, it may be, have come down to us only-in an Atharvan recension Finally, those Upanishads which are directly attached to the Atharva-Veda are complete vehicles of developed philosophical systems, they are to some extent sectarian in their contents, in which respect they reach down to the time of the Puranas That, however, the fundamental works now extant of the philosophical systems, viz., their Sútras, were composed much later than has hitherto been supposed, is conclusively proved by the following considerations In the first place, the names of their authors are either not mentioned at all in the most modern Brahmanas and Aranyakas or, it they are, it is under a different form and in other relations-in such a way, however, that their later acceptation is already foreshadowed and exhibited in the germ Secondly, the names of the sages mentioned in the more ancient of them are only in part identical with those mentioned in the latest liturgical Sútras And, thirdly, in all of them the Veda is expressly presupposed as a whole, and direct reference is also made to those Upanishads which we are warranted in recognising as the latest real Upanishads , nay, even to such as are only found attached to the Atharvan The style, too, the enigmatical conciseners, the mass of technical terms-although these are not yet endowed with an algebraic force-imply a long previous period of special study to account for such precision and perfection. The philosophical Sutras, as well as the grammatical Sútra, should therefore be considered as dating from the beginning of the next period, within which both are recognised as of predominant anthority

In closing this survey of Vedic hterature, I have lastly to call attention to two other branches of science, which, though they do not appear to have attained in this period to the possession of a hierature—at least not one of which direct relica and records have reached us—must yet have enjoyed considerable cultivation—I mean Astronomy and Medicine Both received their first impulse from the exigences of religious worship Astronomical observations—though at first, of course, these were only of the

rudest description—were necessarily required for the regu-lation of the solemn sacrifices, in the first place, of those offered in the morning and evening, then of those at the new and full moon, and finally of those at the commencement of each of the three seasons Anatomical observations, again, were certain to be brought about by the dissection of the victum at the sacrifice, and the dedication of its different parts to different deities The Indo-Germanic mind, too, being so peculiarly susceptible to the influences of nature, and nature in India more than anywhere else inviting observation, particular attention could not fail to be early devoted to it Thus we find in the later portions of the Vajasaneyi-Samhita and in the Chhandogyopanishad express mention made of "observers of the stars". and "the science of astronomy," and, in particular, the knowledge of the twenty-seven (twenty-eight) lunar mansions was early diffused. They are enumerated singly in the Taittiriya-Samhitá, and the order in which they there occur is one that must necessarily" have been established somewhere between 1472 and 536 BC Strabo, in the somewhere neween 14/2 am 330 he Strato, in above-mentioned passage, expressly assigns darpovoquia as a favourite occupation of the Bpaygaive. Nevertheless, they had not yet made great progress at this period, their observations were chiefly confined to the course of the moon, to the solstice, to a few fixed stars, and more particularly to astrology

As regards Medicine, we find, especially in the Samhita of the Atharvan, a number of songs addressed to illnesses and healing herbs, from which, however, there not much to be gathered. Animal anatomy was evidently thoroughly understood, as each separate part had its own distinctive name. Alexander's companions, too, evtol the Indian physicians, especially for their treatment of subcapite.

\_\_\_\_

<sup>\*</sup> See I St, in 240, note [The seems to be that contained in the correct numbers are rather 2780—Jyotaha, we obtain the years 1820—1820a.0, see I St, x 234-236(1866) 860, ibid. p 236, if bee further and for the blarzam street, which the remarks in note 2 above]

From this preliminary survey of Vedic literature we now pass to the details Adhering strictly to the Indian classification, we shall consider each of the four Vedas by itself, and deal with the writings belonging to them in their proper order, in connection with each Veda separately

And first of the Rigreda The Rigreda-Samhitá presents a twofold subdivision—the one purely external, having regard merely to the compass of the work, and evidently the more recent, the other more ancient and based on internal grounds. The former distribution is that into eight ashtakas (eighths), nearly equal in length, each of which is again subdivided into as many adhyayas (lectures), and each of these again into about 33 (2006 in all) rargas (sections), usually consisting of five verses 13 The latter is that into ten mandalas (circles), 85 anuidkas (chapters), 1017 súltas (hymns), and 10 580 rechas (verses), it rests on the variety of authors to whom the hymns are ascribed. Thus the first and tenth mandalas contain songs by Rishis of different families, the second mandala, on the contrary (asht 11. 71-113), contains songs belongme to Gritsamada, the third (asht ii 114-119, iii. 1-56) belongs to Visyamitra, the fourth (asht 111 57-114) to Vamadeva, the fifth (asht 1u. 115-122, 1v 1-79) to Atri, the sixth (ash; iv 80-140, v 1-14) to Bharadvaja, the seventh (asht v 15-118) to Vasishtha, the eighth (asht v 119-129, vi. 1-81) to Kanva, and the ninth (asht vi. 82-124, vil. 1-71) to Afiguras 19 By the names of these Rishis we must understand not merely the individuals, but also their families The hymns in each separate mandala are arranged in the order of the deities addressed 190 Those addressed to Agni occupy the first place, next come those

16 For particulars see f St. III. 255. Muller, Anc S Lit., p 250 stiktas), the minth 7 an 114 s, and the tenth 12 an 191 s

Delbruck, in his review of Sie berning Luder die Royrida (cf. note 32) in the Jenaer Literaturzeitung (1875, p. 867), points out that in booky 2-7 the bymns to Agin and Indra are arranged in a descending gradation as regards the number of verses.

<sup>15</sup> The first mandala contains 24 caucides and 191 mildes the second 4 can 42s, the third 5 can 62s, the fourth 5 can 58s the fifth 6 can 87s the sixth 6 can 75s the seventh 6 can 10s, the eighth 10 can 92s be ides 11 radialhium and 92s be ides 11 radialhium 6

to Indra, and then those to other gods This, at least is the order in the first eight mandalas The ninth is addressed solely to Soma, and stands in the closest connection with the Sama-Samhita, one-third of which is borrowed from it, whereas the tenth mandala stands in a very special relation to the Atharva-Samhita The earliest mention of this order of the mandalas occurs in the Aitareya-Áranyaka and in the two Grihya-Sútras of Aśwalayana and Sankhayana. The Pratisakhyas and Yaska recognise no other division, and therefore give to the Rik-Samhita the name of dasatayyas, i.e., the songs "in ten divisions," a name also occurring in the Sama-Sútras The Anukramaní of Katyayana, on the contrary, follows the division into ashtakas and adhyavas The name súkla, as denoting hymn, appears for the first time in the second part of the Brahmana of the White Yaius, the Rig-Brahmanas do not seem to be acquainted with it. 20 but we find it in the Aitareva-Aranyaka, &c The extant recension of the Rik-Sambita is that of the Sakalas and belongs specially, it would seem, to that branch of this school which bears the name of the Saisinyas another recension, that of the Vashkalas, we have but occasional notices but the difference between the two does not seem to have been considerable. One main distinction, at all events, is that its eighth mandala contains eight additional hymns, making 100 in all, and that, consequently, its sixth ashtala consists of 132 hymns 21 The name of the Sakalas is evidently related to Sakalya, a sage often mentioned in the Brahmanas and Sutras, who is

formed part of the egith mondala. When I wrote the above I was pro-bably thanking of the Yakahiyas, abby thanking of the Yakahiyas, and the yakahiyas, as eight (cf. 70th, Zer Lat ur, a gest) and the At. Eur. A graph of the Walland of the Yakahiyas, and the Yakahiyas and the Yakahiyas and the yakahiyas belong specially to the Vakhikas, I cannot at pressit produce any differences of the Yakahiyas and the Yakahiyas and yakahiyas belong specially to the Vakhikas, I cannot at pressit produce any differences of the Yakahiyas and yakahiyas ang yakah

This is a mistake. They know the word not any in the above, but also in a technical sense, and also a subject to a first and a subject to a first and a subject to a first and a subject to a first a subject to a su

<sup>&</sup>quot;I am at present unable to corrotorate this statement in detail. I can only slow from Sunnakas Anusakhunkramani, that the recen sion of the Vashkalas had eight hymis more than that of the Sakalas but no that these eight hymis

stated by Yasha" to be the author of the Padapatha\* of the Rid-Samhitat, According to the accounts in the Brahmane of the Winte Yajus (the Satapatha-Brahmana) a Sakaha, summend Vidagdha (the cunning?), Iwed contemporaneously with Yajinavallaya as a teacher at the court of Janaka, King of Vidadha, and that as the declared adversary and rival of Yajinavallaya. He was vanquished and cursed by the latter, ris head dropped off, and his bones were stolen by robbers—Varkaha ialso (a local form of Vashkah) is the name of one of the teachers mentioned in the second part of the Satapatha-Brahmana 13

The Sakalas appear in tradition as intimately connected with the Sunakas, and to Saunaka in particular a number of writings are attributed, which he is said to have composed with a view to secure the preservation of the text (rquedaypitaque), as, for instance, an Anukramani of the Rishis, of the metres, of the detition, of the anunalar, of the lymns, an arrangement (Vidhana) of the verses and their constituent parts; at the above-mentioned Brithaddevata,

on Nir iv 4, see Roth, p 39, in troduction, p layin.

This is the designation of that peculiar method of rectung the Veda in which each word of the text stands by itself unmodified by the suphonic changes it has to undergo when connected with the preceding adfollowing words. [Seeabove p 23]

t His name seems to point to the north west (!) The scholar ton Panini [iv 2, 117] at least, probably following the Mahabhashya, cites Sakala in connection with the Bahi kas see also Burnouf, Introduction a l'Hust du Buddh p 620 ff The pa uge in the sutra of Panini, iv 2. 128, has no local reference [on the data from the Mahabhashya bearing on this point, see I St, xiii 366, 372 ,09, 428, 445] On the other hand we find Saxyas also in the Kosala country in Kapil-wastu of whom, however as of the Siki yanina in the Yajus we do not ex actly know what o make (see be In i The earlest mention of the Ford Sakala in immediate reference

to the Rik, occurs in a memorial reries, symmodial, quoted in the Ait. Bridini, in 43 fees I St. ix. 2771—For the name Saksiriyal can only cite the greatera section added in the close of the Airalyyana SymutaSúra, in which the Saisma are mentioned several times, parlly by themselves partly beade and in association with the Surias.

<sup>&</sup>lt;sup>22</sup> Thus form of name, which might be traced to sytholf occurs also in the Safakáyana Aranyaka viu 2 "antuantaman" Tärkatino brukatiahan abhas nyadasyan" to hogisthe parallel pasage in the data Arany, in 8, otherwise s milarly worded reads anatexal of 'Tärkatino', ta' (e.g., ca) Artaino'.

28 Rather theo Vichana texts (see below), the one of which has for its object the 'polication of particular richas the other probably that of particular paries to superstit ous purposes after the manner of the Samarichaus Brill man.

the Prátišákhya of the Rik a Smarta-Sútra.\* and also a Kalpa-Sutra referring specially to the Aitareyaka, which, however, he destroyed after one had been composed by his pupil. Asvalayana It is not perhaps, on the face of it, impossible that all these writings might be the work of one individual Saunala, still they probably, nay, in part certainly, belong only to the school which bears his name. But, in addition to this, we find that the second mandala of the Samhita itself is attributed to him, and that, on the other hand, he is identified with the Saunaka at whose sacrificial feast Sauti, the son of Vaisampavana, is said to have repeated the Maha-Bhara's, recited by the latter on an earlier occasion to Janameiava (the second) together with the Harivansa. The former of these assertious must. of course, only be understood in the sense that the family of the Sunakas both belonged to the old Rishi families of the Ril, and continued still later to hold one of the foremost places us the learned vorld of the Brahmans Against the second statement, on the contrary, no direct objection can be urged, and it i at least not impossible that the teacher of Asyalayana and the sacrificer in the Namishat forest are identical. - In the Brahmana of the White Yajus we have, further two distinct Saunakas mentioned, the one Indrota, as sacrificial priest of the prince who, in the Maha-Bharata, appears as the first Janamejaya (Parikshita, so also in M Bh xii. 5595, if), the other, Staidayana, as Audichya, dwelling in the north

As author of the Aruma-patha of the Rik-Samhita a Pañchala Babbrava 2 is mentioned. Thus we see that to the Kuru-Pañchalas and the Kosala-Vicheva (to whom Sal aly a belongs) apperturs the chief ment of having fixed and arranged the text of the Rik, as well as that of the Yanus,

tim treated entiter !

<sup>\*</sup> On the Gr Lya of Saucaka, see Stenzier / St. 1, 243

and this was probably accomplished, in the case of both Vedas, during the most flourishing period of these tribes For the origin of the songs themselves we must go back.

as I have already repeatedly stated to a far earlier period. This is most clearly shown by the mythological and geo-

graphical data contained in them.

Il e former, the mythological relations, represented in the older hymns of the Rik, in part carry us back to the primitive Indo-Germanic time. They contain relics of the childlike and naive conceptions then prevailing, such as may also be traced among the Teutons and Greeks So for instance, the idea of the change of the departed spirit into air, which is conducted by the winged wind as by a faithful dog, to its place of destination, as is shown by the identity of Sarameva and Equage, of Sabala and Kep, βepos † Further, the idea of the celestial sea, Varuna, Ougaios, encompassing the world, of the Father-Heaven Dyaushpitar, Zev. Diespiter, of the Mother - Earth. Δημήτηρ, of the waters of the sky as shining nymphs, of the san's rays as cows at pasture, of the dark cloud-god as the robber who carries off these maidens and cows, and of the mighty god who wields the lightning and thunderbolt, and who chastises and strikes down the ravisher. and other such notions I Only the faintest outlines of this comparative mythology are as yet discernible, it will unquestionably, however, by degrees claim and obtain, in relation to classical mythology a position exactly analogous to that which has already in fact, been secured by comparative Indo-Germanic grammer in relation to classical grammar The ground on which that mythology has hitherto stood trembles beneath it, and the new light about to be shed upon it we owe to the hymns of the Rigseda, which enable us to glance, as it were, into the workshop whence it originally proceeded §

<sup>§</sup> See Z D M G v 112 [Since I wrote the above comparative my toology has been enriched with much ralusale mat er but much also that is cruse and fascial has been advanced. Deserting of special men toon be side, various papers by Adalb Lishn in his Zc chift are two rape show the sign.

Again, secondly, the by mns of the Rik contain sufficient cyldence of their antiquity in the invaluable information which they furnish regarding the origin and gradual derelonment of two cycles of epic legend, the Persian and the Indian In both of these the simple allegories of untural phenomena were afterwards arrayed in an historic garb. In the songs of the Rik we find a description, embellished with poetical colours of the celestial contest between light and darkness, which are depicted either quite simply and naturally, or else in symbolical guise as divine beings In the Persian Veda, the Avesta, on the other hand, "the contest \* descends from heaven to earth, from the province of natural plenomena into the moral sphere. The champion is a son, born to his father, and given as a saviour to earth as a reward for the pious exercise of the Soma worship. The dragon slain by him is a creation of the Power of Evil, armed with demoniacal might for the destruction of purity in the wold. Lastly. the Persian epic enters upon the ground of history The battle is fought in the Aryan land the serpent, Aji Dahaka in Zend Ahi [Dasaka] in the Veda, is transformed into Zohak the tyrant on the throne of Iran, and the blessings achieved for the oppressed people by the warlike Ferédún-Traitana in the Veda Thraétaono in Zend-are freedom and contentment in life on the paternal soil." Persian legend traversed these places in the course of perhaps 2000 years passing from the domain of nature into that of the opic and thence into the field of lictory A succession of phases, corresponding to those of Feredun may be traced also in the case of Jemshid (Anna Yima), a suhilar series in the case of Kaikavia (Kavya Usanas kwa Us) and probably also in the case of Kai Khosru (Susravas Hušravanh) Indian legend in its development is the counterpart of the Persian myth. Even in the time of the Yajurieda the natural significance

of the myth had become entirely obliterated Indra is there but the querrel-one and jealous god who subdues the unvields giant by low cuming, and in the Indian epic the myth either still returns the same form, or else Indra is represented by a haman hero, Arjuna an incarnation of bimself, who makes short work of the gunt, and the lings who prass for the incurations of the latter. The principal figures of the Maha-Bharate and Ramayana fall way like the langs of Firdis, and there remain for history only those general events in the story of the people to which the ancient myths about the gods have been righted. The personages fade into the background, and in this representation are only recognisable as poetic creations.

Thirdly, the songs of the Rik unfold to us particulars as to the time, place, and conditions of their origin and growth In the more ancient of them the Indian people oppear to us settled on the bonks of the Indus, divided into a number of small tribes, in a state of mutual hosthirty, leading a patriarchal life as husbandmen and nomads, hving separately or in small communities, and represented by their kings, in the even of each other by the wars they wage, and in presence of the goas by the common sacrifices they perform. Each father of a family acts as priest in his own house, himself kindling the sacred fire, performing the domestic ceremonies, and offering up praise and prayer to the gods. Only for the great com-mon sacrifices—a sort of tribe-festivals, celebrated by the king-are special priests appointed, who aistinguish themselves by their comprehensive knowledge of the requisite rites and by their learning, and amongst whom a sort of ri alry is gradually developed, according as one tribe or another is considered to have more or less prospered by its sacrifices Especially prominent here is the enmity between the further or Vasishtha and Visyamitz, which runs through ail Vedic antiquity continues to play an important part in the epic, and is kept up even to the latest times, so that, for exemple, a commentator of the Vega who claims to be descinged from Vasishtha legues passages unexpounded in which the letter is stated to have had a curve imprecated upon him. This implacable hatred oves its origin to the trifling creamstance of Vasishtha

having once been appointed thief sacrifical priest instead of Vishamitra by one of the petty kings of these early times -The influence of these royal priests does not, howeven, at this early period, extend beyond the sacrifice, there are no castes as yet, the people is still one united whole, and bears but one name, that of usas, settlers The prince, who was probably elected, is called Vispati a title still preserved in Lithuanian. The fice position held by women at this time is remarkable. We find songs of the most exquisite kind attributed to poetesses and queens among whom the daughter of Atri appears in the foremost rank As regards love, its tender, ideal element is not very conspicuous, it rather bears throughout the stamp of an undisquised natural sensuality Marriage is, however, held sacred, husband and wife are both rulers of the house (dampati), and approach the gods in united prayer The religious sense expresses itself in the recognition of man's dependence on natural phenomena and the beings supposed to rule over them, but it is at the same time claimed that these latter are, in their turn, dependent upon human aid, and thus a sort of equilibrium is established The religious notion of sin is consequently wanting altogether, and submissive gratitude to the gods is 13 yet quite foreign to the Indian 'Give me and I will render to thee,' he says," claiming therewith a right on his part to divine help, which is an exchange no grace In this free strength, this vigorous self consciousness, a very different, and a far more manly and noble, picture of the Indian is presented to us than that to which we are accustomed from later times I have already endeas oured above to show how this state of thing, become gradually n'tered, how the fresh energy was broken, and by degrees disappeared, through the dispersion over Hindustan, and the enervating influence of the new climate But what it was that led to the emigration of the people in such masses from the Indus across the Sarasvat, tov ands the Ganges,

<sup>\*\*</sup> Quite freign is rather too (1851) There are different phases strong an expression. S 14.56

what was its principal cuies, is still uncertain. Was it the pressure brought bout by the airwid of new settlers? Was it evees of population? Or was it only the longing for the beautiful tracts of Hindustain? Or perhaps all these cuiese combined? According to a legend preserved in the Brahmana of the White Yapu, the priest were in a great mersure the cause of this movement, by urging it upon the kings, even against their will [Z 8.1 178]. The connection with the ancestral home on the Indus remained, of course, at first a very close one, later on, however, when the new Brahmanical organisation was completely consolidated in Hindustain, a strong element of bitterness was infused into it, since the Brahmania looked upon their old kinsnen who had remained true to the customs of their forefathers as apostates and unbelievers.

But while the origin of the songs of the Rik dates from the primitive time, the redaction of the Rik-Samhita only took place as we observed, at a period when the Brahmunical hierarchy was fully de eloped, and when the Kosila-Videhas and Kuru-Pañchalar \* vho are to be required as having been specially instrumental in effecting it, were in their prime. It is also certain that not a few of the songs were composed either at the time of the emigration into Hindustan or at the time of the compilation itself. Such songs are to be found in the last book especially, a comparatively large portion of which, as I have already remarked, recurs in the Athervaveda-Samhita. It is for the critic to determine approximately in the case of each individual song, having regard to its con-

scribed in that one had been fought out hory before the final strange ment of the RN Sambits' It is, however questionable whether the Suptana or the Mahl Bhartan is identical with the Suntana men tioned in the Rik or, even if we take this for granted, whether he may not in rely have heen associated with the gap legend in mayorem ragionam. Derupt, at least, who, has in the RR at different father from the one given in the epic. Sep 1.8 1 2019

<sup>\*</sup> Mendala x 98 18 a dialogue between Decan and Santana the terror Decan and Santana the terror Decan and Santana the them In the Made Betaras San tion in the name of the father of Britchina and Verbitrarija by whose two wires tumbik and Arbida Yida beame the father of Diritarashitri and Findo This Simiana is therefore the grand father of these lutter or the great Simiana is therefore the grand father of these briter or the great Pandatas the belligerena in the Made Bhirata We should thus have to suppose that the feul de-

tents, its ideas, its language, and the traditions connected with it, to what period it ought possibly to be ascribed. But as yet this task is only set, its solution has not yet

even begun."

The desties to whom the songs are for the most part addressed are the following -First, Agni, the god of hee. The songs dedicated to him are the most numerous of all -a fact sufficiently indicative of the character and import of these sacrificial hymns He is the messenger from men to the gods, the mediator between them, who with his farshining flame summons the gods to the sacrifice, however distant they may be He is for the rest adored essentially as earthly sacrificial fire, and not as an elemental force The latter is rather pre-eminently the attribute of the god to whom, next to Agni, the greatest number of songs is dedicated, viz, Indra. Indra is the mighty lord of the thunderbolt, with which he rends asunder the dark clouds, so that the heavenly rays and waters may descend to bless and fertilise the earth A great number of the hymns, and amongst them some of the most beautiful, are devoted to the battle that is fought because the malicious demon will not give up his booty, to the description of the thunderstorm generally, which, with its flashing lightnings its rolling thunders, and its furious blasts, made a tremendous impression upon the simple mind of the people The break of day, too, is greeted, the dawns are praised as bright, beautiful maidens, and deep reverence is paid to the flaming orb of the mighty sun, as he steps forth vanquishing the darkness of night, and dissipating it to all the quarters of the heavens The brilliant sun-god is besought for light and warmth, that seeds and flocks may thrive in gladsome prosperity

Besuces the three principal gods, Agni, Indra, and Surya, we meet with a great number of other divine personges, prominent amongst whom are the Maruts or winds, the fathful conrades of Indra in his battle, and Rudra, the having, terrible god, who rules the furnous tempest. It is not, however, my present test to discuss the whole of the Vedio Olympus, I had only to sketch generally

<sup>\*\*</sup> See von Perineb, Cyalekha, p irodlati, 1873 p 522) ! Et 12 57 (1854 compare Li eraruches Cen 299, 201 279, 280, ! Sir. L 29

the groundwork and the outlines of this ancient edifice 29 Besides the powers of nature, we find, as davelopment progresses, personifications also of spiritual conceptions, of ethical import, but the adoration of these as compared with the former, is of later origin

I have already discussed the precautions taken to secure the text of the R.k-Samhita, i.e., the question of its authenticity, and I have likewise alluded to the aids to its explanation furnished by the remaining Vedic literature These latter reduce themselves chiefly to the Nighantus. and the Nirukta of Yaska 20 Both works in their turn, found their commentators in course of time. For the Nighantus, we have the commentary of Devaraiavaivan. who belongs to about the fifteenth or sixteenth century In the introduc ion he enlarges upon the history of their stidy from which they appear to have found only one other complete commentator since Yaska viz. Skanua-For Yaskas Nirukta a commentary has been handed down to us dating from about the thirteenth century, that of Durga. Both works, moreover, the Nighantus as well as the Nirukta, exist in two different recensions These do not materially differ from one another and chiefly in respect of arrangement only, but the very fact of their existence leads us to suppose that these works were originally transmitted orally rather than in writing A commentary, properly so called, on the Fik-Samhita has come down to us, but it dates only from the fourtrenth century, that of Savanacharya.\* "From the long series of

Some extracts from Ravanas commentary have been published by Fitz-Edward Hai' in Journal As Sen Beng 1862, pp 129-134.

Samhita of the White Yajus, not the Rik-Samhita, as well as commentaries on the two Pratisakhyas of the Pik and the White Yajus

As regards European researches, the Rik-Samhita, as well as the other Vedas, first became known to us through Colebrooke's excellent paper "On the Vedas," in the As Res vol. vin (Calc 1805) To Rosen we are indebted for the first text, as given partly in his Rigical Specimen (London, 1830), partly in the edition of the first ashtaka, with I atin translation, which only appeared after the early death of the lamented author (ibid 1838) Since then, some other smaller portions of the text of the Rik-Samhita have here and there been communicated to us in text or translation. especially in Roth's already often quoted and excellent Abhandlungen zur Inttera'ur und Geschich'e des Weda (Stuttgart, 1846) The entire Samhita, together with the commentary of Sayana, is now being published, edited by Dr M. Muller of Oxford, at the expense of the East India Company, the first ashtaka appeared in 1849 At the same time an edition of the text, with extracts from the commentary, is in course of publication in India. From Dr M Muller, too, we may expect detailed prolegomena to his edition, which are to treat in particular of the position held by the songs of the Rik in the history of civilisation A French translation by Langlois comprises the entire Sombita (1848-1851), it is, of course, in many respects highly useful, although in using it great caution is necescary An English translation by Wilson in also begun, of which the first ashtala only has as yet appeared as

Induct, Nos 1-5 (Calo 1849) only reaches to the end of the second adjusty of Common the East and the second and

<sup>12</sup> Multer delition of the text, toge her with the comment of the first of Savan, a complete unite of words, and use to profiler is now complete in six vols. 1839-1875. The first complete Cathon the text was published, in Pomin 1879. The first complete Cathon of text was also considerately, in the first location of text and conventionary, in the fibblished

We now turn to the Brahmanas of the Rik

Of these, we have two, the Astareya-Erchmana and the Sunkhayana- (or Kaushtaki-) Brahmana They are closely connected with one another, treat essentially of the same matter, not unfrequently, however, taking opposite views of the same question. It is in the distribution of their matter that they chiefly differ In the Sankhavana-Brahmena we have a perfectly arranged work, embracing on a definite plan the entire sacrificial procedure, but this does not seem to be the case in an equal degree in the Altareva-Brahmana. The latter, moreover, appears to treat exclusively of the Soma sacrifice, whereas in the former it merely occupies the principal place. In the Sankhayana-Brahmana we meet with nothing at all corresponding to the last ten adhydyas of the Astareye-Brah mana, a gap which is only filled up by the Sinkhavana-Sútra, and for this reason, as well as from internal evidence, it may perhaps be assumed that the adhuávas in question are but a later addition to the Aitareya-Brahmera. In the extant text, the Antareya-Brahmana con tuns 40 adhyayas (divided into eight panchinas, or pen-

lated and explained (London 1869) but the scholar who has done most by far for the right understanding of the Rik is Roth, both in the commentary added to his edition of Láska's Nirukta (Gottingen, 1848-52), and in the great St Petersburg Sanskrit Dictionary (even vol., 1853-75), edited by Bohtlingk and him Here we may also mention the following works -Grassmann, Wortesbuch zum Rigreda (1873, ff.), Delbruck, Das altindische Verbum (1874), B.nfe" Einleitung in die Grammatil der vedischen Sprache (1874), and Die Quantitotseerschie denheiten sa den Samhita und Padi Texten de Veden, Bollensen, Die Lucder des Pantiore in Z D M G vvo (1865), Subenzig Lieder des Rigieda, übersetzt von harl Geldner und Adolf Kaegt wit Beitragen von R Roth (Tubinger 1875)-reviewed by Abel Bergrigne in the Prus Gretque Dec. 11 and 18, 1875 \* See on the Alfred Ludwig, Die Nachrichten des [und 12. 377].

Riz und Atharvaveda über Geogra thic, Gochicht und Verfamung des alten Indies ; (the identification here mentioned, p 13, of the Vedic Serusvati with the Index, was first made by myself of Fdy & Spec 11 So H . 1847), and Die philo ophi echen und religiösen Anschauungen des Veda (Prag, 1875), Alfred Hil lebrandt Leber die Gottin Adits (Bres lau 1876), H Zimmer, Parjanja Febraya Vata Wodin in Zearschraft für Deutsches Alterthum New Series vii 164, ff Lastly, we have to draw attention specially to Mair's Orinnal Sanstrut Texts (5 vols , second edit. London 1868 ff), in which the antiquarian information contained in the Pik Sambits on the different stages and phases of Indian life at that early period is clearly and comprehensively grouped translations of numerous Vedic passages and Dieces are given " See on this I S , is 280. "

tads) while the Śankháyona-Brahmana centains 30, and it is perhaps allowable to refer to them the rule in Panini 1 62, which states how the name of a Brahmana is to te formed if it contain 30 or 40 adhy dyas -a view which would afford external warrant also of the fact or then existence in this form in Panimis time, at all events Geographical or similar data, from which a conclusion might be drawn as to the time of their composition, are of very rare occurrence Most of these, together with really historical statements, are to be found in the last books of the Altareya-Brahmana (see I St, 1 199, ff), from which it at any rate specially follows that their scene is the country of the Kuru-Panchalas and Vasa-Usinaras (see vin. 14) In the Sankhayana-Brahmana mention is made of a great sacrifice in the Naimish, forest, but this can hardly be identified with the one at which, according to the accounts of the Maha-Bharata, the second recitation of this epic took place. Another passage implies a very special prominence amongst the other gods of the deity ho is afterwards known to us exclusively by the name of Siva. He here receives, among other titles those of Isana and Mahadeva, and we might perhaps venture to conclude from this that he was already the object of a very , special worship We are at any rate just fied in inferring unless the passage is an interpolation, that the Sankhavana-Brahmana ranks chronologically with the last books of the Samhita of the White Yajus and with those poitions of its Brahmana and of the Atharva-Samhita in which this nomenclature is likewise found. Lastly, a third passage of the Sankhayana-Brahmana implies as already hinted a special cultivation of the field or lan guage in the northern parts of India. People reserted thither in order to become acquainted with the language and on their return enjoyed a special authority on questions connected with it. [I St, ii. 309]

Both Brahmanas presuppoce laborary compositions of some extent as having preceded them. Thus merhation is made of the akhydnan dar is "those versed in tricultion" and gathus, akhiyan a gathus a sort of memoral verses (lartida), are also frequently referred to end quoted. The names Rigy eda Samaveda and Yajury eda as well as croys the days a term used to express trum collectively repeatedly

occur In the Sankhavana Brahmana, however, special regard is had to the Paingya and Kaushitaka, whose views are very frequently quoted side by side, that of the Kau slutaka being always recognised as final The question now arises what we are to understand by these expres sions, whether works of the Biahmana order already extant in a written form, or still handed down orally onlyor merely the inherited tradition of individual doctrines Mention of the Kaushitaka and the Paingya occurs in the Astareya-Brahmana only in a single passage—and that purhaps an interpolated one—in the latter part of the work. This at all events proves, what already seemed prohable from its more methodical arrangement, that this Sankliavana-Biahmana is to be considered a later production than the Aitaieva-Brahmana, since it appears to be a recast of two sets of views of similar tenor already extant under distinct names, while the Altareva Brahmana piesents itself as a more independent effort. The name Paingya belongs to one of the sages mentioned in the Brahmana of the White Yajus and elsewhere, from whose family Yaska Panigi\* was descended, and probably also Pingala the author of a treatise on metre The Paingi Kalpah is expressly included by the commentator of Panini, probably following the Mahabhashya among the ancient Kalpa-Sutras, in contradistinction to the Asmarathah Kalpah, with which we shall presently become acquainted as an authority of the Asvalayana-Sútra. The Paingins are, besides, frequently mentioned in early writings, and a Paingi-Brahmana must still have been in existence even in Sayana's time, for he repeatedly refers The case stands similarly as regards the name Kaushitaka, which is, moreover, used directly in the majointy of passages where it is quoted for the Sankhayana-Bruhman's itself-a fact easy of explanation, as in the latter the view represented by the Kaushitaka is invariably upheld as the authoritative one, and we have in this Brahmana but a remoulding by Sankhayana of the stock of dorma peculiarly the property of the Kaushitakin-Turther in its commentary which it may be remarked

<sup>•</sup> The quotes one from Britmanian Par of Kalpan in the Mahalibhat ya in tiska therefore belong in part see [St., 2in 455] pe baps to the Pangis; () [On the

interprets the wo k under the sole title of the "Kaushfaki-Brilmana" pressages are frequently quoted from a Mahr-Kaushtaki-Brilmana, so that we have to infer the existence of a still larger work of similar contents,—probably a lyter landling of the same subject (3). This commentary further connects the Kaushitaki Brahmana with eschool of the Kauthumas—a school which otherwise belongs only to the Samaveda this, however, is a relation which has not as yet been cleared up—The name Sankinyana-Brahmana interchanges occasionally with the form Sufikhayana-Brahmana but the former would seen to deserve the preference, its earliest occurrence is probably in the Pratisa'hlya-Saftra of the Block Yyus

The great number of myths and legends contrained in both these Brahmanas of the Rh. in east shem with a peculiar interest. These are not indeed introduced for their own sake, but merely with a view to explain the origin of some hymn, but this, of course does not detract from their value. One of them, the legend of Surnháepa Brahmana, is translated by Roth in the Intractoe Student 448-464, and discussed in detail, 10d, 11 112-123

1458—454, and discussed in detail, void, in 112-123 According to him, it follows a more ancient metrical version. We must indeed assume generally, with regard to many of these legends, that they had already gained a rounded, independent shape in tradition before they were incorporated into the Brahmana and of this we have fixed the property of the standard of their saguage, compared with that of the rest of the text. Now these legends possess grat value for us from two points of view first because they contain, to some extent at a plain and artless manner, but at other times disguised and only perceptible to the eye of entireins, and secondly because they present connecting links with the legends of late times, the origin of which would otherwise layer.

remained almost entirely obscure

On the Aitareya-Brahmona we have a commentary by
Sayana and on the Kaushitaki-Brahmana one by Viuayaka a son of Madhava.

<sup>23</sup> The Astareva Britmans has by Martin Hang 2 vols. Eombay been edited text with translation 1863 see J St., 1x. 177-380 (1863)

To each of these Brahmanes is also annexed an Aran Jaka, or 'ion set-portion,' that is, the pottion to be studied in the forest by the sages Ino in to us through Megasthenes as the fitch, and also by their disciples. This forest-life is endeadly only a later stage of development in Brahmanneal contemplation, and it is to at that we must only a student of the same and it is to at that we must only a student on the complete absorption in mysuc devotion by which the Hindés are ominately distinguished. Accordingly, the writings directly designated as Aranyakes bear this character impressed upon them in's very married degree, they consist in great part of Upanished. Only, in which, generally peaking a bold and vigorous facility of thought cemind fall to be recognised, however much of the bizarre they may at the same time contain.

The Astareya-Arenyaka 330 consists of five books, each of which again is called Aranyaka. The second and third books\* form a separate Upanishad, and a still further subdivision here takes place, masmuch as the four last sections of the second book, which are particularly consonant with the doctrines of the Vedanta system, pass κατ' εξοχήν as the Anarenopanishad . Of these two books Mahidasa Antareva is the reputed author, he is supposed to be the son of Visala and Itara, and from the latter his name Artareya is derived. This name is indeed several times quoted in the course of the work itself as a final authority, a circumstance v hich conclusively proves the correctness of tracmg to him the views therein propounded For we must divest ourselves of the notion that a teacher of this period ever put his ideas into writing, oral delivery was his only method of imparing them to his pupils, the knowledge of them was transmitted by tradition until it became fixed in

The legend of Sunaheepa (m. 13-78) had been desc. sed by Roth, see also M Multer Hest of A S L, p 573 ff Another s ction of it (vni. 5-20) treating of royal mangers uous had previously been edited by

some definite form or other, always however retaining his name It is in this way that we have to account for the fact of our finding theauthors of works that have been handed down to us, mentioned in these works themselves For the rest, the doctrines of Aitareya must have found especial favour. and his pupils have been especially numerous, for we find his name attached to the Brahmana as well as the Aranyaks. With respect to the former, however, no reasons can for the present be assigned, while for the fourth book of the Alanyaka we have the direct information that it belongs to Asvalayana, the pupil of Saunaka, nav. this Saunaka himself appears to have passed for the author of the fifth book, according to Colebrooke's statements on the subject, Misc Ess, 1 47, n. The name of Altareya is not traceable anywhere in the Brahmanas, he is first mentioned in the Chhandogyopanishad earliest allusion to the school of the Altare, ins is in the Sama-Sútras -To judge from the repeated mention of them in the third book, the family of the Mandukas, or Mandukeyas, must also have been particularly active in the development of the views there represented. Indeed, we find them specified later as one of the five schools of the Rigveda, yet nothing bearing their name has been preserved except an extremely abstruce Upan shad, and the Manduki-Sikshi, a grammatical treatise however apparently only belongs to the Atharvan and exhibits completely the standpoint of a rigid system latter might possibly be traced back to the Mandúkeya who is named here as well as in the Rik-Pratifakhya

The contents of the Antareya-Aranyaka, as we now have it \$5 supply no direct clue to the time of its composi-

<sup>\*</sup> I find an Ávvaláyana Bráhmana alva quoted but am unable to give any particulars regarding it. [In a M3 of the Art. Ar India Office Library 086, the entire work is described at the end as Áfraldyanok tam Aranyakam.]

See I St., 1 387-392 I am now in possession of the complete text, but have nothing material to add to the above remarks. Great streams laid upon keeping the particular doctrines secret, and upon

the high importance of those familiar with them. Among the name mentioned in the course of the work. Againveld-years and of significance on account of its formation. The interesting passages on the three pidhas of the Veida mirkhuya satinhadidaha, protiptiona = padagrafika and bilayen enterrine "twanapitha are disvisach by M. Muller on M. Prit. 1 2-4 (see also bild, Nact rage, p. 11)

tion, other than the one already noticed, namely, that in the second chapter of the second book the extent arrangement of the Ri.-Sambita is given. Again the number of teachers individually mentioned is very great, particularly in the third book—among them are two Sakalyas, a Krishna Harita, a Patichilachanda—and this may be considered as an additional proof of its more recent origin, a conclusion already implical by the spirit and form of the opmons enuncised. See

The Kaushital granuata, in its present form, consists of three books, but it is uncertain whether it is complete?" It was only recently that I lighted upon the two first books. These deal rather with ritual than with specula tion. The third book is the so-called Kaushfaly-Upanishad t a work of the highest interest and importance. Its first achydua gives us an extremely important account of the ideas held with regard to the path to, and arrival in, the world of the blessed, the significance of which in relation to similar ideas of other races in not yet quite apparent, but it promises to prove very rich in information The second achydra gases us in the ceremonies which it describes, amongst other things, a very pleasing picture of the varmth and tend ruces of farms, ties at tent period. The third adhiava is of meetimable value in connection with the history and development of the epic myth, inas much as it represents fugra battling with the same powers of nature that Ariuna in the epic saboues as evil demona. Lastly, the fourth adayaya contains the second recension of a legend v high also appears, under a somewhat different

<sup>24</sup> The circumstance here emphasized may be used to support the very opposite view indeed I have so represented it in the similar case of the Ldtysyans Suirz (see below) This latter view non appears to me

form, in the Åranyaka of the White Yajus, the legend namely, of the instruction of  $\alpha$  Brahman who is very wise in his own esterm, by a warner called Ajatesatru, king of Kasi. This Upanishad is also peculiarly rich in geographeal data, throwing light upon its origin. Thus the name of Chitra Gangyayan, the vise king in the first adhyday who instructs Artin, clearly points to the Graga According to 1 10, the northern and southern mountains its, Himaxant and Vindhya, enclose in the eves of the author the whole of the known world, and the list of this meighbouring tribes in 1 1 perfectly accords with the That, moreover, this Upanishad is exactly contemporance us with the Vrihad-Aranyaka of the White Yajus is provided by the position of the names Arun, Steaketu, Ajudestru, Gargya Balaki, and by the identity of the legends about the latter [See 18 st., 352-420]

We have an interpretation of both Aranyakas, that is to eay, of the second and third books of the Aitare; a-Aranyaks, and of the third book of the Kaushitaki-Aranyaka in the commentary of Samkaiaenarya, a tacher who lived about the eighth century AD, 38 and who was of the highest importance for the Vedanta school only did he interpret all the Vedic texts, that is all the Upanisheds, upon which that school is founded he elso commented on the Vedanta Sutra itself, besides composing a number of smaller works with a view to elucidate and establish the Vedanta doctrine His explanations, it is true, are often forced, from the fact of their having to accommodate themselves to the Vedanta system, still they are of high importance for us Pupils of his Anan dajmana, Anandagiri, Anandatirtha, and others, in their turn composed glosses on his commentaries Of most of these commentaries and glosses we are now in possession as they have been recently edited, together with their Upanishads, Ly Dr Roer, Secretary to the Asiatic Society of Bengal, in the Bib'io'neca Indica, a periodical appearing under the auspices of that Society, and devoted exclusively

to the publication of texts Unfortunately the Kaushitak -Upanishad is not yet among the number neither is the Maitrayany-Upanishad, of which we have to speak in the sequel. It is, however, to be hoped that we shall vet receive both . And may yet a third, the Vashkala-Upanishad, be recovered and added to the list of these Upanishads of the Rik! It is at present only known to us through Anquetal Duperron's Oupnekhat, 11. 366-371, the original must therefore have been extant at the time of the Persian translation (rendered into Latin by Anguetil) of the principal Upanishads (1656) The Vashkala-Sruti is repeatedly mentioned by Sayana We have seen above that a particular recension of the Rik-Samhita. which has likewise been lost, is attributed to the Vashkalas This Upanishad is therefore the one sorry relic left to us of an extens ve cycle of literature It rests upon a legend repeatedly mentioned in the Brahmanas. which in substance, and one might almost say in name also, corresponds to the Greek legend of Gany-Medes Medhatithi, the son of Kanva is carried up to heaven by Indra, who has assumed the form of a ram, and during their flight he inquires of Indra who he is. Indra, in reply, smilingly declares himself to be the All-god identifying himself with the universe As to the cause of the abduction, he goes on to say that, delighted with Medhatithis penance, he desired to conduct him into the right path leading to truth, he must therefore have no further With regard to the date of this Upanished misgiving nothing more definite can of course at present be said than that its general tenor points to a tolerably high antiquity 40

We now descend to the last stage in the literature of the Rigveds viz, to its Sutras

First, of the Sraita-Sutras, or text-books of the sacrificial rite Of these ve possess two, the Sútra of Asvalation in 12 adhyduas, and that of Sankhayaha in 18

<sup>\*\*</sup> Both have now b en published and translated by Cowei in the (1853-69) Shilotheen fact of the Kan at Up See now my special paper on the (Laic 1861) is scrompanied with subject in f St, in 33-42 the orithe column of Sunkannanda, the gualitative hounds with the column of Sunkannanda, the grades the northeen met with

adhyayas The former connects itself with the Aitareva-Brahmana the latter with the Sankhayana Brahmana, and from these two works frequent literal quotations are respectively borrowed From this circumstance alone as well as from the general handling of the subject, we might infer that these Sutras are of comparatively recent origin. and direct testimony is not wanting to establish the fact Thus the name Asyalayana is probably to be traced back to Asvala, whom we find mentioned in the Aranyaka of the White Yaius as the Hotar of Janaka, king of Videha (see J St , 1 441) Again, the formation of the word by the affix ayana,\* probably leads us to the time of established schools (ayana)? However this may be, names formed in this way occur but seldom in the Brahmanas themselves, and only in their latest portions, in general, therefore they always betoken a late period. We find corroboration of this in the data supplied by the contents of the Asvalayang-Satra. Among the teachers there quoted is an Asmarathya, whose kalpa (doctrine) is considered by the scholast on Panini, iv 3 105 probably following the Mahabhashya.41 as belonging to the new lalpas implied in this rule, in contradistinction to the old kulpas If, then, the authorities quoted by Asvalayana were regarded as recent, Asvalayana himself must of course have been still more modern, and therefore we conclude, assuming this statement to originate from the Mahabhashya, that Asvalayana was nearly contemporane-ous with Panini Another teacher quoted by Asvalayana, Taulvali, is expressly mentioned by Panini (ii. 4, 61) as belonging to the pranchas, or "dwellers in the east"—At the end there is a specially interesting enumeration of the various Brahmana-families, and their distribution among the family stems or Bhrigu, Anguras, Atri, Visvamitra Kasyapa, Vasishtha and Agastya.—The sacrifices on the Surasyati, of which I shall treat in the sequel are here only briefly touched upon and this with some differences in the

yan, Alambayan, Jit Sayans, Au dumbanyana, Kandamayara Ka tudiana, Khungana D-abyayana Pikk hayana Boardrana, Langluk Ann, Rohiyara Lu vayana Labou Ann, Rohiyara Lu vayana Labou

names, which may well be considered as later corruptions. We have also already seen that Asyalavana is the author of the fourth book of the Attareva-Aranyaka, as also that he was the pupil of Saunaka, who is stated to have destroyed his own Sútra in favour of his pupil's work

The Sútra of Sankhayana wears in general a somewhat more ancient aspect, particularly in the fifteenth and sixteenth books, where it assumes the appearance of a Brahmana The seventeenth and eighteenth books are a later addition, and are also ranked independently, and separately commented upon. They correspond to the first two books of the Kausintaki-Araniaka

From my but superficial acquaintance with them, I am not at present in a position to give more detailed information as to the contents and mutual relation of these two Sutias 42 My conjecture would be that their differences may rest upon local grounds also, and that the Sutra of Asvalayana, as well as the Artareya-Brahmana may belong to the eastern part of Hudustan, the Sutra of Sankhayana, on the contrary, like his Brilmana, rather to the western . The order of the ceremonial is pretty much the same in both, though the great sacrifices of the kings &c , viz , tayopeya (sacrifice for the prospering of the means of subsistence), iájasúya (consecration of the king) asiamedha (hoise sacrifice), purushamedha (human sacrifice), arramedha (universal sacrifice), are handled by Sankhavana with far more minuteness

For Asvalayana I find mention made of a commentary by Narayana 45 the son of Krishnajit, a grandson of Smpati A namesake of his, but son of Pasupatisaiman,

<sup>\*</sup> Tre As aliyana Su'ra has since been printed, Bill Ind (Cale 1864-74) accompanied with the comm of Náravana Gárgya, edited by Ráma Náriyana and Anandachandra A special comparison of it with the Sinkhayana Quua 18 still wanting Buhler, Ca alogue of 1188 from Quiarat 1 154 (1871) cites a com mentary by Devatrita on the Atv S- S likewise a partial one by

<sup>&</sup>quot; This is a confusion The abovenamed Náráyana wrote a commen tary upon the Sankhayana Gribya . but the one who commented the Asvalayana Sraut. Sútra calla him self in the introduction a san of Narasinha Just as Marayana the commentator of the U tara Na: thadhija, does, who, according to tradition (Poer Pref p viii., 1855), lived some five hundred years ago Are those two to be regarded as one and the same person? hee ! Sir . 2, 298 (1860)

composed a paddhat, t'outlines') to Sankhe ana, after the example of one Brahmadatta. When he haved is uncertain but we may with some probability using him to the sixteenth century. According to his own statements he was a native of Malayadeas. Further, for the Sutrea of Sankhayana we have the commentary of Varadatasuit. Anantitya Three of its adhlydgas were lost, and have been supplied by Dassásrman Munjasunu, viz, the ninth tenth and eleventh "On the last two adhyayas, xvii, xviii, there is a commentary by Govinda. That these commentaries were preceded by others, which, however, have since been lost, is obvious, and is besides expressly stated by Anartitya.

Of the Grahya Sutra; of the Rigreda we likewise only possess two, those of Asvala, and (in four adhyuyas) and of Sankhayana (in six adhyayas). That of Saunaka is indeed repeatedly mentioned, but it does not seem to be

ary longer in existence

However widely they may differ as to details, the contents of the two works are essentially identical, especially as regards the order and distribution of the matter. They treat mainly, as I have already stated (p 17) of the ceremomes to be performed in the various stages of conjugal and family life, before and after a buth, at marriage, at the time of and after a death. Besides these however. manners and customs of the most diverse character are depicted, and 'in particular, the sayings and formulas to be uttered on different occasions bear the impress of a very high antiquity, and frequently carry us back into the time when Brahmanism had not yet been developed" (see Stenzier in I St , ii 159) It is principally popular and superstatious notions that are found in them , thus, we are pointed to star-worship, to astrology, portents, and witchcraft, and more especially to the adoration and propitiation of the evil powers in nature, the averting of their malign influence, &c It is especially in the pitritarpana or oblation to the Manes that we find a decisive proof o

<sup>\*\*</sup> Sections 3-5 of the fourth book have been published by Donner in his Pindapririgana (Berlin, 1870), and the section reading to the legond of Sunah em (xv. 17-27) by

Streater (1861), the variants presented therein to the parallel passes in the Air British had already been given by M. Muller. A. S. L. p. 573. ff

the modern composition of these works, as the forefathers are there enumerated individually by name-a custom which, although in itself it may be very ancient (as we find a perfect analogy to it in the Yeshts and Nerengs of the Parsis), yet 'n this particular application belongs to a very recent period, as is apparent from the names themselves For not only are the Rishis of the Rik-Samhita cited in their extant order, but all those names are likewise ment-oned which we encounter as particularly significant in the formation of the different schools of the Rik. as well as in connection with its Brahmanes and Sútras, for example, Vahlala, Sakalya Mandukeya, Astareya Pangya, Keushitaka, Saunaka Asvalayana, and Sankhayanz themselves, &c Joined to these, we find other names with which we are not yet otherwise acquainted, as also the names of three female sages, one of whom Gárgi Vachaknavi, meets us repeatedly in the Vrihad-Aranyaka of the White Yajus, as residing at the court of Janaka. The second is unknown, but the name of the third, Sulabha Maitrey, is both connected with this very Janaka in the legends of the Maha-Bharata," and also points us to the Ex lablar. Brahmanani quoted by the echcl.ast on Panin, iv 3 105, probably on the authority of the Mahabhashya, 65 as an instance of the 'modern Brahmanas implied by this rule Immediately after the Rishis of the Rik-Samhita, we find mention of other names and works which have not yet been met with in any other part of Vedic h'erature. In the Sankhayane-Grihya we have these Sumorta-Jarren Varsampayana-Pada-súlra-Shashva [-Garasa-Bach-u] and in the Asvalayana-Gribya these Sumant Jarmin Varsamvavana Parla--4'-a-bharata-mandbharata-dr armacharyah a The latter

passage is evidently the more modern and although we must not suppose that the Maha-Bharata in its present form is here referred to, still, in the expression Vaisompayano mahabharatacharyah apparently indicated by this passage, there must at all events be implied a work of some compass, treating of the same legend, and therefore forming the basis of our extant text. The passage seems also to indicate that the same material had already been handled a second time by Jaimini, whose work however, can have borne but a distant resemblance to the Jamuu-Bharata of the present day We shall find in the sequel frequent confirmation of the fact that the origin of the epic and the systemat c development of Vedic literature in its different schools belong to the same period. Of a Sutra by Sumantu, and a Dharma by Paila, we have no knowledge whatever It is only in more modern times in the Puranas and in the legal literature proper, that I find a work attributed to Sumantu, namely, a Smriti-Sastra, while to Paila (whose name appears from Pan IV I II8) is ascribed the revelation of the Rigveda-a carcumstance which at least justifies the inference that he played a special part in the definitive completion of its school development -It is, however, possible to give a wholly different interpretation of the passage from Aśvalayana, and in my opinion it would be preferable to do so We may divest the four proper names of any special relation to the names of the four works and regard the two groups as independent,49 as we must evidently assume them to be in the Sankhayana Gribya. If this be done then what most readily suggests itself in connection with the passage is the manner in which the Puranas apportion

distinct to one another, and as an other Petitisthers of the Back the Petitisthers of the Back the Petitisthers of the Back the Petitisthers of the Back and the Yana county days and the Yana county days and the Addid. We must therefore more sund by it works in hidded though the meaning of the word in the petitisthers of the words and petitisthers of the words and petitisthers of the words and appropries the ene in which all relating the petitisthers of the subject further ext.

This interpretation becomes importance after the rectification of the text (see the previous rote, according to which no longer four but five runds of works are in question.

What is meant in the latter [ard of not 47 in the Ast Grid. two] by the worl thathya, appears from the Prati Athya of the White Yajus where (1 10 20) redering and Addigues u are tunnd in contradir

the revelation of the several Vedas, masmuch as they assign the Atharvaveda to Sumantu, the Samareda to Jaimini, the Yajurveda to Vaisampayana, and the Rigveda to Paila But in either case we must assume with Roth, who first pointed out the passage in Asvalayana (op a, p 27) that this passage, as well as the one in Sankhayana, has been touched up by later interpolation. 49 otherwise the dates of these two Grihya-Sútras would be brought down too far! For although, from the whole tenor of both passages that in the Asvalavana-Gribva, as well as that in the Sankhayana Griliya-which for the rest present other material discrepancies of detail-it is sufficiently clear that they presuppose the literature of the Rigveda as entirely closed, still the general attitude of both works shows their comparatively ancient origin -The question whether any connection exists between the Smnti-Sastra of Sankha and the Grihya Sutra of Sankhayana, remains still unanawered

For both Grihya-Sútras there are commentaries by the same Narayana who commented the Srauta-Sútra of Aśvalay and so They probably belong to the fifteenth century \* There are, besides, as in the case of the Śrauta-Sutras,

comm of the Sankh Unhya, son of he shnapet, and grandson of Sripati This third Nar lived A D 1939, are Catalogue of the Berlin MSS, p 354, sub No 1282)-The text of the Asval Gribya has been edited by Stengler with a translation (In discl. many small treatises in connection with the Gribvastirts, some of them being summanes, in which the larger works are reduced to system. Among them is a Paddh it to the Sankh ivana-Gribya by Ramachindra who lived in the Namisha forest in the initidle of the fifteenth century, and I am inclined to think that this Namisha forest was the birthplace of the Sutra itself. It is penhaps for this reason that the tradition connected with it was so well preserved in that distinct.

The extant Prátisákhya-Sutra of the Rik Samhita is ascribed to Saunaka, who has been repeatedly mentioned already, and who was the teacher of Asvalayana This extensive work is a metrical composition, divided into three Adadas, of six patalas each, and containing 103 , kandikas in all The first information regarding it was given by Roth, op c p 53 ff - According to tradition, it is of more ancient origin than the Sutras of Asvalayana just mentioned, which only purport to be written by the pupil of this Saunaka, but whether it really was composed b, the latter, or whether it is not much more probably merely the work of his school must for the present remain undecided The names quoted in it are in part identical with those met with in Yaska's Nirukti and in the Sutra of Panini The contents of the work itself are however as yet but little known 11 in their details. Of special interest are those passages which treat of the correct and incorrect pronunciation of words in general. There is an excellent commentary on it by Uata, which professes in the introduction to be a remodelling of an earlier commentary by Vishnuputra .- The Upalekha is to be con-

authors bear the same name. But to the transport of transport of the transport of transport

sidered as an epitome of the Pratisakhya-Sútra, and to some extent as a supplement to it [specially to chapters x xl] It is a short treatise, numbered among the Pansishtas (supplements), and it has in its turn been

repeatedly commented upon 12

A few other treatises have still to be noticed here, which, although they bear the high sounding name of Vedángas, or 'members of the Veda,' are yet, as above stated (p 25), only to be looked upon as later supplements to the literature of the Rigveda the Siksha, the Chhandas, and the Justisha All three exist in a double recension according as they profess to belong to the Rigveda or to the Yajurveda. The Chhandas is essentially alike in both recensions, and we have to recognise in it the Sutra on prosed; ascribed to Pingala 53 It is, moreover, like both the other treatises, of very recent origin. We have a proof of this, for instance, in the fact that, in the manner peculiar to the Indians it expresses numbers by words, it and feet by letters, and that it treats of the highly elaborated metres, which are only found in modern poetry 55 The part dealing with Vedic metres may perhaps be more ancient. The teachers quoted in it bear in part comparatively ancient

ably altered by the prolongation and repetition of the syllables, by the insertion of additional syllables serving as a rest for the chanting, and so forth, and only thus were they transformed into samans Two of these songbooks, the Granagoya-gana (erroneously called Voyaodna), in seventeen prapatiakas, and the Aranya-odna, in six prapathatas, follow the order of the richas contained in the first part of the Samhita, the former being intended for chanting in the gramas, or inhabited places, the latter for chanting in the forest Their order is fixed in a comparatively very ancient Anukramaní, which even bears the name of Brahmana, viz, Rishi-Brahmana The other two ganas, the Tha-gara, in twenty-three prapathakas, and the Uhya-gána, in six prapáthakas, follow the order of the richas contained in the second part of the Sarahita mutual relation here still requires closer investigation Each such saman evolved out of a ruch has a special techmeal name, which probably in most cases originated from the first inventor of the form in question, is often, however, borrowed from other considerations, and is usually placed in the manuscripts before the text itself As each rich can be chanted in a great variety of ways, in each of which it bears a particular name, the number of sarans, strictly speaking, is quite unlimited, and is of course far greater than that of the richas contained in the Samhita Of these latter there are 1540," of which all but seventyeight have been traced in the Rik-Samhita Most of them are taken from its eighth and ninth mandalas

I have already remarked (p 9) upon the artiquity of the readings of the Sama Samhitá as compared with those of the Rak-Samhita. It follows from this almost with

much as 249 of those occurring in the first park are repeated in the second, three of their twice, while nine of the ribha which occur in the second part only appear twice [See on this Whitney's detailed table at the end of his Tabe lunische Darvellung der gegrassitzen Verball mass der Sughaben des Rik Siman, Wessen Yayus und Albarum I St., in 321, F., 36, (1853)!

## SAMAVED 4 SAMHITA

certainty that the richas constituting the former were borrowed from the songs of the latter at a remote period, before their formation into a Rik Samhita had as yet taken place, so that in the interval they suffered a good deal of wearing down in the mouth of the people, which was avoided in the case of the richas applied as samans, and so protected by being used in worship. The fact has also already been stated that no verses have been received into the Sama-Samhita from those songs of the Rik-Samhita which must be considered as the most modern find no sámans borrowed from the Purusha-Súkta, in the ordinary recensions at least, for the school of the Naigeyas has, in fact, incorporated the first five verses of it into the seventh prapathaka of the first part—a section which is peculiar to this school The Sama-Samhita, being a purely derivative production, gives us no clue towards the determination of its date. It has come down to us in two recensions, on the whole differing but little from each other, one of which belongs to the school of the Ranayaniyas, the other to that of the Kauthumas Of this latter the school of the Negrs, or Nargeyas, alluded to above, is a subdivision, of which two Anukramanis at least, one of the desties and one of the Rishis of the several verses, have been preserved to us 60 Not one of these three names has as yet been traced in Vedic literature, it is only in the Sútras of the Samaveda itself that the first and second at least are mentioned, but even here the name of the Negas does not appear -The text of the Ranayaniyas was edited and translated, with strict reference to Sayana's commentary, by the missionary Stevenson in 1842, since 1848 we have been in possession of another edition, furnished with a complete glossary and much

The seventh populitate, who is possible to the same been the source been decovered. It bears the title Arm syla Sambit, and has been educated by Singfried Goldschmidt in Monatherichted Farl Acad 1858, pp 235–248. The editor points out that he Armyseighers is based upon the large manner of the Armyseighers is based upon the period of the Armyseigher of the Armyseigher and that MSS have probably been preserved of its inflaming also (in 241) — A London MS of Baratzavious Samuelalvavarana Samuelalvavarana Samuelalvavarana

additional material, together with translation, which we

owe to Professor Benfey, of Gottingen et

Although, from its very nature, the Samhita of the Samaveda is poor in data throwing light upon the time of its origin, yet its remaining literature contains an abun-

dance of these, and first of all, the Brahmanas The first and most important of these is the Tándya Brahmana, also called Pa 7-haursa, from its containing twenty-five books. Its contents, it is true, are in the main of a very dry and unprofitable character, for in mystic trifling it often exceeds all bounds, as indeed it was the adherents of the Samaveca generally who carned matters furthest in this direction. Nevertheless, from its great extent, this work contains a mass of highly interesting legends, as well as of information generally It refers solely to the celebration of the Soma sacrifices, and to the chanting of the samans accompanying it, which are quoted by their technical names These sacrifices were celebrated in a great "ariety of ways, there is one special classification of them according as they extended over one day or several, or finally over more than twelve days. The latter, called sattras, or sessions, could only be performed by Brahmans, and that in considerable numbers, and might last 100 days, or even several years. In consequence of the great variety of ceremonies thus involved, each bears its own name, which is borrowed either from the object of its celebration, or the sage who was the first to celebrate it, or from other considerations. How for the order of the Samhitá is here o' cerved has not yet been investigated,

is said to be still in existence in Molaher, see Rost, / St in

in To and Some acris the lange reputation is variefor at least preparator dura, there are not there sixe not never the house day, on refer only to those days were a Some piece days. but in any case it would be a mistake to suppose that for all the different sacrifices enumerated in the Brahmana corresponding prayers exist in the Samhita. On the contrary, the latter probably only exhibits the verses to be chantled generally at all the Soma sacrifices, and the Brahmana must be regarded as the supplement in which the prodifications for the separate sacrifices are given, and also for those which arose later. While, as-we saw above (p 14), a combination of verses of the Rik for the purpose of recitat on bears the name fastra, a similar selection of different samans united into a whole is usually called ultrate (J sech, to speak), stoma (J stat, to prase), or prestita (J prachh, to ask), and these in their turn, like the fastras, receive different appellations

Of special significance for the time of the composition of the Tandya Brahmana are, on the one hand, the very minute descriptions of the sacrifices on the Sarasvati and Drishadvati, and, on the other, the Vratyastomas, or sacrifices by which Indians of Aryan origin, but not living according to the Brahmanical system, obtained admission to the brahman community The accounts of these latter sacrifices are preceded by a description of the dress and mode of life of those who are to offer them "They drive in open chariots of war, carry bows and lances, wear turbans, robes bordered with red and having fluttering ends, shoes, and sheepskins folded double, their leaders are distinguished by brown robes and silver neck-ornaments. they pursue neither agriculture nor commerce, their laws are in a constant state of confusion, they speak the same language as those who have received Brahmanical consecration, but nevertheless call what is easily spoken hard to pronounce" This last statement probably refers to

prakritic, dialectic differences, to the assimilation of groups of consonants, and similar changes peculiar to the Prakrit The great sacrifice of the Namishiya Rishis vernaculars is also mentioned, and the river Sudaman. Although we have to conclude from these statements that communication with the west, particularly with the non-Brahmanic Arvans there, was still very active and that therefore the locality of the composition must be laid more towards the west 61 still data are not wanting which point us to the Thus, there is mention of Para Atnara, king of the Kosalas, of Trasadasyu Purukutsa, who is also named in the Rik-Samhita, further of Namin Sapya, king of the Videhas (the Nimi of the epic), of Kurukshetra, Yamuna The absence, however of any allusion in the Tandya-Brahmana either to the Kuru-Panchalas or to the names of their princes, as well as of any mention of Janaka, 13 best accounted for by supposing a difference of locality Another possible, though less likely, explanation of the fact would be to assume that this work was contemporary with, or even anterior to, the flourishing epoch of the kingdom of the Kuru-Panchalas The other names quoted therein seem also to belong to an earlier age than those of the other Brahmanas, and to be associated, rather, with the Rishi period. It is, moreover, a very significant fact that scarcely any differences of opinion are stated to exist amongst the vanous teachers. It is only against the Kaushitakis that the field is taken with some acrimony, they are denoted as vrátyas (apostates) and as yamárakírna (unfit to sacrifice) Lastly, the name attached to this Brahmana, viz, Tandya, is mentioned in the Brahmana of the White Yajus as that of a teacher, so that, combining all this, we may at least safely infer its priority to the latter work &

The Tindya Bridmana has been cultad, logarher with Siyana a commentary, in the Bibl Ind (1969-74) by Amadekandra Vedintavigisa At the time of the Biblioka Sutra (see Kielborn, 1 S. x. ag1); timert still have been accentuated and that in the same manner as the Sata patha, in Kunnfrilabbatta time, on the contrary (the last ball of the

The Shadwidsa-Brahmana by its very name proclaims itself a supplement to the Panchavinsa-Brahmana. It forms, as it were, its twenty-sixth book, although itself consisting of several books. Sayana, when giving a summary of its contents at the commencement of his here excellent commentary, says that it both treats of such ceremonies as are not contained in the Panchavinsa-Brahmana, and also gives points of divergence from the latter It is chiefly expiatory sacrifices and ceremonies of imprecation that we find in it, as also short, comprehensive general rules The fifth book (or sixth adhyaya) has quite a peculiar character of its own, and is also found as a separate Brahmana under the name of Adbhuta-Brahmana, in the latter form, however, with some additions at the end It enumerates untoward occurrences of daily life, omens and portents, along with the rites to be performed to avert their evil consequences These afford us a deep maight into the condition of civilisation of the period, which, as might have been expected, exhibits a very advanced phase. The ceremonies first given are those to be observed on the occurrence of vexatious events generally, then come those for cases of sickness among men and cattle, of damaged crops, losses of precious things. &c , those to be performed in the event of earthquakes. of phenomena in the air and in the heavens, &c. of marvellous appearances on altars and on the images of the gods, of electric phenomena and the like, and of miscarriages 60 This sort of superstition is elsewhere only treated of in the Gribva-Sutras, or in the Panisishtas (supplements), and this imparts to the last adhvava of the Shadvinsa-Brahmana-as the remaining contents do to the work generally—the appearance of belonging to a very modern period And, in accordance with this, we find mention here made of Uddalaka Aruni, and other teachers, whose names are altogether unknown to the Panchavinsa-Brahmana - A sloka is cited in the course of

ectenth century according to Burnell), it was already being hinded down without accents, as 1 the present day See Muller A.S. L., p. 348. Burnell, Simaridhána Erábinaps, Preface, p. 1.

<sup>66</sup> The Addhuta Bridimina has been published by increase, text with translation and explanatory notes, in Zwa reduche Texa uter Omina and Portenta (1859)

the work, in which the four ya.gas are still designated by their more ament names, and are connected with the four lunar phases, to which they evidently owe their origin, although all recollection of the fact had in later times died out? This, 9fc.a taself we are perhaps justified in assigning to an earlier time than that of Megasthenes, who infoims us of a fabulous division of the mundane ages amelogous to that given in the epic. But it does not by any means follow that the Shadvinse-Brahmana, in which the 8fc/a is quoted, itself dates earlier than the

time of Megasthenes

The third Brahmana of the Samaveda bears the special title of Chhándogua-Bráhmana, although Chhandogua is the common name for all Saman theologians ever, also find it quoted, by Samkara, in his commentary on the Brahma-Sútra, as "Tándraára śrut," that is to say, under the same name that is given to the Panchavinsa-Brahmana The two first adhydyos of this Brahmana are still missing, and the last eight only are preserved, which also bear the special title of Chhandoryoranishad This Brahmana is particularly distinguished by its rich store of legends regarding the gradual development of Brahmanical theology, and stands on much the same level as the Vrihad-Aranyaka of the White Yains with respect to opinions, as well as date, place, and the individuals mentioned. The absence in the Vrinad-Aranyala, as in the Brihmana of the White Yajus generally, of any reference to the Naumisiya-Rishis, might lead us to argue the priority of the Chhandogyopanishad to the Vrihad-Aranyaka Still, the mention in the Chhandogyopanished of these, as well as of the Mahavrishas and the Gandharas-the latter, it is true, are set down as distant-ought perhaps only to be taken as proof of a somewhat more western origin, whereas the Vrihad-Aranyaka belongs, as we shall hereafter see, to quite the eastern part of Hindustan numerous animal fables, on the contrary, and the mention of Mahidasa Aitareya, would sooner incline me to suppose that the Chhandogyopanishad is more modern than the Vrihad-Aranyaka. With regard to another allusion, in

<sup>67</sup> Differently Roth in his essay Die Lehre to: d n ner Weltaltern (Tubingen 1800)

itself of the greatest significance, it is more hazardous to venture a conjecture. I mean the mention of Krishna Devakiputra, who is instructed by Ghora Angirasa The latter, and besides him (though not in connection with him) Krishna Anguasa, are also mentioned in the Kaushitaki-Brahmana, and supposing this Krishna Angirasa to be identical with Krishna Davakiputra, the allusion to him might perhaps rather be considered as a sign of priority to the Vribad-Aranyaga. Still, assuming this identification to be correct, due we ght must be given to the fact that the name has been altered here—instead of Angirasa, he is called Dovakipatra, a form of name for which we find no analogy in any other Vedic vitting excepting the Vansas (genealog...al tables) of the Vrihad-Aranyaka, and which therefore belongs, at all events, to a tolerably late period.\* The sign ficance of this allusion for the understanding of the position of Krishna at a later period is obvious Here he is yet but a scholar, eager in the pursuit of know ledge, belonging perhaps to the military caste He cortainly must have distinguished himself in some way or other, howe er little we know of it, otherwise his elevation to the rank of delty, brought about by external carcumstances, would be nexplicable 63

The fact of the Chhandogyopanns and and the Vrihad-knayaka hang in common the names Prachana Jar-ali, Uslasti Chyrayana, Sindilya, Satyakama Jebala, Uddalaka Arun, Setaleru, and Aśrapan, makes it clear that they were as nearly as possible contemporary works, and this opports also from the generally complete identity of the se-enth book of the former with the corresponding passages of the Vrihad-Aranyaka What, however, is of most sterrificance, as tending to establish a lae, date for

the Chhandogyopanishad, is the voluminous literature, the existence of which is presupposed by the enumeration at the beginning of the ninth book Even supposing this ninth book to be a sort of supplement (the names of Sanatkumara and Skanda are not found elsewhere in Vecic literature, Narada also is otherwise only mentioned in the second part of the Aitareya-Brahmana (3), there still remains the mention of the 'Atharvangirasas,' as well as of the Itihasas and Puranas in the fifth book. Though we are not at liberty here any more than in the corresponding passages of the Vrihad-Aranyaka, to understand by these last the Itihasas and Puranas which have actually come down to us, still we must look upon them as the forerunners of these works, which, originating in the legends and traditions connected with the songs of the Rik, and with the forms of worship, gradually extended their range, and embraced other subjects also, whether drawn from real life, or of a mythical and legendary character Originally they found a place in the Brahmanas, as well as in the other expository literature of the Vedas, but at the time of this passage of the Chhandogyopanishad they had possibly already in part attained an independent form, although the commentance, \* as a rule, only refer such expressions to passages in the Brabmanas themselves The Maha-Bharata contains, especially in the first book, a few such Itahasas, still in a prose form, nevertheless, even these fragments so preserved to us belong, in respect both of style and of the conceptions they embody, to a much later period than the similar passages of the Brahmanas. They however suffice, together with the slokas, gathas, &c , quoted in the Brahmanas themselves, and with such works as the Barbaddaivata, to bridge over for us the period of transition from legend to

epic poetry

We meet, moreover, in the Chhandogyopanishad with
one of those legal cases which are so seldom mentioned in
Vedic literature, viz., the infliction of capital punishment
for (demed) theft, exactly correstonding to the severe

And a few times in the Atharva-Samhitá, as also in the Vensa of the Samwadhina Brill mags.

case but Sáyam, Harardmin, and Drivenagaños in similar passages of the Saspatha Brithmana and Taturha-Aranyska

enactments regarding it in Manu's code Guilt or innocence is determined by an ordeal, the carrying of a redhot are, this also is analogous to the decrees in Manu, We find yet another connecting link with the state of culture in Manu's time in a passage occurring also in the Vribad-Aranyaka, viz. the doctrine of the transmigration of souls. We here meet with this doctrine for the first time, and that in a tolerably complete form, in itself, however, it must certainly be regarded as much more ancient The circumstance that the myth of the creation in the fifth book is on the whole identical with that found at the beginning of Manu, is perhaps to be explained by regarding the latter as simply a direct imitation of the former The tenth book, the subject of which is the soul. its seat in the body and its cordition on leaving it, ie, its migration to the realm of Brahman, contains much that is of interest in this respect in connection with the abovementioned parallel passage of the Krushitaky-Upanishad. from which it differs in some particulars. Here also for the first time in the field of Vedic literature occurs the name Ráhu, which we may reckon among the proofs of the comparatively recent date of the Chhandogyonanishad

Of expressions for philosophical doctrines we find only Upanishad, Adesa, Guhya Adesa (the keeping secret of doctrine is repeatedly and urgently inculcated). Urakhyana (explanation) The teacher is called acharya [as he is also in the Sat Br ], for "inhabited place," ardha is used ,

single flokas and gathas are very often quoted
The Chhandogyopanishad has been edited by Dr Roer in the Bibliotheca Indica, vol in, along with Samkara's commentary and a gloss on it 70 Fr Windischmann had previously given us several passages of it in the original. and several in translation, see also I St. 1 254-273

The Kenopanishad has come down to us as the remnant of a fourth Brahmana' of the Samaveda, supposed to be its ninth book.\* In the colophons and in the quotations found in the commentaries, it also bears the other-

<sup>79</sup> In this series (1854-62) a trans first eight books S mk\_ra furni.her lation also has been published by us with informs on a the begin Rájendra Lála Mit-a. ning of his commer, are Regarding the conterts of the

was unknown name of the Talunal draw! It is divided into two parts the first, composed in Glakes, treats of the being of the supreme Brahman, appealing in the fourth verse to the tradition of the "callier sages who have taught us this" as its authority. The second part contains a legend in support of the unrement of Brahman, and here we find Urin Hammarit, later the spouse of Sixs, acting as mediative between Brahman and the other gods, probably because she is imagined to be identical with Sarastet, or Vich, the godders of speech, of the creative word T

These are the evtant Brahmanas of the Samaveda. Savana, indeed, in his commentary on the Samavidhanenumerates eight (see Muller, Rik i Pref p xxvii) the Proudha- or Mand-Brahmana (10, the Panchavinsa), the Shadin, a, the Samoudhi, the Arsheya, the Deratadhyaya, the Upanishad, the Sarihitopanishad, and the Vansa The claims, however, of four of these works to the name of Brahmans, have no solid foundation. The Arsheya is, as already stated, merely an Anukramani, and the Devatadhyaza can hardly be said to be anything else, the Vansa else "Lere always constitutes a part of the Brahmanas themselves the two latter worl's, moreover, can scarcely be supposed to be still in existence, which, as far as the Vansa is concerned, is certainly very much to be regretted The Samevidhana also, which probably treats, like the portion of the L trayana-Sútra bearing the same name, of the contersion of the richas into almans, can hardly pass for a Brahmana 71 As to the Samhitopanishad, it appears

to me doubtful whether Sayana meant by it the Kenopanishad, for though the samhitá (universality) of the Supreme Being certainly is discussed in the latter, the subsect is not handled under this name, as would seem to be demanded by the analogy of the title of the Samhitopanishad of the Aitareya-Aranyaka as well as of the Taitting --Aranyal-a My conjecture would be that he is far more likely to have intended a work 72 of the same title, of which there is a MS in the British Museum (see I St. 1 42), and if so, all mention of the Kenopanishad has been omitted by ' him, possibly for the reason that it appears at the same time in an Atharvan-recension (differing but little, it is true), and may have been regarded by him as belonging to

There is a far greater number of Sútras to the Sama veda than to any of the other Vedas We have here three Śrauta-Sutras, a Sútra which forms a running commentary upon the Panchavinsa-Brahmana, five Sútras ou Metres and on the conversion of richas into samans, and a Grihya-Sútra To these must further be added other similar works of which the titles only are known to us, as

well as a great mass of different Parisishtas

Of the Srauta-Sutras, or Sutras treating of the sacrificial ritual, the first is that of Maśaka, which is cited in the other Sama-Sutras, and even by the teachers mentioned in these, sometimes as Arsheya Kalpa, sometimes as Kalpa, and once also by Latvayana directly under the name of Masaka 73 In the colophons at bears the name of Kalpa-Sutra This Sutra is but a tabular enumeration of the prayers belonging to the several ceremonies of th Soma sacrifice, and these are quoted partly by their tech-nical Saman names, partly by their opening words. The

72 This is unquestionably correct,

since this text appears there, as we as elsewhere, in connection with th Vana Brahmans, &c. It is no much larger than the Devatadhyaya but has not yet been published, s.

ASL, p 44S) m his time all of them vers already without accents One fact deserves to be specially noticed here, namely, that several of the teachers mentioned in the Vansa Brahmana ly their very names, point u. directly to the north west of India, eg, himb ja Au ramanyava, Madragira Saungayani Sa i Ausbtrák shi Silamkiyana, and haphala see J.St. 1v 223-280

<sup>° 11 375</sup> 73 Latvivana designates Masaka ... Gárgya Is this name connected with the Midosaya of the Greeks Lawen, I Ah , 1 130, I 4, 1

order is exactly that of the Panchavinsa-Brahmana, yet a few other ceremonies are inserted, including those added in the Shadvinia-Brahmana, as well as others Among the latter the Janakasaptarátra deserves special notice, -a ceremony owing its origin to King Janaka,74 of whom, as we saw above no mention is yet made in the Panchavinsa-Brahmana His life and notoriety therefore evidently fall in the interval between the latter work and the Sutra of Masaka -The eleven prapathalas of this Sutra are so distributed that the ckahas (sacrifices of one day) are dealt with in the first five chapters, the ahinas (those lasting several days) in the following four, and the sattras (sacrifices lasting more than twelve days) in the last two There is a commentary on it, composed by Varadaraja, whom we shall meet with again as the commentator of another Sama-Sútra.

The second Scauta-Sútra is that of Látyáyana, which begong to the school of the Kauthumas This name appears to me to point to Lata the Aapusi of Ptolemy, to a country therefore lying quite in the west, directly south of Suráshira (Xupaa-ppii) This would agree perfectly with the conjecture above stated, that the Panchavinsa-Brálmana belongs more to the west of India, and is borne out by the data contained in the body of the Sútra itself,

as we shall see presently

This Sütra, like that of Maśaka, connects itself closely with the Panchavine-Brahmana, and indeed often quotes passages of some length from it, generally introducing them by tad ullam brahmanena, or, "it is almanam blant, once also by "tatha pradnam Tandam". It usually gives at the same time the different interpretations which these passages received from various teachers. Sandilya, Dhanamjayya, and Sandilyayana are most frequently mentioned in this manner, often together, or one after the other, as expounders of the Fanchavinés-Brahmana. The first named is already known to us through the Chhandogopanishad, and he, as well as Sandilyayana, is repeatedly

<sup>76</sup> Sáyana, it is true to Pañch Exu 9 1 takes janaka as an ap peliative in the sense of prajdpats, which is the reading of the Pañcha with Britmana.

mentioned also in another Sútra, the Nidana-Sútra, the same is the case vith Dhanamayya Besides these, how ever, Latyayana mentions a number of other teachers and schools, as, for example, his own wharyas, with especial frequency, the Arsheya-Kalpa two different Gautamas, one being distinguished by the surname Sthavira (a technical title, especially with the Buddhists), further Sauchivrikshi (a teacher known to Panini), Kshairakalambhi, Kautsa, Varshaganya, Bhanditayana, Lamakayana, Ranayaniputia, &c., and in particular, the Sityayanins, and their work, the Satyayanaka, together with the Salankayanins, the latter of whom are well known to belong to the western part of India Such allusions occur in the Sútra of Latyayana, as in the other Sútras of the Samaveda, much more frequently than in the Sutras of the other Vedas, and are in my opinion evidence of their priority to the latter At the time of the former there still existed manifold differences of opinion, while in that of the latter a greater unity and fixedness of exegesis, of dogma, and of worship had been attained. The remaining data appear also to point to such a priority, unless we have to explain them merely from the difference of locality The condition of the Sudras as well as of the Nishadas te, the Indian aborigines, does not here appear to be one of such oppression and wretchedness as it afterwards became It was permitted to sojourn with them (Sandilya, it is true, restricts this permission to "in the neigh-bourhood of their grámas"), and they themselves were allowed to attend in person at the ceremonies, although outside of the sacrificial ground. They are, moreover, now and then represented, though for the most part in a mean capacity as taking an actual part on such occasions, which is not to be thought of in later times. Toleration was still a matter of necessity, for, as we likewise see, the strict Brahmanical principle was not yet recognised even among the neighbouring Aryan tribes These, equally with the Brahmanical Indians, held in high esteem the songs and customs of their ancestors, and devoted to them quite as much study as the Brahmanical Indians did, nay, the latter now and then directly resorted to the former, and borrowed distinct ceremonies from them This is sufficiently clear from the particulars of one ceremony of the

kind, which is embodied, not indeed in the Panchavinsa-Brahmana, but in the Shadvinsa-Brahmana, and which is described at full length by Látyáyana It is an imprecatory ceremony (called suena, falcon), and this naturally suggests the idea that the ceremonial of the Atharvan, which is essentially based upon imprecations and magical expedients.-as well as the songs of the Atharvan itself.-may perhaps chiefly owe its cultivation to these western, non-Brahmanical, Arvan tribes The general name given to these tribes by Latyayana (and with this Pánini v 2 21 agrees) is Vratinas, and he further draws a distinction between their yaudhas, warriors, and their arhants. teachers Their anuchanas, i.e., those versed in Scrinture. are to be chosen priests for the above-mentioned sacrifice Sindilya limits this to the arkants alone, which latter word-subsequently, as is well known, employed exclusively as a Buddhistic title—is also used in the Brahmana of the White Yasus, and in the Aranyaka of the Black Yajus, to express a teacher in general The turban and garments of these pries's should be red (lohita) according to Shadymsa and Latyayana, and we find the same colour assigned to the sacrificial robes of the priests of the Rakshasas in Lanka, in the Ramayana, vi. 19 110, 51 21, with which may be compared the light red, yellowish red (kashaya) garments of the Buddhists (see for instance Mrichhakat, pp 112, 114, ed Stenzler, M.-Bhar, xii, 566. 11898, Yajnav, 1 272), and the red (ralta) dress of the Samkhyabhikshu \* in the Laghujataka of Varaha Mihira. Now, that these western non-Brahmanical Vratvas. Vratinas, vere put precisely upon a par with the eastern non-Brahmanical, ie, Buddhistic, teachers, appears from an addition which is given by Latyavana to the description of the Vratyastomas as found in the Panchavinsa-Bruhmana. We are there told that the converted Vratyas, 10, those who have entered into the Brahman community, must, in order to cut off all connection with their past hand over their wealth to those of their companions who still abide by the old mode of life-thereby transferring to these their own former impurity -or else, to a "Brahma-

<sup>\*</sup> According to the commentary, or smould this be fiftyible by all See I %: in 287

bandhu Magadhadesiya." This latter expression is only explicable if we assume that Buddhism, with its anti-Brahmanical tendencies was at the time flourishing in Magadha, and the absence of any such allusios, in the Panchavinsa-Brahmana is significant as to the time which elapsed between this work and the Sútra of Latyavana.\*

The first seven prapatral as of the Latyayana-Surra comprise the rules common to all Soma sacrifices, the eighth and part of the minth book treat, on the contrary, of the separate eldhas, the remainder of the minth book. of the ahinas, and the tenth, of the sattras We have an excellent commentary on it by Agnistamin," who belongs probably to the same period as the other commentators whose names terminate in sramir, as Blichasvamin. Bharatasvamin, Dhurtasvamin, Harisvamin, Khadirasvamin, Meghasyamin, Skandasyamin, Kalirasyamin, de . their time, however, is as yet underermined "?

The third Sama-Sutra, that of Dich dvara, differs but slightly from the Latyayana-Sutra. It belongs to the school of the Ranavaniyas We meet with the name of these latter in the Ranavaniputra of Laiynyana, his family is descended from Vesishtha, for which reason this Sutra is also directly called Vosisitha-Surra For the name Drahyayana nothing analogous can be aidure, "8 The difference between this Sutia and that of Latianina

<sup>\*</sup> In the Rik S mbits, where the Kikatas-the aucient name of the people of Magadas-and their king Pramagamda are ment on d as hos tile, we have probably to tuink of the abortones of the country, and not of bc\_tile Aryas (?) is mainly confined to the different distribution of the matter, which is on the whole identical, and even expressed in the same words. I have not yet met with a complete coder of the whole work, but only with its beginning and its end, in two different commentaries, the date of which it is not yet possible to determine—the begin ming, namely, in Maghas-damin's commentary, remodelled by RudrasLanda, the end in the excellent commentary of Dhanvin.

The only knowledge I have of a Srauta-Sútra by Gobhila is derived from a notice of Roth's (op c, pp 55, 56), according to which Krityachintamani is said to have com-

posed a commentary upon it 79

In a far more important degree than he differs from Drahyáyana does Latyáyana differ, on the one hand, from Kátyáyana, who in his Śrauta-Sútra, belonging to the White Yajus, treats in books 22-24 of the ekahas, ahinas, and sattras, and on the other from the Rik-Sútras of Asvalayana and Sankhayana, which likewise deal with these subjects in their proper place. In these there is no longer any question of differences of opinion, the stricter view represented by Sandilya in the Latyayana-Sutra has everywhere triumphed. The ceremonies on the Sarasyati and the Vratvastomas have also become, in a local sense too, further removed from actual life, as appears both from the slight consideration with which they are treated, and from modifications of names, &c. which show a forgetting of the original form Many of the ceremonies discussed in the Sama-Sutras are, moreover, entirely wanting in the Sútras of the other Vedas, and those which are found in the latter are enumerated in tabular fashion rather than fully discussed-a difference which naturally originated in the diversity of purpose, the subject of the Sútra of the Yajus being the duties of the Adhvaryu, and that of the Sútras of the Rik the duties of the Hotar

A fourth Sama-Sútra is the Anupada-Sútra, in ten praváthabas, the work of an unknown author It explains

<sup>79</sup> The same Krityschintaman' probably belongs to the work itself, compare / 't, 1. 60, in 396, Auf recht, Caldegus, p 365°, but whether it really was a commentary

on a Srauta Sutra of Gobbila re mains doubtful in the meantime, since such a work is not mentioned elsewhere

the obscure passages of the Pañchavnsa-Brahmana, and, the would appear, of the Shadwnsa-Brahmana also, accompanying the text step by step. It has not as yet been closely exumined, but it piomises to prove a rich mine of material for the history of Brahmanical theology, as it makes mention of, and appeals to, on extremely large number of different works. For example, of schools of the Rik, it cites the Antarcyins, the Parligns, the Kaushitaka, of schools of the Yajus, the Adharayis in gentle and in the Charay and frequently also fruit, mutit, decharges, the Kathaka, the Kalabavnis, Bhallwins, Samhuvis, Vajasansyins, and frequently also fruit, mutit, decharges, &c. It is a work which deserves to be very thoroughly studied.

Winle the above-named four Sútras of the Samaveda specially attach themselves to the Panchavinsa-Brahmana, the Sútras now to be mentioned stand out more independently beside the latter, although of course, in part at least, often referring to it In the first place, we have to mention the Nidána-Sútra, which contains in ten prapáthakas metrical and other similar investigations on the different ukthas, stomas, and ganas The name of the author is not given. The word niddna, root, is used with reference to metre in the Brahmana of the White Yajus, and though in the two instances where the Nadanas are mentioned by Yasks, their activity appears to have been directed less to the study of metre than to that of roots, etymology, still the Nidanasamınaka Grantha is found cited in the Brihaddevata, 5 5, either directly as the Sruti of the Chhandogas, or at least as containing their Sruti. This Sutra is especially remarkable for the great number of Vedic schools and teachers whose various opinions it adduces, and in this respect it stands on pretty much the same level as the Anupada-Sútra. It differs from it, however, by its particularly frequent quotation

Dufortunately we do not even on now know of more than one MS , resee I St. 1, 47

In This is wrong, on the contrary, the word has quite a general meaning in the passages in question (e.g., in gayatri at cold inddness,

or yo wd aird "gair gdyairi sa nidd nead" "Niddaa, in the sense of "cause, foundation" is a favourite word in

<sup>.</sup> 

also of the views of the Saman theologians named by Latvayana and Dráhyáyana, vir, Dhanamjayya, Sandilya, Sau chivrikshi, &c -a thing which seldom or never occurs in the former The animosity to the Kaushitakis, with which we have already become acquainted in the Panchavinsa-Brahmana, is here again exhibited most vividly in some words attributed to Dhanamjayya With regard to the Rigveda, the dasatavi division into ten mandalas is mentioned, as in Yaska The allusion to the Atharvanikas, as well as to the Anubráhmanins is particularly to be remarked, the latter peculiar name is not met with elsewhere, except in Panini. A special study of this Sútra is also much to be desired, as it likevise promises to open up a wealth of information regarding the condition of literature at that period 82

Not much information of this sort is to be expected from the Pushpa-Sutra of Gobbila which has to be named along with the Nidana Sutra The understanding of this Sútra is, moreover, obstructed by many difficulties For not only does it cife the technical names of the samans, as well as other words, in a very curtailed form, it also makes use of a number of grammatical and other technical terms, which, although often agreeing with the corresponding ones in the Pratisakhva-Sútras, are vet also often formed in quite a peculiar fashion, here and there, indeed, quite after the algebraic type so favoured by Panini This is particularly the case in the first four pranathakas, and it is precisely for these that, up to the present time at least, no commentary has been found. whereas for the remaining six we possess a very good commentary by Upadhyaya Ajatasatru t treats of the modes in which the separate richas, by various insertions, &c . are transformed into samans, or "made to blossom," as it were, which is evidently the origin of the name Pushpa-Sutra, or 'Flower Sutra" In addition to

<sup>\$2</sup> Sea / St, 1 44, IF the first two safalas, which have special re ference to metre, have been edited and translated by me in I St, vin 85-724. For Anubrahmanio, "pa, see also Asv Sr, ii 8 11, and Schol on T S . 1 8 1 1

the Pravehana, is (according to the commentary), Brins, Iman, of the Kalbahvans and that of the Satya, anna, I found, on a cursory inspection, mention also of the Kauthumas. This is the first time that their name appears in a work connected with Yedic literature. Some portions of the work, particularly in the last books, are composed in slokes, and we have, doubtless, to regard it as a compilation of pieces belonging to different periods of In close connection with it stands the kâma-Zatrira, composed in the same manner, and equilly unintelligible without a commentary. It treats, in thirteen praphilalize, of accent and the accentuation of the separate verses. A commentary on it is indeed extant, but at present only in a fragmentary form. At its close the work is denoted as the vydkarana, grammar, of the Safana theologians \$^{34}

Several other Sutras also treat of the conversion of richas into sámans, &c One of these, the Pañchardhrostura (Páñchardhrya, Pañchardhrya), is only known to me from quotations, according to which, as well as from its name, it reats of the five different vidhis (nodes) by which this process is effected Upon a second, the Prati-hára-Sútra, which is ascribed to Katyayana, a commentary called Daśatayi was composed by Varadarija, the above-mentioned commentator of Maskia. It treats of the aforesind five vidhis, with particular regard to the one called pratikára The Tandátkakhana-Sutra is only known to me by name, as also the Upagrantha-Sutra; both of which, with the two other works just named, are, according to the catalogue, found in the Fort-William

<sup>45</sup> In Dekhan MSS the work as called PhallacStdrs, and a sacrbed to Vararachi, not to Gobbila see Burnell, Catalogue, pp 45, 46. On time and other pounts of difference, see my paper teler dus Septiates Lam des Helde (1870) pp. 25%, 250 and commentary, but have nothing of consequence to add to the above remarks.

Ph See also Burnell Catalogue pp 40, 41 — Ibus p. 44 we find a Svaraparibháshí, or Sámalakabana, specified kaiyata also mentions a sárialak.hanam prátiadkhyan kil

from by which he explains the word wkiderfak which, according to the Makshhidiya, is at the founds ton of aukthic, whose formation is taught by Panins himself (iv 2 60), see I St., at 447 According to this it certainly seems very doubtful whether the Simulabians mend with the extant work bearing the same same name.

Shadguruśishya, in the intro duction to his commentary on the Anukramani of the Rik, describes Kátyáyana na 'upayranikasya káraka,

collection of MSS By the anonymous transcriber of the Berlin MS of the Masslab-Sütra, who is of course a very weak authority, ten Smuta-Sutras for the Sinnaveda are enumerated at the close of the MS, viz, beades Lityayana, Anupada, Nidána, Kalpa, Tandalakshan, Paŭchavidheya, and the Upagminthas, also the Kalpanpada, Amistotra, and the Kahudras Wint is to be understood by the three last names most for the present remain undecaded 8

The Grihya-Sútra of the Samaveda belongs to Gobhila. the same to whom we also found a Scauta-Sutra and the Pushpa-Sútra ascribed.88 His name has a very unvedic ring, and nothing in any way coresponding to it appears in the rest of Vedic literature 87 In what relation this work, drawn up in four prapathalas, stands to the Grihya-Sutras of the remaining Vedas has not yet been investigated.88 A supplement (parisishta) to it is the Karmapradipa of Katvavana. In its introductory words it expressly acknowledges itself to be such a supplement to Gobhila, but it has also been regarded both as a second Grihya-Sútra and as a Smriti-Sastra According to the statement of Asarka, the commentator of this Karniapradipa, the Grihva-Sutra of Gobbila is authoritative for both the schools of the Samaveda, the Kauthumas as well as the Ranayaniyas \*- Is the Khadira Grihya, which is now and then mentioned, also to be classed with the Sámayeda ?80

On the Patchavidh Stira and he Kaipfaupeda, each in two propotphakas, and the Kahaudra, in three propotphakas, see Muller, 4. S L. p. 210. Autrecht, Canalgus, p. 377 Tae Upagrantha-Stira treats of expationly pringlachitat, see Rdjendra L. M., hource of Sanaku MS3, n. 182.

<sup>26</sup> To him is also ascribed a Naigera-Stra, "a description of the Metres of the Samreed, 'see Colin Browning Catalogue of Sonskit MSS cauting to Oude (1873), p. 4. "A hist of teachers belonging to the Gobbila school is contained in the Vank-Briffmans.

on months of the Gobbita Gribya-Sutra, with a very diffuse minimizatory by the editor, Chan

drakinta Tarkilamkira, has been commenced in the BBL Indica (1871), the fourth fusiculus (1873) reaches to it. S. 12 See the section relating to nuptral cremones in Haas spare, I St., v 252, ft.

As representative of the last stage of the literature of the Samaveda, we may specify, on the one hand, the various Paddhatis (outlines) and commentaries, &c, which connect themselves with the Sutras, and serve as an explanation and further development of them, and, on the other, that peculiar class of short treatises bearing the name of Parisishtas, which are of a somewhat more independent character than the former, and are to be looked upon more as supplements to the Sútras \* Among these, the already mentioned Arsha and Danata-enumerations of the Rishis and deities-of the Samhita in the Naigeya-Sakha deserve prominent notice Both of these treatises refer throughout to a comparatively ancient tradition, for example, to the Narruktas, headed by Yaska and Sakapuni, to the Naighantukas, to Saunaka (10, probably to his Anukramani of the Rik), to their own Brahmana, to Astareya and the Astareyans, to the Satapathakas, to the Pravachana Kathaka, and to Asvalayana. The Dalbhya-Parisishta ought probably also to be mentioned here, it bears the name of an individual who appears several times in the Chhandogyopanishad, but particularly often in the Purants as one of the sages who conduct the dialogue

The Yayareda, to which we now turn, is distinguished above the other Vedas by the great number of different schools which belong to it. This is at once a consequence and a proof of the fact that it became pre-eminently the subject of study, insamed as it contunis the formulas for the entire samficial ceremonal, and indeed forms its

tary on the Gribya-Sutra of the White lajus several times accides their authorship to a kātyāyana (India Office Library, No 440, fol 52\*, 56 55\*, &c.), or do the equatations only refer to the abononemed K, irms-pridips

<sup>(</sup>cf. Burnell, p 57 the commentator Anantayayan identifies the author with Akshapáda, the author of the Nyáya Sutra) and the Gautama-Dharma Sutra, see the ectum treating of the legal hiterature

proper foundation, whilst the Rigveds prominently, and the Simaveda exclusively, devote themselves to a part of at only, viz, to the Soma sacrifice The Yajurveda divides itself, in the first place, into two parts, the Black and the White Yaius These, upon the whole, indeed, have their matter in common, but they differ fundamentally from each other as regards its arrangement. In the Sambita of the Black Yajus the sacrificial formulas are for the most part immediately followed by their dogmatic explanation, &c. and by an account of the ceremonial belonging to them, the portion bearing the name of Brahmana differing only in point of time from this Samhitá, to which it must be viewed as a supplement In the White Yajus, on the contrary, the sacrificial formulas, and their explanation and ritual, are entirely separated from one another, the first being assigned to the Samhita, and their explanation and ritual to the Brahmana, as is also the case in the Rigveds and the Samaveds. A further difference apparently consists in the fact that in the Black Yams very creat attention is paid to the Hotar and his duties, which in the White Yajus is of rare occurrence By the nature of the case in such matters what is undigested is to be regarded as the commencement, as the earlier stage, and what exhibits method as the later stage, and this view will be found to be correct in the present instance. As each Yajus possesses an entirely independent literature, we must deal with each separately

First, of the Back Yapus The data thus far known to sconcerning it open up such extensive literary perspectives, but withal in such a meagre way, that in estigation has up to the present time, been less able to attain to approximately satisfactory results than in any other field. In the first place, the name "Black Yapus Velongs only to a later period, and probably arose in contradistinction to that of the White Yapus While the theologians of the Ris, are called Babvrichas, and those of the Saman Chhundogas, the old name for the theologians of the Yapus is Advayrus, and, indied, these three names are already so

<sup>\*</sup>See I St, i 68 f [All the been published, see the ensuing texts, with the exception of the notes] Surns refating to rive, dark now

employed in the Samhitá of the Black Yajus and the Brahmana of the White Yajus In the latter work the designation Adhvaryus is applied to its own adherents, and the Charakadh varyus are denoted and censured as their adversaries -- an enmity which is also apparent in a passage of the Samhitá of the White Yajus, where the Charakacharya, as one of the persons to be dedicated at the Purushamedha, is devoted to Dushkrita, or "Ili deed" This is all the more strange, as the term charaka is otherwise always used in a good sense, for "travelling scholar:" as is also the root char, " to wander about for instruction ' The explanation probably consists simply in the fact that the name Charakas is also, on the other hand, applied to one of the principal schools of the Black Yajus, whence we have to as sume that there was a direct enmity between these and the adherents of the White Yajus who arose in opposition to them-a hostility similarly manifested in other cases of the kind A second name for the Black Yajus is "Taittirfya," of which no earlier appearance can be traced than that in its own Praticalhya-Sutra, and in the Sama-Sutras Panun's connects this name with a Rishi called Tittiri, and so does the Anukramani to the Atreya school, which we shall have frequent occasion to mention in the sequel. Later legends, on the contrary. refer it to the transformation of the pupils of Vaisampavana into partridges (tittiri), in order to pick up the yajusverses disgorged by one of their companions who was wroth with his teacher However absurd this legend may be, a certain amount of sense yet lurks beneath its surface The Black Yajus is, in fact, a motley, undigested numble of different pieces, and I am myself more inclined to derive the name Taittirfya from the variegated partridge (tittiri) than from the Rishi Tittiri, just as another name of one of the principal schools of the Black Yajus, that of the Khandilayas, probably owes its formation to

<sup>•</sup> The rule referred to (iv 3 102) saccording to the statement of the Calcutta scholast not explained in Pathypalis Bhishya, possibly therefore it may not be Pannia at all but may be later than Pathypa

however is several times mentioned in the Bháshya, s.e. I &t zin. 442, which is also acquired with "Ta tirina problidh flohah, not belonging to the Chhauday, etc. I & v. 41, Gold tucker Pápain, p. 2417.

the The time Tuttiriya if elf,

this very fact of the Black Yajus being made up of khandas, fragments, although Panini,\* as in the case of Taitiriya, traces it to a Rishi of the name of Khindika, and ilhough we do really meet with a Khindika (Audblan) in the Brithmans of the White Yajus (xi & 4.1)

Of the many schools which are allotted to the Black Yasus, all probably did not extend to Samhitá and Brah mana, some probably embraced the Sutras only † Thus far, at least, only three different recensions of the Samhita are directly known to us, two of them in the text itself. the third merely from an Anukramani of the text two first are the Taittiriva-Samhild, nat' e Eovin so called which is ascribed to the school of Apastamba, a subdivision of the Khandikivas, and the Kathaka, which belongs to the school of the Charakas, and that particular subdivision of it which bears the name of Chaiavanivas t The Samhita, &c., of the Atreva school, a subdivision of the Aukhiyas, is only known to us by its Anukramani, it agrees in essentials with that of Apastamba. This is not the case with the Kathaka, which stands on a more indepen dent footing, and occupies a kind of intermediate position between the Black and the White Yapus, agreeing frequently with the latter as to the readings, and with the former in the arrangement of the matter. The Kathaka. together with the Handranka-a lost work, which, however, likewise certainly belonged to the Black Yaius, viz. to the school of the Handravivas, a subdivision of the Mastravanivas-is the only work of the Brahmana order mentioned by name in Yaska's Nirukta. Panini too. makes direct reference to it in a rule, and it is further alluded to in the Anupada-Sútra and Brihaddevatá The name of the Kathas does not appear in other Vedic writings, nor does that of Apastamba §

thals Kattas the synthet of these late in found in Pfrom (cut 3 gt) and Hegastlaines mentions the Registleshoa as a people in the 1 an jth—in the Fort William Catalogue at a happ-latal Symplatis in mentioned [see I St. xm 375, 439—At the time (f the Makhibidiya) at position of the Kuthas murt have been or of great consideration, since

<sup>\*</sup> The rule is the same as that for Titizi I be remark in the previous note, therefore, applies here also + As is likewise the case with the other Vedas

<sup>1</sup> Besides the text, we have also a Rudysnukriment for it.

<sup>§</sup> in later writings several Kathas see distinguished, the Kathas, the Fidebys hathas and the hapish

The Samhita of the Apastamba school consists of seven books (called ashtakas ), these again are divided into 44 prasnas, 651 anuidkas, and 2198 kandikas, the latter being separated from one another on the principle of an equal number of syllables to each 90 Nothing definite can be ascertained as to the extent of the Atreya recension, it is likewise divided into kándas, prasnas, and anuvákas, the first words of which coincide mostly with those of the corresponding sections of the Apastamba school. The Kathaka is quite differently divided, and consists of five parts, of which the three first are in their turn divided into forty sthanakas, and a multitude of small sections (also probably separated according to the number of words), while the fourth merely specifies the richas to be sung by the Hotar, and the fifth contains the formulas belonging to the horse sacrifice In the colophons to the three first parts, the Charaka-Śakha is called Ithimila, Madhyamila, and Orimika, respectively the first and last of these three appellations are still unexplained. The Brahmana portion in these works is extremely meagre as regards the ever, peculivily rich in legends of a mythological character. The sactificial formulas themselves are on the whole the same as those contained in the Samhita of the White Yasus, but the order is different, although the

they-and their text, the Kathaka -are repeatedly mentioned, see I St, Ent 437, If The founder of pupil, and the Kathas themselves appear in close connection with the Kalapas and Kauthumas, both schools of the Samen In the Rama yana, too, the Katha Kalapas are mentioned as being much esteemed in Ayodhya (u. 32 18, Schlegel) Haradatta's statement, "Bahryichd namapyasi: Kathasakha (Bhatton s Siddh Kaum ed Tarauatha (1865), vol u p 524, on Pan, vn 4 38), probably rests upon some misunderstanding , see I St, xm 438 ]

It is not the number of sylla bles, but the number of words that

constitutes the norm, fifty words, as a rule, form a Landika, see I St, xi 13, xii 90, xii: 97-99 - Iustead of ashfala, we find also the more their action, Katha, appears in the of ashlada, we find also the more Mahabhashya as Vaisampayana's correct name kanda, and instead of praina, which is peculiar to the Taittiriya texts, the generally em ployed term, prapathala see I St., x: 13, 124—The last Brahm and the Tast. Ar, are also subdivided into kandikds, and these again into very small sections, but the princi ple of these divisions has not yet

een clearly ascertained 91 Ithimika is to be derived from heffhina (from heffha, ir, edha tai) and Ormuká from wearens (from upari) , ee my paper, Leber die liha

gasati der Jama, 1 494, 1

order of the ceremonial to which they belong is pretty much the same. There are also many discrepancies with regard to the words, we may instance, in particular, the expansion of the semi-vowels v and y after a consonant into uv and uy, which is peculiar to the Apastamba school 22 As to data, geographical or historical, &c. (here, of course, I can only speak of the Apastamba school and the Kathaka) in consequence of the identity of matter these are essentially the same as those which meet us in the Sumhita of the White Yajus (In the latter, however, they are more numerous, formulas being also found here for ceremonies which are not known in the former-the purushamedha, for instance) Now these data-to which we must add some other scattered allusions \* in the por tions bearing the character of a Brahmana-carry us back, as we shall see, to the flourishing epoch of the kingdom of the Kuru-Panchalas 23 in which district we must therefore recognise the place of origin of both works this also holds good of their final reduction is another question, the answer to which, as far as the Apastamba-Samhita is concerned, naturally depends upon the amount of influence in its arrangement to be ascribed to Apastamba, whose name it bears The Kathaka, according to what has been stated above, appears to have existed as an entirely finished work even in Yaska's time, since he quotes it, the Anukramani of the Atreya school, on the contrary, makes Yaska Pangg at the pupil of Vasam-payana) the teacher of Titure, the latter again the in-

22 For further particulars, see [This remains correct, though the I St, mu 104-106. \* Amonget them, for example, the enumeration of the whole of the loner esten ma in the Anastamba Sambita, where they appear in an order deapting from that of the later series, which, as I have pointed out above (p 30) mu t necessarly tion of Dhritarishtra Valchitravirya. have been fixed between 1472 and 526 B.c But all that follows f om this, in regard to the passage in question, is that it is not earlier than 1472 BC , which is a matter of course it nowie follows that it may not be later than 536 f.c. So we obtain nothing definite bere

structor of Ukha, and Ukha the preceptor of Atreya.\* This at least clearly exhibits its author's view of the priority of Yaska to the schools and reductions of the Black Yajus bearing the names of Tittiri and Atreya, although the data necessary to prove the correctness of this view are wanting. That, however, some sort of influence in the arrangement of the Samhita of the Black Yajus is certainly to be attributed to Yaska, is evident further from the tact that Bhatta Bhaskara, Misra, in an extant fragment of his commentary on the Apastamba-Samhita,† quotes, side by side with the views of Kasakritsna and Ekachurni regarding a division of the text, the opinion of Vaska also

Along with the Kathaka, the Manara and the Martra are very frequently quoted in the commentaries on the Katiya Sutra of the White Yajus We do not, it is true; find these names in the Sutras or similar works, but at all events they are meant for works resembling the Kathaka, as is shown by the quotations themselves, which are often of considerable length Indeed, we also find, although only in later writings, the Maitrayaniyas, and, es a subdivision of these, the Manavas, mentioned as schools of the Black Yajus Possibly these works may still be in existence in Indiat

 Atresa was the padaldra of his school, Kundina, on the contrary, triffe is here obscure, as it is also in Schol to Pap, iv 3 108 (mddhuri vyttih) [see I St., 1111, 381].

t We have, besides, a commentary by Sayana, though it is only fragmentary another is ascribed to a Lilakrabna. (In Burnell's Col lection of MSS, see his Catalogue, pp 12-14, is found the greater por tion of Bhatta Kausika Bhaskara Micra s commentary, under the name Induayayna, the author is said to have hved 400 years before Sayana, he quotes amongst others Bhavasvá min, and scenis to stand in sperial connection with the Atreyi echool A Paulichablashya on the Black Yanus is also mentioned see I St. ix 176 - An edition of the Tatturing Suphits in the Bibl Innico.

with Sáyana's complete commentary, was commenced by Poer (1854) con tinged by Cowe'l and Rum, Narayens, and is now in the hands of Mahesachandra Pylyaratas (tl o last part, No 28, 1574, reaches to 17 3 11), the complete text 12 Roman transcript, has been published by myself in I St., x1, x1 (1871-72)

Besides the Samhitá so called, there is a Brahmana recognised by the school of Apastamba, and also by that of Atreya,\* which, however, as I have already remarked, differs from the Samhitá, not as to the nature of its contents, but only in point of time, it is, in fact, to be regarded merely as a supplement to it. It either reproduces the formulas contained in the Samhita and connects them with their proper ritual, or it develops further the liturgical rules already given there, or again, it adds to these entirely new rules, as, for instance, those concerning the purushamedha, which is altogether wanting in the Samhita, and those referring to the sacrifices to the lunar asterisms Only the third and last book, in twelve prapáthalas, together with Sayana's commentary, is at present known.95 The three last prapathakas, which contain four different sections, relating to the manner of preparing certain peculiarly sacred sacrificial fires, are ascribed in the Anukramani of the Atreya school (and this is also confirmed by Sayana in another place) to the sage Katha. Two other sections also belong to it, which, it seems, are only found in the Atreya school, and not in that of Apastamba, and also, lastly, the two first books of the Taittiriya-Aranyaka, to be mentioned presently Together these eight sections evidently form a supplement to the Kathaka above discussed, they do not, however, appear to exist as an independent work, but only in connection with the Brahmana and Aranyaka of the Apastamba-(and Atreya-) schools, from which, for the rest they can be externally distinguished easily enough by the absence of the expansion of v and y into uv and iy. The legend quoted towards the end of the second of these sections (prap x1. 8), as to the visit of Nachiketas, to the lower

ditions, viz., the Upanishad (see below) which passes as kinda it., and the last linda, called Khila.]

<sup>\*</sup> At least as regards the fact, for the designation Sanhitts or Brish man does not occur in its Amkra man! On the contrary, it passes without any break from the portions which belong in the Apastamba School to the Suphitt, to those there belonging to the Brishman.

world, gave rise to an Upanishad of the Atharsan which bears the name of Kathakopunishad Now, between this supplement to the Kathaka and the Kathaka itself a considerable space of time must have clapsed, as follows from the allusions made in the last sections to Maha-Meru, Krauńcha, Mamaga, to Vaisampayana, Vyasa Parasarya, &c. as well as from the literature therein presupposed as existing, the 'Atharvangirasas,' Brahmanas, Itihasas, Puranas, Kalpas, Gathás, and Narasansis being enumerated as subjects of study (siddhyaya) Further, the last but one of these sections is ascribed to another author, viz., to the Arunas, or to Aruna, whom the scholast on Panini 90 speaks of as a pupil of Vaisampayana, a statement with which its mention of the latter as an authority talkes excellently, this section is perhaps therefore only erroneously assigned to the school of the Kathas.-The Tarttiriya-Aranyaka, at the head of which that section stands (as already remarked), and which belongs both to the Apastamba and Atreya schools, must at all events be regarded as only a later supplement to their Brahmana, and belongs, like most of the Aranyakas, to the extreme end of the Vedic period. It consists of ten books, the first six of which are of a liturgical character the first and third books relate to the manner of preparing certain sacred sacrificial fires, the second to preparatives to the study of Scripture, and the fourth, fifth, and sixth to purificatory sacrifices and those to the Manes, corresponding to the last books of the Symbita of the White Yajus The last four books of the Aranyaka, on the contrary, contain two Upanishada, viz, the seventh, eighth, and ninth books the Taittiriz opanishad, kar efoxiv so called, and the tenth, the Yarriks- or Narawaniya Upanishad The former, or Taittiriyopanishad, is in three parts The first is the Samhitopanishad, or Siksharalli, which begins with a short grammatical disquisition, or and then turns to

Maysta on Pin, 19 2 104 (Mahibhialuys, 60 739, ed Beares), he calls hum, however, Arum in stead of Aruma, and derives from him the actool of the Arumas (ent d in the Ebashya, 60d) the Arumas are cited in the Kathaka itself, see f Mt. 11, 475

<sup>\*</sup> Valls means 'a creeper,' it is perhaps meant to describe these Upanishads as 'creepers,' which have attached themselves to the Yeda-SChi.

<sup>&</sup>lt;sup>1</sup>See above, p 61 Müller, A S L, p 113, ff Haug, Ueber das Wesen des sedts hen Accouts, p 54-

the question of the unity of the world-spirit. The second and third are the Anandaralli and Bhriquealli which together also go by the name of Varuni-Upanishad and treat of the bliss of entire absorption in meditation upon the Supreme Spirit, and its identity with the individual soul \* If in these we have already a thoroughly systematised form of spesulation, we are carried even further in one portion of the Yajniki-Upanishad, where we have to do with a Lind of sectarian worship of Narayana the remaining part contains ritual supplements Now, interesting as this whole Aranyaka is from its motley contents and evident piecing together of collected fragments of all sorts. it is from another point of view also of special importance for us, from the fact that its tenth book is actually extant in a double recension, viz, in a text which, according to Sayana's statements, belongs to the Dravidas, and in another, bearing the name of the Andhras, both names of peoples in the south-west of India. Besides these two texts, Savana also mentions a recension belonging to the Karnatakas, and another whose name he does not give. Lastly, this tenth book + exists also as an Atheryopanishad, and here again with many variations, so that there is here opened up to criticism an ample field for researches and conjectures. Such, certamly, have not been wanting in Indian literary history, it is seldom, however, that the facts lie so ready to hand as we have them in this case, and this we one to Sajana's commentary, which is here really excellent.

When we look about us for the other Brahmanas of the Black Yajus, we find, in the first place, among the schools

<sup>\*</sup> See a translation &c, of the Testit Upan had in I SL, in 207-235. It has been edited, with Samkara s commentary, by Roer in Eth Edica: vol vulj the test slone, as a portion of the latth. ated in the Sama-Sútras two which must probably be considered as belonging to the Black Yijus viz, the Endi-lavins and the Sutyayanins The Brahmana of the Endilarens is quoted by the scholiast on Panini probably following the Mahabhashya, 23 as one of the 'old' Brahmanas we find it mentioned in the Brihaddevata Suresvaracharya also, and even Sayana himself, quote passages from the Bhallavisruti. A passage supposed to be borrowed from the Bhallavi-Upanishad is adduced by the sect of the Madhavas in support of the correctness of their (Dvaita) belief (As Res, xvi 104) That the Bhallavins belong to the Black Yajus is, however, still uncertain, I only conclude so at present from the fact that Bhallaveva is the name of a teacher specially attacked and censured in the Brihmana of the White Yajus As to the Satyayanus, whose Brahmana is also reckoned among the 'old' ones by the scholast on Panini,89 and is frequently quoted, especially by Sayana, it is pretty certain that they belong to the Black Yajus, as it is so stated in the Charanavvuha, a modern index of the different schools of the Vedas, and, moreover, a teacher named Satyayanı is twice mentioned in the Brahmana of the White Yajus The special regard paid to them in the Sama-Sútras, and which, to judge from the quotations, they themselves paid to the Saman is probably to be explained by the peculiar connection (itself still obscure) which we find elsewhere also between the schools of the Black Yajus and those of the Saman 100 Thus.

the Kathas are mentioned along with the Sunan schools

with the above-mentioned Maitra (Brahmana) Its text, however, both in language and contents, shows that, compared with the latter, it is of a very modern date. At present, unfortunately, I have at my command only the four first prapathalas, and these in a very incorrect form .whereas in Auguetil's translation, the Upanishad consists of twenty chapters,-yet even these are sufficient clearly to determine the character of the work. King Brihadratha, who, penetrated by the nothingness of earthly things, resigned the sovereignty into the hands of his son, and devoted himself to contemplation, is there instructed by Sakayanya (see gana 'Kunja') upon the relation of the dtman (soul) to the world, Sakayanya communicates to him what Maitreya had said upon this subject, who in his turn had only repeated the instruction given to the Balakhilyas by Prajapati himself The doctrine in question is thus derived at third hand only, and we have to recognise in this tradition a consciousness of the late origin of this form of it This late origin manifests itself externally also in the fact that corresponding passages from other sources are quoted with exceeding frequency in support of the doctrine, introduced by "atha 'nyatra 'py uktam," "etad apy uktam," "atre 'me śloká bhatantı," "atha yathe 'yam Kautsavanastutih" The ideas themselves are omite noon a level with those of the fully developed Samkhya doctrine, t and the language is completely marked off from the

prose of the Brahmanas, both by extremely long compounds, and by words entirely foreign to these, and only belonging to the epic period (such as sura, yeksha, aruga, bhutagana, &c.) The mention also of the grahas, planets, and of the motion of the polar star (dhrurasya pracha lanam), supposes a period considerably posterior to the Brahmana.ics The zodiecal signs are even mentioned in Anquetil's translation, the text to which I have access does not unfortunately extend so far 104 That among the princes enumerated in the introduction as having met their downfall, notwithstanding all their greatness, not one name occurs belonging to the narrower legend of the Maha-Bharata or Ramayana, 13 no doubt simply owing to the circumstance that Bribadratha is regarded as the predecessor of the Pandus For we have probably to identify him with the Brihadratha, king of Magadha, who according to the Maha-Bharata (ii. 756) gave up the sovere-guty to his son Jarasamdha, afterwards slam by the Pandus, and retired to the wood of penance. I cannot forbear con necting with the instruction here stated to have been guen to a king of Magadha by a Saldyanya the fact that it was precisely in Magadha that Buddhism, the doctrine of Sakyamuns, found a welcome. I would even go so far as directly to conjecture that we have here a Brahmanical legend about Sakyamun; whereas otherwise legends of this kind reach us only through the adherents of the Buddhist doctrine. Maitreys, it is well known, is, with the Buddhists, the name of the future Buddha yet in their legends the name is also often directly connected with their Sakyamuni, a Purna Maitrayaniputra, too, 18 given to the latter as a pupil. Indeed, as far as we can judge at

(b 205)L

<sup>3.2</sup> According to Cowell (p. 244) by graka we have here to under stand, once at least (i. 4), not the planets but billagrands (children's disesses). " Dhruvaya prachalanam probably only refers to a prolawa . then even 'the never ranging pole star' is forced to move. In a yound passage, however (w. 16, p. non and the ritahas Very

ius state too, is the statement as to er Limits of the sun a two

pourneys (v. 14. Cowell, pp. 119, 266), see on this I St. 12 363.

104 The text has rothing of this (vil. 1, p 195), but special mention is here made of Saturn, fans (n. 201), and where futra occurs (p. 200) we might perhaps think of Venue This last addydya through out clearly betrays its later oncin of special interest is the bi ter polemie against hereties and unbelievers

present, the dectrine of this Upanishad stands in close connection with the opinions of the Buddhist, <sup>168</sup> although from its Brahmanical origin it is naturally altogether free from the dogma and mythelogy peculiar to Buddhism. We may here also notice, especially, the contempt for writing (grawtha) exhibited in one of the \$lokas\* quoted in corroboration

Neither the Chhagalins, nor the Svetášvataras, nor the Maitzyaniyas are mentioned in the Sútras of the other Vedas, or in similar works, as schools of the Black Yajus, still, we must certainly asenbe to the last mentioned a very active share in its development, and the nature Martreya and Maitreyi at least are, not unfrequently

quoted in the Brahmanas

In the case of the Suras, too, belonging to the Bluck Yajua, the large number of different schools is very striking. Although, as in the case of the Brahmanes, ve only know the greater part of them through quotations there is reason to expect, not only that the remnifably nich collection of the India House (with vinch 1 am caliver) superficially acquainted) will be found to contain many treasures in this department, but also that many of them will yet be recovered in India itself. The Perlu collection does not contain a single one. In the first place, as to the Straula-Sutrae, my only knowledge of the Katha-Sutrae, † the Maviers, the Maitra-Su.a., and the Lawgid shi-Sutra is derived from the comment ries on the Katha-Sutrae, and the Willey Sutrae, the Sundae Sutrae, which we comment ries on the Katha-Sutrae, of the White Yajus, the second, however, "se stands in the catalogue of the Fort-William col-

whether the word granta ought really a priors and for the earlier period to be understood of written texts (cf. I 2r., xm. 476), yet in this verse at any rate a different interpretation is hardly possible, see below?

+ Laugakshi and the Lamaldysnindm Brilimanam' are said to be quoted therein

100 On this, as well as on the contents and the division of the work, see my remarks in I St, v 13-16, in accordance with communications received from Professor Cowell, cf. 1800 Haug 1616, 12: 175 A h. Anava

<sup>&</sup>lt;sup>150</sup> Báná's Harphachyntra informs us of a Matrixpnija Drikhara who embraced the Buddhi, tersed, and Bhai Daji (Jermel Bombey Branch R A S x 40) adds that even now Matrix Brahman invo ear Blainghon at the foot of the Yinddya, with the Common, the reach may have been the early Buddhist tendencies of many of them.

Which by the way, recurs together with some others in precisely the same form in the Amritania du (or Brahmavirdu) Upanishad [Though it may be very doubtful

lection, and of the last, whose author is cited in the Katha-Sútra, as well as in the Kátíya-Sútra, there is, it appears, a copy in Vienna. Mahádeva, a commentator of the Kalpa-Sútra of Satyashadha Hiranyakesi, when enumerating the Taittiriva-Sútras in successive order in his introduction, leaves out these four altogether, and names at the head of his list the Sutra of Baudhayana as the oldest, then that of Bharadvaja, next that of Apastamba, next that of Hiranyakes himself, and finally two names not otherwise mentioned in this connection, Vadhuna and Varkhanasa, the former of which is perhaps a corrupted form Of these names. Bháradváia is the only one to be found in Vedic works, it appears in the Brahmana of the White Yajus, especially in the supplements to the Vrihad-Aranyaka (where several persons of this name are mentioned), in the Katiya-Sutra of the same Yajus, in the Pratisakhya-Sutra of the Black Yajus, and m Panini. Though the name is a patronymic, yet it is possible that these last citations refer to one and the same person, in which case he must at the same time be regarded as the founder of a grammatical school, that of the Bharadvájíyas. As yet, I have seen nothing of his Sútra, and am acquainted with it only through quotations According to a statement by the Mahadeva just mentioned, it treats of the oblation to the Manes, in two prasnas, and therefore shares with the rest of the Sútras this designation of the sections. which is peculiar to the Black Yajus 107 The Sutra of Apastamba " is found in the Library of the India House, and a part of it in Paris also Commentaries on it by

Śranta Sútra is also cited in Bühler's Catalogue of MSS from Gujardt, 1 188 (1871), it is in 322 foll The manuscript edited in facsimile by Goldstücker under the title, 'Mdnava Kalpa Sitra, being a portion of this encent work on Vaidil rice to gether with the Commentary of hu marilasedmin (1861), gives but little of the text the commentary quoting only the first words of the passages commented upon whether the con cluding words 'Kundrelabhashyam sarulplam,' really indicate that

Kumarilasvamın was the author of the commentary seems still doubt-

ful. 107 The Bhiradydriva Sotra has now been discovered by Buhler , see his Catal of MSS from Out . 186 (212 foll), the Vaikhanna Sutra is allo quoted ab i 190 (292 foll), see also Haug in I St, ix 175

· According to the quotations, the Vájasmeyska, Babyricha Brábmana, and Satyayanaka are frequently menfroned therein.

Dhutasvámin and Tálavrintanivasin are mentioned. The alone on the Sútra of Baudháyans by Kapardisvamin 190 The work of Satyashadha contains, according to Mahadeu'a's statement, 190 tenuty-seven prakans, whose contains agree pretty closely with the order followed in the Katyas-Sútra, only the last mer form an exception, and are quite peculiar to t. The inneteenth and twentieth prakans refer to domestic ceremonies, which usually find a place in the Ghlya- and Santa-Sútras. In the twenty-first, geneelogical accounts and lists are contained, as also in a prakan of the Baudhayana-Sútra.

Still scantier is the information we possess upon the Grahya-Sútras of the Black Yajus The Kathala Grahya-Sútra is known to me only through quotatious, as are also the Sútras of Baudhayana (extant in the Fort-William

108 On the Apastamba-Srauta-Sútra and the commentance belonging to it, by Dhurtasv , Kapardisvámin, Rudrada ta, Gurudevasvámin, Ka ravindasvámin, Tálav , Ahobalasuri (Adsbila in Bubler, L.c. p 150, who also mentions a Nysinba, p 152), and others, see Burnell in his Cata logue, pp 18-24, and in the Indian Ant quary, 1 5, 6 According to this the work consists of thirty prainas, the first twenty three treat of the secrificial rites in essentially the same order (from dariapurnamasau to sattrayanam) as in Hiran yakesi, whose Sutra generally is almost identical with that of Apastamba , see Bühler s preface to the Ap Dharma-Sútra, p 6, the 24th profac contains the general rules, parithands, edited by M. Muller in Z D M G , 12. (1855), a proparakhanda and a kautraka, prainas 25-27-contain the Gribya-Sútra, prai mas 28 29 the Dharma Satra, edited by Bunler (1868), and finally, praina 30, the Sulva-Sutra (fulra, 'measuring cord')
100 On the Bandhayana Satra com

<sup>18</sup> On the Baudhdyana Satra compare likewise Burnell s Catalogue, pp 24-30. Bhavas ramin, who amongst others commented it, is mentioned by Bhatta Bhattas, and is conserved by Burnell (p 26) in

the eighth century According to Kielhorn, Catalogue of S MSS on the South Division of the Bombay Pres, p 8 there exists a commen tary on it by bayana also, for whom indeed, it constituted the special text-book of the Yajus school to which he belonged, see Burnell, Vanta Brahmana, pp 12-212. In Buhlers Catalogue of MSS from Guy , 1. 182, 184, Anantadeva, Na vahasta, and Sesha are also quoted as scholasts. The exact compass of the entire work is not yet ascertained the Baudhayana Dharma Sutra. which, according to Bubler, Digest of Hindu Low, p. p xx. (1867) forms part of the Srsuta-Suira, as in the case of Apastamba and Hiranvakeán was commented by Govinda

svamin, see Burnell, p 35.

110 Mitridatts and Vanchesvars (f)
are also mentioned as commentators,
see Kielhorn, L c, p 10.

Such hist are also found in davaldyanas work at the end, though only in brief for the Kátiya Sátra, a Parisablta comes in. IPrai mas 26, 27, of Hiranyakets treat of Aharmas, so that here also as in the case of Apast, and Bauth, the Dharma-Sátra forms part of the Scaule Sátra; collection), of Eháradrája, and of Satyáshádha, or Hiranvakes, unless in this latter case only the corresponding prasnas of the Kalpa-Sútra are intended." I have myself only glanced through a Paddhati of the Gribve-Sitra of the Maitravaniya school, which treats of the usual subject (the sixteen samsharas, or sacraments) I conclude that there must also have been a Grihy a-Sutra 112 of the Manara school from the existence of the Code bearing that name, " just as the Codes ascribed to Atri, Apastamba, Chhagaleya Baudhayana, Laugakshi, and Satyayana are probably to be traced to the schools of the same name belonging to the Black Yajus, that is to say, to their Griby a-Sutras.114

Lastly, the Pratisakhya-Sutra has still to be mentioned as a Sútra of the Black Yajus The only manuscript with which I am acquainted unfortunately only begins at the fourth section of the first of the two prasnas This work is of special significance from the number of very peculiar names of teachers \* mentioned in it as Atreya, Kaundinya (once by the title of Sthavira), and Bharadvaja, whom we know already, also Valmiki, a name which in this connection is especially surprising, and further Agnivesys, Agnivesyayana, Paushkarasadi, and others. The two last names, as well as that of Kaundinya, t are mentioned in Buddhist writings as the names either of pupils or of contemporaries of Buddha and Paushkarasadi is also cited in the varitulas to Panini by Katyayana, their author. Again, the allusion occurring here for the first time to the Mimansakas and Taittiriyakas deserves to be remarked,

all This is really so On Apar shadyati and Sarasyati as the proper stamba- and Bharadraja Cubys sec Burnell, Catalogue pp 30-33 The sections of two 'prayogas, of both texts, relating to birth ceremonial, have been edited by Sperjer in his book De Ceremonia cpud Indos que toca'ur sátakarma (Letden, 1872) 115 Je 13 actually extant see Bub

also the contradistinction, found at the close of the work, of Chhandas and Bháshá, te, of Vedic and ordinary language. The work appears also to extend to a portion of the Aranyaka of the Black Yajus, whether to the whole cannot yet be ascertained, and is scarcely probable.

In conclusion, I have to notice the two Anulramanis already mentioned, the one belonging to the Atrey a school, the other to the Charayaniya school of the Kathaka. The former 117 deals almost exclusively with the contents of the several sections, which it gives in their order. It consists of two parts. The first, which is in prose, is a mere nomenclature, the second, in thirty-four slokas, is little more It, however, gives a few particulars besides as to the transmission of the text To it is annexed a commentary upon both parts, which names each section, together with its opening words and extent. The Anukramani of the Kathaka enters but little into the contents, it limits itself, on the contrary, to giving the Rishis of the various sections as well as of the separate verses, and here, in the case of the pieces taken from the Rik, it not unfrequently exhibits considerable divergence from the statements given in the Anukramani of the latter, citing, in particular, a number of entirely new names According to the concluding statement, it is the work of Atri, who imparted it to Laugal shi

We now turn to the White Yans

With regard, in the first place, to the name itself, it probably refers, as has been already remarked, to the fact that the sacrificial formulas are here separated from their

<sup>- 118</sup> In the passage in question (xxiv 5), "chlandoblidshif means rather the Veda language," see Whitney, p 417

<sup>118</sup> We have now an excellent edit on of the work by Whitney, Joer nol Am Or Soc, 1x. ritual basis and dogmatical explanation, and that we have here a systematic and orderly distribution of the matter so confusedly mixed up in the Black Yajus This is the way in which the expression suklani yanunshi is explained by the commentator Dyrveda Gangs, in the only passage where up till now it has been found in this sense, namely, in the last supplement added to the Vrihad-Aranyaka of the White Yajus I say in the only passage, for though it appears once under the form sukrayarunshe, in the Aranyaka of the Black Yayus (5 10), it has hardly the same general meaning there, but probably refers, on the contrary, to the fourth and fifth books of that Aranvaka itself. For in the Anukramani of the Atreva school these books bear the name sukriyakanda, because referring to expiatory ceremonies; and this name sukriya, 'expisting' [probably rather 'illuminating'? belongs also to the corresponding parts of the Sambita of the White Yanus, and even to the samans employed at these particular sacrifices

Another name of the White Yajus is derived from the surname Vájasaneya, which is given to Vájnavalkya, the teacher who is recognised as its anthor, in the supplement to the Vrhad-Aranyaka, just mentioned. Mahidhara, at the commencement of his commentary on the Samhita of the White Yajus, explains Vajasaneva as a patronymic, "the son of Vajasam" Whether this be correct, or whether the word ransons is to be taken as an appellative, it at any rate signifies " "the giver of food," and refers to the chief object lying at the root of all sacrificial ceremonies, the obtaining of the necessary food from the gods whom the sacrifices are to propitiate. To this is also to be traced the name tour, "having food," by which the theologians of the White Yajus are occasionally distinguished.118 Now, from Vájasaneya are derived two forms of words by which the Samhita and Brahmana of the White Yesus are found

In Maha-Bharata, 201, 1507, the word is an epithet of Knahna THere also it is explained as above . for the Rik, however according to the St. Petersburg Dictronary, we asve to assign to it the meaning of 'prosuring courage or strength, victorious gaming booty or write coursecous, howe are the f

by 'food' (anna) is probably purely a scholastic one 1 2.0 According to another explanation, this is because the Sun as Horse revealed to Yaparalkya the andiagimaniminate patauhe, see Vithou Purios, 11 5 23, amil, courageous, horse are the funda-

cried, namely, Vénasansyaka, first used in the Taitinga-Sútra of Ápastamba and the Katiya-Sútra of the White Yajus itself, and Vénasansyinas,\* 2 c, those who study the two works in question, first used in the Anupada-Sútra of the Samaveds.

In the White Yains we find, what does not occur in the case of any other Veda, that Samhita and Brahmana have been handed down in their entirety in two distinct recensions, and thus we obtain a measure for the mutual relations of such schools generally These two recensions agree almost entirely in their contents, as also in the distribution of them , in the latter respect, however, there are many, although slight, discrepancies. The chief difference consists partly in actual variants in the sacrificial formulas. as in the Brahmana, and partly in orthographic or orthospic peculiarities One of these recensions bears the name of the Kanras, the other that of the Madhyamdinas, names which have not yet been found in the Sutras or similar writings The only exception is the Pratifalhya-Sutra of the White Yajus itself, where there is mention both of a Kanva and of the Madhyamdinas In the supplement to the Vrihad-Aranyaka again, in the lists of teachers, a Kanviputra (vi 5 1) and a Madhyamdinayana (iv 6 2) at least are mentioned, although only in the Kanva recension, not in the other, the former being cited among the latest, the latter among the more recent members of the respec-The question now arises whether the two recensions are to be regarded as contemporary, or if one is older than the other It is possible to adopt the latter view, and to consider the Kanva school as the older one For not only is Kanva the name of one of the ancient Rishi families of the Rigveda-and with the Rigveda this recension agrees in the peculiar notation of the cerebral d by l-but the remaining literature of the White Yajus appears to connect itself rather with the school of the Madhyamdinas However this may be,119 we cannot, at

<sup>\*</sup> Occurs in the gond \* Caunaka.\*
[The Vájasaneyaka is also quoted by Lityáyana.]

113 The Madhyamdinas are not

mentioned in Pitamialia Maha bhahya, but the Kanas, the Kan

vaks, a vellow (pingula) Kanva, and a Kanyayana, and also their pupils, are mentoned, see J. St., zu. 417, 444. The school of the Konras Kau, rereads is mentioned in the Kathaka, see un thus I. St., in. 477,

any rate, assume anything like a long interval between the two recensions, they resemble each other too closely for this, and we should perhaps do better to regard their distinction as a geographical one, orthoppic divergencies generally being best explained by geographical reasons. As to the exact date to be ascribed to these recensions, it may be, as has already been stated in our general survey, (p 10), that we have here historical ground to go upona thing which so seldom happens in this field. Arnan, quoting from Megasthenes, mentions a people called Madizvoivol, "through whose country flows the river Andhomati," and I have ventured to suggest that we should understand by these the Madhyamdinas,120 after whom one of these schools is named, and that therefore this school was either then already in existence, or else grew up at that time or soon afterwards \* The matter cannot indeed be looked upon as certain, for this reason, that madhyamdina, 'southern,' might apply in general to any southern people or any southern school, and, as a matter of fact, we find mention of madhyamdina-Kauthumas, 'southern Kauthumas' † In the main, however, this date suits so perfectly that the conjecture is at least not to be rejected offhand. From this, of course, the question of the time of origin of the White Yajus must be strictly separated, it can only be solved from the evidence contained in the

andin the Apastamia Dharma Sótra also reference is sometimes made to a teacher Kapva or Kapva. work itself Here our special task consists in separating the different portions of it, which in its present form are bound up in one whole Fortunately we have still data enough here to enable us to determine the priority or postenority of the several portions

In the first place, as regards the Sambita of the White Yajus, the Vajasaneyi-Samnifa, it is extant in both recensions in 40 adhyayas In the Madhyamdina recension these are divided into 303 anurakos and 1975 kandilos The first 25 adhydyas contain the formulas for the general sacrificial ceremonial, 121 first (1, 11) for the new and fullmoon sacrifice, then (iii.) for the morning and evening fire sacrifice, as well as for the sacrifices to be offered every four months at the commencement of the three seasons. next (1y -y111) for the Soma sacrifice in general, and (1x., x.) for two modifications of it, next (xi-xviii) for the construction of altars for sacred fires , next (xix -xxl) for the sautráriant, a ceremony originally appointed to expiate the evil effects of too free indulgence in the Soma drink . and lastly (xxu-xxv) for the horse sacrifice The last seven of these adhydyas may possibly be regarded as a later addition to the first eighteen. At any rate it is certum that the last fifteen adhyd yas which follow them are of later, and possibly of considerably later, origin. In the Anukramani of the White Yaius which bears the name of Katyayana, as well as in a Parisishta 122 to it and subsequently also in Mahidhara's commentary on the Samhita, xxv1-xxxv are expressly called a Khila, or supplement, and vxxvi-xl, Sukraya, a name above explained. statement the commentary on the Code or Yamavalkya (called Mitakshara) modifies to this effect, that the Sukriya begins at vxx. 3, and that vxxvi I forms the beginning of an Aranyaka,\* The first four of these later added adhyawas (xxvi-xxix.) contain sacrificial formulas v hich belong to the ceremonies treated of in the earlier adhydyas, and

<sup>121</sup> A comprehensive but condensed exposition of it has been commenced in my paper Zer Kennuss desirelischen Opferrinals, in 1 St., x 321-396, xiii 217-292

<sup>\*</sup> That a portion of these lashools is to be considered as an Aran yau seems to be beyond doubt, for XXXVI.-XXXX, IN particular this is cyrtain, as they are explained in the Aranyaka part of the Brahmana.

must be supplied thereto in the proper place. The ten following adhydyas (xxx-xxxix) contain the formulas for entirely new sacrificial ceremonies, viz., the purusha-medha (human sacrifice),122 the sarva-medha (universal sacrifice) the puri-medha (oblistion to the Manes), and the pravarova (purificatory sacrifice) 124 The last adhydya, finally, has no sort of direct reference to the sacrificial ceremonial. It is also regarded as an Upanishad " and is professedly designed to fix the proper mean between those exclusively engaged in sacrificial acts and those entirely neglecting them. It belongs at all events to a very advanced stage of specu lation, as it assumes a Lord (6) of the universe !- Independently of the above-mentioned external testimony to the later origin of these fifteen adhyayas, their posteriority is sufficiently proved by the relation in which they stand both to the Black Yajus and to their own Brahmana, as well as by the data they themselves contain In the Taittiriya-Samhita only those formulas appear which are found in the first eighteen adhyayas, together with a few of the mantras belonging to the horse sacrifice, the remainder of the latter, together with the maniras belonging to the sautramans and the human sacrifice, are only treated of in the Taittiriva Brahmans, and those for the universal and the purificatory sacrifices as well as those for oblations to the Manes, only in the Taittiriya-Aranyaka. In like manner, the first eighteen odhydyas are cited in full, and explained word by word in the first nine books of the Brahmana of the White Yajus, but only a few of the formulas for the szutramans, the horse sacrifice, human sacrifice, universal

kbya.

The transition of the word property is not a hieral see (for this see the St. Peterburg Dict., ander not seny with prep pred) but a horresed from the sense and purpose of the ceremony in question the later is, according to Haugen Art. Britism, 18, p. 42, a preparatory rise intended for providing the property of the present of the pres

Other parts, too, of the Vapas S. have in later times been looked upon as Upanabade for example, the sixteenth bock (Sata rudriya), the thirty first (Furnha rakta), thirty-eround (Tadres) and the beginning of the thirty fourth

book (Sireas meelpe).

+ According to Mibblibura's commentary, its polemic is directed partially against the Bauddhas, that is, probably spainst the doctrines which afterwards were called Sirp

sacrifice, and oblation to the Manes (xix.-xxxv) are cited in the twelfth and thirteenth books, and that for the most part only by their initial words, or even merely by the initial words of the anuidlas, without any sort of explanation, and it is only the three last adhydyas but one (xxxvii - xxxix) which are again explained word by word, in the beginning of the fourteenth book In the case of the mantras, but slightly referred to by their initial words, explanation seems to have been considered unnecessary, probably because they were still generally understood, we have, therefore, of course, no guarantee that the writer of the Brahmana had them before him in the form which they bear at present to those mantras, on the contrary, which are not mentioned at all the idea suggests itself that they may not yet have been incorporated into the Samhita text extant when the Brahmana was composed They are, roughly speaking, of two kinds First, there are strophes borrowed from the Rik, and to be recited by the Hotar, which therefore, strictly speaking, ought not to be contained in the Yajus at all, and of which it is possible that the Brahmana may have taken no netice, for the reason that it has nothing to do with the special duties of the Hotar, en. in the twentieth, thirty-third, and thirty-fourth adhydyas especially Secondly, there are passages of a Brahmana type, which are not, however, intended, as in the Black Yajus, to serve as an explanation of mantras preceding them, but stand independently by themselves, eg, in particular, several passages in the nineteenth adhyana, and the enumeration, in the form of a list, of the animals to be dedicated at the horse sacrifice in the twenty-fourth adhydya In the first eighteen adhydyas also, there occur a few sacrificial formulas which the Brahmana either fails to mention (and which, therefore, at the time when it was composed, did not form part of the Samhita), or else cites only by their initial words, or even merely by the initial words of the anurakas But this only happens in the sixteenth, seventeenth, and eighteenth adhydyas, though here with tolerable frequency, evidently because these adhyanas themselves bear more or less the character of a Brahmana.—With regard, lastly, to the data contained in the last natingayas, and testifying to their posteriority, these

are to be sought more especially in the thirtieth and thirty-minth adhydyas, as compared with the sixteenth, It is, of course, only the Yaius portions proper which can here be adduced, and not the verses borrowed from the Rik-Samhita, which raturally prove nothing in this connection At most they can only yield a sort of measure for the time of their incorporation into the Yaius, in so far as they may be taken from the latest portions of the Rik, in which case the existence of these at that period would necessarily be presupposed. The data referred to consist in two facts. First, whereas in the sixteenth book Rudro, as the god of the blazing fire is endowed with a large number of the epithets subsequently applied to Siva two very significant epithets are here wanting which are applied to him in the thirtyninth book, viz, isana and mahadera, names probably indicating some kind of sectarian worship (see above, p 45) Secondly, the number of the mixed castes given in the thirtieth is much higher than that given in the sixteenth book Those mentioned in the former can hardly all have been in existence at the time of the latter, or we should surely have found others specified besides those that are actually mentioned

Of the forty books of the Samhite the sixteenth and thirtieth are those which bear most distinctly the stamp of the time to which they belong. The sixteenth book, on which, in its Teithers a form, the honour was afterwards bestowed of being regarded as an Upanishad, and as the principal book of the Siva sects, treats of the propitation of Rudra, and (see I St. 11 22, 24-26) by its enumeration and distinction of the many different kinds of thieves. robbers, murderers, night-brawlers, and highwaymen, his supposed servants, reveals to us a time of insecurity and violence its mention, too, of various mixed castes undicates that the Indian caste system and polity were already fully developed. Now as in the nature of things these were not established without vigorous opposition from those who were thrust down into the lower castes and as this opposition must have manifested itself chiefly in fends open or secret, with their oppressors, I am inclined to suppose that this Rudra book dates from the time of these secret feuds on the part of the conquered aborigines, as well as of the Vratyas or unbrahmanised Aryans after

their open resistance had been more or less crushed 125 At such a time, the worship of a god who passes as the prototype of terror and fury is quite intelligible - The thirtieth book, in enumerating the different classes of persons to be dedicated at the nurusha-medha, gives the names of most of the Indian mixed castes, whence we may at any rate conclude that the complete consolidation of the Brahmanical polity had then been effected. Some of the names here given are of peculiar interest So, for example, the magadha, who is dedicated in y 5 "atthrushtaya" The question arises, What is to be understood by magadha? If we take atikrushta in the sense of "great noise, the most obvious interpretation of magadha is to understand it with Mahidhara, in its epic sense, as signifying a minstrel,\* son of a Vaisya by a Kshatriya. This agrees excellently with the dedications immediately following (in v 6), of the suta to the dance, and of the sarlusha to song, though not so well, it must be admitted, with the dedications immediately preceding, of the kliba (eunuch), the uyogu (gambler?), and the punschalu (harlot) The magadha again appears in their company in v 22 † and they cannot be said to throw the best light upon his moral character a circumstance which is certainly surprising considering the position held by this caste in the epic, though, on the other hand, in India also, musicians, dancers, and singers (sailushas) have not at any time enjoyed the best reputation. But another interpretation of the word magadha is possible! In the fifteenth, the

125 By the Buddhist author Ya somitra, scholast of the Abhidhar makeds, the Satarduras is stated to be a work by Vydan against Buddhism whence, however, we have probably to cinclude only that it passed for and was used as a principal support for Siva worship esocially in its detached form as a separate Upanished see Burnouff Introduction at Histoire de Buddi

t Here however the kntawa is put instead of the ayogu, and be

aides, an express condition is laid down that the four must belong neither to the Sudra nor to the Bribmana caste [By ayegs may also be meant an unchaste woman, see I St 176]

\* How he comes by this name is,
it is true not clear

so called Vratya book of the Atharva-Samhita, the Vratya (s.e., the Indian living outside of the pale of Brahmanism) is brought into very special relation to the punschalf and the magadha, faith is called his harlot, the mitra (friend !) his magadha, and similarly the danu, the earth (1), the highting his harlots, the mantra (formula), hasa (score ?) the thunder his mugadhas. Owing to the obscurity of the Vratya book, the proper meaning of this passage is not altogether clear, and it is possible, therefore, that here also the dissolute minstrel might be intended. Still the connection set forth in the Sama-Sútras of Latyayana and Dráhyayana, as well as in the corresponding passage of the Katiya-Sutra between the Vratvas and the magadhadesiya brahmabandhu,200 and the hatred with which the Magadhas are elsewhere (see Roth, p 38) spoken of in the Atharia-Samhita, both lead us to interpret the magadha of the Vrátva book as an heretical teacher. For the passages, also, which we are more immediately discussing, this interpretation vies with the one already given, and it seems, in particular, to be favoured by the express direction in v 22, that ' the manadha, the harlot, the cambler, and the eunuch" must neither be Sudres nor Brahmans,-an inannetion which would be entirely superfluous for the mid-adha at least, supposing him to represent a mixed caste, but which is quite appropriate if the word signifies "a native of the country Magadha." If we adopt this latter interpretation, it follows that heretical (i.e., Buddhist) opinions must have existed in Magadha at the time of the composition of this thirtieth adhydya. Meanwhile, however, the question which of these two interpretations is the better one remains, of course, unsolved. The mention of the nakshalradarsa, "star-gazer," in v 10, and of the

Manadia-explained by Sirens se Majadhadehipanno brahnachdriis contemptuously introduced by the Stiraktra (probably Bandha 211 330 - That there were good Brabmans also in Magadha aprests from the name Magadantist, which is given to Pritibodbiputra, the ercond era of Hrstva Mindakeye, in

yanala, "calculator," in v 20, permits us, at all events, to conclude that astronomical re, astrological, science was then actively pursued It is to it that, according to Mahidhara at least, the "questions" repeatedly mentioned in v 10 relate, although Sayana, perhaps more correctly, thinks that they refer to the usual disputations of the Brahmans The existence, too, of the so-called Vedic quinquennial cycle is apparent from the fact that in v 15 (only in xxvii. 45 besides) the five names of its years are enumerated, and this supposes no inconsiderable proficiency in astronomical observation 127 - A barren wife is dedicated in v 15 to the Atharvans, by which term Sayana understands the imprecatory and magical formulas bearing the name Atharvan, to which, therefore, one of their intended effects. barrenness, is here dedicated. If this be the correct explanation, it necessarily follows that Atharvan-songs existed at the time of the thirtieth book.-The names of the three dice in v 18 (krita, tretá, and dvápara) are explained by Sayana, commenting on the corresponding passage of the Taittiriva-Brahmana, as the names of the enic yugas, which are identical with these-a supposition which will not hold good here, though it may, perhaps, in the case of the Taittinya Brahmana - The hostile reference to the Charakáchárva in v 18 has already been touched upon (p 87) 128

In the earlier books there are two passages in particular which give an indication of the period from which they date. The first of these exists only in the Kánva recension, where it treats of the samflice at the consecration of the king. The text in the Madhyamdina recension (x 40, x 18) runs as follows. This is your king, O ye So and So," where, instead of the name of the people, only the indefinite pronoun am is used, whereas in the Kanva

recension we read (xi 3 3 6 3) "This is your king Oye Kurus Oye Panchalas." The second passage occurs in connection with the horse sacrifice (xxiii. 18) The riahishf, or principal wife of the king, performing this sacrifice, must, in order to obtain a son, pass the night by the side of the horse that has been immolated, placing its sisna on her upastha, with her fellow-wives, who are forced to accompany her, she pours forth her sorrow in this lament "O Amba, O Ambika, O Ambalika, no one takes me (by force to the horse), (but if I go not of my self), the (spiteful) horse will be with (another, as) the (wicked) Subhadra who dwells in Kampila. † Kampila is a town in the country of the Panchalas Subhadra, therefore, would seem to be the wife of the king of that district ! and the benefits of the asvamedha sacrafice are supposed to accrue to them, unless the mahishi consents soluntarily to give herself up to this revolting ceremony. If we are justified in regarding the mahishi as the consort of a king of the Kurus, and the names Ambika and Ambilika actually appear in this connection in the Maha-Bhárata, to wit, as the names of the mothers of Dhritarishtra and Pandu-we might then with probability infer that there existed a hostile, jealous feeling on the part of the Kurus towards the Panchalas, a feeling which was possibly at that time only smouldering, but which in the epic legend of the Maha-Bharata we find had burst out into the flame of open warfare. However this may be, the allusion to Kampila at all events betrays that the verse, or even the whole book (as well as the correspond-

ing passages of the Taitt. Brahmana), originated in the region of the Panchalas, and this inference holds good also for the eleventh book of the Kanza recension 129 We might further adduce in proof of it the use of the word arruna in the Madhyamdina, and of phalouna in the Kanva recension, in a formula 130 relating to the sacrifice at the consecration of the king (x 21) "To obtain intrepidity, to obtain food(, I, the offerer, ascend) thee(, O chariot,) I, the inviolate Arjuna (Phalguna)," as, Indra, Indra-like. For although we must take both these words in this latter sense, and not as proper names (see I St. 1, 100), yet, at any rate, some connection must be assumed between this use and the later one, where they appear as the appellation of the chief hero of the Pandus (or Panchalas?), and this connection consists in the fact that the legend specially applied these names of Indra \* to that hero of the Pandus (or Panchalas?) who was preemmently regarded by it as an incarnation of Indra.

Lastly, as regards the critical relation of the richzs incorporated into the Yayus, I have to observe, that in general the two recensions of the Kanvas and of the Madhyamdinas always agree with each other in this particular, and that their differences refer, rather, to the Yayus portions. One half of the Vayasaneyi-Samhitá consists of richzs, or werses, the other of gopurable, i.e., formulas in prose, a measured prose, too, which rises now and then to a true thythmical swing. The greater number of these richzs

recur in the Rik-Sambita, and frequently with considerable variations, the origin and explanation of which I have already discussed in the introduction (see above, pp o 10) Readings more ancient than those of the Rik are not found in the Yaius, or at least only once in a while, which results munly from the fact that Rik and Yajus agree for the most part with each other, as opposed to the Saman. do, however, find that verses have undergone later alterations to adapt them to the cense of the ritual. And hually, we meet with a large number of readings which appear of equal authority with those of the Rik, especially in the verses which recur in those portions of the Rik-Sambitá that are to be regarded as the most modern.

The Vájasanes i-Samhitá, in both recensions, has been edited by myself (Berlin, 1849-52), with the commentary of Mahidhara,131 written towards the end of the sixteenth century, and in the course of next year a translation is intended to appear, which will give the ceremonial belonging to each verse, together with a full glossary \* Of the work of Unta, a predecessor of Mahidhara, only fragmenta have been preserved, and the commentary of Madhava which related to the Kanva recension 152 appears to be entirely lost Both were supplanted by Mahidhara's work. and consequently obliterated, an occurrence which has happened in a similar way in almost all branches of Indian interature, and is greatly to be regretted.

I now turn to the Brahmana of the White Yaius, the Salanatha-Brahmana, which, from its compass and contents undoubtedly occupies the most significant and important position of all the Brahmanas First, as to its

shorter than that of the Madhyamdinis, it is so only in appearance, the disparity is probably rather to be erplained by the greater length of the kandikis in the former Omissions, it is true, not unfrequently occur. For the rest, I have no means of ascertaining with perfect accuracy the precise relation of the Brahmana of the Kanya school to that of the Madhyamdinas, and what I have to say in the sequel will therefore relate solely to the

latter, unless I expressly mention the former

As I have already remarked, when speaking of the Samhita, the first nine kándas of the Brahmana refer to the first eighteen books of the Samhita, they quote the separate verses in the same order \* word for word, explaining them dogmatically, and establishing their connection with the ritual. The tenth kinda, which bears the name of Agni-rahasya ("the mystery of fire"), contains mystical legends and investigations as to the significance, &c, of the various ceremonies connected with the preparation of the sacred fires, without referring to any particular portions of the Samhita. This is the case likewise in the eleventh kinda called from its extent Ashtidhváví, which contains a recapitulation of the entire ritual already discussed, with supplements thereto, especially legends bearing upon it, together with special particulars concerning the study of the sacred works and the provisions made for this purpose The twelfth Landa, called Madhyama, "the middle one," treats of prhyaschittas or propitiatory ceremonies for untoward events, either previous to the sacrifice, during, or after it, and it is only in its last portion, where the Santrámani is discussed, that it refers to certain of the formulas contained in the Samhita (xix-xxi) and relating to this ceremony The thirteenth Landa, called Assamedha treats at some length of the horse sacrifice, and then with extreme brevity of the human sacrifice, the universal sacnifice, and the sacrifice to the Manes, touching upon the relative portions of the Samhita (xxii-xxxv) but very seldom, and even then very slightly. The fourteenth kánda, called Aranyaka, treats in its first three adhyáyas

<sup>\*</sup> Only in the introduction does of the new moon and full moon sao a variation occur, as the Britimana infices, which is endently more our treats first of the morning and even rect systematically my searnface, and not full afterwards

of the purification of the fire,134 and here it quotes almost in their entirety the three last books but one of the Samhita (xxxvii.-xxxix), the last six adhyayas are of a purely speculative and legendary character, and form by them-selves a distinct work, or Upanishad, under the name of Vrihad-Aranyala This general summary of the con-tents of the several landas of itself suggests the conjecture that the first nine constitute the most ancient part of the Brahmana, and that the last five, on the contrary, are of later origin,-a conjecture which closer investigation reduces to a certainty, both on external and internal evidence With reference to the external evidence, in the first place, we find it distinctly stated in the passage of the Maha-Bharata above alluded to (xii, 11734) that the complete Satapatha comprises a Rahasya (the tenth kanda), a Samgraha (the eleventh lunda), and a Parisesha (the twelfth, thirteenth, and fourteenth lordas) Further, in the idritika already quoted for the name Satapatha. we also meet with the word shashtipatha 155 as the name of a work, and I have no hesitation in referring this name to the first nine landas, which collectively number sixty adhyayas On the other hand, in support of the opinion that the last five handas are a later addition to the first nine, I have to adduce the term Madhyama ("the middle one'), the name of the twelfth Adnda, which can only be accounted for in this way, whether we refer it merely to the last three kandas but one, or to all the five \*

124 The precenture concerns, rather, the lustration of the exerticer bravels, see above note 122, p. 108, 122 It is found in the Praintal Praisinfa also, and along with it the name asinpatha (1), suspently wanted in the precent of the control of

In the latter case a difficulty is caused by the Kanza receiving, which subdivides the last kinds into two justs (xm, xmm), thus divisor, however seems not to have been generally received, ance in the Miss. of Sankara commentary, at least, the Upanahad (xm) is restored throughout as beginning with the

thard adjulya (nm., of the Linds), we that it is all viv councile to be that it is not vive councile to be the lighty remarkable statement is found in the MESS of the Middly appela recension at v 3.7 L, to the effect darget reduces, with 25 Landston and vive the light darget reduces, with 25 Landston and the light darget reduces, despending of reduces, with 3129 Landston at marter of fact, the preceding Lard Liu S amount to this latter number, but it we find that at the norm for the second but, as the norm for the second but, as the norm for the second but with the larget the larget the larget the larget the larget the larget the result is larget to the larget the result in the result in the result in the larget the result in the result in the result in the larget the result in th

Now these last five landas appear to stand in the same order in which they actually and successively originated. so that each succeeding one is to be regarded as less ancient than the one that precedes it This conjecture is based on internal evidence drawn from the data therein contained,-evidence which at the same time decides the question of their being posterior to the first nine kandas In the first place, the tenth Landa still connects itself pretty closely with the preceding books, especially in its great veneration for Sindilya, the principal authority upon the building of altars for the sacred fires The following are the data which seem to me to favour the view that it belongs to a different period from the first nine books 1 4 1. ff., all the sacrifices already discussed in the preceding books are enumerated in their proper order, and identified with the several ceremonies of the Agni-chayana, or preparation of the sacred fireplace - Of the names of teachers here mentioned, several end in -dyana, a termunation of which we find only one example in the seventh, eighth, and ninth kandas respectively thus we meet here with a Rauhinavana, Sayakayana, Vamalakshayana (ulso in vii ), Rajastambayana, Sandilyayana (also in ix.), Satyayanı (also in viii), and the Sakayanins -The Vansa appended at the close (se, the list of the teachers of this book) differs from the general Vansa of the entire Brahmana (at the close of the fourteenth book) in not referring the work to Yamavalkya, but to Sindilya, and also to Tura Kavasheya (whose ancestor Kavasha we find on the banks of the Sarasvati in the Aitareya-Brahmana) The only tribes mentioned are the Salvas and Kekayas (especially their king, Asvapati Kaikeya),-two western tribes not elsewhere alluded to in the Brihmanas -The

preent extent of the work (381z k) is at vi 7 I 19, where also the MSS repeat the above statement (0 555)—It deserves special me into that the notation of the above motivalus kandids the accent at the end of a Lawlide being modified by the accent of the first word of the next landid. From this we might perhaps conclude that the

marking of the accents a earlier in date than the dirision of the text into Landidie As, however, we find exactly the same state of things with regard to the final and initial words of the individual bendenmas (see Jener Literaturizung, 1875, p. 134) we should also have to refer the brahmans division to a later date, and this is hardly possible. legends here as well as in the four succeeding kándas are mostly of an historical character, and are besides chiefly connected with individual teachers who cannot have lived at a time very distant from that of the legends themselves In the earlier kandas, on the contrary, the legends are mostly of a mythological character, or, if historical, refer principally to occurrences belonging to remote antiquity, so that here a distinct difference is evident -The travividya (the three Vedas) is repeatedly discussed in a very special manner, and the number of the richas is stated to be 12,000, that of the yapus-verses 8000, and that of the samans 4000 Here also for the first time appear the names Adhvaryus, Bahvrichas, and Chhandogas side by side .\* here, too, we have the first occurrence of the words upanishad (as sara of the Ved-), uponishadam adesah, mimaned (mentioned once before, it is true, in the first kanda), adhidevatam, adhiyamam, adhiyatmam, 128 and lastly, here for the first time we have the form of address bharan (mstead of the earlier bhagaran) Now and then also a sloka is quoted in confirmation, a thing which occurs extremely seldom in the preceding books Further, many of the technical names of the samans and sastras are mentioned (this, however, has occurred before, and also in the tenth book of the Samhita), and generally, frequent reference is made to the connection subsisting with the richas and somans, which harmonises with the peculiarly mystical and systematising character of the whole I and a

That the eleventh Landa is a supplement to the first nine is sufficiently evident from its contents. The first two adhydyas treat of the sacrifices at the new and full moon, the four following, of the morning and evening sacriheial fires, of the sacrifices at the three seasons of the year, of the mauguration of the pupil by the teacher (acharya), of the proper study of the sacred doctrines, &c . and the last two, of the sacrifices of animals The Rigreda, Yapurieda, and Samareda, the Atharrangera as, the anusasanas, the rudyás, the válorákya, the strhasapuruna, the nárásansis, and the oáthús are named as subjects of study We have

Along with the ydfuridas (those sailful in witchcraft), surparidas adhydroum occur several times in (expent charmers), decapararidas, the earlier books

<sup>1 5</sup> Mirroust adhedayatars, and

already met with this enumeration (see p 93) in the second chapter of the Taitt Aranyaka, although in a considerably later form, and we find a similar one in the In all these passages, the commenfourteenth landa tames, t probably with perfect justice, interpret these expressions in this way, viz , that first the Samhitas are specified, and then the different parts of the Brahmanas, so that by the latter set of terms we should have to understand, not distinct species of works, but only the several portions respectively so designated which were blended together in the Brahmanas, and out of which the various branches of literature were in course of time gradually developed terms anusasana ("ritual precept" according to Sayana, but in Vrhad-Ar, 11 5 19, 1v 3 25, Kithopan, 6 15, "spiritual doctrine"), vidyá, "spiritual doctrine," and gdhd, "strophe of a song" (along with sloka), are in fact so used in a few passages (gdhd indeed pretty frequently) in these last five books, and in the Brahmanas or Upanishads of the Rik and Saman Similarly vákovákya in the sense of "disputation" occurs in the seventh kanda, and strhása at least once in the eleventh kánda itself (1 6 9) It is only the expressions purana and narasansis that do not thus occur, in their stead-in the sense of narrative, legend-we find, rather, the terms ákhyána, vyákhyána, anrákhyana, upákhyána Vyákhyána, together with anuvyál hyána and upavyákhyána, also occurs in the sense of "explanation." In these expressions, accordingly, we have evidence that at the time of this eleventh kanda certain Symbitas and Brahmanas of the various Vedas, and even the Atharya-Samhita itself, were in existence. But further, as bearing upon this point, in addition to the single verses from the songs of the Rik, which are here, as in the earlier books, frequently cited (by "tad etad rishind 'bhyaniktam"), we have in the eleventh kanda one very special quotation, extending over an entire hymn, and introduced by the words "tad etad uktapratyuktam panchadasarcham Bahvrichah prahuh" It is an interesting fact for the critic that in our text of the Rik the hymn in question

<sup>\*</sup> From it has evidently originated 45), which does not harmonie at all explanation also

<sup>†</sup> Here Sáyana forms an excepa passage in Yamaralkyas Code (t. tion, as he at least states the other

with the rest of that work

(mand x 95) numbers not fifteen but eighteen raches Single stokas are also frequently quoted as confirmation. From one of these it appears that the care taken of horses in the palace of Jenamejaya had it that time passed into a proverb this is also the first menton of this king Rudra here for the first time receives the name of Mahadwa\* (v 3 5)—In in it, fit, special rules are for the first time given concerning the begging (bhiskid) of the traches time given concerning the begging (bhiskid) of the traches time given concerning the begging (bhiskid) of the traches time that the thritish book of the Samhitá [v 18]—But what throws special light upon the date of the eleventh kánda is the frequent mention here made, and for the first time, of Jenaka, king (samráf) of Vulcha, as the patron of Yapavalkya The latter, the Kaurupańchán Uddájaka Aruni and his son Svetaketu, aro (es in the Vrhad-Aranyaka) the chief figures in the legends

The twelfth kanda alludes to the destruction of the kingdom of the Srinjayas, whom we find in the second kanda at the height of their prosperity, and associated with the Kurus This connection may still be traced here, for it seems as if the Kauravya Valhika Pratiplya wished to take their part against Chakra, their enemy, who was a native of the country south of the Reva, and priest of King Dushtaritu of Dasapurushamraya, but that his efforts failed—The names Varkali (i.e., Vashkali) and Naka Mandgalya probably also point to a later period of time, the latter does not occur elsewhere except in the Vrihad-Aranyaka and the Taittiriyopanishad. -The Rigveda, the Yajurveda, and the Samaveda are mentioned, and we find testimony to the existence of the Vedic literature generally in the statement that a ceremony once taught by India to Vasishtha and formerly only known to the Vasishthaswhence in former times only a Vasishtha could act as brahman (high priest) at its performance-might now be studied by any one who liked, and consequently that any one might officiate as brahman thereat 157 - In u. 4. I occurs the first mention of purusha Narayana -The name of Proti Kausambeya Kausurubindi probably presupposes the existence of the Panchala city Kansambi.

In the sixth kdnda he is still in Sec on this I St , x 34, 35 ralled manda derag

The thirteenth kánda repeatedly mentions purusha Núrayana Here also Kuvera Vaisravana, king of the Rakshasas, is named for the first time So, too, we find here the first allusion to the siktas of the Rik, the anurakas\* of the Yajus, the dasats of the Saman, and the parrans of the Atharvanas and Angirasas, which division, however, does not appear in the extant text of the Atharvan A division into parrans is also mentioned in connection with the Sarpavidya and the Devajanavidya, so that by these names at all events distinct works must be understood. Of Itabasa and Purana nothing but the name is given, they are not spoken of as divided into parrans, a clear proof that even at that time they were merely understood as isolated stories and legends, and not as works of any extent.138-While in the first nine books the statement that a subject has been fully treated of already is expressed by tasyokto bandhuh for, so sav eva bandhuh, and the like], the same is expressed here by tasyoktam brahmanam - The use in v 1 18 of the words ekavachona and bahuvachana exactly corresponds to their later grammatical signification -This kanda is, however, very specially distinguished by the number of odthds, strophes of historical purport, which it quotes at the close of the account of the horse sacrifice, and in which are given the names of kings who celebrated it in earlier times. Only one of these atthas appears in the Rik Samhita (mand iv 42 8), the greater number of them recur in the last book of the Altareya-Brahmana, and in the Maha-Bharata, xii, 010, ff., in both places with many variations + The question here arises whether we have to regard these outhas as freements of more lengthy hymns, or if they must be looked upon merely as separate memorial verses The fact that in connection with some of these names (if we take into account

\* This term, however, occurs in the preceding kdadas also, eg, in terms in the Sinih. Sr, xvi. 2, Åival Sr x 7

<sup>†</sup> The passages in the Mahi Bhdrata evid-ntly connect themselves with the Satapath Brimmas, to which, as well as to its author Yajnovalkya, and his patron Junka, special regard as had in this book of the Mahi-Bhdrata. [See also Sankh, xvi 8 25-29 32]

the Astareva-Brahmana also) two, three, four, five, and even six verses are quoted, and always in the same metre, in slotas, certainly favours the former view Only one excention occurs where the first and fourth verses are stokas, but the second trishtubh, the third not being quoted at all, it is however, according to the commentary, understood by implication, so that this instance tells, perhaps, with a very special force in favour of the view in question. The analogy of the gathas or slokas of non-historic purport quoted elsewhere cannot be brought forward in support either of the one view or of the other, for the very same uncertainty exists respecting them. Moreover, these verses repeatedly contain very old Vedic forms \* Again, their expressions of eulogy are for the most part very hyperbolical, and they might-therefore perhaps be looked upon as the utterance of a still fresh feeling of gratitude, so that we should have to consider their origin as in part contemporary with the princes they extol otherwise this circumstance does not readily admit of explanation. † A passage in the thirteenth Landa itself directly favours this view (see I St, 1 187) Among the kings here named the following deserve special mention Bharata, son of Duhshanta and the Apsaras Sakuntala, and descendant of Sudvumna-Satanika i Satrajita, king of the Bharatas, and enemy of Dhritarashtra, ling of the Kasis-Purukutsa & Aikshvaka-Para Atnára Hairanyanabha Kausalya - but above all, Janamejaya Parikshita, with the Parikshitiyas (his three brothers) Bhimasena, Ugrasena, and Srutasena, who by means of the horse sacrifice were absolved from "all guilt, all brahmahatya" The time when these last four lived cannot be considered as very distant from that of the kanda itself, since their sacrificial priest Indrota Daivapa Sannaka (whom the Mahá-Bharata, xu. 5595, also specifies as such) is once mentioned in it apparently as coming forward in opposi-

And names too thus, the king of the Panchdlas is called Kravya, the explanation given by the Brah mana being that the Panchdlas were formerly called Krivis.

<sup>†</sup> Unless these verses were merely invened by priests in order to stimulate kings to copy and emulate the literality or their ancestors.

Still this is both in itself a very forced explanation and besides many of these verses are of purely historical purport, and contain no allusion to the presents given to the presets.

See Váj S, 34 52 (not in the

See Rik, rignd iv 42 8

tion to Bhallaveya, while his own opinion, differing from that of the latter, is in turn rejected by Yajnavallya. On account of the interest of the subject I introduce here an other passage from the fourteenth book, from which we may gather the same result We there find a rival of Yamayalkya testing him with a question, the solution of which the former had previously obtained from a Gandharva, who held in his possession the daughter of Kapya Patamehala of the country of the Madras, -the question, namely, "Whither have the Parikshitas gone?" the solution of which therefore appears to have been looked upon as extremely difficult Yajnavalkya answers "Thither where (all) assamedha sacrificers go" Consequently the Parikshitas must at that time have been altogether Yet their life and end must have been still fresh in the memory of the people, and a subject of general currosity \* It almost seems as though their "guilt, their brahmahatya," had been too great for people to beheve that it could have been atoned for by sacrifices were they ever so holy, or that by such means the Parikabitas could have become partakers of the reward fixed for other less culpable evil-doers It appears further as if the Brahmans had taken special pains to rehabilitate their memory, and in this undoubtedly they were completely successful. Or was it, on the contrary that the majesty and power of the Pirikshitas was so great and dazzling, and their end so surpassing, that it was difficult to believe they had really passed away? I prefer, however, the former explanation.

The fourteenth kinda, at the beginning of its first part (that relating to ritual), contains a legend of a contention among the gods, in which Vishin came off victionous, whence it became customary to say, "Vishin is the freshtld (luckest!) of the gods." This is the first time that we find Vishin brought into such prominence, mideed, he otherwise only appears in the legend of the three strides, and as the representative of the sample of the time strides, and the stripe services in fact, ascribed to

<sup>\*</sup> The country of the Madras has in the north we t, and is therefore remote from the country of the Murus According to the Mahd Painta, however, Milri, second

wife of Pandu and mother of the two youngest Pandaras, Nakula and Sahadeva, was a native of this re giop, and Parikshit also had a Ma dray if to wife

hm here also . Indra, as here related, afterwards strikes off his head in jenlousy 120 The second part of this Landa, the Vrihad-Aranyaka, which consists of five pravathakas. or six adhydyas, is again divided into three kandas, the Madhul anda, adhy 1 11. (prap 1 1-11. 5), the Yanaval-kiya-kanda, adhy 111. 1v (prap 11 6-1v 3), and the Khila-Landa, adhy v v. (prap iv 4-v 5) Of these three divi-sions, each succeeding one appears to be later than that which precedes it, and each closes with a Vansa or statement of the line of teachers, carried back to Brahman, the primeval source The third brahmana of the Madhu-Landa is an explanation of three slokas prefixed to it, a form of which we have no previous example The fifth (adhy ii. 1) contains, as has already been stated (p 51), another recension of the legend related in the fourth adhyaya of the Kaushitaky-Upamshad, of Ajatakatru, the king of Kasi, who was jealous of Janaka's fame as a patron of learning The eighth (adhy u. 4) contains another recension of the closing legend in the Yamavalkiya-kanda, of Yanavallya's two wives, Maitreyi and Katyayani,this being the first mention we have of these names Here, as also in the eleventh landa, we find an enumeration of the subjects of Vedic study, namely, Riquela, Yapurveda, Samareda, the Atharvangirasas, itihasa, purána, vidyás, upanishads, slokas, sutras, anveyákkyánas, vyakhyanas. The same enumeration recurs in the Yajinavalkiya-Landa (adhy vi. 10) Samkara and Dvivedaganga. the commentators of the Vrihad-Aranyaka, both, like Sayana (on the eleventh Lánda), take the expressions stildsa, &c., to mean sections in the Brahmanas They are, in fact, as I have already pointed out (p 122), used in

<sup>132</sup> This is wrong. The Lody send forth and to grant the bowstring of Vishpu, who stands learning on his bended bow, the string, snapping and epringing upwards, severs his lead from his body. The same legend recurs not only in the participation of the history and the passage of the history to the participation of the history of the his

the Panch Br of Mahh, alone (cf also T S, nu z a 1) In the Sampatha, Makh, is anily mentioned among the goes Now somethied though to be sure he appears immediately before Yalana.

<sup>\*</sup>The lat five expressions take here the place of anutions exicvitys, norder i, and guides in the eleventh book. The latter are

velated of Vishnu the Taitt. Ar clearly the more and out tells it of Makha Vaishnava, and

this sense in the Brahmanas themselves. It is only in regard to saira that I am unable to prove a similar use (though Dvivedaganga pretty frequently calls certain sentences by the name of sútra, eg, i 2 18, 22, 3 1, &c), and this term raises a doubt whether the opinion of the commentators ought to hold good with reference to these passages also, and their time The ninth (which is the last) brahmana is evidently the one from which the Madhu-kanda received its name. It treats of the intimate relation existing between the four elements (earth, water, fire, air), the sun, the quarters of the heavens, the moon, lightning, thunder, aldsa (ether), &c, on the one hand. and all beings on the other, this relation being set forth by representing the one as the madhu (honey) of the other This doctrine is traced to Dadhvanch Atharvana. as is also, in fact, done in the Rik-Samhita itself (i. 116 12, 117 22) In the beginning of the fourth kanda of the Satap Brahmana also (iv 1 5 18) we find the madhu nama brahmanam mentioned expressly in this connection. Sayana, too, quotes Satyayana (-Vajasaneyau) in support A very early date is thus guaranteed for the name at least and probably also for the contents of this chapter, though its form of course, cannot make any pretension to high antiquity The concluding Vaus't here as elsewhere, varies very much in the two schools, that 13, as regards the last twenty members or so back to Yaska and Asuravana, but from these upwards to the mythical fountein-heads the two schools generally agree Asurayanz himself (consequently, also Yaska, who is recorded as his contemporary) is here placed two stages after Asuri. at the end of the Khila-kanda he is even designated as his papil, Asuri, again, being set down as the pupil of Yamavalkya The list closes, therefore, with about the twenty-fifth member from the latter It must consequently have been continued long after the Madhu-kanda had been finally put into shape, since both the analogy of the Vansa contained in the last brahmana but one of the Khila-landa and the very nature of the case forbid the

<sup>\*</sup> The word sutra is found several supreme Brahman ristif, which, like times here, but in the seres of a band embraces and holds together \*thread, band, only, to denote the everything.

conclusion that its reduction could have taken place so late as the twenty-fifth generation from Yajnavalkya. The commentators never enter into any explanation of these Vansas, doubtless, therefore, they too regarded them as supplements. The names themselves are naturally highly interesting, and, as far at least as the later stages are concerned, are probably strictly authentic -The aim of the Yámavalkíva-kánda is the glorification of Yámavalkya, and it recounts how, at the court of his patron Janaka, king of Videha, he silenced all the Brahmans of the Kurupanchalas, &c. and gamed his patron's full confidence (hke the corresponding legends in the twelfth book of the Maha-Bharata) The legend narrated in the eleventh Landa (vi. 3 f ff.) may perhaps have been the model, at least the Yamavukiya here begins a exactly the same manner, and gives also, almost in the same words, the account of the discomfiture and punishment of Vidagdha Sákalva. which alone is given in the eleventh Landa It closes with a legend already given in the Madhu-kanda, but with some deviations The expressions panditya, muni, and mauna, occurring in this landa, are worthy of special notice as being new 140 (m. 2 1, iv 2 25), further, chahansa, śramara tápasa (1V I 12, 22), pratrajin (1V 2 25, where bhilsnacharya is recommended), and pratibuddha (iv 2 17, the verb pratibudh occurs in this sense 1, 2 21), and lastly, the names chandala and paulkasa (1v 1 22) I am now of opinion t that it is to this Yajnavalkiya-kanda that the iarttika to Panini iv 3 105 refers when it speaks of the Yamaralkani brahmanani as not purana-prokta, but tulyakala, "contemporaneous," 12, with Panini. The wording of the tarttika does not necessarily imply that

hits, vir., viii. I7 14, and x 136 2-5 —First German edition Errata. Paulkasa is found also in V S. 30.

Among them Aévala, the hing's thetar Vidagitha Sikalaya, who tas' his life for his impertmence, Rabola Kan bitakeya, and Gérgi Vécha knasi who all four (the latter at less, according to the Griphs-Sutro) may be locked upon as represent tives of the Rik towards which therefore a kind of pealousy is here upon sizakely exhibited.

the later portous of the P & Sup

<sup>+</sup> Formerly I was of different opinion, see I St., L 57 Many of the riews there expressed—expectally pp 161-222—have here either been further developed or modified after caseful con ideration of the vanous parasger, as may be perceived by totagerson.

these Brahmanas originated from Yajnavalkya himself, consequently they might bear his name simply because treating of him I prefer the latter view, for it appears to me very hazardous to regard the entire Satapatha-Brahmana, or even its last books only, as directly bearing the name of Yajnavalkya, -however fully it may embody his system,-or to set it down as contemporaneous with, or but little anterior to. Panini In regard to the Yamavalkıya-kanda, however, I have not the slightest hesitation in doing the latter 141 - Finally, the Khila-kanda, or last Landa of the Vrihad-Aranyaka, is uniformly described by the commentators as such a kinla, or supplement, and as a matter of fact it is clearly enough distinguished from the other kandas Its first adhyaya-the fifth of the Vrihad-Aranyaks-is made up of a number of small fragments. which contain for the most part mystical plays upon words, of the most clumsy description The second adhyava contains two brahmanas, parts of which, as I have already remarked (p 71), recur in precisely the same form in the Chhandogyopanishad vii. 1, 3 Of the third brahmana, which contains ritual injunctions, we also find another recension, told vii. 2 It concludes with a Vansa, not, however, in the form of a list, but of a detailed account According to at the first author of the doctrine here taught was Uddalaka Aruni, who imparted it to Yainavalkva, here for the first time called Vajasaneya, \* his pupil was Madhuka Paingya, from whom the doctrine was transmitted to Chúda Bhagavitti, then to Jánaki Avahsthúna, and lastly to Satvakáma Jabála The name of the latter (a teacher often alluded to in the Chhandogyopanishad) is in fact borne in later works by a school of the White Yaius so

<sup>14.</sup> On this subject compare Gold stückers detailed discussion in his Pefrant p 132-40 and my special rejoiner, I St. v 65-74, xm 443, and 44, I St. n 212. According to the state of the state fund, the state of the state fund, the state of the state of

nini Although he here counts Yájnavalkya among the purdgas, 'ancients,' and this interpretation is required by the wording of the vdrttka,—yet the Kásíks, on the contrary, expressly declares him to

dilaka Arupi 12, like the other Brah
mane, silenced by Yajaawalkya no
mention being made of his being
the preceptor of the latter

that we might perhaps ascribe to him the final adjustment of this doctrine in its existing form. The fourth and last brahmana of this adhyaya is, like the third, surprising, from the nature of its contents, which, consisting as they do of the rites to be observed before, and at the time of. costus, as well as after the birth of a son, more properly pertain to a Gribya-Sutra It too closes with a Vansa\* this time of quite unusual length, and distinguished, as far as the more recent members are concerned, by this peculiarity, that their names are formed by the addition of putra to the mother's name (see above p 71), and that both parts of the names are accentuated Asun as here called the pupil of Yamavalkya, and the latter the pupil of Uddalaka Then, having passed through ten more stages and arrived at Aditya, the sun-god, as the original author. we find the following words as the close of the whole Brahmana ádstyáni máni sukláni yapunshi Vájasaneyena Yamavalkyena 'lhyayante, 'these White Yajus-texts oncanating t from Aditva are transmitted by Vanasaneva Yajnavalkya.' According to Samkara and Dvivedaganga. this Vansa does not refer to the Khila-kanda, but to the entire Pravachana, the entire Veda (1 e, the White Yajus). This view is at all events favoured by the fact that the Vansa at the close of the tenth book (the only one which appears in the whole of the Satapatha-Brahmana, besides those of the Madhu-kanda, Yajnavalkiya-kanda, and Khilakanda) 1 evidently refers to this Vansa, and presupposes its existence when at its commencement it says sandram a Sampriputrat, 'up to Sampiviputra the teachers are the same' For, ascending from this Samjiviputra, there are still in this Vanéa three steps up to Yamavalkya, while in the tenth book, as before remarked, the doctrine is not traced up to the latter at all, but from Samifviputra through five steps to Sandilya, and through two more to Tura Kayasheva 5-This latter circumstance suggests to

<sup>\*</sup> In the Kanva recension the Vanus invariably form separate the words Ydingralkuend "khud chapters, + Or 'these White Yapus texts

us, moreover, the possibility of yet another division of the Satapatha-Brahmana with reference to the one in of the different handas For in the first five and the last four handas the name of Yájnavalkya meets us exclusively, and very fre quently, as that of the teacher whose opinion is appealed to as the decisive authority, whose system consequently is in any case there set forth Further, if we except the Yanavalkiya-kanda and the gathas in the thirteenth Landa, races settled in eastern or central Hindustán are the only ones mentioned in these kandas, viz, the Kurupañchalas, Kosalavidehas, Sviknas, and Smijayas Once only the Prachyas (eastern tribes) are opposed to the Vahikas (western tribes), again there is once mention made of the Udichyas(in habitants of the north), and lastly, the (southern) Nishadhas are once alluded to in the name of their king Nala Naishadha (or, as he is here called, Naishidha) From this the remaining kándas—the sixth to the tenth—differ palpably enough. They recognise Sandilya as the final authority ? instead of Yajnavalkya, whom they do not even name, neither do they mention any but north-western races. viz. the Gandheras with their king Nagnaut, the Salvas, and the Kekayas ! May not the above-mentioned Vanis apply not only to the tenth book, but to these five kandas? Since the latter treat specially of the fire-ritual, of the erection of the sacred fire-altars, their possible north-

<sup>&</sup>quot; The fact that this is so clear may easily account for the circum stance that the Purares have here for once a statement in conformity with fact, as they cite Yanavslkya as the author of the White Yayus. Us may here mention that the name of Yangavalkya occurs nowhere else in Vedia I terature, which might be explained partly by the difference of locality, partly by his having edited the Whits Yajus after the text of the other Vedes had been fixed, though the latter reason seems insufficient, since other teachers of the White Yajus are mentioned fre quently in later Vedig literature, as, formstagee Arms, byelaketu Satyalama Jabala, &c., who are either his contemporaries, or belong to even

later times Besider his patron Janaka in mentomed at his it makes in the fixed his patron of the fixed

<sup>+</sup> So do the Sama Sutres, Sindilya is mentioned besides in the Chhandegyop only The legend concerning these so

curs in the Chhandegrop

western origin might be explained by the fact that the doctrine upon this subject had, though differing from that of the Persa-Arvans, been kept particularly pure in the north-west owing to the proximity of this latter people \* However this may be, whether the north-western origin of the doctrine of these five Adadas be well founded or otherwise,142 they at any rate belong, in their present form, to the same period as (the tenth possibly to a somewhat later period than) the first five Landas. On this point the mention of Aruna Aupavesi, Aruni, Svetaketu Aruneva. and of Indradyumna (in the tenth book), as well as the frequent reprehension of the Charakadhvaryus, is decisive. That the various parts of the Brahmana were blended together by one arranging hand 143 is evident in particular from the repeated occurrence of phrases intimating that a subject has already been treated of in an earlier part, or is to be found presented more in detail in a later part. A closer investigation of the various instances where this occurs has not as yet been within my power.
The number of deviations in regard to ritual or readings.

The number of deviations in regard to ritual or readings ited in the Brahmana is very great. To these regard is had here and there even in the Samhita itself, two different mantres being quoted side by side as equally good. Most frequently the citation of such variations in the Prahmana is introduced by the words sty etc, or tad dhab, yet pretty often the names of individual teachers are also mentioned, who must here, in part at least, be looked upon as representing the schools which bear their names. Thus in addition to those already named we have Ashachla Savaysas, Barku Varshna, Aupoditeya, Pañch, Takshan, Jirala Chailaki, Asun, Madluid, Kaboda Kaushitaki, Varshna Satiy ayana, Satiyayani, Tandya, Budla Asvatarafu,

Ought we to bring the \$644 yan is into direct connection with the latter? But then what would become of the connection between Sakayanya (in the Maitrayan) Una.

Rama Aupatasvini, Kaukústa, Mahitthi, Mudimbha\* Andanya, Szumápau Mánutentavyau, Satyakama Jabála, Šailali, &c Besides the Charakadhvaryus, Bhallaveya in particular is regularly censured, from which I conclude, as already stated (p Q5), that the Bhallavi-Brahmana should be reckoned among those of the Black Yajus. By the "eke." where these are found fault with, we should probably also understand (eg, once for certain in the irist kánda) the adherents of the Black Yaius Once, however (m the eighth kanda), a reading of the Kanva school is quoted by "eke" and disputed How the matter stands in the Brahmana of the latter as to this passage, whether it finds fault with the reading of the Madhyamdina school. I am not able to say A collection of passages of this

kind would naturally be of peculiar interest

The legends interspersed in such numbers throughout the Brahmana have a special significance. In some of them the language is extremely antiquated, and it is prohable therefore that before their incorporation into it they possessed an independent form The following deserve special mention from their being treated in detail, viz, the legends of the Deluge and the rescue of Manu, of the emigration of Videgha Mathava from the Sarasvati to the Sadanira in the country of the Kosala-Videhas, of the restoration to youth of Chyanana by the Asvins at the request of his wife Sulanya, the daughter of Saryata Manava, of the contest between Kadru and Suparni, of the love and separation of Pururavas and Urvasi, and others Many of them reappear as episodes in the epic, in a metrical garb, and often very much altered obvious that we have here a much more intimate connection with the epic than exists in the other Brahmanes The names Vallinka, Janamejaya, and Nagnajit have the most direct reference to the legend of the Maha-Bharata, as also the names already discussed above in connection with the Samhita, Amba, Ambika, Ambalika, Subhadra, and the use there made of the words arguna and phalguna In any case, we must look for the explanation

<sup>\*</sup> Compare the Mutibhas in the Midduks (or Paing) a), and Kaushi-Atlar Br --Of the above, only Bu take are mentioned elsewhere glis, the Saumapau Satyakan

of this in the circumstance, that this Brahmana substantially originated and attained its final shape among the tribes of the Kurupanchales and the neighbouring Kosala-The king of the latter, Janaka, who is represented in it as the chief patron of the sacred doctrine it embodies, bears the same name as the father of Sita and father-in-law of Rama, in the Ramayana This is, however, the only point of contact with the Ramayana legend which can here be traced, and as the name Janaka seems to have belonged to the whole family, it also virtually disappears Nevertheless I am inclined to identify the father of Sita with this exceptionally hely Janaka, being of opinion that Sita herself is a mere abstraction, and that consequently she had assigned to her the most renowned father possible. As regards the special relation in which the Brahmana stands to the legend of the Maha-Bharata, Lassen, it is well known, takes as the fundamental feature of the latter a conflict between the Kurus and the Panchalas, ending in their mutual annihilation, the latter being led by the family of the Pandus, who came from the west. Now at the time of the Brahmana, we find the Kurus and the Panchalas still in full prosperity, and also united in the closest bonds of friendship as one people t Consequently this internecine strife cannot yet have taken place. On the other hand, in the latest portions of the Brahmana, we find the prosperity, the sin, the expirition, and the fall of Janumejaya Parikshita and his brothers Brimasena, Ugrasena, and Srutisena, and of the whole family of the Parilishitas, apparently still fresh in the memory of the people and discussed as a subject of controversy Maha-Bharata boundless confusion prevails regarding these Janamejaya and his brothers, already mentioned, are represented either as great-grandsons of Kuru, or else as the great grandsons of the Panduid Ariuna, at whose snake-sacrifice Valsampayana related the history of th

<sup>\*</sup> Though certainly in the last poittons of the Br. the Kosala-Videhas seem to have a certain preponder ance and there had perhaps existed as early as the time of the Samhiti (see p. 114) a certain rivalry between the Kurus and Pascidias

<sup>+</sup> At less I am not able to offer another explanation of the work Kurupahchila it is, moreover, noteworthy that no name of a king of the Kurupahchiles is ever ment oned, Such names are quoted only for Kaurayas or Féfichila kings.

great struggle between the Kurus and the Pandus Adopting the latter view, which appears to be the better warranted, from the fact that the part of the Maha-Bharata which contains it is written in prose, and exhibits a pecu harly ancient garb, the supposed great interpeding conflict between the Kurus and the Panichalas, and the dominion of the Pandavas, must have been long past at the time of the Brahmana. How is this contradiction to be explained? That something great and marvellous had happened in the family of the Pankshitas, and that their end still excited astonishment at the time of the Brahmana, has already been stated. But what it was we know not. After what has been said above, it can hardly have been the overthrow of the Kurus by the Panchalas, but at any rate, it must have been deeds of guilt, and indeed I am inclined to regard this as yet unknown 'something' as the basis of the legend of the Mahá-Bhárata.143 To me it appears absolutely necessary to assume, with Lassen, that the Panday as did not originally belong to the legend, but were only associated with it at a later time,145 for not only is there no trace of them anywhere in the Brahmanas or Sútras, but the name of their chief hero, Arjuna (Phalguna), is still employed here, in the Satapatha-Brahmana (and in the Samhita), as a name of Indra, indeed he is probably to be locked mon as originally identical with Indra, and therefore de titute of any real existence Lassen further (I AK, 1, 6.17, ff.) concludes, from what Megusthenes (in Arrian) reports of the Indian Heracles, his sons and his daughter Harbaia, and also from other occounts in Curtius, Pliny, and Ptolemy,\* that at the time when Megasthenes wrote, the mythical association of Krishna (?) with the Panda as already ex-

sted. But this conclusion, although perhaps in itself probable, is at least not certain, of and even if it were, it would not prove that the Pándavas were at that time already associated with the legend of the Kurus. And if we have really to assign the arrangement of the Madhyamdins recession (see p. 100) to about the time of Megestienes, it may reasonably be inferred, from the lack of all mention of the Pandavas in it, that their association with the Kurus had not then been established, although, strictly speaking, this conclusion has weight not so much for the period when the arrangement of the work actually took place, as for the time to which the pecess arranged belong

As with the epic legends, so also do we find in the Satapatha-Brahmana several points of contact with the legends of the Buddhists, on the one hand, and with the later tradition concerning the origin of the Samkhya doctrine, on the other First, as regards the latter Asur, the name of one of its chief authorities, is at the same time the name of a teacher frequently mentioned in the Satapatha Brahmana. Again, though only in the Yajnavalkiya-kanda, we have mention of a Kapya Patamchala of the country of the Madras as particularly distinguished by his exertions in the cause of Brahmanical theology, and in his name we cannot but see a reference to Kapila and Patamjali, the traditional founders of the Samkhya and Yoga systems As regards the Buddhist legends, the Sakvas of Kapilavastu (whose name may possibly be connected with the Sakavanins of the tenth landa, and the Sakayanva of the Maitrayana-Upanishad) called themselves Gantamas, a family name which is particularly often represented among the teachers and in the lists of teachers of the Brahmana. It is moreover, the country of the Kosalas and Videhas that is to be looked upon as the cradle of Buddhism.-Svetaketu (son of Aruni), one of the teachers most frequently ment ened in the Satapatha-Brahmana, is with the Buddan s the name of one of the earner births of Sakvamum

The me.st of Hercules with Hardan must certainly be traced to the nees of Prijicate and his daughter so often toucked ou in the branmarus. The Valueva

and Arguna occur together in Pán, iv 3 93, cannot be considered as a proof of their being connect 4 with each other, see I &t, xiii 2-2, ff.]

(see Ind Stud., u. 76, note) -That the magadha of the Samhitá may perhaps also be adduced in this connection is a point that has already been discussed (pp 111, 112) -The words arhant (111. 4. 1 3, ft.), framana (Vrib. Ar, 1v 1 22, as well as Taitt. Ar , 11. 7, beside tápasa), mahábráhmana (Vrih Ar, u 1 19 22), and praisbuddha, although by no means used in their Buddhistic technical sense, yet indicate how this gradually arose. - The name Chelaka also in the Brahmana may possibly have some connection with the peculiarly Buddhistic sense attached to the word chela Agatasatru and Brahmadatta, on the contrary, are probably but namesakes of the two persons designated by the Buddhists under these names as contemporaries of Buddha (?) The same probably also applies to the Vatsiputrivas of the Buddhists and the Vatsipuiras of the Vrih. Arany (v 5 31), although this form of name, being uncommon, perhaps implies a somewhat closer connection. It is, however, the family of the Kátvávanas. Katvavaníputras, which we find represented with special frequency among the Buddhists as well as in the Brahmana (although only in its very latest portions) We find the first mention f of this name in the person of one of the wives of Yamavalkya, who is called Katvavani, both in the Madhu-kanda and the Yajnavalkiya-kanda, it also appears frequently in the lists of teachers, and almost the whole of the Sútras belong-

mg to the White Yajus bear this name as that of their author

The Satapatha-Brahmana has been commented in the Madhyamdina recension by Harisvamin and Sayana, but their commentaries are so far extant only in a fragmentary form,16 The Vrihad-Aranyaka has been explained by Dviveda Ganga (of Gujarat), and in the Kanva recension by Samkara, to whose commentary a number of other works by his pupils, &c, attach themselves. As yet onlythe first Larga, with extracts from the commentances, has been published, edited by myself. In the course of the next three years, however, the work will be printed in its entirety it? The Vrihad-Aranyaka in the Kanva recension has been edited by Poley, and recently by Roer, together with Samkara's commentary and a gloss thereon. 148

I now turn to the Sútras of the White Yams The first of these, the Srauta-Sutra of Katyayana, consists of twefity-six adhydyas, which on the whole strictly observe the order of the Brahmana. The first eighteen correspond to its first nine kandas, the Santramani is treated of in the nineteenth, the horse sacrifice in the twentieth advidua, the twenty-first contains the human, universal, and Manes sacrifices The next three adhyavas refer, as before stated (p 80), to the ceremonial of the Samayeda, to its several ekahas, ahinas, and sattras, yet they rather specify these in the form of lists than present, as the other adhyduas do, a clear picture of the whole sacrificial proceedings The twenty-fifth adhyaya treats of the prayaschittas, or expiatory ceremonies, corresponding to the first part of the twelfth landa, and lastly, the twenty-sixth adhydya contains the pravargya sacrifice, corresponding to the first part of the fourteenth kanda-Only a few teachers are cited by name, and among these are two belonging to authors of Sútras of the Black Yajus, viz., Laugakshi and Bharadvaja, besides whom, only Jatukarnya, Vátsya, Bádan, Kaša-

<sup>16</sup> And in very bad manuscripta Thelast fasciculus was published in 1855 A translation of the first book, and also of some legenus spe cially mentioned above, is printed in vol. v. of my Indusche Street in (1868)

<sup>143</sup> Poer's translation (1826) includes the commentary of the first addydya, he also gives several extracts from it in the subsequent chapters.

knism, and Kárshnajm are named. We meet with the three last of these elsewhere only 119 in the Vedanta Satra of Badarayana, Badarı excepted, who appears also in the Mumansa Sutra of Jamun. Vatsya is a name which occasionally occurs in the Vansas of the Satapatha-Brahmana, 100 and the same applies to Jatukarnya, who appears in the Vansa of the Madhu- and Yajnavalkiya-landes in the Kanva recension as a pupil of Asurayana and of Yasha. (In the Madhyamdina recension, another teacher inter venes between the last-named and Jatukarnya, viz. Bharadvaja.) He is also mentioned in the Aitareva-Aranyaka. and repeatedly in the Pratisakhya-Sutra of the White Yajus Besides these, "eke" are frequently quoted, whereby reference is made to other Sakhas One passage gives expression to a certain hostility towards the descendants of the daughter of Atra (the Haleyas, Valeyas, Kaudreyas, Saubhreyas, Vimarathyas, Gopavanas), while the descendants of Atri himself are held in especial honour. A similar hostility as exhibited in other passages towards the descendants of Kanva, Kasyapa, and Kautsa, yet these three words, according to the commentanes, may also be taken as appellatives, kanva as "deaf," kasyapa as "having black teeth" (Sydradanta), and Lautsa as "doing blamable things" The first adhydya is of peculiar interest, as it gives the paribháshás, or general rules for the sacrificial ceremonial. Otherwise this work, being entirely based upon the Brahmana, and therefore in no way an independent production. contains but few data throwing light upon its probable are. Amongst such we may reckon in particular \* the concumstance that the word roava. "conquest," se of the

points of the compass, as once used in the sense of the points of the compass themselves (xx 4.26), which evidently presupposes the custom of the day-viguas—probably also poetical descriptions of them (1). The adhydyas relating to the Saman ceremonal (xxii—xxi) are the relating to the Saman Sutras, of the sacrifices on the Sarayata, and also of the Vatiya-kerifices, at which we find the Magadhalesiya brahmadandhu (xxii 4.22) occupying the same position as in Latyayane.

The Katyayana-Sútra has had many commentators, as Yasoga, 12 Pttribhútt, Karka (quoted by Sayana, and therefore prior to hum 125), Bhartryana, Sri-Ananta, Devayajnıka (or Yajulkadera), and Mahadeva. The works of the three last,† and that of Harka are, however, the only ones that seem to have been preserved. The text, with extracts from these commentaries will form the third part of my edition of the White Yaque. 125—To this Sútra a multitude edition of the White Yaque. 125—To this Sútra a fulltitude

ff) contain by far richer material if all these schools actually existed but there is certainly a great d al of more error and embellishment in these statements—then, in truth,

hmentably jittle haben left to us. 139 See Stemier a account of its contents in Z D M O, vin. (18,3) and his easy ou the orphodic (Pdr. 1, 8, Brealsu 1855). — He see, toons on instringe corespondid Law been published by Hasa, I Z I, 28, ff., which the sections on the Sperim (1872) legelier with critical ramata (pg. 1-2-3) to the Moole test which was used by Stemier Yajus also (according to the Charanavyuha) derived its name The word Paraskara is used as a samina, or proper name—but, according to the gana, to denote a district—in the Sútra of Panin, but I am unable to trace it in Vedic literature To this Grihya-Sútra there are still extant a Paddhati by Vasudeva, a commentary by Jayarama, and above all a most excellent commentary by Rama-Lrishne under the title of Samslara-ganapats, which ranks above all similar works from its abundant quotations and its very detailed and exhaustive handling of the various subjects In the introduction, which deals with the Veda in general and the Yajurveda in particular, Ramakrishna declares that the Kanva school is the best of those belonging to the Yajus -- Under the name of Paraskara there exists also a Smriti-Sastra, which is in all probability liased upon this Gribya-Sutra. Among the remaining Smritt-Sastras, too, there are a considerable number whose names are connected with those of teachers of the White Yajus, for instance, Yajnavalkya, whose posteriority to Manu quite corresponds to the posteriority of the White Yajus to the Black Yajus—and no doubt also to that of the Katiya-Sútra to the Manava-Sútra, -further, Katyayana (whose work, however, as we saw, connects itself with the Samaveda), Kanva, Gautama, Sandilya, Jabah, and Parasara. The last two names appear among the schools of the White Yajus specified in the Charanavyuha, and we also find members of their families named in the Vanéas of the Satapatha-Brahmana, where the family of the Parasaras is particularly often represented.\*

The Pratisakhya-Sútra of the White Yajus, as well as its Anakramani, names at its close Katyavana as its author In the body of the work there is mention, first, of three grammanans, whom we also find cuted in the Pratisakhya of the Rik, in Yaska, and in Panni, viz. Sakatayana, Sakalya, and Gargya, next, of Kasyapa, likewise mentioned by Panni, and, lastly, of Dalbhya, Jatukarnya, Saunaka (the author of the Rik-Pratisakhya a), Auprávy,

compendium for religious meads-

<sup>\* (</sup>S-e I St., 1.156) Pánini, iv canta. [The Párdárono biústacad. 3. 110 (a rule which possibly does are mentioned in the Mahibháshya nut belong to him), atribute to a also, and beades a Kalpa by Pará Párdárya a Bhahan Sutra, ha a fara, see I St., 111, 3,0, 445).

Kanva, and the Madhyamdinas The distinction in 1. 1 18. 19 between weda and bhashya, re, works in bhasha, -which corresponds to the use of the latter word in Panini, -has already been mentioned (p 57) The first of the eight adhyáyas contains the saminás and paribháshás, ie, technical terms and general preliminary remarks second adhy treats of the accent, the third, fourth, and fifth of samskara, ee, of loss, addition, alteration, and constancy of the letters with reference to the laws of euphony, the sixth of the accent of the verb in the sentence, &c , the eighth contains a table of the vowels and consonants, lays down rules on the manner of reading 150 (svadhyaya), and gives a division of words corresponding to that of Yaska. Here, too, several sloias are quoted referring to the desties of the letters and words, so that I am almost inclined to consider this last adhyaya (which is, moreover, strictly speaking, contained in the first) as a later addition to We have an excellent commentary on this work by Uvata, who has been repeatedly mentioned, under the title of Matmmodal a 151

The isubcraman' of Katyiyana contains, in the first place, in the first four adaptives (down to 17 g), an index of the authors, deities, and metres of the several skilden yavianah "White Yayas formulias" contained in the "Middly and mitty Vajassneyake Vajarsneyake yaven to the several from Vitasvani, the sun-god For their vanilyaya, or liturgical use, we are referred to the Kalpakara. As regards the maines of authors here mentioned, there is much to be remarked The authors given for the richas usually agree with those assigned to the same verses in the Rig anukra mand, there are, however, many exceptions to this Very often the Purtualiar name appears (as is also the case in often the Purtualiar name appears (as is also the case in

the Rig anukramani) to be borrowed from some word occurring in the verse. In the case where a passage is repeated elsewhere, as very often happens, it is frequently assigned to an author different from the one to whom it had previously been attributed. Many of the Rishis here mentioned do not occur among those of the Rik, and belong to a later stage than these, among them are several even of the teachers mentioned in the Satapatha-Brahmana, The closing part of the fourth adhyaya\* contains the dedication of the verses to be recited at particular ceremonies to their respective Rishis, deities, and metres, together with other similar mystical distributions the fifth adhydya gives a short analysis of the metres which occur In the excellent but unfortunately not altogether complete Paddhati of Śrihala to this Anukramani we find the liturgical use of each individual verse also given in detail.

The Yajus recension of the three works called Vedángas, viz, Sikshá, Chhandas, and Jyotisha, has already been dis-

cussed (p 60) t

We come now to the Atharvaveda

The Samhità of the Atharvaveda contains in twenty kándas 1-3 and thirty eight prapáthakas nearly 760 hymns and about 6000 verses Besides the division into prapáthakas, another into anuelkas is given, of which there are

Published together with the fifth adhydya, and the beginning of the work, in my edition of the Vájazaneyi Samhitá, introduction, pp. ly-lyni

<sup>†</sup> For particulars I refer to my Catalogue of the Berlin MSS, pp 96-100 [and to my editions, already mentioned, of these three tracts] 114 This devision of the Ath S

unto twenty books a sitested for the period of the author of the edithica, and also by the Gopatha Erdhunga 1. S, see J. St., xiii 433, whereas both the Ath. S itself (19.22, 23) and the Ath. Par 43. 4-6 still contain the direct, intimation that it formerly consisted of sixteen books only. see J. St. 17. 423-434.

<sup>. .</sup> 

some ninety The division into parvans, mentioned in the thirteenth book of the Satapatha-Brahmana, does not appear in the manuscripts, neither do they state to what school the existing text belongs As, however, in one of the Parisishtas to be mentioned hereafter (the seventh), the richas belonging to the ceremony there in question are quoted as Parppalada manirah, it is at least certain that there was a Samhita belonging to the Paippalada school. and possibly this may be the Samhita now extant 159 Its contents and principle of division are at present unknown 100 in their details We only know generally that "it principally contains formulas intended to protect against the baneful influences of the divine powers, against diseases and noxious animals, cursings of enemies, invocations of healing herbs, together with formulas for all manner of occurrences in every-day life, prayers for protection on journeys, luck in gaming, and the like " +-all matters for which analogies enough are to be found in the bymns of the Rik-Samhita. But in the Rik the instances are both less numerous and, as already remarked in the introduction (p 11), they are handled in an entirely different manner, although at the same time a not inconsiderable portion of these songs reappears directly in the Rik, par-ticularly in the tenth mandala. As to the ceremonial for which the hymns of the Atharvan were used, what corre-

Me According to a track recently pablished by Roth, Den Atharoneda in Kashmi (1875), this is not the case, the criant Samhitá seems rither to belong to the school of the Saunakas, whilst the Parppalda Samhitá has come down to us in a second recension, still preserved in Kashmir

100 The arrangement in books you for some control of the number of verses in the different pieces, these have, on an average four verses in book I, five in II, set in III, se

ringe, av of the glorifleation of Virtya, avi., wint of certain con jurations, xuil, of burnal and the institution of the flatters of the consideration, book are contained, with one peculiar exception, with one peculiar exception, which were between the consideration of the consideration of the flatters of these two last books in other of these two last books in contend in the Athera Particially (see note 10f)) and therefore the right of the turns of the work.

des Weda, p 12

sponds to it in the other Vedas is found, not in the Srauta-Sútras, but with few exceptions in the Grihya-Sútras only, and it appears therefore (23 I have likewise already remarked) that this ceremonial in its origin belonged rather to the people proper than to the families of priests in the Shadvinsa-Brahmana and in the Sama Sútras we actually meet with a case (see p 78) where an imprecatory ceremony is borrowed from the Vratinas, or Aryans who had not adopted the Brahmanical organisation, we may further reasonably conjecture that this was not a solitary instance, and thus the view naturally presents itself that, though the Atharva-Samhita originated for the most part in the Brahmanical period, yet songs and formulas may also have been incorporated into it which properly belonged to these unbrahmanical Aryans of the west . And as a matter of fact, a very peculiar relation to these tribes is unmistakably revealed in the fifteenth kanda, where the Supreme Being is expressly called by the name of Vratya,101 and is at the same time associated with the attributes given in the Samaveda as characteristics of the Vratyas In the same way, too, we find this word Vratya employed in the Atharva Upanishads in the sense of "pure in himself" to denote the Supreme Being The mention of the magadha in the Vrátya-book, and the possibility that this word may refer to anti-brahmanical Buddhist teachers, have already been discussed (p 112) In a passage communicated by Roth, op e p 38, special, and hostile, notice is taken of the Angas and Magadhas in the East, as well as of the Gandháris, Mújavants, Súdras, Mahavrishas, and Valhikas in the North-West, between which tribes therefore the Brahmanical district was apparently shut in at the time of the composition of the song in question. Intercourse with the West appears to have been more active than with the East, five of the races settled in the West being mentioned, and two only of those belonging to the

the Chalikopanishad, v II (see f St., v. 445, 446, iz. 15, 16). According to Roth on the contrary (see above p. 112, note) the purpose of the book is rather "the idealising of the devout vagrant or mendicant (parteriolate, de.)."

In the Visbur Purings the Sain dharss, Saindhaviyacus are men toned as a school of the Atharran.

In This explanation of the contents of this book and of the word writing is based upon its employment in the Prasoopanishad 2 7, and in

East. In time it will certainly be possible, in the Atharya Sembita also, to distinguish between pieces that are older and pieces that are more modern although upon the whole geographical data are of rare occurrence. Its language exhibits many very peculiar forms of words, often in a very antique although prakritized shape. It contains in fact, a mass of words used by the people which from lack of occasion found no place in the other branches of the literature The enumeration of the lunar astensms in the nmeteenth landa begins with krittika, just as in the Taittiriva-Samhitá, but otherwise it deviates considerably from the latter, and gives for the most part the forms of the names used in later times 152 No direct determination of date, however, can be gathered from it as Colebrooke imsgined Of special interest is the mention of the Asura Krishna \* Kesin, from the slaving of whom Krishna (Angirasa 2. Devakiputra) receives the epithets of Kesihan, Kesisúdana in the Epic and in the Puranas In those hymns which appear also in the Rik Samhita (mostly in its last mandala), the variations are often very considerable, and these readings seem for the most part equally warranted with those of the Rik. There are also many points of contact with the Yajus

The earliest mention of the Athar an-songs occurs under the two names "Athar anas" and "Afgirasas," names which belong to the two most ancient Rishi-families, or to the common ancestors of the Indo-Aryans and the Persa-Aryans, and which are probably only given to these songs in order to lend all the greater authority and holizess to the incantiations, &c., contained in them; They are also often specially connected with the ancient family of the Bhrigas <sup>55</sup> Whether we have to take the "Athar-

346-348

on special grounds to be a later supplement, see I St, 1v 433 n
An Asura Krishna we find even the Rik Samhitá, and he plays a

prominent part in the Buddhist legends (in which he seems to be identified with the Krahna of the ene (ff)

<sup>†</sup> See / St, i 295 ff. That these names indicate any Pura Aryan in fluence is not to be thought of,

and if according to the Bharushya Purána (Wilson in Pemsuda Mira. sur Finde p. 394) the Paris (Manu) have four Vedas, the Vada (Vainna) Valvavada (Vispered) Vidut (Vendidad) and figuras, this has purely Indian view, though indeed very remarkable.

<sup>162</sup> See my essay Zwel redische Texte uber Omina und Portenta, pp

vanus" in the thirtieth book of the Val Samhita as Atharvan-songs is not yet certain, but for the period to which the eleventh, thirteenth, and fourteenth books of the Satapatha Brahmana, as well as the Chhandogyopanishad and the Taittinya Aranyaka (in and viii ), belong, the existence of the Atharvan-songs and of the Atharvaveda is fully established by the mention of them in these works The thirteenth book of the Satapatha-Brahmana even mentions a division into parcans,\* which, as already remarked, no longer appears in the manuscripts In the eighth book of the Taittinya-Aranyaka, the adesa, te, the Brahmana, is inserted between the three other Vedus and the "Atharvangirasas" Besides these notices, I find the Atharvaveda or more precisely the "Athar-nanikas," only mentioned in the Nidana-Sútra of the Samaveda (and in Panini) The names, too, which belong to the schools of the Atharvaveda appear nowhere in Vedic literature, with the exception perhaps of Kausika, still, this patronymic does not by any means involve a special reference to the Atharvan 1 Another name, which is, however, only applied to the Atharvaveda in the later Atharvan-writings themselves, viz, in the Parisishtas, is "Brahma veda." This is explained by the circumstance that it claims to be the Veda for the chief sacrificial priest, the Brahman,104 while the other Vedas are represented as those of his assistants only, the Hotar, Udgatar, and Adhvaryu,

 Corresponding to the silias, enurdias and datats of the Rik, Yajur and Siman respectively

f Members of the family of the Atharvans are now and then men toned thus especially Dadhyaheh Ath., Kabandha Ath., whom the Visbus Purana designates as a pupil of Sumantu (the latter we met in the Gribya Stiras of the Rik, see above, p 57) and others.

athereinquents, as major formulas in the Rámgyan intervise only once in 26 20 (Gore) the mattried childreness (the latter passage I overlooked in 1 St. 3, 297). [In Patampals & Mahchbashya, howaver, the Atharyan is cited at the head of the Vedas (as in the Rig Grilyan, see above, p 58) occasionally even as their only representative, see

J. St., xui. 437—32 1 1st This exploration of the name, though the traditional one is yet very likely eroneous by Brahma veda (a name which is brit mentioned in the Sinkh Grhya, i 50 we have rather to understand the Veda of brahmán, of prayers 1¢, here in the narrower sense of 'in cantations.' St. Petersburg Dick!

<sup>‡</sup> it seems that even in later times the clum of the Athervan to rank as Veda was disputed. Yáj navalkya (t. 101) mentions the two apprately reddifiered though in another parage (t. 44) the "that vängrasas occur along with Rich, Sámun, and Yayus. In Manus Code we only once find the shutter.

—a claim which has probably no other foundation than the circumstance, cleverly turned to account, that there was, in fact, no particular Veda for the Brahman, who was bound to know all three, as is expressly required in the Kaushitaka-Brahman (see I St. n. 305). Now the weaker these pretensions are, the more strongly are they put forward in the Atharvan-writings, which indeed display a very great animosity to the other Vedas. To wards one another, too, they show a hostile enough spirit, for instance, one of the Parisishtes counders a Bhargava. Papipalada, and Sunaka done worthy to act as priest to the kings while a Mauda or Jalada as purchita would only brine misfortune

The Atherva Samhitá also, it seems, was commented upon by Sâyana. Manuscripts of it are comparatively rare on the Continent. Most of them are distinguished by a peculiar mode of accentuation † A piece of the Samhitá of some length in been mide known to us in text and translation by Aufrecht (I St, 1 121-140), besides this,

only some fragments have been published iss

only come regiments have over parameter.

The Brahmana-stage is but very feelly represented in the Atharvaveda, viz, by the Gopatha Brahmana, which, in the manuscript with which I am acquanted (E I H, 2142), comprises a para- and an uttara-portion, each containing five praphflackas, the MS, however, breaks off with the beginning of a sixth (i.e., the eleventh) proposed.

† Dots are here used justeed of lines, and the svarita stands mostly beside, not above, the akphara 165 The whole text has been Rahmy (187) In the Copsils Britisman is, 700, and in Patunjskis Mathibabba (see I St., 201, 43); a shirtogh, according to Bursell, Inthe South Indian MSS, only the Commence with I opinion of the Ramphill Spring to the Commence with I opinion of the Ramphill Spring to Commence with I opinion of the MSS in Bluiga preserved actually made and the MSS in Bluiga preserved actually begin the text in this manner ser living a Prokumon with dar Britism Wissing the Commence of the Ramphill Spring the text in this manner ser living a Prokumon with dar Britism Vasia Br. pt. 211) double whether the Ath. thaka In one of the Parisishtas the work is stated to have originally contained 100 prapathalas The contents are entirely unknown to me According to Colebrooke's remarks on the subject, Atharvan is here represented as a Prajapati who is appointed by Brahman as a Demiurge, and this is, in fact, the position which he occupies in the Parisishtas and some of the Upanishads The division of the year into twelve (or thirteen) months consisting of 360 days, and of each day into thirty multurias, which Colebrooke points out as remarkable, equally appears in the Brahmanas of the Yajus, &c 166

Departing from the order hitherto followed I will add here what I have to say about the Sútras of the Atharvaveda, as these are the only other writings which have reference to the Samhita, whereas the remaining parts of the Atharvan-hterature, corresponding to the Aranyakas of the other Vedas, have no reference to it whatever

In the first place, I have to mention the Saunakiya chatur-adhyaysha, 1664 a kind of Pratisakhya for the Atharva-Samhita, in four adhyavas, which might possibly go back to the author of the Rik-Pratisal bya, who is also mentioned in the Pratisakhva of the White Yaius. The Saunakas are named in the Charanavyuha as a school of the Atharvan, and members of this school are repeatedly mentioned in the Upanishads The work bears here and there a more generally grammatical character than is the case with the remaining Pratisakhyas. Saka-

of which appear in the same form as in the Satapatha Brahmana, xl. 314. and are therefore probably simply copied from it. The second ball contains a brief exposition of a variety of points connected with the Srauta ritual, specially adapted, as it seems from the Aitar Br Very remarkable as the assumption in i. 28 of a deshapats, lord of evil (11), who at the beginning of the Dvs. para (yuga) is supposed to have arted as 'rishtnam eladelah' This reminds us of, and doubtless rests upon, the Mara of the Buddhata.

is M. Muller first gave un some information as to the Gonatha Brabmana in his History of A. S L. p 445-455, and now the work itself has been published by Rajendra I4la Mitra and Hurschandra Vidyabhti shana in the Bibl. Indica (1870-72) According to this it consists of eleven (i.e., 5+6) propathakas only We do not discover in it any special relation to the Ath S. spart from several references thereto under different pames. The contents are a medley to a large extent derived from other sources The first half is essentially of speculative, conmogonic import, and is particularly MS, is chaturadhydyilat. rich in legends, a good number

tiyana and other grammatical teachers are mentioned. In the Berlin MS—the only one as yet known—each rule is followed by its commentary 167

An Anukramani to the Atharva-Samhita is also extant, it, however, specifies for the most part only divine

beings, and seldom actual Rishis, as authors

The Kausika-Sútra is the sole existing ritual Sútra of the Atharvaveds, although I am acquainted with an Atharvana-Grihya through quotations iss It consists of fourteen adhydyas, and in the course of it the several doctrines are repeatedly ascribed to Kausika. In the introduction it gives as its authorities the Mantras and the Brahmanas, and failing these the sampradaya, te, tradition, and in the body of the work the Brahmana is likewise frequently appealed to (by the br), whether by this the Gopatha-Brahmana is intended I am unable to say The style of the work is in general less concise than that of the other Sútras, and more narrative The contents are precisely those of a Gubya-Sutra. The third adhudua treats of the ceremonial for Nirriti (the goddess of misfortune), the fourth gives bhaishayas, healing remedies, the sixth, &c., imprecations, magical spells, the tenth treats of marriage, the eleventh of the Manes-sacrifice, the thirteenth and fourteenth of expiatory ceremonies for various omens and portents (like the Adbhuta-Brahmana of the Sámaveda) 158

148 By which is doubtless meant just this Kaulike Satra. A Strotz Scarp belonging to the Atharaveda has recently come to light, under the name of Vatidas Satra; see Haug, J. St., is 176. Böhler, Cat of MSS from Guyerda, 1190, and Monattheraclis of the Bert. Acad. 1871, p. 76, and some fuller accounts in Roths Atharaveda in Kauliner, p. 28.

10 These two sections are pulsabed, with translation and notes, in my coar, Zeel reducts Tests due to dama and Portents (1859), the section relating to marriage ceremonies is communicated in apper by Has, Uter du Hirrathyre brunche der alten Inder in I St., v 378, ff.

<sup>167</sup> Of the Pratisikhra also Whitney has given us an excellent edition in Journal Am Or Soc, vn (1862), z 156, ff. (1872, additions) See also my remarks in I St. 1v 20-82. According to Whitney, this work takes no notice of the two last books of the existing Ath. text, which it otherwise follows closely, since therefore the Atharva Sambita in Patamiali's time already comprised twenty books, we might from this directly infer the priority of the Sann chat, unless Patamjali's statement refer not to our text at all. but rather to that of the Paippa lida achool , see Roth, Der Atharpa reda in Kashmir, p 15 - Buller bas discovered another quite different Ath Pritifikhys, see Monatsber of the Ber! Acad. 1871, p 77

To this Sutra belong further five so-called Kalvas the Nakshatra-Kalpa, an astrological compendium relating to the lunar mansions, in fifty kandikas, the Santi-Kalpa, in twenty-five Landikas, which treats likewise of the adoration of the lunar mansions,179 and contains prayers addressed to them, the Vitana-Kalpa, the Samhita-Kalpa, and the Abhichara-Kalpa The Vishnu-Purana and the Charanavyúha, to be presently mentioned, name, instead of the last, the Angirasa-Kalpa Further, seventy-four smaller Parisishtas 171 also belong to it, mostly composed in slokas, and in the form of dialogues, like the Puranas The contents are Grihya-subjects of various kinds, astrology,172 magic, and the doctrine concerning omens and portents are most largely represented Some sections correspond almost literally to passages of a like nature in the astrological Samhitas Among these Parisishtas, there is also a Charana-vyuha, which states the number of the richas in the Atharva-Samhita at 12,380, that of the paryayas (hymns) at 2000, but the number of the Kausikoktáni paraishtana only at 70 Of teachers who are mentioned the following are the chief first, Brihaspati Atharvan, Bhagavant Atharvan himself, Bbrigu, Bhargava, Angiras, Angirasa, Kavya (or Kari) Usansa, then Saunaka, Narada, Gautama, Kamkayana, Karmagha, Pippalada, Mahaki, Garga, Gargya, Vriddhagarga, Atreya, Padmayoni, Kraush-We meet with many of these names again in the astrological literature proper

I now turn to the most characteristic part of the literature of the Atharvan, viz, the *Upanishads* Whilst the Upanishads  $\alpha a^{-} \ell^2 \rho \gamma \rho$  so called, of the remaining Vedas all belong to the latter, or even the latest, portions of these

kind are quoted even in the Maha-

<sup>170</sup> An account of the contents of both Jexts is given in my second essay on the Nakshatras pp 300-393 (1862), Haug in I St., ix 174, mente us an Aranyaka Jyotisha, dif

Vedas, they at least observe a certain limit which they never transgress, that is to say, they keep within the range of inquiry into the nature of the Supreme Spirit, without serving sectaman purposes. The Atharvan Upanishads, on the contrary, come down as far as the time of the Puranas, and in their final phases they distinctly enter the lists in behalf of sectarian views Their number is as yet undetermined. Usually only fifty-two are enumerated But as among these there are several which are of quite modern date, I do not see why we should separate these fifty-two Upanishads from the remaining similar tracts which, although not contained in the usual list, nevertheless call themselves Upauishads, or Atharvopanishads, more especially as this list varies in part according to the different works where it is found, and as the manuscripts mix up these fifty-two with the remaining Upanishads indiscriminately Indeed, with regard to the Upanishad literature we have this peculiar state of things that it may extend down to very recent times, and consequently the number of arritings to be reckoned as belonging to it is very considerable. Two years ago, in the second part of the Indische Studien, I stated the number at ninety-five including the Upanishads contained in the older Vedas \* The researches instituted by Walter Elbot in Masulipatam among the Telingana Brahmans on this subject have, however, as Dr Roer writes to me, nielded the result that among there Brahmans there are

repanhal) being different from the former. The number of the former — The number of the former of th

<sup>\*</sup> This number is wrong , it ought to be ninety threa. I there counted the Anandayelli and Bhrigura'li twice, first among the twenty three Atherpopent Acts omitted by An quetil, and then among the nine Upanishads borrowed from the other Vedas which are found in his work. The number would further have to be reduced to minety two since I cite Calebrooke & Ameritarindo and Anguetila Ampitinada as distinct Upanisheds, whereas in point of fact they are id-nical, but then, on the other hand, two Upan shads afents fied by me ought to be kept distinct. viz Colebrooke a Prantymibotra and Anguetil a Pranou, the latter (Prant

123 Upanshada actually extant, and if we include those which they do not possess, but which are contained in my list just referred to, the total is mixed to 147. A list of these 123 is given in two of them, viz, in the Mahavak-yamuktavah and in the Mukikhoranishad, and is exactly the same in both. According to the statement given above, there must be among these 123 fifty-two? in all which are wanting in my own list, and these include the two names just mentioned—A Persian translation made in 165 of fifty Upanishads is extant in Anquetil du Percon's Latin rendering

If now we attempt to classify the Upanishads so far known, the most ancent naturally are those (1-2) which are found in the three older Vedas only? I have already remarked that these never pursue sectamen mass A seeming—but only a seeming—exception to this is the Satarudrya, for although the work has in fact been used for sectanno purposes, it had originally quite a different significance, which had nothing to do with the missiphication of its afterwards made, originally, indeed, it was not an Upunishad at all § A real exception, however, is the Sretishadaropanishad (13), which is in any case wringly classed with the Black Yajus, it is only from its having incorporated many passiges of the latter that it has been fosted in here. It belongs to about the same rank and date as the Kauralyopanishad Nor can the Maintagum.

According to the previous note, only 145

Yajus, it belongs rather, like the Svetasvataropanishad, only to the Yoga period Still it does not, at least in the part known to me, ha pursue any sectarian aim (see pp. 96-99)

Apart from the two last-named Upanishads, the transition to the Atharvopanishads is formed on the one hand by those Upanishads which are found in one of the other three Vedas, as well as in a somewhat modified form in an Atharvan-recension, and on the other hand by those Upanishads of which the Atharvan-recension is the only one extant, although they may have formerly existed in the other Vedas as well. Of the latter we have only one instance, the Kathates-Upanishad (15, 10), of the former, on the contary, there are several instances (17-20), viz., Kina (from the Samareda), Barguralli, Anandavalli, and Brichandrayana (Tatt Ar. viii...x).

The Atharvopanshads, which are also distinguished externally by the fact that they are mostly composed in crose, may themselves be divided into three distinct classes, which in their beginnings follow the earlier Upanisheds with about equal closenes. Those of the first class continue directly to investigate the nature of Atman, or the Supreme Spirit, those of the second cleal with the subject of absorption (1992) in meditation thereon, and give the means whereby, and the stages in which, men may even in this world attain complete union with Atman, and lastly, those of the third class substitute for Atman soure one of the many forms under which Siva and Vishnu, the two principal gods, were in the course of time workshoped.

Before proceeding to discuss these three classes in their proper order, I have to make some observations on the Athan an-recensions of those Upanisheds which either belong at the same time to the other Vedus also, or at any

rate originally did so

The Atharvan-text of the Kenopanahad, in the first place, differs but very little from its Siman text. The reason why this Upanishad has been incorporated into the Atharvan collection seems to be the fact that Umi Hamayati is here (and for the first time) mentioned, as she

<sup>175</sup> In the remaining parts also there is nothing of the kind to be found.

was probably understood in the sense of the Siva sects With the Atharvan-text both of the Anandavalli and of the Bhriguvalli\* I am unacquainted Of the Brihannarayanop † also, which corresponds to the Narayaniyop of the Taitt. Aranyaka, only a few data are known to me, these, however, sufficiently show that the more ancient and obscure forms have here throughout been replaced by the corresponding later and regular ones t-The two Katharallis, for the most part in metrical form, are extant in the Atharvan-text only § The second is nothing but a supplement to the first, consisting as it does almost exclusively of quotations from the Vedas, intended to substantiate more fully the doctrines there set forth The first is based upon a legend (see pp 92, 93) related in the Taitt, Brahmana [u. 11 8] Nachuketas, the son of Arum | asks Death for a solution of his doubt whether man exists after death or not After much reluctance, and after holding out enticements of all kinds, which Nachiketas withstands, Death at length mutates him into the mystery of existence Life and death, he says, are but two different phases of development, true wisdom consists in the perception of identity with the Supreme Spirit, whereby men are elevated above life and death. The exposition in this first part is really impressive the diction, too, is for the most part antique. A few passages, which do not harmonise at all with the remainder, seem either to have been inserted at a later time, or else, on the contrary, to have been retained

<sup>\*</sup> Two lists of the Atharvopaniahads in Chambers's Collection (see my Catalogue, p. 95) cite after these two rallis (39, 40), also a modhyaralli

and an utararalli (41, 42) the By Colebrooke at a reckened as two Upanisheds.

Thus we have rescent a ustead of rya cha sara, Kanyakundrin in stead of re, Kdtydyan jar instead of yandya, &c

S See J. St., it. 195, ff, where the various translations and editions are cited. Since then this Upanishad has appeared in a new edition, with Samkars a commentary in the Bibl. Jadka, vol. vin., edited by Dr. Roer [and translated in vol. xv]

If Two other names, which are given to the father of Nachiketas, viz. Auddálak and Vajasravasa, conflict with the usual accounts. Vajasravasa appears also in the passage above referred to of the Tait tidya Brähmena, whether Auddálaki does so likewine i Am unable to

eay [Audddaki is warting in the f Br, as also the whole passage itself.] Beniey (in the Gittinger Gildarie America, January 18,24, p 129) suggests that we should refer Auddflaki Arani to Nachkelie, but the incompatibility of the two name:

the incompatibility of the two names is not thereby removed. Aroni is Ud dilaka, and Auddal ki is Aroneya.

from a former exposition drawn up more for a liturgical Its polemics against those holding different opinions are very sharp and bitter. They are directed against tarka, "doubt," by which the Samhhyas and Baud dhas are here probably intended. The sacredness of the word om as the expression for the eternal position of things is very specially emphasised a thing which has not occurred before in the same way. The gradation of the primeval principles (in iii. 10, 11) exactly corresponds to the system of the deistical Yoga, whereas otherwise the exposition

bears a purely Vedantic character

Of the Atharvopanishads proper the Mundala- and Prasna - Upanishads (21, 22) connect themselves most closely with the Upanishads of the older Vedas and with the Vedánta doctrine. 176 indeed, in the Vedanta-Sútra of Badarayana reference is made to them quite as often as to these others The Mundaka-Upanishad, mostly in verse, and so called because it "shears" away, or frees from, all error, is very like the Kathakop with regard to doctrine and style, it has, in fact, several passages in common with it. At the outset it announces itself as an almost direct revelation of Brahman himself For Anguas, who communicates it to Saunaka, has obtained it from Bháradvája Satyaváha, and the latter again from Angir. the numil of Atharvan, to whom it was revealed by Brah

following Un to other Sakhia. But Náráyana, with whom, as regards the order of the first twenty-sight names. Colebrooke agrees in the mein ifrom the point their statements differ), also quotes the Sausakagranthurutara for the Brahma. vindu No. 18, and the silled Saurakavartita for the Atmopini shad No 23 as authority for these numbers, or places of the two Up-anisheds. The Gopdatefani, how-ever, is marked by him as the forty aixth "Atlanes-Paippa's, and the Vaniderepanished as the furty ninth kehndragranskarane, see Rajen dra Lala Mitra Advers of Sanatral MSS L 18 (1870).

Afigur is a name which occurs

<sup>17.</sup> The list of the Atharvopani shads begins as a rule with the Mundakonspished, and, according to the statements in Narayanabhat tas acholium on the smaller Ath Upausshads now being edited faince 1872) in the Bibl Indica by Rama maya Tarkaratna, a settled order of these Upanishade must still liave been in existence in the time of Nardyanabhatta, since he denutes the individual Upsuishads as, ag. the seventh, the eighth, &c. reckon ing from the Mundaka. This order is occasionally secrabed by him to the Saunaka school Compare as to this the remarks of Colebrooke, Muse En . 1, 01 according to which the first fifteen Upanuhade only would belong to the Saunakiyas, and the nowhere else,

man himself. Shortly afterwards. Vedic literature is opposed, as the infehor science, to speculation. The former is stated to consist of the four Vedas, and of the six Vedangas, which are singly enumerated. Some manuscripts here insert mention of the dihara-purana-nyaya-mimansa-dharmasastrani, but this is evidently a later addition. Such additions are also found in other passages of this Upanishad in the manuscripts. This enumeration (here occurring for the first time) of the different Veddingas is of itself sufficient to show that at that time the whole material of the Vedas had been systematically digested. and that out of it a new literature had arisen, which no longer belongs to the Vedic, but to the following period We may further conclude from the mention of the Treta in the course of the work that the Yuga-system also had already attained its final form. On the other hand, we here find the words kall (the dark one) and karall (the terrible one) still recknied among the seven tongues of fire, whereas m the time of the dramatic poet Bhavabhúti (eighth century A.D.) they are names of Durga—the wife of Siva, developed out of Agni (and Rudra)—who under these names was the object of a bloody sacrificial worship Since evidently a considerable time is required for the transition from the former meaning to the latter, the Mundakon must be separated by a very wide interval from the date of Bhavabhuti,—a conclusion which follows besides from the circumstance that it is on several occasions turned to account in the Vedanta-Sútra, and that it has been commented by Samkara. - The Prasnopanishad, in prose, seems to be borrowed from an Atharva-Brahmana, viz, that of the Pippalada-school. It contains the instruction by Propolida of six different teachers, amongst whom the following names are especially significant in regard to the date of the Upanishad Kausalya A.valayana, Vaidarbhi Bhargava, and Kabandhin Katyayana. In the course of

In the colophons, at least, it is once so de cribed , by Samkara, too, at the beginning of his commentary, st is called brokmana, although this a frut and brdlmana. - The name

Pippalida is probably to be traced to the conception found in the first verse of the Mundaka na I (taken from Rik mand : 164 20) (1)- The proves but little, since with him all same verse recurs in the Svetivia the Uramabada he comments pass tarepanahad iv 6 and in hir re-

the work Hiranyanábha, a prince of the Kosalas, is also mentioned,-the same doubtless who is specially extelled in the Puranas As in the Mundahopan , so here also some interpolated words are found which betray themselves as such by the fact that they are passed over by Samkara in his commentary They refer to Atharvan himself, and to the half matra (mora), to which the word om, here appearing in its full glory, is entitled in addition to its three morn (a, u, m), and are evidently a later addition by some one who did not like to miss the mention of these two subjects in an Atharvopanishad, as in these they otherwise invariably occur Both Mundaks and Prasna have been several times edited and translated see I St. 1 280, ff. 439 ff. again recently by Dr Roer in vol. vui. of the Bibliothica Indica together with Samkara's commentary 173 .- The name of Pippalada is borne by another Upanishad, the Garbha-Upanishad (23), which I add here for this reason, although in other respects this is not quite its proper place contents differ from those of all the other Upanishads, and relate to the human body, to its formation as embryo and the various parts of which it is composed, and the number and weight of these The whole is a commentary on a fri shtubh strophe prefixed to it, the words of which are passed in review singly and further remarks then subjoined The mention of the names of the seven musical notes of the present day, as well as of the weights now in use (which are found besides in Varaha Mihira), brings us to a tolerably modern date, so also the use of Devadatta in the sense of Carus A few passages in which, among other things, mention is made, for instance, of Narayana as Supreme Lord, and of the Simkhya and Yoga as the means of attaining knowledge of him, reappear in the fourteenth book—a supplementary one—of Yaska's Nirukti Whether Samkara expounded this Upanishad is as yet uncertain. It is translated in Ind Stud, in 65-71 fre. In the Brahriopanishad also (24), Pippalida appears, here with the title bhagaidn Angirds, he is thus identified with the latter, as the authority for the particular

no Rose a translation is published 1872, in his introduction described nock as of the Bill Indica (1853) as pakebakhandi "elfinita (read "no the bakhandi "kifinita (read "no the bakhandi Bakha

doctrine here taught which he imparts to Saunaka (mahásala), exactly as is the case in the Mundakopanishad. There is, for the rest, a considerable difference between this Upanishad 177 and the Mundaka and Prasna, it belongs more to the Yoga-Upanishads properly so called. It consists of two sections the first, which is in prose, treats, in the first place, of the majesty of Atman, and later on, in its last portion, it alleges Brahman, Vishnu, Rudra, and Akshara to be the four pidas (feet) of the niriánam brahma, the first eleven of the nineteen verses of the second section discuss the subject of the Yogin being allowed to lay aside his yamopavita, or sacred thread, as he stands in the most intimate relation to the sútra, or mundane thread, the whole therefore amounts to a mere play upon words The last eight verses are borrowed from the Syetasyataropanishad, Mundakopanishad, and similar Upanishads, and again describe the majesty of the One -The Mandul-yopanishad (25-28) is reckoned as consisting of four Upanishads, but only the prose portion of the first of these, which treats of the three and a half matras of the word om, is to be looked upon as the real Mandukyopanishad, all the rest is the work of Gaudapada,\* whose pupil Govinda was the teacher of Samkara, it dates therefore from about the seventh century A.D Similarly, there are two works by Samkara himself specified among the Upanishads, viz, the Aptavarrasúcht (29), in prose, and the Tripurt (30), likewise in prose, both composed in a Vedanta sense The former treats at the outset of what makes a Brahmana a Brahmana, it is not rate (birth). tarna (colour), pánditya (learning), but the Brahmand (he who knows Brahman) is alone a Bráhmana† Then it passes to the different definitions of molsha (liberation),

<sup>17</sup> Edited with Nardyana's comm. in Bibl. Ind. 1873, in the introduction described as chatualkhanda dakami, the two sections of the

text seem to have been transposed in some of the MSS.

<sup>†</sup> This portion has been used by a Buddhist (Aśragbosha), almos hiterally, agains' the system of cas'a in general, in the tract of the same title which is given by Gildemeister, Bibl. S. Fract, p vi, not, 'ee also

stating the only correct one to be the perception of the oneness of juna (the individual soul) and parametera (the All-Soul), and lastly, distinctly rejecting all sects, it expounds the two bighly important words fat (the Absolute) and from (the Oiyective) The Trapurs treats of the rela-tion of Aiman to the world, and stands as fourth prakarana in a series of seven little Vedanta writings attributed to Samkara. 178 The Sarvopanishats aropanishad (31), in proce, may be considered as a kind of catechism of these doctroes. its purpose is to answer several queries prefixed to it as an introduction.179 The same is the case with the Nirdlanbopanishad (32),180 which, however, exhibits essentially the Yoga standpoint. The Atmopanished (33), in proso, contains an inquiry by Afiguras into the three factors (purushas), the body, the soul, and the All-Soul. The Pranagnihotropanishad (34), in prose points out the relation of the parts and functions of the body to those of the sacrifice, whence by implication it follows that the latter is unnecessary. At its conclusion it promises to him who reads this Upanishad the same reward as he receives who expires in Varanasi, viz., deliverance from transmigration. 137 The Arshikopanishad (135) contains a dialogue on the nature of Atman between Visvamitra, Jamadagni, Bharadvája, Gautama, and Vasishtha, the last of whom, appealing to the opinion of "K'hak" (lanother MS in Anguetil has "Kepl"=Kapila f), obtains the assent of the others 127

10 See J St., in 48-52. The
name of the Upanished is not yet
ertain.

The second class of the Atharvopamshads, as above stated, is made up of those whose subject is Yoga, or absorption in Atman, the stages of this absorption, and the external means of attaining it These last chieff consist in the giving up of all earthly connections, and in the frequent repetition of the word om, which plays a most prominent part, and is itself therefore the subject of deep study Yamavalkya is repeatedly named in the Upanishads of this class as the teacher of the doctrines they set forth,\* and indeed it would seem that we ought to look upon him as one of the chief promoters of the system of religious mendicancy so intimately associated with the Yoga-doctrine Thus, in the Tarakopanishad (36) he instructs Bharadvaja as to the saving and sin dispelling efficacy of the word cm, 153 and similarly in the Shalyopanishad (37)\* Sakaly as to true emancipation 154. The one, however, in which he stands out most prominently is the Jabalopanishad (38), in prose, which, moreover, bears the name of a school or the White Yajus, although no doubt wrongly, as it must in any case be considered as merely an imitation of the Aranyaka of this Veda (see I St. n. 72-77) Still, it must have been composed before the Badarayana-Sutra, as several passages of it seem to be given in the latter (unless these passages have been borrowed from a common source?) Of special importance with regard to the mode of life of the Paramahansas, or religious mendicants, are also, in addition to the Upanishad just mentioned, the Kathaśruti (39, Colebrooke gives the name incorrectly as Kanthasruti), in prose, and the Arunthopanishad (40), likewise in prose, 2 both are to be

(50) and the Pranava (51) These two are found in Anquetil only 186 The various stages of gradual absorp-tion into Atman form the contents of the following Upanishada (52-59) Hansanada (in prose), Kshurika (24 Elokas), Nádavindu (20 Elokas), Brahmavindu (22 ślokas, also called Amritarindu), Amritarindu (38 ślokas, also called Amritanáda), Dhyánavindu (23 slohas), Yogasilha (10 slokas), and Yogatattra (15 slokas), while the majesty of Atman himself is depicted in the Chulil a (60, in 21 slokas) and Tejorindu (61, in 14 slokas) \* in the former direct reference is repeatedly made to the doctrine of the Atharvans The range of ideas and the style are quite identical in all the Upanishads just enumerated. the latter frequently suffers from great obscurity, partly because there occur distinct grammatical maccuracies, partly because the construction is often very broken and without unity Many verses recur in several of them, many again are borrowed from the Svetasvataropanishad or Maitrayanopanishad. Contempt for caste as well as for writing (grantha) is a trait which appears again and again in almost all these Upanishads, and one might therefore be inclined to regard them as directly Buddhistic, were they not entirely free from all Buddhistic dogma. This agreement is to be explained simply by the fact that Buddhism itself must be considered as having been originally only a form of the Samkhya-doctrine.

The sectarian Upanishads have been set down as forming the third class. They substitute for Atman one of the forms of Yishin or Siva, the earlier ones following the Yoga-doctrine most closely, whilst in those of a modern date the personal element of the respective detices comes

more and more into the foreground. A special characteristic of this class are the unmeasured promises usually held out at the close of the work to him who reads and studies it, as also the quotation and veneration of accref formules containing the name of the particular detty.

First, as regards the Upanishads of the Fishnu-sects .the oldest form under which Vishnu is worshipped is Nurdyana We find this name for the first time in the second part of the Satapatha-Brahmana, where, however, it is not in any way connected with Vishnu, it rather stands, as at the commencement of Manu and the Vishau-Purana, in the sense of Brahman (mascul) This is also the case in the Nárayaníyopanishad of the Taittirlya Aranyaka and in its Atharyan-recension as Probannarevanopanishad, although in the lafter he is at least called Harr, and in one passage brought into direct relation to Vasudeva and Vishou. It is in the Mahd-Upanuhad (62),-a prose tract, which in its first part contains the emanation of the universe from Narayana, and in its second a paraphrasa of the principal passage of the Narayaniyopanishad, that Narayana first distinctly appears as the representative of Vishpu, since Sulapani (Siva) and Brahman proceed from him, and Vishna is not mentioned at In the Nardyspopanishad (64, in prose),157 on the contrary, Vishou also emanates from him, exactly as in the Narivana section t of the twelfth book of the Maha-Bharata (a book which in other respects also is of special a gmificance in relation to the Samkhya- and Yoga-doctrines) The sacred formula here taught is om namo Nardyand, a. There exists of this Upanishad another, probably a later, recension which forms part of the Atharvasiras to be mentioned hereafter, and in which Devakinatra Madhusudana 13 mentioned as particularly brahmanya, pious, as 13 also the case in the Airaprabodha-Upanishad (65), which like-

<sup>\*</sup> Translated in I St., it. 5-8 (see an Taylor, II 463, Rijendra L M. i. 25), beauties it there must have crusted another Mand Upon. (6)) which is cited by the adherents of the Hiddars sect as a warrant for there behaf in a personal soul of the universe, divince from the soul of man.

wise celebrates Narayana as the Supreme Lord, 128 see I St, ii 8, 9 He (Narayana) is named, besides, in the same quality in the Garbhopanishad (in a passage recurring in the Nirukti, xiv) and in the Sakaly opanishad

The second form under which we find Vishnu worshipped is Nrisinha The earliest mention of him h therto known appears in the Taitt. Ar, x 1 8 (in the Narayaniyop), under the name of Narasinha, and with the epithets ragranakha and tikshnadanshtra The only Upanishad in which he is worshipped is the Nrssinhatapaniyopanishad (in prose) It is relatively of considerable extent, and is also counted as six separate Upanishada (66-71), as it consists of two parts,\* the first of which is in turn subdivided into five distinct Upanishads The first part treats of the Anushtubh-formula t sacred to Nrisinha, the mantraraja nárasinha ánushjubha, with which the most wondrous tricks are played, wherein we have to recognise the first beginnings of the later Malamantras with their Tautra-ceremonial. A great portion of the Mandúkvopanishad is incorporated into it, and the existence also of the Atnorvasikha is presupposed, as it is directly quoted. The contents of the second part are of a more speculative character; but in respect of mystical trifling it does not yield to the first part In both, the triad-Brahman, Vishnu, and Siva—is repeatedly mentioned As regards language, the expression buddha for the supreme Atman. which occurs (along with miya, suddha satya, multa, &c) in the second part, is of peculiar interest, and the expression is still retained in Gaudapada and Samkara, originally it belongs evidently to the Samkhya school (see above, pp 27, 120)

This Upanishad has been interpreted by Gaudapada and Samkara, and in addition to much that is quite modern, it presents a great deal that is ancient. It probably dates from about the fourth century Ap, as at that

<sup>188</sup> See also Pájendra L. M., 111 36, Taylor 11 328 The above mentioned lists of Upamahads in the Chambers collection admit a Madiyatdynm also [see my Catalogue, p. 95]

time the Nasiaha worship flourished on the western coast of India, while otherwise we find no traces of it. 12

The Ramatapantyopanishad (72, 73), in which Rama is worshipped as the Supreme God, shows a great resemblance to the Nrisinhatapaniyop, especially in its second part. This second part, which is in prose, is, properly speaking nothing but a collection of pieces from the Tarakopanishad. Mandukyopemshad, Jabalopanishad, and Nesiahopanishad, naturally with the necessary alterations valk) a here appears as the proclaimer of the divine glory of Rams. A London MS, adds at the close a long passage which is unknown to the commentator Anindarana (& native of the town Kundina) The crowning touch of the sectarian element in this Upanishad is found in the cir-cumstance that Rama is implored by Siva (Samkara) himself to spare those a second birth who die in Manikarnika or in the Ganga generally, the two principal scats of the Siva worship The first part, in ninety-five s'olus contains et the beginning a short sketch of Rama's life, which bears a great similarity to that at the beginning of the Adhyatmaramayana (in the Brahmanda-Purana) The Mantrarya is next taught by the help of a mystical alphabet, specially invented for the purpose . This Upanished evidently belongs to the school of Ramanuja, possibly to Ramanuja himself, consequently its earliest date would be the cleventh century AD 120

Under the names Vichnu, l'urushottama, and Vásudeva Vishnu is mentioned as the supreme Atman in several

Upanshada, \* Krishna Devalaputra appears likewse in some of them (the Atmaprabotha and Narayana), not, however, as supreme Atman, but merely, as in the Chhandogyor, as a particularly pious sage. It is in the Geptale Atmapranishad (44, 75) that we first find him elevated to divine dignity. Of this Upanshad, the second part at least, in prose, is known to met it treats urst of the gopts of Mathum and Vraja, then it passes to the denthication of Mathum and Vraja, then it passes and it belongs without doubt to a very modern period, as it exhibits hardly any points of contiact with other Upanshads in regard to contents and language. The Goptilandano-panishad (76) also probably belongs to this place. It know it only by name.

kinow it only by name
At the head of the Upamshads belonging to the Sirasecias stands, according to the use that has been made of the Sirasecias stands, according to the use that has been made of it, the Sitaradraya I have already remarked, however, that this is nothing but an abuse In its germs the worship of Sivas may be traced even in the later portions of the Yajus. He appears very prominently as Mahadeva in a portion of the Narayaniyopanshad, endere he is already associated with his spouse The Sietas staropanishad sha los pays bomage to him. Among the Atharvo-panishad (77), a mixture of pross and slokas, in which haparam randderch himself instructs Asvalayana concerning his own majesty, in a similar way he acts as his own herald is in the Atharvafras (78) in 1950.

SECOND PERIOD.
SANSKRIT LITERATURE.

## SECOND PERIOD

## SANSKRIT LITERATURE.

HAVIAC thus followed the first period of Indian Interdure, in its several divisions, down to its close, we now turn to its second period, the so-called Sanskrit hierature. Here, however, as our time is limited, we cannot enter so much not detail as we have hithered done, and we must therefore content ourselves with a general survey. In the case of the Vedio literature, details were especially essential both because no full account of it had, yet been given, and because the various works still lie, for the most part, shut up in the manuscripts, whereas the Sanskrit literature has already been repeatedly handled, partially at least, and the principal works belonging to it are generally accessable

Our first task, naturally, is to fix the distinction between the second period and the first. This is, in part one of age, in part, one of subject-matter. The former distinction is marked by the language and by direct data, the latter by the nature of the subsect-matter itself, as well as by

the method of treating it

As regards the language, in the first place, in so far as the grounds a distinction in point of age between the two periods of Indian Interature, its special characteristics in the second period, although apparently slight, are yet in reality, so significant that it appropriately furnishes the name for the period, whereas the earlier one receives its designation from the works composing it.

Among the various dialects of the different Indo-Aryan tribes, a greater unity had in the course of time been established after their immigration into India, as the natural result of their intermingling in their new homes, and of their combination into larger communities. The gram matical study, moreover, which by degrees became necessary for the interpretation of the ancient texts, and whic' grew up in connection therewith, had had the effect of substantially fixing the usage, so that a generally recognised language, known as the blasta, had arisen that namely, in which the Brihmanas and Suiras are composed. Thow the greater the advance made by the study of grainmar, the more stringent and precise its precepts and rules became, and all the more difficult it was fothose who did not occupy themselves specially therewith to keep in constant accord with grammatical accuracy. The more the language of the grammatically educated gained on the one hand in purity, and in being purged of everything not strictly regular, the more foreign did it become on the other hand to the usage of the majority of the people, who were without grammatical training. In this way a refined language gradually disconnected itself from the vernacular, as more and more the exclusive property of the higher classes of the people, I the estrange-

ment between the two growing more and more marked, as the popular dirlect in its turn underwent further develop-This took place mainly under the influence of those aboriginal inhabitants who had been received into the Brahmanic community, who, it is true, little by little exchanged their own language for that of their conquerors, but not without importing into the latter a large number of new words and of phonetic changes, and, in particular, very materially modifying the pronunciation. This last was all the more necessary, as the numerous accumulations of consonants in the Aryan bháshá presented exceeding difficulties to the natives, and it was all the easier, as there had evidently prevailed within the language itself from an early period a tendency to clear away these troublesome encumbrances of speech,-a tendency to which, indeed, the study of grammar imposed a limit, so far as the educated portion of the Aryans was concerned, but which certainly maintained itself, and by the very nature of the case continued to spread amongst the people at large This tendency was naturally furthered by the native inhabitants, particularly as they acquired the language not from those who were conversant with grammar, but from intercourse and association with the general body of the people In this way there gradually arose new vernaculars, proceeding directly from the common bháshá, and distinguished from it mainly by the assimilation of consonants, and by

ceeding in common from.' The term directly opposed to it is not samskrita, but rankrita, see, e.g., Ath. Paris 49. I, "ramin parvam rydlhyd sydmah prákruta ve cha vaikrutáh."] The earliest instances as yet known of the name Samskyit as a designation of the language occur in the Mrichbakati (p. 44. 2. ed. Stensler). and in Varaha Mibira's Bribat Sam hitá, 8, 3 The following passages also of the Rimivana are doubtless to be understood in this sense, viz. V 18 19 29 17 34 (82 3), VL 104 2. Paning is familiar with the word Samskrifa, but does not use it in this sense, though the Paninlya-Sikshi does so employ it (v 3), in contradi tinction to smilrita

<sup>&</sup>quot; And therefore specially so called down even to modern times, whereas the grammatically refined blasta afterwards lost this title, and substituted for it the name Samakritablidshd, 'the cultivated speech, The name Prdireta-bhdahd, which was at the same time applied to the popular dialects, is derived from the word prakysts, 'nature,' 'origin, and probably describes these as the 'natural,' 'original' continuations of the ancient bhashd or does pra-Irda here agnify 'having a prairies or origin, as, 'derived ! [Out of he signification original,' lying at the root of '(prakrus bhata) 'un modified, arose that of 'purmal then that of 'ordinary, 'community "sulgarss, and lastly that of pro-

the curtailment or loss of terminations. Not unfrequently, however, they present older forms of these than are found in the written luguage, purily because the latter has neorously eliminated all forms in any way irregular or obsolete, but partly also, no doubt, from the circumstance that grammar was cultivated principally in the north or north-west of India, and consequently adapted itself specially to the using there prevailing. And in some respects (eq. in the instrument and more developed phase than appears to have been the case in India Proper, since the language was not there hampered in its independent growth by any external influence, whereas the Aryans who had passed into India maintained their speech upon the same internal level on which it stood at the time of the immercation, those

187 This example is not quite per tinent, as the instruptor in die is of very ancient date being reflected not only in Z-nd, but also in Sixvenic and Lithuanin; see Bopp, Ferol. Oram., 1 556 (1507)

Fergl. Oram. | 1569 (1593) \* The difference in unce between the Eastern and Western forms of speech is once touched upon in the Brishman's of the White Yajus, where it is said that the Vahikas atria Arni Blana, while the Prach yan on the contrary, call him Sarra, Yaska (il 2) opposes the Kambelia (the Persa Aryanar) to the Aryan (the Indo-Arransty stating that the latter. for instance, possess derivatives only of the root fu, whereas the Kam boles possess it also as a verh (Grammarians of the Kambolas are hardly to be thought of here, as Roth, Zur Let., p. 67, supposes.) Yacks further apposes the Princhyse and the Udi bras, and the same is done by Pinint. According to the Brihming, the Udichyse were most conversant with grammar [see / St. 1 152 li 309 310 xlif 353,ff Enrnella identification of the Kam befar here, and in the other earlier passages where they are meatlened with Cambol a In Partier India are his Florests of Soud In lian Pal to graphy pp. 31, 3° of is clearly a mistake For the time of the full

ever considerable were the external modifications w line h it underwent

The second period of Indian literature, then, commences with the epoch when the separation of the linguing of the educated classe, -of the written language-from the popular dialects was an accomplished fact It is in the former alone that the literature is presented to us. Not till after the lapse of time did the vernaculars also in their turn produce literatures of their own, -in the first instance under the influence of the Buddhist religion, which addrussed itself to the people as such, and whose scriptures and records, therefore, were originally, as for the most part they still are, composed in the popular idiom. The enoch in question cannot at present be precisely determined. vet we may with reasonable certainty infer the existence of the written language also, at a time when we are in a position to point to the existence of popular dialects, and with respect to these we possess historical evidence of a rare order, in those rock-inscriptions, of identical purport, which have been discovered at Girnar in the Gujarat peninsula, at Dhauli in Onssa, and at Kapur di Giri 158 in Kabul. J Prinsep, who was the first to decipher them and Lassen, refer them to the time of the Buddhist king Asoka, who reigned from BC 259, but, according to the most recent investigations on the subject-by Wilson, in the "Journal of the Royal Asiatic Society," xii., 1850 (p. 95 of the separate impression)—they were engraved "at some period subsequent to BC 205" and are are still, therefore, of uncertain date However this question may be settled, it in any case results with tolerable certainty

And that not much later, as wonded for by the Sumes of the Greek, lungs therein August Menne Alexander, Androney, Mang, Prolemy, Antochua, Theo cannot, it strue, be regarded as centemporaneous with the inscriptions but they notinely in India, can hardly have been of such long duration that the inscriptions can have been composed long after their time. See Wilson, J. C.

<sup>18</sup> This name ought probably to be written Kapendenn! See my paper on the Stormpyra Midstays, paper on the Stormpyra Midstays, paper on the Stormpyra Midstays, or the storm of the storm of

that these popular dialects were in existence in the third century no. But this is by no means to be set down as the limit for the commencement of their growth, on the contruy, the form in which they are presented to us are cently shows that a very considerable period must have elapsed since their separation from the ancient 14d-4. This separation must therefore have tall en place comparatively early, and indeed we first allowers to these cerairs hars here and there in the Britannant themselve.\*

The direct data, attesting the obsteriority of the second period of Indian literature, consist in these facts first, that its opening phases everywhere presuppose the Vedic period as entirely closed, next, that its oldest portions are regularly based upon the Vedic literature, and, lastly, that the relations of life have now all arrived at a stage of development of which, in the first period, we can only trace the germs and beginning Thus, in particular, divine wer ship is now centred on a triad of divinities, Brahman, Visling, and Siva, the two latter of whem, again, in course of time, have the supremacy severally allotted to them under various forms, according to the different secis that grew up for this purpose. It is by no means implied that individual portions of the earlier period may not run on into the later, on the contrary, I have frequently endeayoured in the preceding pages to show that such is the case. For the rest, the connection between the two periods is on the whole, somewhat loose it is closest as regards those branches of literature which had already attained a definite stage of progress in the first period, and which merely continued to develop further in the eccond,-Grammar, namely, and Philosophy In regard to those branches, on the contrary, which are a more independent

growth of the second period, the difficulty of connecting them with the earlier age is very great. We have here a distinct gap which it is altogether impossible to fill up. The reason of this lies simply in the fact, that owing to the difficulty of preserving literary works, the fortunate successor almost always wholly supplanted the predecessor it surpassed the latter thus became superfluous, and was consequently put aside, no longer committed to memory, no longer copied. In all these branches therefore—unless some other influence has supervened—we are in possession only of those master-works in which each attained its culmnating point, and which in later times served as the classical models upon which the modern literature was formed, itself more or less destitute of native productive energy This fact has been already adduced as having proved equally fatal in the case of the more ancient Brahmana literature, &c., there, much to the same extent as here, it exercised its lamentable, though natural influence. In the Vedic literature also, that is to say, in its Sakhas, we find the best analogy for another kindred point, namely, that some of the principal works of this period are extant in several-generally two-recensions. But along with this a further circumstance has to be noted, which, in consequence of the great care expended upon the sacred literature, has comparatively slight application to it, namely, that the mutual relation of the manuscripts is of itself such as to render any certain restoration of an original text for the most part hopeless. It is only in cases where ancient commentaries exist that the text is in some degree certain. for the time at least to which these commentaries belong This is evidently owing to the fact that these works were onginally preserved by oral tradition, their consignment to writing only took place later, and possibly in different localities at the same time, so that discrepancies of all sorts were mevitable. But besides these variations there are many alterations and additions which are obviously of a wholly arbitrary nature, partly made intentionally, and partly due to the mistakes of transcribers. In reference to this latter point, in particular, the fact must not be lost sight of that, in consequence of the destructive influence of the climate, copies had to be renewed very frequently As 3 rule, the more ancient Indian manuscripts

are only from three to four hundred years old, hardly any cell be found to dute more it an fix hundred years lack. We talk the or nothing, therefore, can here be effected by mean of so-called diplomate centuring. We cannot even depending on a test as it appears in quotinions, such quotant being generally made from memory,—a practice which, of course, turns oddally entitle metales and alterations.

The distinction in point of rub, et-matter between the first and second periods corsists mainly in the circui. stance that in the former the various subjects are only handled in their details, and almost solely in their relation to the sacrifice, whereas in the latter they are discussed in their ceneral relations. In short it is no, so much a runtical, as rather a scientific a poetical, and artistic wart il at is here satisfied. The difference in the form under witch the two periods present themselves is in Leeping with the In the former, a simple and compact prose had gradually been developed, but in the latter this form is al andored. and a rhy thing one adopted in its stead, which is employed exclusively, even for strictly scientific exportion. The only exception to this occurs in the grammatical and I'is losophical Satrus, and these again are characterised by a form of expression so condenced and technical that it can not fittingly be termed prece. Apart from this we late only frogm nts of proce occurring in stones which are now and then found eited in the great epic, an I further in the fable literature and in the drama, but they are unifer als Internoven with thythmical portions. It is only in the Buildhist legends that a procestyle has been returned the

language of which, however, is a very peculiar one, and is, moreover, restricted to a definite field. In fact, as the result of this neglect, prose-writing was completely arrested in the course of its development, and declined altogether Anything more clumsy than the prose of the later Indian romances, and of the Indian commentaries, can hardly be, and the same may be said of the prose of the inscriptions

This point must not be left out of view, when we now proceed to speak of a classification of the Sanskrit litera ture into works of Poetry, works of Science and Art, and works relating to Law, Custom, and Worship All alike appear in a poetic form, and by 'Poetry' accordingly in this classification we understand merely what is usually styled belles-lettres, though certainly with an important modification of this sense For while, upon the one hand, the poetic form has been extended to all branches of the literature, upon the other, as a set-off to this, a good deal of practical prose has entered into the poetry itself, imparting to it the character of poetry 'with a purpose.' Of the epic poetry this is especially true

It has long been customary to place the Epic Poetry at the head of Sanskrit literature, and to this custom we here conform, although its existing monuments cannot justly pretend to pass as more ancient than, for example, Panini's grammar, or the law-book which bears the name of Manu We have to divide the epic poetry into two distinct groups the Itihasa-Puranas and the Kavvas We have already more than once met with the name Itihasa-Puring in the later Brahmanas, namely, in the second part of the Satapatha-Brahmana, in the Taittiriva-Aranyaka, and in the Chhandoryonanishad. We have seen that the commentators uniformly understand these expressions to apply to the legendary passages in the Brahmanas themselves, and not to separate works, and also that, from a passage in the thirteenth book of the Satapatha-Brahmana, it results with tolerable certainty that distinct works of this description cannot then have existed, masmuch as the division into parrans, which is usual in the extant writings of this class, is there expressly attributed to other works, and is not employed in reference to these Itihasa Puranas themselves On the other hand, in the Surpa-vidya (' serpent knowledge ') and the Devalana-vidya (' genealogies of

the gods')-to which, in the passage in question, the dis tribution into parans, that is to say, existence in a distinct form, is expressly assigned-we have in all probability to recognise mythological accounts, which from their nature might very well be regarded as precursors of the epic. We have likewise already specified as forerunners of the epic poetry, those myths and legends which are found interspersed throughout the Brahmanas, here and there, too in rhythmic form,\* or which lived on elsewhere in the tradition regarding the origin of the songs of the Rila Indeed, a few short prose legends of this sort have been actually preserved here and there in the epic itself. The Gáthas also-stanzas in the Bráhmanas, extolling individual deeds of prowess-have already been cited in the like connection they were sung to the accompaniment of the lute, and were composed in honour either of the prince of the day or of the pious kings of old (see I St, 1. 187). As regards the extant epic-the Maha-Bharata-specially, we have already pointed out the mention in the Taittiriya-Alanyaka, of Vyisa Parasarya 100 and Vaisampayana,200 who are given in the poem itself as its original authors, and we have also remarked (p 143) that the family of the

cial relation to the transmission of the Yajur Veda By Panini, it is true (iv 3. 104), he is sumply cited generally as a Vedic teacher but the Mahabbashya, commenting on this pas age, describes him as the teacher of Katha and Kalipen In the Cal cutta Scholium, again, we find further particulars (from what source) of Taranatha on Siddh Roum ,i 590), according to which (see I St , xui 440) mas Vedio schools, and among them two belonging to the Same Veds, trace their origin to him In the Rig Gubya he is endently re garded (see above, pp 57, 58), after the manner of the vishou Purina, as the special representative of the Yajur Veda, and on he appears in the Anukr of the Atreyl school, at the head of its list of ceachers spe citly as the preceptor of Yaska

Pauge.

Parasaras is represented with especial frequency in the tansas of the White Yajus \* We also find repeated allusions in the Brahmanas to a Naimishiya sacrifice, and, on the authority of the Maha-Bharata itself, it was at such a sacrifice that the second recitation of the epic took place in presence of a Saunaka. But, as has likewise been remarked above (pp 34, 45), these two sacrifices must be kept distinct, and indeed there is no mention in the Brahmanas of a Saunaka as participating in the former Nay, several such sacrifices may have tal en place in the Naimisha forest [see p 34], or it is possible even that the statement as to the recitation in question may have no more foundation than the desire to give a peculiar consecration to the work. For it is utterly absurd to suppose that Vyása Parásarya and Vaisampayana-teachers mentioned for the first time in the Tuttiriya-Aranyaka-could have been anterior to the sacrifice referred to in the Brahmanas The mention of the "Bharata" and of the "Maha-Bharata" itself in the Grihya-Sútras of Ásvalayana [and Sankhayana] we have characterised [p 58] as an interpolation or else an indication that these Sutras are of very late date. In Panim the word "Maha Bharata' does indeed occur, not, however, as denoting the epic of this name, but as an appellative to designate any individual of special distinction among the Bharatas, like Maha-Jabala, Hailibila (see I St , 11 73). Still we do find names mentioned in Parini which belong specially to the story of the Maha-Bharata-namely, Yudhishthira, Hastmapura, Vasudeva, Arjuna, + Andhaka-Vrishnay as, Dronn (?), so that the legend must in any case have been current in his day, possibly even in a poetical shape, however surprising it may be that the name Pandut is never mentioned by him. The earliest direct

evidence of the existence of an epic, with the contents of the Maha-Bhárata, comes to us from the rhetor Dion Chrysostom, who flourished in the second half of the first century AD , and it appears fairly probable that the information in question was then quite new, and was derived from mariners who had penetrated as far as the extreme south of Indra, as I have pointed out in the Indische Studien, 11 161-165 \* Since Megasthenes says nothing of this epic, it is not an improbable hypothesis that its origin is to be placed in the interval between his time and that of Chrysostom, for what ignorant + sailors took note of would hardly have escaped his observation, more especually if what he narrates of Herakles and his daughter Pandara has reference really to Krishna and his sister, the wife of Arjuna, if, that is to say, the Pandu legend was already actually current in his time. With respect to this latter legend, which forms the subject of the Maha-Bharata, we have already remarked, that although there occur, in the Yajus especially, various names and particulars having an intimate connection with it, yet on the other hand these are presented to us in essentially different relations Thus the Kuru-Pañchalas in particular, whose internecine fend is deemed by Lassen to be the leading and central feature of the Maha-Bharata appear in the Yaius on the most friendly and perceful footing Arjuna agun, the chief hero of the Pandus, is still, in the Varasanevi-Samuta and the Satapatha-Brahmana, a name of Indra # and astly, Janameiava Párikshita, who in the Maha-Bharata s the great-grandson of Arjuna, appears, in the last part of the Satapatha-Brahmana, to be still fresh in the menory of the people, with the rise and downfall of himself and his house I have also already expressed the conlecture that it is perhaps in the deeds and downfall of this Janamejaya that we have to look for the original plot

It is not, however, necessary to suppose, as I did, I c that they brought this intelligence from the south of India itself they might have picked it up at some other part of their voyage

t That they were so appears from their statement as to the Great Bear

In the thirteenth book of the Satipatha Bribmana, India also bears the name Dharma, which in the Maila Bharata is especially as sociited with Indhubtura him self, though only in the forms diarma rops, dharma putra ke

of the story of the Maha-Bharata, and, on the other hand, that, as in the epics of other nations, and notably in the Persian Epos, so too in the Maha Bharata, the myths relating to the gods became linked with the popular legend But so completely have the two been inter-woven that the marayelling of the respective elements must ever remain an impossibility One thing, however, is clearly discernible in the Maha-Bharata that it has as its basis a war waged on the soil of Hindustan between Aryan tribes, and therefore belonging probably to a time when their settlement in India, and the subjugation and brahmanisation of the native juhabitants had already Deen accomplished. But what it was that gave rise to the conflict-whether disputes as to territory, or it may be religious dissensions-cannot now be determined -Of the Maha Bharata in its extant form, only about one-fourth (some 20 000 flokas or so) relates to this conflict and the myths that have been associated with it, 201 while the elements composing the remaining three-fourths do not belong to it at all, and have only the loosest possible connection therewith as well as with each other additions are of two kinds. Some are of an epic character, and are due to the endeavour to unite here, as in a single focus, all the ancient legends it was possible to muster,and amongst them, as a matter of fact, are not a few that are tolerably antique even in respect of form. Others are of purely didactic import, and have been inserted with the view of imparting to the military caste, for which the work was mainly intended, all possible instruction as to its duties, and especially as to the reverence due to the priesthood. Even at the portion which is recognisable as the original basis-that relating to the war-many generations must have laboured before the test attained to an approximately settled shape. It is noteworthy that it is precisely in this part that repeated allusion is made to the Yavanas, Sakas, Pahlavas,27 and other peoples, and that

Which of course stands in glaring contridiction to the statement that the Wall Bhirats was recited in his pre-ence.

And even of this two thirds

will have to be sifted out as not priginal since in the introduction

to the work (1 Sr) the express intimation is still preserved that it previously consisted of SSco floke.

Pillare The Noldeke, in 2 communicate n dated 3d November

these, moreover, appear as taking an actual part in the conflict-a circumstance which necessarily presupposes that at the time when these passages were written, collisions with the Greeks, &c , had already happened " But as to the period when the final reduction of the entire work in its present shape took place, no approach even to a direct conjecture is in the meantime possible, 200 but at any rate, it must have been some centuries after the commencement of our era.\* An interesting discovery has

1875, mentions a point which, if confirmed, will prove of the highest importance for determining the date of composition of the Maha Bharata and of the Rimiyena (see my Essay on it, pp. 22, 25) as well as of Mann (see x. 41) According to this there exists considerable doubt whether the word Paller, which is the basis of Pallara, and which Olshausen (v sup., p. 4, note) regards as having arisen out of the name of the Parthouse, Parthiana, can have origi nated earlier than the first century A.n. This weakening of th to A is not found, in the case of the word Mithra, for example, before the commencement of our era (in the MIIPO on the come of the Indo-Scythuns, Lassen, f AK., 11. 837 and in Meherdates in Tacitas) the name of a people, the word Pablay became early foreign to the Persiana, learned reminiscences excepted in the Pahlavi texts them eelves, for instance, it does not The period when it passed DECITY over to the Indiana, therefore, won'd have to be fixed for about the 2d-4th century A.D. and we should bare to understand byit not directly the Persuans, who are called Para sikas, rather, but specially the Arsa moan Parthuma.

of especial interest in this con nection is the statement in it. 578, 579, where the Yavana prance Bha gadatta (Apollodotus (1), according to von Gutschmid s conjecture segafter BC. 160) appears as sovereign of Maru (Marwar) and Naraka, As rubur Varunalike, the west.

Side by side with the Itihasa we find the Purana mentioned in the Brahmanas, as the designation of those cosmogonic inquiries which occur there so frequently, and which relate to the 'agra' or 'beginning' of things When in course of time distinct works bearing this name arose, the signification of the term was extended, and these works came to comprehend also the history of the created world, and of the families of its gods and heroes, as well as the doctrine of its various dissolutions and renovations in accordance with the theory of the mundane periods (vugas) As a rule, five such topics are given as forming their subject (see Lassen, I AK, 1 479), whence the enthet Pancha-lakshana, which is cited in Amara's lexicon as a synonym of Purana. These works have penshed, and those that have come down to us in their stead under the name of Paranas are the productions of a later time, and belong all of them to the last thousand years or so They are written (of Lassen, l c) in the interests of, and for the nurpose of recommending, the Siva and Vishnu sects, and not one of them corresponds exactly, a few correspond slightly, and others do not correspond at all, with the description of the ancient Puranas preserved to us in the Schohasts of Amara, and also here and there in the works themselves "For the old narratives, which are in part abridged, in part omitted altogether, have been substituted theological and philosophical doctrines, ritual and ascetic precepts, and especially legends recommending a particular divinity or certain shrines" (Lasseu, I AK, 1 481). Yet they have unquestionably preserved much of the matter of these older works, and accordingly it is not uncommon to meet with lengthy passages, similarly worded, in several of them at the same time Generally speaking, as regards the traditions of primitive times, they closely follow the Mahá-Bhárata as their authority, but they likewise advert, though uniformly in a prophetic tone, to the historic

Talboya Wheeler in his History of the tale Billa Eddrafa, in 44 ser-Isdia, vol. 1. (1867), where, too, gar of 6550 anushtubb verses, there is a general sketch of the contents of the Maha Bharata it self see I Sir, 11 392 - It remains further to mention the recast of the Maha Bharats by the Jama Amarachandra whichisextantunder

and which appeared in the Benares Pandit (1869 ff ) edited by Vechana Pamasistrin This work belongs probably to the 11th century, see Z D. M O , 12m 170

lmes of kings. Here, however, they come into the most violent conflict, not only with each other, but with cinconology in general, so that their historical value in this respect is extremely small. Their number is considerable, amounting to eighteen, and is doubled if we techon the so-called \*Upopurárias\*, in which the epic character has been thrust still more into the background, while the ritual element has come quite to the front. Up to this time only one single Purdias, the Bhagavata-Purana, has been published—the greater part of it at least—edited [and translated] by Burnout but of the others we have excellent notices in Wilson's translation of the Vishnu-Purana.

As the second group of Epic Poetry we designated the Kärnya, which are ascribed to certain definite poets (Karus), whereas the Ithiasa and Puranas are attributed to a mythical personage, Vyas, who is simply Jacoccovi (Redaction) personalled. At the head of these poems stands the Rämdyana of Valimita, whose name we found cited among the teachers of the Tattriya-Pratiskhyat. In respect of language, this work is closely related to the war portion of the Māha-Bharata although in individual cases, where the poet displays his full elegance, it bears plainly enough on its surface, in hyme and metre, the traces of a later date. In

se As also in the separate analy sea of various Purants now collected in vol. 1 of Wilson & Essays on Sanskrif Literature (ed Rost, 1864) Above all, we have here to mention. further the minute accounts given of the Purinas by Aufrecht in his Catal Cod Sanse Bibl Bodl, pp 7-87 The Vishnu Purana has been recently published at Bombay with the commentary of Ratnagarbha bhatta (1867), Wilson s translation of it has been republished edited by Fitzedward Hall in five vols. (1864-1870), with material additions and corrections There are now also several editions of the Bhagarata Purdue, amonest them one with the comm of Sridharasvátnin (Bom bay, 1860) The Marlandeya Pu rdna has been edited in the Bill Indica by K. M. Baneryes (1855-1862), and the Agms Purden is now

appearing in the same series (begins 1870, caps 1-214 thins fast). An impression of the Kalki Perdina appearance at Calcutta in 1873 and lithographed editions of the Linga Pardina, 1830 and of portions of the Pardina, Standa, Garuda, Erahma ansurta, and other Purinas have appeared at Bonbay, see T. Str. 11.

245 ff., 301 ff
The words Latt in the sense of singer poet, and kdrya, in tast of song poem, are repeatedly used in the Veda, but without any technical application see Vd. as Sank Spee, in 187 [trayl var endyd Ldyram chlandar, Sat vin 5 2 4]

Whether by this name we have to understand the same per on is of course not certain, but considering the singularity of the name, it is at least not improbable.

regard to contents, on the contrary, the difference between it and this portion of the Maha-Bharata is an important In the latter human interest everywhere preponderates, and a number of well-defined personages are introduced, to whom the possibility of historical existence cannot be denied, and who were only at a later stage associated with the myths about the gods But in the Ramayana we find ourselves from the very outset in the region of allegory, and we only move upon historical ground in so far as the allegory is applied to an instance fact, namely, to the spread of Aryan civilisation towards the south, more especially to Ceylon The characters are not real historic figures, but merely personifications of certain occurrences and situations Sita, in the first place, whose abduction by a mant demon, and subsequent recovery by her husband Rams, constitute the plot of the entire poem, is but the field-furrow, to which we find divine honours. paid in the songs of the Rik, and still more in the Grihva ritual. She accordingly represents Aryan husbandry, which has to be protected by Rama-whom I regard as originally identical with Balarama "balabhrit," plough-bearer," though the two were afterwards separated -against the attacks of the predatory aborigines. These latter appear as demons and giants, whereas those natives who were well disposed towards the Aryan civilisation are represented as monkeys,-a comparison which was doubtless not exactly intended to be flattering, and which rests on the striking ugliness of the Indian aborigines as compared with the Aryan race. Now this allegorical form of the Ramayana certainly indicates, d priori that this poem is later than the war-part of the Maha-Bharata, and we might fairly assume, further, that the historical events upon which the two works are respectively based stand to each other in a similar relation. For the colonisation of Southern India could hardly begin until the settlement of Hindustan by the Ary ans had been completed, and the feuds It is not however, that arose there had been fought out altogether necessary to suppose the latter, and the warfare at least which forms the basis of the Maha-Bhirata might have been waged concurrently with expeditions of other Aryan tribes to the south Whether it was really the Kosalas, as whose chief Rama appears in the Ramajana, who

effected the colonisation of the south,\* as stated in the noem, or whether the poet merely was a Kośala, who claimed this honour for his people and royal house, is a point upon which it is not yet possible to form a judgment He actually represents Sita as the daughter of Janaka, king of the Videhas, a tribe contiguous to the Kośalas, and renowned for his piety The scanty knowledge of South India displayed in the Ramayana has been urged as proving its antiquity, since in the Maha-Bharata this region appears as far more advanced in civilisation, and as enjoying ample direct communication with the rest of India But in this circumstance I can only see evidence of one of two things either that the poet did not possess the best geographical knowledge, whereas many generations have worked at the Maha-Bharata, and made it their aim to magnify the importance of the conflict by grouping round it as many elements as possible or else-and this is the point I would particularly emphasise—that the poet rightly apprehended and performed the task he had set himself, and so did not mix up later conditions, although familiar to him, with the earlier state of things The whole plan of the Ramayana favours the assumption that we have here to do with the work, the poetical creation, of one man. Considering the extent of the work, which now numbers some 24.000 slokas, this is saying a great deal, and before epic poetry could have attained to such a degree of perfection, it must already have passed through many phases of development. Still,

compass. The term Chefarifs still remains unmidlightle to me, see J. S., 153. (For the rest, as atted by the Chefarifs still characteristic states of the Chefarifs scholars, that rule, v. 2 CO a not interpreted may possibly therefore not be 124 number of Patagnial). Therefore not be 124 number of Patagnial — The word grandle may have reference either to the outward fastening (like the German High, Band) or to the numer companion which of the law or what attended to the control of the three of the total from inclined to procourse for the former IS-se above pp. 15, 90.

165]

<sup>\*</sup> It was by them also—by Bhagira that, according to the Rimiyana, the mouths of the Gan ges were discovered Properly they were the Eastern rather than the Southern foreposts of the Aryans

<sup>†</sup> Of these phases we have probably traces in the grankhañ Sus frandigañ ho thu Goldstucker in his Pánna, p. 23, takes exception, doubtless correctly, see I SL, ve 2712 amendaligan, Indragnantijan, mentioued by Pánna, vy 38s, and u the Albydras and Charactics and the Character of the Character of the are to be variously designated a. cording to the different bounts of the

it is by no means implied that the poem was of these dimensions from the first here, too, many parts are certainly later additions, for example, all those portions in which Rama is represented as an incarnation of Vishna all the episodes in the first book, the whole of the seventh book, &c The poem was originally handed down orally. and was not fixed in writing until afterwards, precisely like the Mahá-Bhárata. But here we encounter the further peculiar circumstance-which has not yet been shown to apply, in the same way at all events, to the latter worknamely, that the text has come down to us in several distinct recensions, which, while they agree for the most part as to contents, yet either follow a different arrangement, or else vary throughout, and often materially, in the expression This is hardly to be explained save on the theory that this fixing of the text in writing took place independently in different localities. We possess a complete edition of the text by G Gorresio, containing the so-called Bengáli recension, and also two earlier editions which break off with the second book, the one published at Serampore by Carey and Marshman, the other at Bons by A. W von Schlegel. The manuscripts of the Berlin library contain, it would seem, a fourth recension.

in its earliest shape in Boddhlat legenda, underwent in the hands of Válmíki, rest upon an acqualotance with the conceptions of the Trojan cycle of legend, and I have like was endeavoured to determine more accurately the position of the work in literary history The conclusion there arrayed at us, that the date of its composition is to be placed towards the commencement of the Christian era, and at all events in an epoch when the operation of Greek influence upon India had already set in This choited a rerounder from Kashmata Trumbak Telang (1873) estitled, Was the Ramayena copied from Homer, as to which see Ind Ant, it. 209 I St. xnt. 336, 480. The same writer afterwards, in the Ind. Ant in 124, 267, pointed out a half floka which occurs in the Yudd'a binda,

See my Catalogue of these MSS. p. 119. [Two complete editions of the text, with Rima s Commentary, have since appeared in India, the one at Calcutta in 1859-60, the other at Bombay in 1859 respecting the latter, see my notice in I Sir, ir 235-245 Gorresio s edition was completed by the appearance in 1867 of the text, and in 1870 of the translation, of the Uttara-kinda Hippolyte Fauche's French translation follows Gorresios text, whereas Griffith's metrical English version (Benares, 1870-74, 10 5 vols ) fol lows the Bombay edition. In my Essay, Utber das Edmáyanam 1870 (an English translation of which appeared in the Indian Antiquary for 1872, also separately at Bumbay in 1873), I bave attempted to show that the modifications which the tory of Rama, as known to us

Between the Ramavana and the remaining Kayyas there exists a gap similar to that between the Maha-Bharata and the extant Puranas Towards filling up this blank we might perhaps employ the titles of the Kavyas found in the Kavi language in the island of Bali,207 most of which certainly come from Sanskrit originals. In any case, the emigration of Hindus to Java, whence they subsequently passed over to Bali, must have taken place at a time wher the Kavya literature was particularly flourishing, otherwise we could not well explain the peculiar use they have made of the terms karr and karya Of the surviving Kayvas, the most independent in character, and on that account ranking next to the Ramayana-passably pure, too, in respect of form-are two works \* bearing the name of Kalidasa, namely, the Raghu-ransa and the Kumarasambhava (both extant in Kavi also) The other Kavyas. on the contrary, uniformly follow, as regards their subject, the Maha-Bharata or the Ramayana, and they are also plainly enough distinguished from the two just mentioned by their language and form of exposition. This latter abandons more and more the epic domain and passes into the erotic, lyrical, or didactic-descriptive field, while the language is more and more overlaid with turgid bombast,

and also twice in Patampalis Mahh hhashys. But the verse contains a more property of the verse of the second transport of the second property of the second property of the post of reverse from the Randsyans. In stell, consequently it proves nothing as to the propriy of the post to Patampals, and this all the less, as it are pressly cited by Wilmids himself are property of the post to the property of the post of the property of the post of the some other knowled points see my letter in the Ind. Ast. v. 247 ft (1875). See Friederich, i. e. J. St., u.

rayoff. The numerous traces which are contained in Patanyah's Mabb blashys of epic or natrative poems then actually extant, and which appear in that work as direct quota tions therefrom, take us back to a far other time, see I St, rui. 463 ff

\* They have been edited by Stenzler, text with translation [and repeatedly in India since, with or without the commentary of Malli natha. To the seven books of the Kumara sambhava, which were the only ones previously known ten others have recently been added. on the critical questions connected with these see eg Z D M G, xxvii 174-182 (1873) From the astrological data contained in both works, H Jacobi has shown in the Monatsber der Berl, Acad , 1873, p 556 that the date of their com position cannot be placed earlier than about the middle of the 4th century a D The Raghu vansa was most probably composed in honour of a Ehoja prince see my E say on the P'ro Tap Up p 279, I Str . 1. 312]

until at length, in its latest phases, this artificial epic resolves itself into a wretched jurgle of words. A pretended degance of form, and the performance of difficult tricks and feats of expression, constitute the main aim of the poet, while the subject has become a purely subordinate consideration, and merely serves as the material which enables him to display his expertness in manipulating the language. 38

Next to the epo, as the second phase in the development of Sankari postry, comes the Dama. The successive state of the player is styled Next, literally dancer. Etymology thus points as to the fact that the drama has devoloped out of dancing, which was probably accompanied, at first, with music and song only, but in course of time also with pantominic representations, processions, and dialogue. We find dancing repeatedly menored in the songs of the Rik (e.g., m. in 10.1, 9.2 4, 6.0.) but with special frequency in the Atharva-Samhut, and the Yarus. \*Hough everywhere still under the root-form

201 Six of these artificial epica are specially entitled Mahakdayas These are, in addition to the Raghu vania and Kumara-sambhava -(1) the Rhatti-Laves, in 22 sorges, composed in Valabhi under king Bri Dharasena (xxii. 35) in the 6th or 7th cent therefore, it deals with the story of Rama, and is written with a special reference to grammar (2) the Magha Lavya or Schmillabadka of Magha, the son of Dattaka. in 22 saroas (Suprabhadeva, grand father of the poet, is described as the minister of a king Sri Dharmanabhal, and (3) the Kurdidryaniya of Bharavi, in 18 sargas, -both prior to Halfyndha (end of the 10th cent.), see I St viii. 193, 195. 196 (4) the Nauhadhtua of Sri Harsha, in 22 sargas, of the 12th cent. (see Eubler in the Journal Borday B- R. A. S. x. 35) The Raghavapandariya of Lavirais. in any case later than the 10th cent (see I Str. 1. 371), enjoys a high esteem, it handles, in the self same words, at once the story of the Ramayana and that of the

Mahi Bhirata and like the Nalidaya, 10 4 sargas, which is even sacrabed to Kalidasa (edited so long ago as 1830 by Ferd, Benary), 18 one of the most characteristically artificial pieces of this class of poetry All these works bave beed frequently published in India, and to them are to be added many other similar productions — The Prikut poem Setu-bandha or Rd vina badha, which relates to the story of Rams, and is reputed to be by Kalidaso, also facrits special mention here Of this Paul Gold erhmidt has already published two chapters (Gottingen, 1871), and Sieg fried Goldschmidt is engaged on an edition of the entire text

"Yuki various kunser munealse companients, according to the V41 companients, according to the V41 Samh xxx, where we meet with quite a nomber of mineans and daneses as well as with the name Salidian tackly, which, a ta later time, at all events, belongs specially to actors, see I Sir. t. 75 83 According to the scholume on K41 to actors, see I Sir. t. 75 83 According to the scholume on K41 to actors, see I Sir. t. 75 83 According to the scholume on K41 to actors, see I Sir. t. 75 83 According to the scholume on K41 to actors, see I Sir. t. 75 83 According to the scholume on K41 to actors, see I Sir. t. To Sir.

nrit The prakritized form nat occurs for the first time in Panini, who, besides, informs us of the existence of distinct Nata-sutras,\* or manuals for the use of natas, one of which was attributed to Silálin, and another to Krišaśva, their adherents being styled Sailalinas and Krisasvinas respectively The former of these names finds an analogue, at least, in the patronymic Sailali, which occurs in the thirteenth Landa of the Satapatha-Brahmana, and it may also, perhaps, be connected with the words Sailúsha and Kusilaya, both of which denote 'actor' (2) + latter name, on the contrary, is a very surprising one in this connection, being otherwise only known to us as the name of one of the old heroes who belong in common to the Hindus and the Parsis ! Beyond this allusion we have no vestige of either of these works Panini further cites § the word naiyam in the sense of 'naianam dharma ámnávo vá" In both cases, we have probably to understand by the term the art of dancing, and not dramatic art -It has been uniformly held lutherto that the Indian drama arose, after the manner of our modern drama in the Middle Ages, out of religious solemnities and spectacles (so-called 'mysteries'), and also that dancing originally subserved religious purposes But in support of this latter assumption, I have not met with one single instance in the Srauta- or Grihva-Sútras with which I am acquainted (though of the latter, I confess, I have only a very super-

ye sampadayeyuh" as the text has it, we have to understand specially teachers of daucing, music, and singing "In the man who dances and sings, women take delight.

[The Sailalino natah are mentioned in the Bhashva to iv 2. 56, in the Anugada sutra, the Saildlings are cited as a ritual

ficial knowledge) 200 The religious significance of dancing is thus, for the older period at least, still questionable; and since it is from dancing that the drama has evidently sprung, the original connection of the latter with religious solemnities and spectacles becomes doubtful also Besides, there is the fact that it is precisely the most ancient dramas that draw their subjects from civil life, while the most modern, on the contrary, almost exclusively serve religious purposes. Thus the contrary, rather, would seem to be the case, namely, that the employment of dancing and of the drama at religious solemnities was only the growth of a later age 210 This does not imply, however, that dancing was excluded from those great sacrificial festivals which were now and then celebrated by princes; but only that it did not itself constitute part of the sacred rite or religious ceremony, and could only, and did only, find a place in the intervals The name applied to the stage-manager is the dramas themselves, 'Sutra-dhara,' is referred, and no

a Kantavadha and Valibandha by so called taubhilas-(comp perhaps the saubhikas in Hardrall, 151, though these are explained as androydidas, 'lugglers,' of sobha, sobhanagaraka, I St., us 153]-lead us directly to this conclusion , see I St, xiii. 354. 487 ff "But between the dramatic tepresentations known in the Bha shya, which bear more or less the character of religious festival plays, and the earliest real drams that have actually come down to us, we must of course suppose a very con siderable interval of time, during which the drama gradually rose to the degree of perfection exhibited in these extant pieces, and here I am still disposed to assign a certain influence to the witnessing of Greek The Indian drams, after having acquitted itself brilliantly in the most varied fields-notably too as a drama of civil life-finally reverted in its closing phases to esten tially the same class of subjects with which it had started-to represents t 'ms from the story of the gods."-Ibid , pp 491, 492

<sup>\*\*\*</sup> Even now I am acquauted with but little from these sources with but little from these sources other thangs at the pulymetic of the sound of the

doubt rightly, to the original sense of '(measuring) Imeholder, 'carpenter,' smce it appears to have been one of the duties of the architect at these sacrificial celebrations, over and above the erection of the buildings for the reception of those taking part in the sacrifice, likewise to conduct the various arrangements that were to serve for their amusement. (See Lassen, I AK, ir 503) Whether the najas and nartakas mentioned on such occasions are to be understood as dancers or actors, is at least doubtful, but in the absence of any distinct indication that the latter are intended, I hold in the meantime to the etymological sigmification of the word, and it is only where the two appear together (eg, in Rámáy 1 12 7 Gorr) that nata has certainly to be taken in the sense of 'actor' Buddhist legend scems, indeed, in one instance-in the story of the life of Maudgalyayana and Upatishya, two disciples of Buddhato refer to the representation of dramas in the presence of these individuals + But here a question at once arises as to the age of the work in which this reference occurs, this is the main point to be settled before we can base any conclusion upon it. Lassen, it is true, says that "in the oldest Buddhistic writings the witnessing of plays is spoken of as something usual," but the sole authority he adduces is the passage from the Dulva indicated in the note. The Dulva, however, that is, the Vinaya-Pitaka, cannot, as is well known, be classed amongst the "oldest Buddhistic writings," it contains pieces of widely different dates, in part, too, of extremely questionable antiquity In the Lalita-Vistara, apropos of the testing of Buddha in the

<sup>•</sup> And therefore has probably motion to do with the Nata Grass mentioned above? For mother application of the word by the Bud dhusts, see Lasen, I AK, In St Of a marnowith theater, at all results, we must not think, though the Javanese pupper shows might tempt us to do so

various arts and sciences (Foncaux, p. 150), adiys must, undoubtedly, be taken in the sense of simmetic art'—and so Foucaux translates it, but this does not suppose the sustence of distinct dramas. The date, moreover, of this particular works is by no means to be regarded as settled, and, in any case, for the time of Buddha himself, this examination-legend carries no weight whatever.

With respect now, to the surviving dramas it has hitherto been usual to follow what is supposed to be the tradition, and to assign the most ancient of them, the Mrichhakati and Kalidasa's pieces, to the first century BC. while the pieces next following-those of Bhavabhutibelong to a time so late as the eighth century AD Between Kálidasa and Bhavabhúti there would thus be a gap of some eight or nine centuries-a period from which, according to this view, not one single work of this class has come down to us Now this is in itself in the highest degree improbable, and were it so, then surely at the very least there ought to be discernible in the dramas of the younger epoch a very different spirit, a very different manner of treatment, from that exhibited in their predecessors of an age eight or nine hundred years earlier. But this is by no means the case, and thus we are compelled at once to reject this pretended tradition, and to refer those sor-disant older pieces to pretty much the same period as those of Bhavabhuti Moreover, when we come to examine the matter more closely, we find that, so far as Kalidása is concerned, Indian tradition does not really furnish any ground whatever for the view hitherto accepted we only find that the tradition has been radically misused. The tradition is to the effect that Kalidasa lived at the court of Vikramaditva, and it is contained in a memorial verse which says that Dhanvantari, Kshapanaka, Amarasinha, Sanku, Vetalabhatta, Ghatakarpara, Kalidasa, Varahamihira and Vararuchi + were the 'nine gems' of Vikrama's

<sup>•</sup> I have here copied Holtzmann a words, referring to Amara, in his excellent hitle treatise, Uber den griechischen Urspring des indicates Thickreise, Karlorube, 1841, p. 26. † This is obviously the Viriaches who is mentioned by the Hindustini shrunder as the author of the 1;

krama-chantra (Journ Auch Mal, 1844, p 355) [This received to secrebed to Vararuchi-e-of the 8th biasan-dvidtruskid is actually at tant, see Aufrecht Cet. of Sank MSS Libe Tran. Cell. Camb., p 11, and Westergard Celd. Codd. Or Bill. Rev. Hausense, 1001]

court Now it is upon this one verse-a mere waif and stray, that has come, like Schiller's 'Madchen aus der Fremde, from nobody knows where,\* and which is, in any case, of the most questionable authority-that the assumption rests that Kalidasa flourished in the year 56 BC I For people were not satisfied with hastily accepting as genuine coin the tradition here presented-and this notwithstanding the fact that they at the same time impugned to some extent the trustworthiness of the verse embodying it +-they at once rushed to the conclusion that the Vikrama here named must be the Vikramaditya, whose era, still current in our own day, commences with the year 56 BC But then, we know of a good many different Vikramas and Vikramadityas t and, besides, a tradition which is found in some modern works, and which ought surely, in the first instance, to have been shown to be baseless before any such conclusion was adopted, states expressly (whether correctly or not is a question by itself) that king Bhoja, the ruler of Malava, who dwelt at Dhara and Unayini, was the Vikrama at whose court the 'mine gems' flourished, and, according to an inscription, this king Bhoja lived

It is alleged to be taken from the Vikrama charitra, but Roth, in his analysis of this work in the Journ. Amat, Octob 1845, p 278 ff., says nothing of it. [And in fact it occurs neither there nor in any of the other recensions of the Sinhasana-dvátrin šiká to which I have access. It is, however, found embodied both in the Jyctirvid abharana, of about the arteenth century (22, 10, see Z D M G, xxu 723, 1868), and in a Singhalese MS of the so-called Navaratna (with Singhalese com mentary) cited in Westergaards Catal Codd. Or Bibl. Reg Haun P 14 (1846) ] † Partly on erroncous grounds.

It was asserted, namely, that the word Chttakarpara in the verse was only the name of a work, not of a person this, however, is not the case, as several posens, besides, are found ascribed to him ‡ 'Sun of might' is quite a

general title, and not a neme.

See, for instance, al o Haeber

lin a Sanskrit Anthology, pp 483

See Lassen, Zeitich für die Kunde des Morg, vil. 294 ff , Colc brooke, ii. 462 According to Rein aud in the Journ. Asial., Sept 1844, p. 250, Bhoja is mentioned some years earlier by Albiráni, who wrote in a.D 1011, as his contemporary . and Othi alludes to him earlier still, in A.D 1018 as then reigning, see Remand, Mem. sur I Inde p 261 According to a later Hindustini chronicler, he lived 542 year, after Vikramiditya (.ee Journ Anat Ma: 1844, p 354), which would make the date of the latter about A D 476 Upon what this very pre cise statement rest. is unfortunately uncertain, the Vikrama-charitra does not fix in this definite way the interval of time between Dhoja and Vikrama. Roth, at all events, in his analysis of the work (Journ Anat. Sept 1854, p 281) merely sors, "ben des nanées oures (la mort de Vikramaditya) Bhoja partint au about 1040-1090 AP On the other hand, there exist no positive ground whatever for the opinion that the Vilenam of the verse is the Vikramaditys whose era begins in EQ 50 Nay, the case is stronger still, for up to the present time we have absolutely no authentic evidence. To show whether the era of Vikramáthya dates from the year of his burth, from some achievement, or from the year of his death, or whether, in fine, it may not have been simply introduced by him for astronomical reasons? To assign him to the first year of his era might be quite as great a mutake as we should countint in placing Pope Gregory XIII. In the year one of the Gregorian Calendar, or even Julius Cessar in the first year of the Julius period to which his name has been given, i.e., in the year 4713 BC" (Holtzmann, op eu, p. 19)

souverdin pourour" [The text has simply "bahum varaidm gaides." Nor does any definite statement of the kind occur in any of the various other recensions of the Smhasanadvátrnáská, although a considerable interval is here regularly assumed to have elapsed between the rule of Vikrama at Avanti and that of Bisoja at Dhard . To suppose two Bhoras. as Remand does, L. c , and Min. sur Clude, pp 113, 114, is altogether arbitrary We might determine the uncertain date of Vikramáditya by the certain date of Bhoja, but we cannot reverse the process. The date mas of Yudbishthira s era is, J As. L c., p 357, assigned to the acces not appear whether this is the attract tradition of the Hindustani chroni eler, or merely an addition on the part of the translator Even in the former case, it would still only prove that the chronicler or the tradition he followed, mixed up the common sesertion as to the date of Vikrama with the special statement above referred to fTo the statements of the Hindustani chronicler, Mir Cher 1 Alı Afsos, no great impor tance probably, need be attached. They rest substantially on the recen ston attributed to Vararuchi of the

Schläsma driftrahlick, which, lowers, in the MR before ne from Colle, Comb h, yields no definite chrivological data. — After all, the assumption of several Biopa annoe turned out to be fully warranted, see, ey Rigendrilland years and the second of the fully warranted, see, ey Rigendrilland years and years are years are years and years are years are years and years are years are years are years are years are years and years are years are years are years

1844, p 357 + We first meet with it in the astronomer Varaha Mibira in the fifth or sixth century, though even this is not altogether certain, and, as in the case of Brahmsgupts in the be the era of Silvabana (beg 1.D 78) Lassen does, in fact, suppose the latter (I AK, a 508), but see Colebrooke, 11. 475 -Albirari gives particulars (v Reimud Journ Asiat, Sept 1844, pp 283-284) as to the origin of the Calmera, but regard ing the basis of the Sament era of Vikrama he does not enlarge [Even yet these two questions, which are of such capital importance for Indian chronology, are in an altogether unsatisfactory state According to Kern, Introd. to his edition of the

The dramas of Kahdasa—that one of the 'nine gems' with whom we are here more immediately concerned-furnish in their contents nothing that directly enables us to determine their date Still, the mention of the Greek female slaves in attendance upon the king points at least to a time not especially early, while the form in which the popular dialects appear, and which, as compared with that of the inscriptions of Pivadasi, is extraordinarily degraded, not unfrequently coinciding with the present form of these vernaculars, brings us down to a period at any rate several centuries after Christ But whether the tradition is right in placing Kalidasa at the court of Bhoja in the middle of the eleventh century appears to me very questionable, for this reason in particular, that it assigns to the same court other poets also, whose works, compared with those of Kalidasa, are so bad, that they absolutely must belong to a later stage than his-for example, Damodara Misra, author of the Hanuman-nataka. Moreover, Kalidasa has allotted to him such a large number of works, in part too of wholly diverse character, that we cannot but admit the existence of several authors of this name, and, in point of fact, it is a name that has continued in constant use down to the present time. Nay, one even of the three dramas that are ascribed to Kalidasa would seem, from its style, to belong to a different author from

Bribat-Samhita of Varsha Mihira, t ff. (1866), the use of the so-called Sameaf era is not demonstrable for early times at all, while astronomers only begin to employ it after the Year 1000 or so. According to Westergaard, Om de indisks Koser Aouse (1867), p 164, the grant of Dantidurga, dated Esta 675 Sararas BIR (A.D 754), is the earliest certain tostance of its Occurrence, see also Burnell, Elem, of South Ind. Pal., p. 55. Others, on the contrary, have no hesitation in at once referring, wherever possible, every Samrat or Samrateure-dated in cription to the Semtut era. Thus, eg, Conning ham in his Archeol Surrey of India, m 3t, 39 directly saugus an in scription dated Sayir 5 to the year Sec. 52 Downers, too, has recently taken the same view, J R. A S., vil. 382 (1875) According to Eggeling (fruboer's Amer and Or La Rec. special number, 1875, p 38), one of the inscriptions found in Sir Walter Liliot's copies of grants dates as far back as the year Sala 169 (A.D 247). Burnell, however, declares st to be a forgery of the teuth century Pergumon too, On the Saka, Sam rat, and Gupta Eras pp 11-16, 15 of opinion that the so-called same of era goes no farther back than the tenth contary For the present, therefore unfortunately, where there is nothing else to gu de us it must generally remain an open question which era we have to do with in a particular inverset on and what date con-equatily the inscription

the other two <sup>31</sup> And this view is further favoured by the circumstance, that in the introduction to this play Dhivaka, Saumilla, and Kaviputra are named as the poet's predecessors, Dhavaka being the name of a poet who flourished contemporaneously with king Sri Harsha of Kashmír, that is, according to Wilson, towards the beginning of the twelfth century A D <sup>32</sup> There may, it is

211 In the introduction to my translation of this drama, the Malavikágumitra, I have specially ex amined not only the question of its gennineness, but also that of the date of Kalidasa. The result ar rayed at is, in the first place, that this drama also really belongs to hun .- and in this view Shankar Pandil, in his edition of the play (Bombay, 1869), concurs. As to the second point, internal evidence, partly derived from the language, partly connected with the phase of civilisation presented to us leads me to assign the composition of Edidisa s three dramas to a period from the second to the fourth cen tury of our era, the period of the Gupta princes, Chandragupta, &c., "whose reigns correspond best to the legendary tradition of the glory of Vikrama, and may perhaps be gathered up in it in our migle focus" Lassen has expressed himself to essentially the same effect (I AK . 11. 457, 1158-1160) see also I St, 11. 148, 415-417 Kern, however, with special reference to the tradition which regards Kalidasa and Varaha Mihira as contemporanea. has, in his preface to Varaha's Brihat-Samhitá, p 20, declared himself in favour of referring the "nine geme" to the first half of the eigth century AD Lastly, on the ground of the astrological data in the Kumira-sambhava and Raghu vands, Jacobs comes to the con clusion (Monatsher der Berl. Acad., 1873, p 556) that the author of these two poenis cannot have lived before about a p 350, but here, of course, the prehammary quest on remains whether he is to be identi-

fied with the dramatist. Shankar Pandit, in Trubner's Am and Or Let Rec , 1875, special No , p. 35, assumes this, and fixes Kalidana a middle of the eighth century For s definite chronological detail which is perhaps farnished by the Megha duta, see note 210 below Br the Southern Buddhists Kalidan is placed in the sixth century, Knighton, Hist, of Ceylon, 105; Z D M O . xxil. 730. With modern astronomers, the ides of a triad of authors of this name is so fixed, that they even employ the term Ralidasa to denote the number 3.

see Z D M G, xxi 713 512 The date of Sri Harsha, of shom Dhiraka is stated in the Kavya-prakasa to have been the protego-Kashmir is not bere in question-has since been fixed by Hall (Introd. to the Vazavadatia) for the seventh century, rather Hall, moreover, questions the existence of Dhavaka altogether (p 17). and is of opinion that he "never enjoyed any more substantial existence than that of a various reiding . This conjecture of Hali s as to the name of the author of the Ratnavall, in which Buhler also concurred, has since been brilliantly verified According to Bubler's letter from Srinagara (publ in L St, are 402 ff), all the Kashmir MSS. of the Kivys praktis read, in the paseage in question, Bono, not Disvaka, the latter name bring altogether unknown to the Pand to of Kashmir, ton reading is un doubtedly the correct one '-Comp. note 218 below

true, have been more Dhavakas than one, another MS. moreover, reads Bhasaka, 233 and besides, these introduc-tions are possibly, in part, later additions. In the case of the Mrichhalati at least, this would appear to be certain, as the poet's own death is there intimated.\* This last-mentioned drama, the Mrichhakati-whose author, Sudraka, 13, according to Wilson, placed by tradition prior to Vikramaditya 211 (2 c. the same Vikrama at whose court the 'nine gems' flourished?)-cannot in any case have been written before the second century and For it makes use of the word nanaka as the name of a com , + and this term, according to Wilson (Ariana Antiqua, p 364), is borrowed from the coins of Kanerki, a king who, by the evidence of these coins, is proved to have reigned until about the year 40 AD (Lassen, I AK, 11 413) But a date long subsequent to this will have to be assigned to to the Mrichhakati, since the vernacular dialects it introduces appear in a most barbarous condition Besides, we meet with the very same flourishing state of Buddhism which is here revealed in one of the dramas of Bhavabhuti, a poet whose date is fixed with tolerable certainty for the eighth century A.D The Ramayana and the warpart of the Maha-Bharata must, to judge from the use

<sup>.</sup> Besides, the slaving of Sumbha and Nisumbha by Devi, which forms the subject of the Devi Mihatmys, v. x., in the Markand Purana, is referred to in the Mrichhakati, p 105 22(ed Stengler) - Whether ibid 10.1 18, Karulaka is to be referred to the nickal of this pame in the Penchalantra 18 uncertain - At page 126 a Stenz'er reads gallalla. but Wilson (Hinds Theatre, L 134) reads mallake, and considers it not impossible that by it we have to understand the Arabic malik!-In regard to the state of manners de picted, the Myschiskati is closely related to the Dasa kum'ra, at though the latter work, written in the eleventh century [rather in the airth, see below, p 213L belongs

From the foregoing exposition it appears that the drama meets us in an already finished form, and with its best productions In almost all the prologues, too, the several works are represented as new, in contradistinction to the pieces of former poets, but of these pieces, that is, of the early beginnings of dramatic poetry, not the smallest remnant has been preserved 216 Consequently the conjecture that it may possibly have been the representation of Greek dramas at the courts of the Grecian kings in Bactria, in the Paniab, and in Gujarat (for so far did Greek supremacy for a time extend), which awakened the Hindu faculty of mutation, and so gave birth to the Indian drama, does not in the meantime admit of direct verification. But its historical possibility, at any rate, is undemable,217 especially as the older dramas nearly all belong to the west of India. No internal connection, however, with the Greek drama exists 218 The fact, again, that no dramas are found either

ne See Cowell in I St, v 475, and as to the Kansa vadba and Vali bandha, the note on p 198 above mr Cf the Introduction to my trunslation of the Malavika, p xivu, and the remarks on Farantial in 2

D M G . xIV 260; also J. St. XIL. 192. 118 The leading work on the In dian dramas is still Wilson's Select Specimens of the Theatre of the Him dus, 1835, 1871. The number of drainas that have been published in India is already very considerable. and is constantly being increased, Foremost amongst them still remain -the Mrichlatatika of Sadraks, the three dramas of Kalidasa (Sakuntald, Urvast, and Midlamita), Bhavabhuti a three (Malati-madhara, Maha-vira chantra, and Uttara-rama chartra), -the Raindrais of King Sri Harsha deva, composed, according to Wil son's view, in the twelfth century and that not by the king himself, but by the post Dhavaks, who lived at his court, but according to Hall, by the poet Bins in the beginning of the goventh century, see Hall, In troduction to the Vasavadatta, p

356), Let Cent. Bl., 1872, p 614 ,the Nagananda, a Buddhistie sea sational piece ascribed to the same royal author, but considered by Cowell to belong to Dhavaka (see, however, my notice of Boyd's trins lation in Lat. C B , 1872, p 615) the Vent-samhara of Bhatta nariyana, a piece pervaded by the colour ing of the Krishna sect, written, according to Grill, who edited it in 1871, in the sixth, and in any case earlier than the teuth century (see Lat. (l. B., 1872, p. 612) — t' Vuldha-kilabhafijiki of Raja-Sekl... ra, probably prior to the ter century (see I Str. 1 313). — Mudri rakshasa of Vikikhadatta, 2 piece of political intrigue, of about the twelfth century and lastly the Prabodha chandrodeya of Krishni misra, which dates, according to Goldstucker, from the end of the same century -Two of Kahddan a dramas, the Sakuntali and Urvasi, are each extant in several recensions evidently in contequence of their having enjoyed a very special popu larity Since the appearance of Puschel's pamphlet, De Kalidasia 13 d. ici pote 212 200ve), I Sr. 1. Sakuntali Pecentionibus Brestau.

in the literature of the Hindid, who emigrated to the island of Jaya about the year Sco An Gand thence subsequently to Hali), or among the Tibetan translations, is perhaps to be explained, in the former case, by the circumstance that the emigration took place from the east coast of India.\* where dramatic literature may not as yet have been specially cultivated (?) But in the case of the Tibetan fact is more surprising, as the Meghadita of Kalidása and other similar works are found among their translations.

The Lyrical branch of Sanskrit poetry divides itself, according to its subject, into the Religious and the Erotic Lyric With respect to the former, we have already seen, when treating of the Atharva-Samhita, that the hymns of this collection are no longer the expression of direct religrous emotion, but are rather to be looked upon as the utterance of superstitious terror and uneasy apprehension, and that in part they bear the direct character of magic spells and incantations. This same character is found faithfully preserved in the later religious lyncs, throughout the Epic, the Paranas, and the Upanishads, wherever prayers of the sort occur, and it has finally, within the last few centuries, found its classical expression in the Tantra literature It is in particular by the heaping up of titles under which the several deities are invoked that their favour is thought to be won, and the 'thousandname-prayers' form quite a special class by themselves. To this category belong also the prayers in amulet-form, to which a prodigious virtue is ascribed, and which enjoy the very highest repute even in the present day these, we also meet with prayers, to Sive + especially, which

† Whose worship appears, in the main, to have exercised the most fav ourable influence upon his followers. for religious ferrour and childlike trust will bear comparison with the best hymns of the Christian Church, though, it must be admitted, their number is very small

The Erotic Lync commences, for us, with certain of the poems attributed to Kuldidas. One of these, the Maghadate, belongs at all events to a period <sup>120</sup> when the temple worship of Sira Mahakala at Upay inf was in its prime, as was still the case at the time of the first Muhammadan conquerors. Together with other matter of a like sort, it has been admitted, and under Kuldiass's name, into the Thotian Tandjur,\* from which, however, no chronological dedication can be drawn, as the date of the final completion of this compilation is unknown. The subject of the Meghadia is a message which an exile sends by a cloud to his distant love, together with the description of the route fine cloud-messagers is to take—a form of exposition which has been imitated in a considerable number of similar poems A pouliar cleas is composed of the sentences of Bhartribar,

whereas it is the worship of Krishna that has chiefly countenanced and furthered the moral degradation of the Hindós.

Amaru, &c , which merely portray isolated situations with out any connection as a whole A favourite topic is the story of the loves of Krishna and the shepherdesses, the playmates of his youth. It has already been remarked that the later Kavyas are to be ranked with the erotic poems rather than with the epic In general, this love-poetry is of the most unbridled and extravagantly sensual description. yet examples of deep and truly romantic tenderness of feeling are not wanting. It is remarkable that, in regard to some of these poems, we encounter the same phenomenon as in the case of the Song of Solomon a mystical interpretation is put upon them, and in one instance at least, the Gita-Govinda of Jayadeva,219a such a mystical reference appears really to have been intended by the port, however incompatible this may at first sight seem with the particularly wanton exuberance of fancy which is here displayed,

Of the Ethico-Didactic Poetry—the so-called Nit. Statras—but little has survived in a complete form (some pieces also in the Tibetan Tandjur), no doubt because the great epic, the Mahá-Ehárata, in consequence of the character of universality which was gradually stamped upon it, is itself to be regarded as such a Nith Sastra. Still, relus enough of the aphoristic ethical poetry have been preserved to enable us to judge that it was a very favourite form, and achieved very excellent results <sup>22</sup> Closely alled

Muir a Religious and Moral Sents ments from Say brit Writers (1875) Regarding an anthology which, both in extent and antiquity, surpreses that of Sarngadhara, viz., the Sadcomp led Sale 1127 (4 D 1205) and comprising fructations from 446 poets see the latest number of Raj Lela Intra a Ant ces III 134 149 The statement at the close of the work respecting the era of king Lakshmanusent in whom service the poets father was, as both in itself phacure and does not well harmonus with our other information on the point. On account of the numerous examples it quotes we may also here mention the Samrati Lanfhabhara ma, a treatism on poetics attributed to king Bhom deva, and therefore

to it is the literature of the 'Beast-Fable, which has a very special interest for ne, so it forms a substantial link of connection with the West. We have already pointed out that the cidest animal-fables known to us at present occur in the Chihandogyopanishid. Nor are these at all limited there to the representation of the gods assuming the forms of animals, and in this shape associating with men, of which we have even earlier illustrations, which we have even earlier illustrations are themselves introduced as the speakers and actors. In Panin's time, complete cycles of fables may possibly have already existed, but this is by no means certain as yet? The oldest fables, out of India, are those of Babrius, for some of which at least the Indian original may be pointed out <sup>23</sup>. But the most ancient book

belonging probably to the eleventh century, see on it Aufrecht, Cata logus, pp 208, 209 - To this class also belongs, though its contents are almost entirely erotic the Prakrit anthology of Hale, con-isting properly of only 700 verses (whence its name Sapta fatala) which, how ever, by successive recensions have grown to 1100-1200. It was the prototype of the Sapta futf of Govardha na a work of about the twelfth cen tury, which in its turn seems to have served as the model for the Satta sai of the Handi poet B hart Lai , sec. my Es.ay on the Sapta sataka of H.Ila (1870), pp. q, 12, and Z D M G, xxvm 345 ff (1874) and also Garrez in the Journ. 436] til In my paper, Leber den Zu sammenhang undischer Fabeln mit

grech...chen (I St., m. 327 ff.) as the result of special investigations bearing upon A Wagerer's Es.ay on the subject (1853), I arrived at exactly the opposite conclusion, tor in nearly every unstance where a Greek fable was compared with the corresponding Inda n one, the marks of origin they appeared to me to belong to the former In all probability the Buddhists were here the special medium of communication. since it is upon their popular forms of literary exposition that the Indian fable and fung tale 'sterature is spe enally based Otto Keller, it is true, in his tract, Ucher die Geschichte der greech Pabel (1862), maintaine, in opposition to my view, the Indian origin of the fables common to India and Greece, and suggests an ancient Assyrian channel of communication His main argument for their Indian origin is derived from the circum stance that the relation existing in Greek fable between the fox and the hon has no real basis in the na ture of the two ammais, whereas the jackal does, as a matter of fact, stand to the hon in the rela tion portrayed in Indian fable Eut are lackals then, only found in In dia, and not also in countries inha bited by Semitic peoples? And is not the Greek animal fable precidly of fables extant is the Pancha-tantra The original text of this work has, it is true, undergone great alteration and expansion, and cannot now be restored with certainty, but its existence in the sixth century A.D is an ascertained fact, as it was then, by command of the celebrated Sassanian king Nushirvan (reg 531-579), translated into Pahlavi. From this translation, as is well known, subsequent versions into almost all the languages of Asia Minor and Europe have been derived 222 The recension of the extant text seems to have taken place in the Dekhan, 223 while the epitome of it known as the Hilopadesa was probably drawn up at Pahbothra, on the Ganges The form of the Hundy collections of fables is a peculiar one, and is therefore everywhere easily recogmisable, the leading incident which is narrated invariably forming a framework within which stones of the most diverse description are set. \*- Allied to the fables are the

a Semitic growth f That the Indiana should turn the fox of the Greek fable back again into the jackal necessarily followed from the very nature of the case The actual state of things, namely, that the jackal prowls about after the hop, had in deed early attracted their attention . see eg, Rik, x 28 4, but there is no evidence at all that in the older period the knowledge was turned to the use to which it is put in the fable the only characteristics mentioned of the rackal being its howling its devouring of carrion, and its enmity to the dog (In Satap, xu. 5 2 5, the jackal 1s, it is true, associated with the word sidagdha, and this is certainly noteworthy, but here the term simply signifies 'burnt' or 'putrid.') Keller a views as to the hish antiquity of the Indian authors he cites are unfounded. 252 See on this benfeys transla

tion (1859) of the Panchs tantra, which follows Ko egarten s edition of the text (1848) Herethere is a full exposition of the whole subject of the later diffusion of the materule of Indian fable throughout the West, Kielhorn and Buhler have published a new edition of the text place in the Mahi Blidrita also

in the Bombay Sanskrif Berke (1868)

and From Benfey's researches, it appears that, in this recension, the original text, which presumably rested on a Buddhistic basis underwent very important changes, so that, oursonaly enough, a German translation made in the last quarter of the fifteenth century from a Latin rendering, which in its turn was based upon a Hebrew version, represents the ancient text more faithfully then its existing Sanskrit form does. Of this, for the rest, two or more other recensions are extant . see I Str. ii. 166. For the 14th chap of the Kalila wa Dimna, no Indian original had been known to exist, but quite recently a Tibetan translation of this original has been disc wered by Anton Schiefner, see his Ekarates Remonst, St. Peters burg 1874 On a newly discovered ancient byrian translation of the groundwork of the Paticha-tantri, made, it is supposed, either from the Pahlavi or from the Banskrit itself, see Benfey in the Augiburger Allg Zest for July 12, 1871

Precisely the same thing tates

Farry Tales and Romances, 224 in which the luxurant ancy of the Hindis has in the most wonderful degree put forth all its peculiar grace and charm. These too share with the fables the characteristic form of setting just referred to, and thereby, as well as by numerous points of detail, they are sufficiently marked out as the original source of most of the Arabian, Persian, and Western farry tales and stories, although, in the meantime, very few of the corresponding Indian texts themselves can be pointed out.

As regards the last branch of Indian poetry, namely, Geography and History, it is characteristic enough that the latter can only fittingly be considered as a branch of poetry , and that not merely on account of its form-for the poetic form belongs to science also-but on account of its subjectmatter as well, and the method in which this is handled We might perhaps have introduced it as a division of the epic poetry, but it is preferable to keep the two distinct, since the works of the class now in question studiously avoid all matter of a purely mythical description. We have already remarked that the old Puranas contained historical portions, which, in the existing Puranas, are confined to the mere nomenclature of dynasties and kings, and that here they clash violently, not only with one another, but with chronology generally We meet with the same discrepancies in all works of the class we are now considering and especially in its leading representa-tive, Kalhana's Raja-taramgini, or history of Kashmir, Which belongs to the twelfth century and Here, it is

the epic 2.5 Certain statements in the satro logical treature Garot Sambita cap Yugu Purana, in which the relations of the Tavanas with India are touched upon (see Kern, Prof to Bribat Samhita, p 33 ff ), appear to have a real historical significance Báns's Harsia charus too, seems to be a work embodying some good information see Hall, Pref to the Vánva dattá, p 12ff (1859) And the same remark applies to the Vikraminla charita by Bilhans of Kashmir, in 18 sargus composed about AD 1085, just edited with a very valuable introduction by Bühler This work supplies most important and authentic information, not only regarding the posts native country and the chief cities of India visited by him in the course of prolonged travels, but also as to the history of the Chillukya dynasty whose then representative, Iribbu vana malla, the work is subended to exalt. In Bübler s opinion, warmay hope for some further accession to our historical knowledge from the still existing libraries of the James and, I might add, from their special literature also, which is peculiarly nch in legendary works (chardra) The Satrang sys met dirays of Dha

nolvara, in 14 surges, composed in Valabhi, under king filldrips, at the end of the sixth century, yields, it is true, but scant historical materral, and consists for the most part merely of popular tales and legends . see my paper on it (1858), p 12 ff. (Bibler, L. c., p 18, places this work se late as the thirteenth century; similarly, Laren, I AK, ir 761, but see my Essay on the Bhagavail, 369) Still, a great variety of information has been preserved by the Jaines, which deserves attention , for example, respecting the ancient Lings Vikramarka and Silivabana, though, to be pare, they, too have become almost wholly mythical figures The Vira charling. of Ananta, lately snalyzed by H. Jacobs to J. St., xiv oy f., describes the feuds between the descendants of these two kings, introducing a third legendary personage, Sudrata, who, siled by the Milava king, the ing the son of billivibins from Pratanbiblina. It is written in a fresh and graphic style, but, to all appearance, it has only a very slight really historical nucleus, mideed it expre sly clams to be an imitation of the Ramayuna ! The Sundanna dustrauhled too a work extant in several recensions, of which one, the Vilrama charstra (see above, p 200), is attributed to Vararuchi. is almost solely, as the Vehila paw

find, in the various Puranas, jejune enumerations of mountains, rivers, peoples, and the like 225 But modern works, also upon this subject are quoted these, however, are known only by name -A leading source, besides, for history and geography, is supplied by the exceedingly numerous inscriptions and grants," which, indeed, being often of very considerable extent, might almost pass as a special branch of the literature. They are usually drawn up in prose, though mostly with an admixture of verse. Of coins the number is comparatively small yet they have furnished surprisingly rich information regarding a period previously quite unknown in its details, the period of the Grecian kings of Bactria.227

From this general view of Sanskrit poetry, we now turn to the second division of Sanskrit literature, to the works of Science and Art

charmatin exclusively, made up of matter of the fary tale de cription The stones in the Bhoja-prabandha of king Bhorn and his court of posts are mere fanciful inventions. -Bubler, in his letter from Kash mir (I St . xiv 404, 404) states that he has now also discovered the Ada-mata which was u ed by Kal hans, as also the Taramounts of Kahemendra and Heldraja , for the Rája-taramerni itself there is thus the prospect of unportant correc

We give the precedence to the Science of Language and take Grammar first,

We have already had frequent occasion to allude to the early beginnings and gradual development of grammatical It grew up in connection with the study and recitation of the Vedic texts, and those works which were specially devoted to it, protected by the sacredness of their subject, have, in part, survived. But, on the other hand. we have no records of the earlier stages of that grammatical study which was directed to and embraced the entire range of the language,\* and we pass at once into the magnificent edifice which bears the name of Panini as its architect, and which justly commands the wonder and admiration of every one who enters. T Panini's grammar is distinguished above all similar works of other countries. partly by its thoroughly exhaustive investigation of the roots of the language, and the formation of words, partly by its sharp precision of expression, which indicates with an enigmatical succinctness whether forms come under the same or different rules. This is rendered possible by the employment of an algebraic terminology of arbitrary contrivance, the several parts of which stand to each other in the closest harmony, and which, by the very fact of its sufficing for all the phenomena which the language presents, bespeaks at once the marvellous ingenuity of its inventor, and his profound penetration of the entire material of the language. It is not, indeed, to be assumed that Panini was altogether the inventor of this method, for, in the first place, he directly presupposes, for example, a collection of primary affires (Un-adi), and, in the second place, for various grammatical elements there occur in his work two sets of technical terms, the one of which is peculiar to lumself, while the other, as testified by his

commentators, is taken from the Eastern grammanans and But et any rate, it seems to have been he who generalised the method, and extended it to the entire stock of the language. Of those of his predecessors whom he mentions directly by name, and whose names recur in part in Yakka Nirukti, the Pratisakhya Sütras, or the Aranyakas some may possibly have worked before him in this field, in particular, Sakatayana perhaps, whose grammar is supposed (Wilson, Mack. Coll., 1.160) to be still in existence, although nothing definite is known about it. 22

The question now arises, When did Panini live? Bohtlingk, to whom we owe an excellent edition of the grammar, has attempted to fix his date for the middle of the fourth century BC, but the attempt seems to be a failure Of the reasons adduced, only one has any approach to plausibility, which is to the effect that in the Katha-samtsagara, a collection of popular tales belonging to the twelfth century, Panini is stated to have been the disciple of one Varsha, who lived at Pataliputra in the reign of Nanda, the father of Chandragupta (Σανδροκυπτος) not only is the authority of such a work extremely questionable in reference to a period fifteen centuries earlier, the assertion is, besides, directly contradicted, both as to time and place, by a statement of the Buddhist Hiuan Thsang, who travelled through India in the first half of the seventh century For Hiuan Thsang, as reported by Remand (Mem sur l'Inde, p. 88), speaks of a double existence of Panini, the earlier one belonging to mythical times, while the second is put by him 500 years after Buddha's

Huan Thang's assertion, no credit whitever need at present be attached to the statement in the Rapa-tarangol If Panim did not really foursh until 100 years after Kanishka, \*\*c \*\*.0 \*\*140\*\*\* it is self-evident that the commentary upon his work cannot have been interested, and still less have been introduced into Kashmir, under Abhimanyu, Kanishka's immediate successor!—But, spart altogether from the foregoing considerations, we have altogether from the foregoing considerations, we have to show that the date to be assigned to him can by no means be so early as Bohtlingk supposes (about in 350). For in it Pannin once mentions the Yavansa, \*\*er, Zácore, Teceka,\*\* and explains the formation of the word querenfail

21 But no such inference is deducible from Husan Theories account, now that we are in possession of its exact tener (see note 270 above) the statement of the Rajitarangum! is thus in no way in

taramgini is thus in no way im rugned by it Latsen (I AK, 1 729) asserts that the most ancient meaning of the word yacana was probably 'Arabia,' because incense, which came from Arabia, was termed ydrang but this assertion is distinctly erroneous So far as we know at present, this latter term first occurs in the Amara koshs, and there slong with turuskka, which can scarcely be a very ancient word. It may con sequently either date from the time of the commercial intercourse of the Indians with Arabia shortly before Muhammad, or even with the Mobammadan Arabs, or else-like guraneshio, 'tin' [Hemach., 1041, according to Bohtlingk Pien, lead, not 'tin'] and yavana-priya, 'pepper,' the chief arueles of traffic with the Greeks of Alexandris-it may torubly have been pamed, not from the Araba, but from the Greeks, who brought incense as well as tin and pepper from Indes (Lamen, I AK. 256 m)! Wherever we find the Yavania mentioned in the epic, or other similar ancient writings, only the Greeks can be meant. (The almost constant as occation of them

with the Kambouss Sakas, &c., is conclusive as to this, see / Eir. il. 321, I St., Int. 371 The name transferred to the political anccessors of the Greeks in the empire of Western India, that is, so the Indo-Sorthians themselves, to the Per erana (Páracikas, whose women, for example, are termed Yaranis by Kalidasa in Regime, Iv 61), and, lastly, to the Arabs or Moslems , eco I St., 2011 308. Recently, it is true, Rajendra Lala Metra, in the Journ As Soc. Beng , 1874 D 246 ff , has pronounced against the view that the Greeks were originally meant by the Yavanas . but his arguments are in great part of a very curious kind Of further on this point my letter in the Ind. Anisq, iv 244 ff (1875) where, in particular, I point out that the name Yavana first became pops larised in India through Alexander, s.c. through bis Persian interpretura, although it may possibly have been known previously through the medium of the Indian agrilianes who served in the army of Darion |- There is a remerkable legend in the To rans and the twelfth book of the Maha Bharata, of the fight of Krishus with Koa-Yavana, the Black Yavana, so called, it would appear, in contradictinction to the to understand African or dark Bom

—to which, according to the Varietie, the word lype, 'writing,' must be supplied, and which therefore signifies 'the writing of the Yavanas,' 222.—In the Pancha-tantra, Panin is said to have been killed by a lion, but, independently of the question whether the particular verse containing this allusion belongs to the original text or not, no chronolocycal inference can be drawn from it. 232.

the races that had come into colli sion with the Indians? At the time of the Dada kumara, the name Kala-Yavana (as well as Yavana itself) does, in point of fact, expressly designate a scafaring people -supposed by Wilson to be the Araba. In the levend in the Pu rans and the Maha-Bharata, on the contrary, no reference to the sea is traceable, and Wilson therefore (Vishnu Pur , 565, 566) refers it to the Greeks, that Is, those of Bactria. This view is perhaps confirmed by the circumstance that this Kala Yavana is as ociated with a Gárova . since it is to Garga, at least, who uniformly appears as one of the earliest Indian astronomers, that a versa is ascribed, in which the Ya vanus (here unquestionably the Greeks) are highly extolled sibly this is the very reason why Gargya is here associated with hala Yavana.

232 For the different explanations that have been attempted of this word, see / St, v 5-8, 17 ff , Burnell, Elem of S Ind Pal, p 7, 93 the latter regards it as "not unlikely that fire has been introduced into Indian from the Persian dim. Benfey also in his Geschichte der Sprachussenschaft p 48 (1869), understands by Yaranani Greek writing but he places the comple tion of Paninia work as early as B.C. 320. In that case, he thinks Paning hadaiready had the opportunity dur ing six years of becoming acquainted with Greek writing in his own im mediate neighbourhood without interruption Alexander baying as is well known, established satrapies in India it alf and in the parts adjoin

ing"-in the vicinity of the Indus. namely, near which Pfninis birthplace was. But to me it is very doubtful indeed that a space so short as aix years should have sufficed to give rise to the employment by the Indians of a special term and affix to denote Greek writing - (which surely in the first years after Alex ander a invasion can hardly have attracted their attention in so very promment a way!}-so that the mere expression 'the Greck' directly signified 'the writing of the Greeks' and Panini found himself obliged to explain the formation of the term in a special rule. "The expression could only have become so very familiar through prolonged and fre quent use-a thin, concertable and natural in Paninis native district. in those provinces of North Western India which were so long occupied by the Greeks But this of course pre-upposes that a lengthened period had intervened since the time of Alexander '-/ Lt. 17 89 (1857)

273 Since the above was written the question of Paninis date has been frequently discussed Muller first of all urged, and rightly, the real import of Hinan Theang s account, as opposed to my argument. Apart from this bowever, I still firmly adhere to the reasoning in the text, see I St, 1v 87, v 2 ff To the vague external testimony we need hardly attach much importance Pánini s vocabulary itself (cf ya randaf) can alone yield us certain information And it was upon this path that Goldstucker proceeded in his Panin, his place in Sanskyit Literature (September 1861) - a work distinguibled in an eminent

Pánini's work has continued to be the basis of gramma tical research and the standard of usage in the language down even to the present time. Owing to its frequent obscurity it was early commented upon, and-a circumstance to which there is no parallel elsewhere in the literature-some of these earliest interpretations have come down to us At their head stand the Paribháshás, or explanations of single rules, by unknown authors, next come the Varttilas (from vritti, 'explanation') of Katvayana. and after these the Mahabhashya of Patamiali With regard to the date of Katyayana, the statement of Hiuan Thrang, to the effect that 300 years after Buddha's death, re, in BC 240,† "le docteur Kia to yan na" lived at Támasavana in the Panjáb, is by Bohtlingk referred to this Katvavana, but when we remember that the same traveller assigns to Panini's second existence a date so late as 500 years after Buddha, such a reference of course becomes highly precarious Besides, the statement is in

degree by truly profound investigation of this aspect of the question as well as of the literature immediately bearing upon it The conclusion he arrives at is that Fanni is older than Buddha, than the Pratisikhyse, than all the Vedic texts we possess. excepting the three Simbites of the Rik, Saman, and Black Yajusolder than any individual author in whatever field, with the slagle ex ception of Yaka (p 241) 1861, before the separate publication of this work, which had previously (Nov 1860) appeared as the preface to Goldstucker's photo lithographed edition of the Manava Kalpa Sutra, I endeavoured-and, as I believe, successfully-in a detailed rejoinder in I St. v 1-176, to rebut these various deductions, point by point. For the post Buddhistic date of Pánini, compare in particular the evidence adduced, pp 136-142 which is excellently supplemented by Bühler's paper on Sikatayana (1863, see note 229 above) To the mention of the 'Yaranani has to be added a peculiar circumstance which Burnell bas recently noticed

(Liem S Ind. Pal, p 96) The denoting of numbers by the letters of the alphabet in their order (1=2). to which Goldstücker (Panini, p 53) first drew attention, and which, ac cording to the Bhashya, is peculiar to Panini, occurs in his work only, and is "precisely similar to the Greek and Semitic notation of numerals by letters of the alphabet," If, further, the Greek accounts of the confederation of the Otsopical and Makket be correct . if, that is to say, their alliance first took place through fear of Alexander whereas they had up till then lived in con stant enmity then in all probability Apidali, and & fortiors Panini also, would have to be set down as tabse quent to Alexander , ace / Et, xitt.

375 n Who there mentions several of these Paribbands.

† That is, if we adopt the chronology of the Southern Buddhata, but rather, only no to, anne Kanishies, whose date, as we saw, is fixed ly come for a n. 40 is by linear Thang, placed 400 years after Duddha's death

itself an extremely indefinite one, the "docteur" in question not being described as a grammarian at all, but simply as a descendant of the Katya family 224 Even admitting, however, that the reference really is to him, it would still be in conflict with the tradition-in itself, it is true, of no particular authority-of the Katha sant-sagara, which not only represents Katyayana as the contemporary of Pánini. but identifies him with Vararuchi, a minister of King Nanda, the father of Chandragupta (Σαυδροκυπτος), according to which, of course, he must have flourished about BC 350 As regards the age of the Mahabhashya,23, we have seen that the assertion of the Raja-taramgini as to its introduction into Kashmir in the reign of Abhimanyu. the successor of Kanishka, i.e., between a.D 40 and 65, is, for the reasons above assigned, in the meantime discredited 238 For the present, therefore, we are without information as to the date of those interpretations, just as we are regarding the date of Panini himself But when once they are themselves in our hands it will certainly be possible to gather from their contents, by means of the great number of words they contain, a tolerably clear image of the time when they originated,237 in the same way as we

to understand Patampali himself, and the same applies to the name Gonkaputra, see on this I St, v 155, xut, 316, 323, 403.

<sup>24</sup> It is this only that has weight, whereas no importance whatever is to be attached, as we have already seen (cote 230), to the second existence of Paniut. On the various hatyas, Katyayaosa at the time of the Bhisbya itself, for instance, see

I St., x111 300 ms The name Patamjali (we should expect Pat") is cer ainly somehow connected with that of the Prtam chala Kapya of the land of the Ma drag who appears in the hainaval kirs kinds of the Satan Br occurs again (see below p 237) as the name of the author of the 1003 Sutras. Patampali appears as name of one of the prior births of Buddha tha 242 m Westergands Cata logus, p 39) In the Pravarddhyaya § 9 (Yapuli Paris) the Patempalis are classed as belonging to the family of Visvainitrs - According to later accounts, by Conardiva, who is cited f ur times in the Eha bya, we have

<sup>256</sup> Dy no mears see note 231 17 On the haus of the hthographed edition of the Mahabhashys, published at Benares in 1872 by Raidramasistrin and Bilasistrin with Kanyata a commentary (of about the seventh century (7), see I V. v 167) I have attempted in I S. xiii. 293-502, to sketch such an outline The first section of the work, with Kaiyata, and Nagesa a gloss belong ing to the eighteenth century was published so long sgo as 1855 by Ballantyne A photo-lithographed in ue of the entire Bhashya, pre pared under Goldstucker a supervi stop at the expense of the Indian Government, has recently appeared in London, in 3 vols. (vol L, the Ebashya vol ii Bha-bya with Kaiyatas Comm , vol in, Magoji

can even now attempt, although only in broad outline, a picture of the time of Panim.\* With regard to the latter, the condition of the text, in a critical point of view, forms a main difficulty. A few of the Suirus found in itam already noterously acknowledged not to be L'Hanuis, and there is the further peculiar circumstance, that, according to the scholasts of the Calcutta edition, fully a third of the entire Stitres are not interpreted in the Mahdbhishys at all.† The question then arises whether this is merely

bhatta a Schol, on Kaiyata) Gold stücker, in his Panini p 228 ff. mainly upon the ground of the statement in the Bhisbys "arunad Yasanah Siketam," which he connects with an expedition of Menander (R.C. 144-120) agunst Ayodhya fixed the date of the composition of the work for the period of this expedition, or specially for B.C. 140-1203 The objections urged by me (I St, v 151) sgainst this assumption were in the first place, materully weakened by a remark of Keru's in his Preface to the Brib. Sumb of Varaha-Mibira p 37, according to which the etatement in the same passage of the Bhashya "arunad Yarano Madhyamikan" is not necessarily to be referred to the Buddhistic school of this name, first founded by Nagarjuca, but may nosably have reference to a trabe eslled Midhyamika, mentioned elsewhere In the next place, Bhandar ker, in the Ind. Antiq , L 299 ff , H, 59 ff., attempted to prove that Patarojala wrote the particular section where he speaks in the above terms of Menander (who as assumed, on Go'dstücker's authority, to be meant by 'Yavana | between a.D. 144 and 142, soong that he there at the same time speaks of sampless as at 21 being performed for Pashpamitra (a.b. 178-142) In roy reply in / S., xiil. 305 ff., I emphas sed these points fir t that the identity of the Yavana and Menander is by no means made out, pext, that st does not at all recessarily follow from the pussage in question that

Patampals and Pushyamstra (that is the correct form) were contemporarice, and, lastly, that Paternial may possibly have found these examples already current, in which case they cannot be used to prove anything with regard to him but only with regard to his predecessors-it may be, even Pánini himself. And al though I am now disposed in presence of Bhandarkar a further objections, to admit the buttorical bearing of the statement referring to Push yamitra (but see Böhtlingk sopposite view in Z D M C . Int. 181 E.) still, with respect to all the examples here in question, I must by special stress on the possibility just mentioned, that they may belong to the class of m Grahabhahahaida illustrations (Sid. p. 315) We must for the present rest astu5ed, theref re (p. 319), with placing the date of the composition of the Bhashya between B.C. I so and a D. Co .- a result which, considering the wretched state of the chronology of Indian Literature genorally, iz, despite its indefeitances,

of no mean importance.

Bee I St., L 141 157 [The beginning here inside came to a stand whill for want of the Habibbishya.]

f in the case of some of their, if is remarked that they are not explained kerr, or else not separately Acquantance with the Mathybidays itself will alone yield as extention, information on the point. From Actractic accounts in the Calal. Cold Sanal Ball. Ball.; appeared that of Planni's 375 rules only 4700 are directly discussed, and Gold because these particular Sútras are clear and interligible of themselves, or whether we may not also here and there have to suppose cases where the Sútras did not yet form part of the text at the time when this commentary was composed The so-called gangs, or lists of words which follow one and the same rule, and of which, uniformly only the initial word is cited in the text itself, are for the present wholly without critical authenticity, and carry no weight, therefore, in reference to Panini's time Some such lists must, of course, have been drawn up by Panini, but whether those now extant are the same is very problematical indeed to some extent it is simply impossible that they can be so Nav. such of them even as chance to be specified singly in the Mahabhashya can, strictly speaking, prove nothing save for the time of this work itself \* too, another word of caution is necessary,-one which ought, indeed, to be superfluous, but unfortunately is not, as experience shows,-namely, that care must be taken not to attribute to words and examples occurring in the scholia, composed so recently as fifty years ago, of the Calcutta edition of Panini, any validity in reference to the time of Panim himself No doubt such examples are usually derived from the Mahabhashya, but so long as this is not actually proved to be the case, we are not at liberty at once to assume it, and besides even when it is clear that they are actually borrowed from the Mahabhashya, they are good only for the time of this work itself, but not for that of Panini 233

tucker then showed that the Bhas'ya is not so much a commentary on Pánin as rather a d fence of him against the unjust attacks of Katya-Your the author of the rdriftkes. see I St xin 297 ff.] See I St, 1 142, 143, 151 [xin.

293, 302 329]
This is not quite strictly to the purpose Max Muller was the first to point out that P mini a Sútras were evidently from the beginning ac companied by a definite interpretation, whether oral or written, and that a considerable proportion of the examples in the Rhashva must have come from this source may, the

Bháshya has itself a special name for these, such examples being styled murdhabhashakta, see I St., xus 315 Unfortunately, however, we have not the slighte t clue (I Str., n. 167) to enable us to decide, in individual instances whether an example belongs to this class of murdh or not.-On the other hand-as re sults not only from the data in the Raja tarangini, but also, in particular, from the statements at the close of the second book of Harı a Vá kyapadiya, which were first cited by Goldstucker, and have lately been published in a corrected form by Kielhorn ju the Ind Antig , m 283In addition to Paninis system, there given no in cores of time everal other grammatical systems, having the own peculiar terminology; and grammatical literature in general attained to a most remarkably rich and extensive des clopment. The question now is to determine the age of Amara sinha-a question which, in the first instauce exactly coincides with the one already discussed as to the date of Kalidasa, for, like the latter. Amara is specified by tradition among the 'nine gems' of the court of Vikramathat Vikrama whom Indian tradition identifies with king Bhoja (AD 1050), but to whom European criticism has assigned the date B.C. 56, because—an era bearing this rame commences with that year The utter groundlessness of this last assumption has been already exposed in the case of Kalidasa, though we do not here any more than there, enter the lists in defence of the Indian tracition. This tradition is distinctly contradicted, in particular, by a temple-inscription discovered at Buddhagaya, which is dated 1005 of the era of Vikramaditya (se, AD 019) and in which Amera-deva is mentioned as one of the 'mine jewels' of Vikrama's court, and as builder of the temple in question. This inscription had been turned to special account by European criticism in support of its view, but Holtzmann's researches (op cat, pp 26-32) have made it not improbable that it was put there in the same age in which Amara-sinha's dictionary was written, seeing that both give expression to precisely the same form of belief, a combination, namely, of Buddhism with Vishnusm-a form of faith which cannot possibly have continued very long in vogue, resting as it does on a union of directly opposite systems events, inscription and dictionary cannot lie so much as 1000 years apart, -that is a sheer impossibility Unfortunately this inscription is not known to us in the original, and has only survived in the English translation made by Ch Wilkins in 1785 (a time when he can hardly have been very proficient in Sanskrit ! the text itself is lost

too coo floks—at ributed to yield, meaning mall likelihood the same Vyfd, who is elsewhere men toored in the Biddys. generations" prior to the litter And on this he grounds a specific buttorial argument." for the determination of Ph nis date, for it yid, Phinis date dut to list erally, so caled in the first Pr., then of course his work mus be litter than Phinin, see squast all the J. v. 41, 27-133, 21, 401.

with the stone ou which it was incised. That the dictionary belongs, in any case, to a period considerably later than the first century BC-the date commonly assigned to it-is sufficiently indicated by data furnished by the work itself For, in the first place it enumerates the signs of the zodiac, which were unquestionably borrowed by the Hindus from the Greeks, and, according to Letronne's investigations, the completion of the zodiac did not take place among the Greeks themselves before the first century A.D., so that, of course, it cannot have become known to the Hindus till one or several centuries later Again, in the Amara-kosha, the lunar mansions are enumerated in their new order, the fixing of which was due to the fresh life infused into Indian astronomy under Greek influence, the exact date being uncertain, but hardly earlier than A.D. 400 Lustly, the word dundra occurs here, which, as pointed out by Prinsep, is simply the Latin denarius (see Lassen, I. AK., ii. 261, 348). The use of the term tantra in the sense of 'text-book' may perhaps also be cited in this connection, as it belongs only to a definite period, which is probably the fifth or sixth cen tury, the Hindus who emigrated to Java having taken the word with them in this sense, 211 All this, of course, yields us no direct date If it be correct, as stated by Reinaud (Mém sur l'Inde, p 114), that there existed a Chinese translation of the work, "redigee au vie siècle," this would give us something tolerably definite to go by But Stan Julien does not, it would seem, in the passage cited by Remaud as his authority, express himself in quite such definite terms, as he merely speaks of the "traduction chinoise de l'Amarakocha, qui paraît avoir éte publice " + nor are the positive grounds be adduces in sup

port of this view directly before us, so that we might test

<sup>•</sup> It also occurs no the Pañcha tuntra, in a legend of Boddh to organ—I may here also remark in pasaing that the world dramma, acc., draying is employed in the twelfth century by Bh. karn as well as in scriptions [of Z D B O V 1 420]. All of the pasaing the pasain interest also is the Arabico Persian very fulls for elephant, of Rundrills on Janua, i. 3

<sup>5,</sup> cited by Colebrooke, Miss. Ex., 1314 (329) Gildemeister in Z D M G, xxviii 697 † The meaning of paratire, however, is doubtful it can signify

ever, is doubtful it can signify either 'seem or be clear' (ac cording to all evidence),—in the latter sence like the Latin apparere, and the Engli b 'appear being it deed derived from apparation.

Of the Tibetan translation of the work in the Tandjur no particulars are known How great the difficulty 19 of arriving at any sort of decision in this matter is shown by the example of one of the most celebraten of living Indianists, H. H. Wilson For while, in the pieface to the first edition of his Sanskrit Dictionary (1819). he 12ther inclined to the view that Amara-sinha flourished in the fifth century A.D., and while again, in the second edition of the work (1832) under the word 'Vararuchi,' he expressly transfers the 'mine gems' to the court of Bhoje (A.D 1050), -in the preface (p vi) to his translation of the Vishna-Parins (1840) on the contrary, ho makes Amara-sinha live "in the century prior to Christranity "-But, independently of all that has hitherto been advanced, the mere circumstance that the other dictionaries we possess, besides the Amara kosha, all belong to the eleventh, twelfth, and following centuries, constrains us to come to a conclusion similar to that which was forced upon us in regard to the drimsnamely, that as the Amara-Losha is in no way specifically distinguished in character from these other productions, so it cannot be separated from them by a very wide interval of tune (Holtzmann, p 26)"12

Resides the decinances, we have also to mention a cass of fexual works quite peculiar to the Hudús-numely, the lists of roots styled Dhátn-páráyanas or Dhátn-páráyanas or Dhátn-páráyanas or Dhátn-páráyanas or They are written partly in prose and partly in ślokas. The latter is the form adopted in all the discussive and it supplies, of course, a strong guarantee of the integrity of the text, the interlacing of the different verses rendering interpolation well may invinovable t

Lastly as a third phase of the science of language, we have to consider Metric, Poetics, and Rhetoric

With the beginnings of Prosody we have already become acquainted in connection with the Veda (see p 23) The treatise ascribed to Pingala even appears as an appendage to the Veda itself, however little claim it has to such a position specifying as it does the most highly elaborated metres, such as were only used in later times (see p 60) The tradition which identifies Pingala with Patamials the author of the Mahabhashya and the Yoga-Sastra must answer for itself, for us there exists no cogent reason for accepting it 243 The other existing treatises on metre are Liewise all modern they superseded the more ancient works, and the same is the case, in an equal degree, with the writings on poetics and rhetoric. Of the Alamkara-Sistra of Bharata, which is often cited as the leading authority on these subjects, only the few quoted passage. would seem to have survived, although, according to one commentary, the work was itself but an extract from the Long-Purana. A. W von Schlegel in his Reflexions sur l Etude des Langues Asiat , p 111, speaks of a manuscript preserved in Paris, of the Sahitya-darpana, another leading work on this subject, as dated sake 949, 20, AD 1027, and this, if correct, would naturally be of the highest importance for the age of the works therein quoted. But a priors I am firmly persuaded that this statement rests on a mis take or misunderstanding, 244 for the oldest manuscripts with which I have had any opportunity of becoming acquainted are, as already mentioned (p 182), not so much

as 500 years old, and it will be difficult to find any of a yet greater age—For the rest, in the field of rhetoric and poetics, the Hindú mud, so ferthe in nice distinctions, has had free scope and has put forth all its power, not seldom in an extremely subtle and ingenious fashion.<sup>24</sup>

We now come to the consideration of Philosophy, as the second branch of the scientific Sanskrit literature.

I maik it here after the science of language, not because I regard it as of later origin, but because the existing text-books of the philosophical systems seem to me to be posterior to the text-book of grammar, the Sattra of Painn, since they appear, to some extent, to presuppose the existence of Upanishads, writings which, in their extant form, manifestly belong to a very late period, comparatively speaking

The beginnings of philosophical speculation go tack, as we have already more than once seen (see especially pp 26 27), to a very remote age Even in the Samhita of the Rik, although only in its later portions, we find hymns that bespeak a high degree of reflection. Here, too, as with all other peoples, it was especially this question as to the origin of the world that more imme-

example, adopted the Vaidarbha ritig ace Bühler, Vikramánka-char i 9. —Vámana's Káryskimi ára-critis has lately been edited by Cappeller Jena, 1875), and belongs, he tuinks, to the twelftheentury Mammaga & Adrysgratdia, several times published in India, belonge, in Bühler's opinion, to the same date, since Hammita, secording to Hall (Introd to Fdare . p. 55) was the maternal uncle of the nother of the Naishadhira , see Bubler in Journ Bord Be H A S a. 37 my I Sr , 1 356 and my Luar on Hills a Sapia-ditaks, p. 11 Cl here also Anfrechts account of the Sarstrati kanthábharana (note 220 abovel -A rich accession to the Alamkira literature a'so will resu't from Babler's journey to Kas'emir the works range from the ninth to the thirteenth centery

Aventiti and Midgad's were added, of my faray on the Pama 740s, p 76 and / E. zir 65 ff Bins parses for the special representative of the Parcha atyle, see Aufrecht in Z D V C, xxvii 93 whereas the Labrira Biltans, for

diately gave rise to philosophical contemplation. Ine mystery of existence of being, and of life forces itself directly upon the soul and along with this comes the question, how the riddle is to be solved and what is its cause The idea that most readily presents itself and which is therefore, in fact, everywhere recognisable as the earliest one, is that of an eternal matter a chaotic mass, into which order and system are gradually introduced, whether-and here we have two distinct views, each of which has its intrinsic warrant and which must therefore have been early opposed to each other-by virtue of an indwelling capacity of development, or by impulse from without, whereby of course an object or Being existing outside of this chaotic mass is so ipso postulated. This point reached, the idea is then a very natural one to regard this Being, v hence the impulse proceeds, as higher and more exalted than the primary chaotic matter it elf. and, as speculation advances, this primary matter continues to sink to a more and more subordinate position till at length its very existence appears as dependent upon the will of this Being, and so the idea of a creation arises The steps of this gradation may actually be followed with tolerable distinctness in the Vedic texts. In the more ancient portions the rotion everywhere still is that the worlds were but 'fixed,' 'arranged' (stabhita, slabhita \*), by the aid of the metres (it is thus that the harmony of the universe is explained), only at later stage is the idea ceveloped of their sarjana, 'emission' or creation. As time goes on the creative Being is conceived as more and more transcendental and supernatural, so that as a means of communication between him and the real universe intermediate grades of beings, demiurges are required by clarsifying and systematising whom speculation strives

It is interesting that i'e Ger man word schaffen is derived from the root sabh slath, 'evable h triginally therefore it had not the sense in which it is now used. The idea of the exable hmont. rangement of the worlds may put sibly therefore date from the epoch when Teutons and Indians sail

of the word grown up is dependently with both peoples? Perhaps the samp gambhirars granga ers migh also to instanced as a similar primitive notion! [The consecutor here supposed betwe n shaffen stid stalk, shalk exteres is very quee t onable the word seems rather to dwell together or has the same use Lelong to schaben ecolere exterior ]

to introduce order, but naturally only with the result of producing greater confusion. We have thus three distinct views as to the origin of the world - that of its 'development,' that of its 'arrangement,' and that of i's 'creation.' The two former agree in so far as the theory of development requires an 'arranger' also, they are, however, sufficiently distinguished by the circumstance that in the former this Power is regarded as the first production of the capacity of development residing in primary matter, in the latter, on the contrary, as an independent Being existing outside of it. The theory of a creation starts generally with a desire on the part of the Creator to be no longer alone, the expression of waich desire is immediately followed by the emanation itself Either it is a female being that first proceeds from the Creator, in connection with whom, by a process of begetting, be then accomplishes the further work of creation, or it is the breath of life that first of all emanates, and in its turn produces all the rest, or again, the mere expression of the desire itself involves creation, rach or speech here appearing as its immediate source, or the process is conceived in a variety of other ways The notion that the world is but Illusion only belongs to the latest phase of this emanation theory-It is impossible at present to attempt even an approximate sketch of the gradual growth of these three different theories into complete philosophical systems, the Brihmanas and Upanishads must first be thoroughly studied. Nor until this has been done will it be possible to dec.de the question whether for the beginnings of Greek philosophy any connection with Hindu speculation can be established-with reference to the five elements in particularit a point which for the present is doubtfulf I have already stated generally (p 29) the reasons which lead me to assign a comparatively late date to the custing text-books (Sutras) of the Hindu philosophical systems.

if or Em. I got "Tre billing to we have them eannot be the eriginal

Unfortunately we are not yet in possession of the treatises themselves, \* and for what follows I have had to depend mainly upon Colebrooke's Essays on the subject 247

The most ancient philosophical system appears to be the Sámkhya theory, which sets up a primordial matter as the basis of the universe, out of which the latter is by successive stages evolved The word Samkhua itself occurs first in the later Upanishads, + while in the earlier Upanishads and Brahmanas the doctrines afterwards belonging to the Samkhya system still appear in incongruous combination with doctrines of opposite tendency, and are cited along with these under the equivalent designations of Mimansa ( J man. speculation), Adesa (doctrine), Upanishad (sitting) &c. I am especially induced to regard the Samkhya as the oldest of the existing systems by the names of those who are mentioned as its leading representatives Kapila, Pafichasikha, and Asun. The last of these names occurs very frequently in the Satapatha-Brahmana as that of an important authority for sacrificial intual and the like, and also in the lists of teachers contained in that work (namely

form of the doctrines of the several schools They are rather a recapt tulation of a series of preceding de velopments which had gone on in the works of successive teachers.

Only two of them have thus far appeared in India , but of the edition of the Vedanta Sura with Samkara e commentary I have not yet been able to see a copy , only the edition of the Avaia Sutra is known to me whole of these texts are at present being edited in India by Dr Bal lantyne with English translation These editions entitled Aphorisms of the Sankhya Vedania, Yoga, &c. extend to all the six systems, each sutra being regularly followed by translation and commentary but unfortunately only a few numbers of each have appeared ]

In the new edition of Coletrooke a Lesays (1873) these are accompanied with excellent notes by Profes or Cowell Since the above was written much new material has heen added by the lat ours of Roor Bal lantre Hall Cowell Muller, Gough,

K. M. Banenjea, Barth St. Hilaira, In the B.M. Indica and the Berares Pondit many highly important editions of texts have appeared, and we are now in por easion of the Sutras of all the six systems together with their leading commentaries three of them in translation also also in particular the Sarra-darfana samgraha of Madhava in the End Ind. (18,3-58) edited by Lavara chandra Vidrásdrara, and Hall a Bibliographical I idea to the Ind

Phil Stat (1850) + Of the Tatturing and Atharvan. as also in the fourteenth book of the virukti, and in the Bhagavad gits. As regards its sense, the term is rather obscure and not very significant , can its use have been in any way influenced and determined by its a sociation with the doctrine of Sing? or has it reference purely and solely o the twenty five prin ciples? [The latter is really the case see I St or 17 ff hapila. tattra samlhjata, Bha, Pur in 25 1.1

as disciple of Yámavslkya, and as only one or a few generations prior to Yaska) Kapila, again, can hardly be unconnected with the Kapya Patamchala whom we find mentioned in the Yajnsvalkiya-kanda of the Vrihad-Aranyaka as a zealous representative of the Brahmanical learning Kapila, too-what is not recorded of any other of these reputed authors of Sútras - was himself afterwards elevated to divine rank, and in this quality we meet with him, for example, in the Svetasvataropanishad.\* But it is above all the close connection of his tenets with Buddhism 218 -the legends of which, moreover, uniformly speak both of him and of Panchasikha as long anterior to Buddhawhich proves conclusively that the system bearing his name is to be regarded as the oldest.249 The question as to the possible date of Kapila is thus closely linked with that of the origin of Buddhism generally, a point to which we shall revert in the sequel, in connection with our survey of the Buddhistic literature. Two other leading doctors of the Samkhya school as such appear towards the sixth century of our era. Isvara-Krishna and Gaudapada the former (according to Colebrooke, 1, 103) is expressly stated

• In the invocations of the Pitys which (see above, pp. 55.6) form park of the ordinary ceremonal Kapidon Asur Panchasikha (and with them a Vedba or Bodba) uniformly occopy a very honourable place in later times, whereas notice is more rarely taken of the remaining authors of philosophical flow, and the state ascient than the formation of the proances; than the latter more ascient than the formation.

author of the Mahabhashy a remains for the present a question. The word yoga in the sense of 'union with the Supreme Being, 'absorption therein by virtue of meditation, first occurs in the later Upanishada, especially in the tenth book of the Taittunya-Aranyaka and in the Kathakopanished, where this very doctrine is itself enumered a. As there presented, it seems to rest substantially upon a dualism, that is, upon the 'arrangement' theory of the universe, in this sense, however, that in the Kathakopamshad at least, purusha, prime al soul, is conceived as existing prior to avyakta, primordial matter, from the union of which two principles the right's a'ma, or spirit of life. is evolved. For the rest, its special connection with the Samkhya system is still, in its details, somewhat obscure, however well attested it is externally by the constant juxtaposition of 'Samkhya-Yoga,' generally as a compound. Both systems appear in particular to have comtenanced a confounding of their purisha, issura with the chief divinities of the popular religion, Rudra and Krishna. as may be ga hered from the Svetasvataropanished = the Phogavad-gate, and many postages in the twelfth book of 'he M.ha-Bharata," One very peculiar side of the Yoga

<sup>233</sup> Now that the antiquity of the extart form of the Samkhya Sutras according to Hall, has become so e-redingly doubtful, the view above extracted also becomes in its turn

very questionable. Besides, as we shall presently see, in both the Miman a-Sútras teachers are repeat edly c ted who are known to us from the Vedic Sátra literature while nothing of the kind occurs in either of the Samkhya pravachana Sutras This does not of course touch the point of the higher ant quity of the doctrines in question . for the names Kapila, Patamiili, and Yajnavalkya distinctly carry us back to a far earlier time than do the namer Jamin and Bidareyens-namely, into the clos og phases of the Brabmana literature staelf

universe form the subject of the Uttara-Miminal, which is hence also designated Brahma - Mimánsá Sáríraka-Mundasa ('doctrine of embodied spirit'), or also Vedánta ('end of the Veda') The term 'Mimansa' originally denotes merely speculation in general, it occurs frequently in this sense in the Brahmanas, and only became a technical expression later,254 as is probably the case also with 'Vedanta, a word first occurring in the later Upanishads, in the tenth book of the Tautinya-Aranyaka, the Kathakopanishad, Mundakopanishad, &c.

The Karma - Mimansa - Suira is ascribed to Jaimine. who is mentioned in the Puranas as the revealer of the Samayeda, though we search in vain in Vedic literature for any hint of his name. Still, of the teachers who

234 In the Mahabhashya, mindaeale, according to Karyeta, is to be taken in the sense of mimdasda adhite and as the term also occurs therein contradistinctic utnauktiiks 16 might in point of fict, refer to the subject of the Purva Miminst Still the proper word here for one speci ally devoted to such atudies would rather seem to be udmike, see I St, xnt. 455 456. With the exception of two

probably interpolated passages in the Griby's Sutras of the Rik (see pp 56-58) -Nor is there anything bearing on it m the Ganapatha of Pintat-of which todeed, for the present, only a negative use can be made, and even this only with proper caution But as the word is ir regularly formed (from Jeman we should expect Jamen;) this circum stance may here, perhaps carry some weight. (Apparently it is not found in the Mahibha hys cither, see I St x111.455 On the other hand the name James occurs in the concluding randa of the 5ams vidhina-Bribm (v I St tv 372) and here the bearer of it is described as the disciple of Tydea Paranaya and preceptor of a Paultandes which answers exactly to the statement in the V shou Pur Jul. 6 1, 4, where he appears as the tracher of Paushpunu (of also Ra

ghuv , 18 32, 33) The special relation of James to the Same Veda appears also from the statements in the Rig Gribyas (ees note 49 abore) which agree with Vishnu Pur, in 4 8, o Indeed, the Charage vytha specifies a Jaiminiva recension of the Saman , and this recension ap pears to be still in existence (see note 60 above) In the Pravara section of the Asval, Stanta-S , III. 10, the Jaminus are classed as belonging to the Bhnges -All thus. however, does not afford us any direct clue to the date of our Jaiment shove, whose work, besides, is properly more related to the Yajur than to the Sama-Veda According to the Panchatantra, the Mitudoskett Jaimin was killed by an elephant-a statement which. considering the antiquity of this work, is always of some value, although, on the other hand, unfortun ately in consequence of the many changes its text has undergone we have no guarantee that this particular notice formed part of the orig inal text which found its way to Persia in the sixth century (of I St, vill 150] -There is also an astro logical (Jotaks) treatise which goes by the name of Jamun Sutra , see Catal of Shr MS N W Pre (1874) pp 508, 510, 514 532)

are cited in this Sútra - Átreya, Badari, Badaráyana, Labukáyana (?),256 Aitaáayana—the names of the first and second, at all events, may be pointed out in the Taittiriya-Pratisakhya and the Srauta-Sútra of Katvavana respectively, while we meet with the family of the Aitasayanas in the Kaushitaki-Brahmana. Badarayana is the name of the author of the Brahma-Mimansa Sutra, but it by no means follows from the mention of him here that his Sutra is older than the Sutra of Jaimini, for not only may the name, as a patronymic, have designated other persons besides, but in the Sutra of the Brahma-Mimansa the case is exactly reversed, and Jaimini in his turn is mentioned there All that results from this, as well as from the fact of each Sutra frequently citing its own reputed author, is rather that these Sútras were not really composed by these teachers themselves, but only by their respective schools t The name Badarayana is not to be found "in Panini," as has recently been erroneously asserted t but only in the gana-patha to Panini, not a very oure guthority for the present -As leading expounders of the Jamuni-Sútra we have mention of Sabara-svamin,256 and, after him, of Kumarila-bhatta, 2.60 the latter is said to have flourished prior to Samkara.

23 In the passagn in question (Am. 7, 27) ought we not to read long highest the control of the c

5 See Colebrooks, 1 208 yet the tolerably modern title bhaffs awakms some doubt as to this it may

The Brahma-Sutra \* belongs, as we have just seen, to Badarayana The notion that creation is but Illusion, and that the transcendental Brahman is alone the Real but throning in absolute infinitude without any personal existence, is the fundamental doctrine of this system. The attempt is here made to demonstrate that this doctrine is the end and aim of the Veda itself, by bringing all Vedic passages into harmony with this monotheistic pantheism, and by refuting the various views of the Samkhya, or atherstic, the Yoga, or theistic, and the Nyaya, or deistic schools, &c The notice thus taken of the other systems would of itself seem to prove the posteriority of the Brahma-Satra, still, it is for the present uncertain whether its polemic is in fact directed against these systems in the form in which we now have them, or merely perhaps against the original tenets out of which these systems have sprung. The teachers' names, at least, which are mentioned in the Brahma-Sútra recur to a large extent in the Srauta-Sútras, for example, Asmarathya in Asvalaya-na, † Badari, Karshnajim and Kasakritsm in Katyayana [see above, p 139], and, lastly, Atreya in the Taithriya-Pratisakhya. The name Audulomi belongs exclusively to the Brahma-Sútra.237 The mention of Jaimin; and of Bádarayana himself has been already touched upon -Windischmann in his excellent "Samkara" (Bonn. 1832)

not have belonged to him originally perhaps (According to Gweel), and the second of th

example of the new Kalpaa, in con tradistinction to the earlier ones and so is regarded as of the same see with Panini If, as is likely the scholast took this illustration from the Mahabhashya fout this is not the case, v / St, 3m 455) then this statement is important. I may mention in passing that Asma rathya occurs in the gona 'Garga Audilom in the yang Biliu, Krish najina in the ganza 'Tika and 'Upa ka ' in the latter also Kálakritsna The Gans patha, however is a most uncertain authority, and for Panini s time without weight.

257 It is found in the Mahabhahya also, on Panini iv 1 85, 78, see

1 St, 201 415

appeared (1870)

In respect of their reduction to systematic shape, the logical Sutras of Kanada and Gotama appear to rank But this by no means indicates that these logical mourses are themselves of later origin-on the contrary, the other Sutras almost uniformly begin with such-but merely that the formal development of logic into two philosophical schools took place comparatively late Neither of the schools restricts itself to logic alone, each embraces, rather, a complete philosophical system, built up however, upon a purely disjectical method. But as vet little has been done to elucidate the points of difference between the two in this regard 200 The origin of the world is in both derived from atoms, which combine by the will of an arranging Power 261. Whether the name of the Hoduvas, who are described by Strabo as contentious dialecticians, is to be traced to the word pramana, 'proof, as Lassen supposes is doubtful. The word tarka, 'doubt,' again, in the Kathakopanishad, ought rather, from the context, to be referred to the Samkhya doctrines, and should not be taken in the sense, which at a later period 18 its usual one, of 'logic' In Manu too (see Lassen, / AK, 1 835), according to the traditional interpretation tarkin still denotes 'one versed in the Miniansa logic' 102 Yet Manu is also acquainted with logic as a distinct

echtid, in the Bibl Ind., the Nyaya dardan of Gotama with the commentary of Vdraygama (Pathiha syamu) The earlier edition (1528) was accompanied with the commentary of Visuandias. The first four books have been translated by Ballantine in the Arborouse.

<sup>98</sup> We find the atomic theory reponsily developed among the Johns, and that no a isasteralute form yt so that the atomic matter and the trial principle are conceived to be no electron immate counce tion, see my Jessy on the Bhaga wild of the Johnson, n 168, 196 by 216 We have a mythological application of it in the sa-sumplication of it in the saward of the Johnson of a principal Marich see 1 St., 12. 20 <sup>28</sup> In Petrala in 6 (\* 12.20 <sup>28</sup> In Petrala in 6 (\* 12.20 )

se In this respect, Roor in particular has done excellent service in the copious notes to bus translation of the Varieshika - Satra be has throughout special regard to this very point (in Z D M Q, vols xx: xx:: 1867, 1858) Before bits, Muller with some of Ballan types writings as a basis, had al ready taken the same line (in vols vi and vn of the same Journal 1852 1851) The text of the Variesbika Sutras with the com mentary called Upankars, of Sam kara-misra, appeared in Bibl Ind. in 1860 1861, edited, with a glors of bis own, by Jaya Marayana Tarkapanebanana, In the Pandit (Nos. 32-60) there is a complete transla tion of both text and commentary Dy A E Gouga -Vaya Warsyans has also since then (1864-65)

science, as well as with the three leading methods of proof which it teaches, though not under the names that were afterwards usual According to the most recent investigations on the subject \* "the terms navyanka and loralanandanka (Pan , 11. 1 49) would point to the Nyaya system as antecedent to Panini ' these words, however, do not occur in the text of Panini at all (which has merely the word kevala '), but only in his scholiast t-Kanada's system bears the name Vauseshika Sutra, because its ad herents assert that visesha, particularity, is predicable of atoms, the system of Gotama, on the other hand, is styled Nydya-Sútra, kar' e Eorhe Which of the two is the older is still uncertain. The circumstance that the doctrines of the Varseshikas are frequently the subject of refutation in the Vedanta-Sutra,-whereas Gotama's teaching is nowhere noticed, either in the text or in the commentaries upon it, as stated by Colebrooke (1. 352),-tells d priors in favour of the higher antiquity of the former, to but whether the author of the Vedanta had these 'doc trines of Kanada' before him in their systematised form, as has recently been assumed, is a point still requiring investigation.204 - For the rest, these two systems are at

By Max Muller L c . t. Q. t This is one of the cases of which I have already spoken (p.

225) In the Simkhya Sitra they are even expressly mentioned by name (see p. 237) , also in the sacred text of the James (v note 240) -The circumstance that the Gotain's Sutra does not, like the other five philosophical text-books, begus with the customary Sutra formula, 'atha tah, may perhaps also be regarded as a sign of later composition † M. Müller, f. c., p. 9 "Whereas

Kandda's doctrines are there fre

quently discussed,"

104 In neither of the Stitrag are there references to older teachers whose names might supply some chronological guidance. As regards the names of their anthors themselves, Land's or Kanabhan (Kanabhakaha) is mentioned by Var ha Miliars and Sunkara, while Aksburalla so far

as we know at present, is first men tioned by Madhava. Their patronymics, Kaiyapa and Gautama (this form is preferable to Gotama) date, it is true, from a very early time, but, beyond this, they tell us nothing Of interest, certainly, although without decisive weight, is the iden tification-occurring in a late com-Inentator (Anantayajvan) on the Pripmedba-Sutra of Gautama be longing to the Sama Veda-of this latter Gautama with Akshapada, see Burnell's Catalogue, p 57 of the Kusumanjalı (1864) it appears that the commentary of Pakshila-srdinin, whom he directly identifies with Vátsyáyana, was com posed prior to Dinoaga, that is to say (see note 219 above) somewhere about the beginning of the sixth century Uddyotakara, who is men tioned by Subandlin in the seventh century, wrote against Dinnigs, and

present and have been for a long time past, those most in favour in India, and it would also appear that among the philosophical writings contained in the Tibetan Tandjur, logical works are the most numerously represented

Bendes these six systems, all of which won for themsolves a general currency, and which on the whole are regarded as orthodox—however slight is the title of the Samkhya theory, for instance, to be so esteemed—se have requent mention of certain heterodox iews, as those of the Charvakas, Lankayatikas, 88 Báthaspafyas Of this last-mentioned smool there must also have euisted a complete system, the Barhaspafya Sutra, but of all this nothing has survived eave occasional quotations, introduced with a view to their refutation, in the commentailes of the orthodox systems

We now come to the third branch of the scientific literature, Astronomy, with its auxiliary sciences. We have already seen (pp 112, 113) that estronomy was cultivated to a considerable extent even in Vedic times, and we found it expressly specified by Strabo (see pp 29 30) as a favourite pursuit of the Brahmans. It was at the same time remarked, however, that the astronomy was still in a very elementary stage, the observations of the heavens being still wholly confined to a few fixed stars, more especially to the twenty-seven or twenty eight lumar asterisms, and to the various phases of the moon itself \*\* The circumstance that the Vedic year is a solar year of 360 days,

and not a lunar year, does indeed presuppose a tolerably accurate observation and computation of the sun's course. but, agreeably to what has just been stated, we can hardly magine that this computation proceeded upon the phenomena of the nocturnal heavens, and we must rather assume it to have been based upon the phenomena of the length or shortness of the day, &c To the elaboration of a quinquential cycle with an intercalary month a pretty early date must be assigned, since the latter is mentioned in the Rik-Samhita The idea of the four mundane ages, on the contrary-although its origin, from observation of the moon's phases, may possibly be of extreme antiquity 287 .-can only have attained to its complete development towards the close of the Vedic period Megasthenes, as we know, found the Yuga system flourishing in full perfection That the Hindú division of the moon's path into twentyseven (or twenty eight) lunar mansions is of Chinese origin as asserted by Biot (Journal des Savants, 1840, 1845, see Lassen, I AK, 1 742 ff) can hardly be admitted 263 Notwithstanding the accounts of Chinese writers, the contrary might equally well be the case, and the system might possibly have been introduced into China through the medium of Buddhism, especially as Buddhist writings adhere to the ancient order of the asterisms-commencing with Kritika-precisely as we find it among the Chinese 260

der in T B B O , viti. (1850)

Courtes Observations sur quelqu's Points de l'Histoire de l'Astronomi. (1863) and, lastly Whitney in the second vol or his Oriental and Lin quistic Studies (1874) To the views expressed above I still escent ally adhere, Whitney, too, inclines to wards them In favour of Chalden having been the mother country of the system, one circumstance, amonest others, tells with especial force viz. that from China, India, and Bat ylon we have precisely the same accounts of the length of the longest day, whilst the statements, eg, in the Bundehesch on this head, exhibit a total divergence see Windisch mann (Zoronstruche Sudien, p 105) 263 This assertion of Biot s has not

been confirmed the Chinese list commences with Chitra (i.e. the autumnal equinox), or Uttara hadha.

To me, however, the most probable view is that these lunar mansions are of Chaldwan origin, and that from the Chaldwans they passed to the Hindus as well as to the Chinese For the חור ח of the Book of Kings, and the ח סור of the Book of Job. 270 which the Biblical commentators errone ously refer to the zodiac, are just the Arabic . 1.1... mansions, and here even Biot will hardly suppose a Chinese ongin The Indians may either have brought the know ledge of these lunar mansions with them into India, or else have obtained it at a later time through the commercial relations of the Phoenicians with the Panjab At all events they were known to the Indians from a very early period and as communication with China is altogether inconcervable at a time when the Hindus were perhaps not even acquainted with the mouths of the Ganges, Chinese influ ence is here quite out of the question. The names of some of these asterisms occur even in the Rik Samhita (and that under peculiar forms), for example, the Aghas, we, Maghas, and the Arranyau, ie, Phalgunyau-a name also applied to them in the Satapatha Brahmana-in the nuptial hymn, mandala x 85 13, further, Tishya in mandala v 54 13, which, however, is referred by Sayana to the sun (see also z. 64. 8) The earliest complete enumeration of them, with their respective regents, is found in the Taittiriya-Sam-

(the winter solution), both of which rather correspond to an arrangement in which Revati passes as the sign of the vernal equilion, see my first | say on the Nakahateus p 300 -Cf here also the account of the twenty-eight lunar asterisms, contained in a letter from Wassiljew to Schiefner (see the latter a German translation of the Preface to Washlish a Russian ren dering of Táranátha e history of Bud dlasm, pp 30-32, 1869), and compan prosted according to the commentary en the Buddhistic Lexicon Malet vyutpatti from the book Sannipata (Chinese Tatti king) According to this account, it was the astrono mer Kharoshtha (au s-lip)-a name which, as well as that of Xarustr, who as Armenian authorities state, encinated the science of astro

nomy in Chaldra Washijew com pares with Zoroaster but in which I am inchined rather to look for the Krauebtuki whose sequant snee we make to the Atharra Paris (see Jis. U Bl., 1869 p 2497)the order quoted in the Dictioners in question, that is, beginning with Articles Afterwards there came another Rish, Rels (Time I), who set up a new theory is regard to the motion of the constellations, and so in course of time Chitra came to be mented as the first externam To all appearance, this actually proves the late and Buddhistic, origin of the Chinese Klo list, see Nakshatras, 1 306

27 On this point see specially /

hitá, a second, which e-hibits considerable variation in the names, betokening a later date, occurs in the Atharva-Samhita and the Taittiriya-Brahmana, the majority of the names are also given in Panini This latter hat contains for the most part the names employed by the later astronomers, and it is precisely these later ones that are enumerated in the so-called Jvotisha or Vedic Calendar (along with the zodiacal signs too!) To this latter treatise an importance has hitherto been attributed to which its contents do not entitle it. Should my conjecture be confirmed that the Legadha, Lagata, whose system it embodies, is identical with the Lat who is mentioned by Albirum as the author of the ancient Surva-Siddhinta [see, however, p 258 n ], then it would fall in the fourth or fifth century of our era, and even this might almost seem too high an antiquity for this somewhat insignificant tract, which has only had a certain significance attached to it on account of its being ranked with the Veda.\*

A decided advance in astronomical science was made through the discovery of the planets. The earliest mention of these occurs, perhaps, in the Tautinya-Aranyaka, though this is still uncertain; <sup>20</sup> beyond this, they are not noticed in any other work of the Vedto period <sup>21</sup> Manu's

law-book is unacquainted with them, Yajnavalkya's Code, however-and this is significant as to the difference in age of these two works-inculcates their worship! in the dramas of Kalidasa in the Mrichhakati and the Maha-Bharata, as well as the Ramayana, they are repeatedly referred to . Their names are peculiar, and of purely Indian origin, three of them are thereby designated as sons respectively of the Sun (Saturn), of the Earth (Mars) and of the Moon (Mercury), and the remaining two as representatives of the two oldest families of Rishis,—Angiras (Jupiter) and Bhrigu (Venus) The last two names are probably connected with the fact that it was the adhe rents of the Atharva-Veda-which was likewise specially associated with the Rishis Angiras and Bhrigu-who at this time took the lead in the cultivation of astronomy and astrology † Besides these names others are also common , Mars, for example, is termed 'the Red,' Venus, 'the White' or 'Beaming,' Satura, 'the Slow-travelling,' this last being the only one of the names that testifies to any real astronomical observation To these seven planets (sun and moon being included) the Indians added two others. Rahu and Ketu, the 'head' and 'tail' respectively of the monster who is conceived to be the cause of the solar and lunar eclipses The name of the former Rahu, first occurs in the Chhandegyopanishad,273 though here it can hardly be taken in the sense of 'planet,' the latter, on the contrary, is first mentioned in Yamavalkya. Butthis number nine is not the original number, -if indeed it be to the planets that the passage of the Tuttiriya-Aranyaka, above instanced, refers-as only seven (sapla súr yáh) are there mentioned The term for planet, graha, 'the seizer,' is evidently of astrological origin, indeed, astrology was the focus in which astronomical inquiries generally converged and from which they drew light and ammation after the practical evigencies of worship had been once for all satis fied Whether the Hindus discovered the planets inde-

pendently, or whether the knowledge came to them from without, cannot as yet be determined, but the systematic peculiarity of the nomenclature points in the meantime to the former view, ""

It.was, however, Greek influence that first influed a real life into Indian astronomy. This occupies a much more important position in relation to it than has hitherth been supposed, and the fact that this is so, to use implies that Greek influence affected other branches of the literature as well, even though we may be unable at present directly to trace it elsewhere <sup>755</sup>. Here it is necessary to insert a few particulars as to the relations of the Greeks with the Indians.

The invasion of the Paujab by Alexander was followed by the establishment of the Greek monarchies of Bactria, whose sway, in the period of their prime, extended, although only for a brief season, over the Paujab as far as Gujant 178 Concurrently therewith, the first Selenedt, as well as the Ptolemies, frequently maintained direct rilations, by means of ambassadors, with the court of Patalnutra, \* and thus it comes that in the inscription

<sup>&</sup>lt;sup>1</sup> Still it has to be remarked that in the Atharra Parisishas, which, with the Jyotsha, represent the o cest remains of Indian astrology the aphers of influence of the planets appears in apecial connection with their Greek names, see I St, vin

The Laranas are really the Yasanas as in really the Jacobs of the Yasanas as a really control of the Yasanas as a really the Jacobs of the Yasanas as a really the Yasanas as a

to whom the name was afterwards transferred, see I St, ani. 306, 307, also note 202 above.

Thus Megasthenes was sent by Seleucus to Chandragupta (d B c 291), Deimachus, again, by Ar tiochus, and Dionysius, and most probably Basilis also, by Ptolemy II to Αμιτροχάτης Amitragháta, con of Chandragupts [Antiochus con-cluded an alliance with Σωφαγά offens, Bubbagasena (1) Sciencus even gave Chandragupta his daughter to wife, Lassen, I AK, n 208 Talboys Wheeler, History of India (1874), p 177 In theretinue of this Greek princess there of course came to Pataliputra Greek dames is as her waiting maids, and these must have found particular favour in the eyes of the Indians, especially of their princes. For not unly are wupderen ederbeit wood wal Auxius mentioned as an article of traffic for India, but in Indian in scriptions also we find lavana girls

of Piyadasi we find mention of the names of Antigonus. Magas, Antiochus, Ptolemy, perhaps even of Alexander himself (cf p 179), ostensibly as vassals of the king, which is of course mere empty boasting. As the result of these embassies, the commercial intercourse between Alexandra and the west coast of India became particularly brisk, and the city of Unayini, Ofnen, rose in consequence to a high pitch of prosperity Philostratus, in his life of Apollonius of Tyana-a work written in the second century AD, and based mainly on the accounts of Damis, a disciple of Apollonius, who accompanied the latter in his travels through India about the year 50 ADmentions the high esteem in which Greek literature was held by the Brahmans, and that it was studied by almost all persons of the higher ranks (Remand, Mem sur I Inde. pp 85, 87) This is not very high authority, it is true [cf Lassen, I AK, m 358 ff], the statement may be an exaggeration, but still it accords with the data which we have now to adduce, and which can only be explained upon the supposition of a very lively intellectual interchange For the Indian astronomers regularly speak of the Yavanas as their teachers but whether this also applies to Parásara, who is reputed to be the oldest Indian astronomer, is still uncertain. To judge from the quotations, he computes by the lunar mansions, and would seem, accordingly, to stand upon an independent footing But of Garga," who passes for the next oldest astronomer.

 The name of Pardiara, sa well as that of Garge belongs only to the last stage of Vedic literature, to the Armyskas and the Sutras in the earlier works neither of the two names is mentioned. The family of the Parasarss is represented with particular frequency in the later members of the sanies of the batapatha Brahmapa a Garga and a Parakara are also named in the Aunkramani as Rishis of several hymns of the Rik and snether Pardiara appears in Pinini as author of the Bhikaba Satra see pp 141 185 [The Gargas must have played a very importan part at the time of the Mahabhashya, in the eyes of the suther at all events . for on almost

specified as tribute, while in Indian literature, and especially in Kali disa, we are informed that Indian princes were waited upon by Ya-vanis, Lassen I AK, it 551 957, 1159, and my Preface to the Malavike, p zlvn The metter of these damages being devoted to Eros, it is not a very far fetched conjecture that it may have been owing to their influence that the Hindu god of Love like the Grank Ergs, bears a dolphin (makara) on his banner and like him, is the son of the coddess of Beauty, see Z D M D. zov 269 (For makara = dolphin, see Journ Bont Br R A S, v 23 34, / Str., 11, 169), and cf ti ther ! St., 12, 380]

an oft-quoted verse has come down to us, in which he extols the Yavanas on account of their astronomical knowledge The epic tradition, again, gives as the earliest astronomer the Asura Maya, and asserts that to him the sun-god himself imparted the knowledge of the stars I have already elsewhere (I St, 11 243) expressed the conjecture that this 'Asura Maya' is identical with the 'Ptolemaios' of the Greeks, since this latter name, as we see from the inscriptions of Piyadasi, became in Indian 'Turamava' out of which the name 'Asura Maya' might very easily grow, and since, by the later tradition (that of the Jnana-bhaskara, for instance) this Maya is disunctly assigned to Romaka-pura \* in the West Lastly. of the five Siddhantas named as the earliest astronomical systems one-the Romaka-Siddhanta-is denoted, by its very name, as of Greek origin, while a second—the Paulisa-Siddhanta-is expressly stated by Albiruni to have been composed by Paulus al Yunani, and is accordingly, perhaps, to be regarded as a translation of the Eloayayi of Paulus Alexandrinus 277 The astronomers

every occasion when it is a question of a patronymic or other aimilar offix their name is introduced among those given as examples see I St, xui 410 ff In the Atharva Panti I tas also, we find Garga, Gárgya, V piddh i Garga cited these latter Gargas are manifestly very closely related to the above mentioned Garga the astronomer See further Kern Pref to Varaha Mihiras Brib Samb, p 31 ff , I

Str. n 347 ] \* See my Catal. of the Santh MSS in the Berl Lib, p 258 In reference to the name Romala I may make an observation in passing Whereas in Maka Ebarata xii 1030S, the Raumyas are said to have been created from the roma Lungs ( bair pores') or Virabh dra, at the destruction of Dalaha a rac rifice at the time of Ramayana ; 55 3, their name mus have been at Il unknown, since other tribes are there represented on a like cerasion, as springing from the ruma kupas Had the author been

acquainted with the name, he would scarcely have failed to make a similar use of it to that found in the Maha Bharata. [Cf my Ecssy on

the Ramayana, p. 23 ff ] † Albiruni resided a considerable time in India, in the following of

Mahmud of Ghaspa, and acquired there a very accurate knowledge of Sanskrit and of Indian literature, of which he has left us a very valuable arcount, written a.D. 1031 Ex tracts from this highly important work were communicated by Reinaud in the Journ. Asiat for 1844 and in his Men. sur i Inde in 1849 [also by Woepcke fold., 1863] the text promised so long ago as 1843 and tno t eagerly looked for ever mince has, unfortunately, not as yet ap peared [Ed Sachau, of Vienna, 19 at present engaged in editing it and, from his energy we may sow at length expect that this grievous wan will be speedaly supplied ]

77 Such a direct connection of the Pulisa Siddhanta with the Elegraphy is attended with difficulty.

and astronomical works just instanced-Garga, Maya, the Romaka-Siddhanta, and the Paulisa-Siddhanta-are, it is true, known to us only through isolated quotations. and it might still be open to doubt, perhaps, whether in their case the presence of Greek influence can really be established; although the assertion, for instance, that Pulisa, in opposition to Aryabhata,278 began the day at midnight, is of itself pretty conclusive as to his Western origin. But all doubt disappears when we look at the great mass of Greek words employed in his writings by Varaha Mihira, to whom Indian astronomers assigned, in Albiruni's day, as they still do in our own,\* the date 504 AD -employed, too, in a way which clearly indicates that they had long been in current use. Nay, one of his works -the Hora-Sastra-even bears a Greek title (from Son). and in it he not only gives the entire list of the Greek names of the zodiacal signs and planets. but he also directly employs several of the latter-namely. Ara, Asphujit, and Kona-side by side with the Indian names, and just as frequently as he does these. The signs of the

from the fact that the quotations from Pulisa do not accord with it, being rather of an astronomical than an astrological description That the Elegraphy however, was itself known to the Hindús, in some form or other, finds support in the circum stance that it alone contains nearly the whole of the technical terms adopted by Indian astronomy from the Greek, see Kerb's Preface to his cuition of Variha Mihira's Brihati Samh., p 49 -- Considerable interest attaches to the argument put forward by H Jacobs in his tract) De Astrologia Indica Hord Appellator Originatus (Boon, 1872). to the effect that the system of the twelve mansions occurs first in Fir micus Maternus (a.p 336-354), and that consequently the Indian Horatorte, in which these are of such fundamental significance, can only have been composed at a stul later date

We This, and not Aryabhatta, is the proper spelling of his name, as is shown by the metre in his own

work (Ganita-pada, v 1) was pointed out by Bhau Daji 1a

See Colebrooks, 1L 461 (415 ed. Cowell)

+ These are the following Kraya κριδε, Τάνατε ταθρος, Ιπαπα δίδυκος, Καβτα κόλουρο (1), Lega λίων, Pá thona repetros, Jaka Juyor, Kaurpya groomios Taukshika roforns Akokera alydrepus, Hridrogs vapoxoos It ha ixous, further, Hels His Hinna Έρμης, Ara Αρης, Kont Κρότος, Jyau Zeuc, Asphojit 'Αφροδίτη Thes. names were made known to long ago as 1827 by C M Whish, in the first part of the Transactions of the Literary Society of Madrus, and have since been frequently published, see in particular Lassen, in Zeitsch, f d Lunde des Morg . 17 306, 318 (1842), lately again in my Catal of the Sansi. MSS in the Berl Lib , p 338 -Hord and Len dra had long previously been iden tified by Pere Pons with 607 and rierope ace Leures Edd . 20 235.

237, Paris, 1743

zodiac, on the contrary, he usually designates by their Sanskrit names, which are translated from the Greek He has in constant use, too, the following technical terms, all of which are found employed in the same sense in the Evoquern of Paulus Alexandrinus, viz,\* drikana = δεκαυος liptá = λεπτη anaphá = avaφη, sunaphá = συναφη, durudhará = δορυφορια, kemadruma (for kremaduma) = χρηματισμός. τός = φάσις, kendra = κευτρου, dpoklima = ἀποκλιμα, panaphará = εταναφορά trikona = τρίγωνος, hibuka = υπόγειου, jámitra = διάμετρου, duutam = δυτόν, meshurana = μεσουρανημα

Although most of these names denote astrological relations, still, on the other hand, in the division of the heavens into zodiacal signs, decans, and degrees, they comprise all that the Hindus lacked, and that was necessary to enable them to cultivate astronomy in a scientific spirit And accordingly we find that they turned these Greek aids to good account, rectifying, in the first place, the order of their lunar asterisms, which was no longer in accordance with reality so that the two which came last in the old order occupy the two first places in the new, and even, it would seem, in some points independently advancing astronomical science further than the Greeks themselves du! Their fame spread in turn to the West. and the Andubarius (or, probably, Ardubarius), whom the Chronicon Paschalet places in primeval times as the earliest Indian astronomer, is doubtless none other than Aryabhata the rival of Pulisa, who is likewise extelled by the Araba under the name Arjabahr For, during the eighth and ninth centuries, the Arabs were in astronomy the disciples of the Hindus, from whom they borrowed the lunar mansions in their new order, and whose Siddhantas (Sindhends) they frequently worked up and translated .- in part under the supervision of Indian astronomers themselves, whom the Khalifs of Bagdad, &c., invited to their courts The same thing took place also

the a occura, currously, in Pingala a Treatme on Prosedy, in the last chap ter of which (preminably a later sod) tion), the permutations of longs and shorts possible in a metre with a fixed number of syllables are set forth in an enigmetical form, see I St., van 425 ff., 324-325-On geometry the Sulva-Sútras, apper turning to the Scaute ritual, formish highly ramarkable information , see Thibant's Address to the Arvan Section of the London International Congress of Orientalists, in the accept number of Transer's American can and Origital Laterary Record, 1874, pp 27, 28, according to which there Sutras even contain attempts at aguaring the circle \* The Indian figures from 1-9

we abbreviated forms of the mittal letters of the numerals themselves (of the similar notation of the musical tones) the size too, has arisen out of the first letter of the word days, 'empty' (it occurs even in Fingals, L. c. It is the decimal

place value of these figures which gives them their special significance Woepeke in his above-quoted Mém. (Journ Asiat, 1863), is of opinion that even prior to their adoption by the Arabs they had been obtained from In he by the Neo Pythagoreans of Alexandria, and that the socalled Gobar figures are traceable to there But against this it has to be remarked that the figures in ones tion are only one of the intest stares of Indean numerical notation, and that a great many other notations preceded them According to Ed ward Thomas in the Journ And for the same year (1863) the earliest instances of the use of thees figure belong to the middle of the seventh century , whereas the employment of the older numerical symbols is communication from the fourth contory downwards See also I St. via. 165 256 The character of the Volabhi Plates seems to be that whose letters most closely approach the forms of the figures Burnell has coste recently, in his Elem S. Ind Pal , p 46 ff , questioned altogether the connection of the figures with the first letters of the nume rals, and he supposes them or rather the older 'Cave Numerals,' from which he directly derives them, to bare been introduced from Alexandra "together with Greek Astrology In this I cannot in the meantime agree with bim see my remarks in the Jenaer Lt Z 1875 No 24, p 410 Arrongst other things, I there call epecual attention to the evenuertance that Hermann Hankel in his excellen s ork fore thumous unfortunateir) Zer Ge schiel 'e der Mathematic (1074) p 320 ff , declares lycepear a opinion

Araba, and from these again to European scholars <sup>22</sup> By these latter who were the disciples of the Araba, frequent allusion is made to the Indians, and uniformly in terms of high esteem and one Sanskrit word even—uchcha, signifying the apex of a planet's orbit—has passed, though in a form somewhat difficult to recognise (aux, genit, angus), into the Latin translations of Arabian astronomers <sup>23</sup> (see Remand, D. 125)

itematur, p 325]
As regards the age and order of sequence of the various Indian astronomers, of whom works or fragments of works still survive, we do not even here escape from the uncertainty which everywhere throughout Indian literature attends questions of the kind. At their head stands the Aryahnta already mentioned, of whose writings we possess at present only a few sorry scraps, though possibly fuller fragments may yet in course of time be recovered <sup>224</sup> He appears to have been a contemporary of Palisa, and, in any case, he was indebted to Greek influence, since he reckons by the zodiacal signs. According to Albirfinf, he

so the effect that the Noo Pyths greams were acquanted with the new figures having place value and with the zero to be erroneous, and the entire passage in Boothus on which this opinion is grounded to be an interpolation of the terth or eleventh century! "3" See also Woccke, Sur Flatro

duction de l'Arithmétique Indienne en Occident (Pome, 1859).

ma As al.o according to Remand a ingenious conjecture (p. 373 ff.) the name of Ujiayuni tiself—through a micreading namely of the Arabic american af Ujiayuni became the coupole d'Aran

164 The researches of Whittery in Jear Am Or See vs 560 (1850) and of Bh'un Digit in J. R. A. S. 1920 Cf (1850) have brought us full light upon this point. From these via appears that of Argabhata there are still extant the Delagiti Sura and the Argabhatanta, both of which baxe been already edited by Kern (1874) under the title argabhatight.

together with the commentary of Paramadiavara of A. Barth in the Revue Critique 1875, pp 241-253 According to his own account therein given Aryabhata was born a D 476, lived in Lastern India at Ku uma pura (Palibothra) and composed this work at the early age of twenty .bree In it he teaches, among stother things a quite peculiar numerical notation by means of letters .- The larger work extant under the title Arra Sid dhasta in eighteen adh jayas is evidently a subsequent production , see Hall in Journ. Am. Or Sec, vi 556 (1860) and Aufrecht, Catalogus, pp 325 326 Bentley thinks it was not composed until A.D 1322 and Bháu Dáji, I c. pp 393, 394, be lieves Bentley ' was here for once correct."-Wilson Mack Coll., 1. 119 and Lassen, I AK, 11. 1136 speak also of a commentary by Arya bhata on the Súrva Siddhánta this is doubtless to be ascribed to Lagha Aryabhata (Bhiu Diji, p 405) See also Kern Pref to Prib Sonh, p to F

was a native of Kusumspura, : c. Pataliputra, and belonged consequently to the east of India. Together with him the authors of the following five Siddhantas are looked upon as apcient astronomers-namely the unknown\* author of the Brahma-Siddhanta or Partamaha-Siddhanta . next, the author of the Saura-Suddhanta, who is called Lat by Albirani, and may possibly be identical with the Lagata, Lagadha mentioned as author of the Vedanga treatise Jyotisha, as well as with Ladha, a writer occasion ally quoted by Brahmagupta, t further, Pulisa, author of the Paulisa-Siddhanta, and lastly, Srishena and Vishnuchandra, to whom the Romaka-Siddhanta and the Vasishtha-Siddhanta-works said to be based upon Aryabhata's system 25-are respectively attributed Of these five Siddhantas, not one seems to have survived. There exist works, it is true, bearing the names Brahma-Siddhanta, Vasishtha-Siddhanta, Sarya-Siddhanta and Romaka-Siddhants, but that these are not the ancient works so entitled appears from the fact that the quotations from the latter, preserved to us by the scholasts, are not contained in them. 296 In point of fact, three distinct Vasishtha-Siddhántas, and, similarly, three distinct Brahma-Siddhántas,

dhants" to for the present doubtful

Cr Kern, Le., pp. 44-46

<sup>\*</sup> Athironi names Brahmagupta as the author of this Brahma-Sid dhonts but this serromeous. Per haps Reinaud has misunderstood the passage (p. 332)

<sup>+</sup> Iddha may very well have arised out of Lagadha, [the form Idta, however see Kern, Pref to Brit Samh, p 53 points rather to Anguri].

2rd As also upon Idta, Vasichta,

and Vijeynamidh, according to Bhdu Bight le, p 408 In the latters opinion the Romaka-Sid dilinta is to be sargined to Sair 427 (AD 505) and was "composed unaccordance with the work I from Roman or Greek author." Bhatjotpals, likewise mentions, amongst others a havanoderan Sphunjdenys (or Apply, a same in wheal Bhat or Apply, a same in wheal Bhat Ecen (Fred to Brah, Sapl, p 48) for an Apply and the same in wheal to form of the same in wheal to the same form of the same in the same in the same form of the same in the same in the same form of the same in the same in the same form of the same in the same in the same form of the same in the same in the same of the same in the same in the same in the same same in the same in the same in the same same in the same in the same in the same in the same same in the same in the same in the same in the same same in the same in the same in the same in the same same in the same same in the same in the

to Brit Sant pa 43-50 Up to

the present only the Surys Suddhints has been published, with Rencandthe a commentary, in the Bibl. Ind. (1854-59), ed. by Fitzedward Hall and Bipú Dera Sistem, also atrans lation by the latter, shid (1860, 1861). Simultaneously there appeared in the Journ Am. Or Sec., vol va. a translat on, nominally by Eb. Barress, with an excellent and very thorough commentary by W D Whitney, who has recently (see Oriental and Leaguistic Studies, in. 360) assumed "the entire responsi bility for that publication in all its parta. In his view p 326, the Surys Siddhants in "one of the most ancient and original of the works which present the modern astronomical acience of the Hindus but how far the existing text ' is identical in substance and extent with that of the original Surya Sid

are cited. One of these last, which expressly purports to be a recust\* of an eather work, has for its author Brahmagupta whose date according to Albirani, is the year a p 664, which corresponds pretty closely with the date as sened to him by the modern astronomers of Unavied, A D 628 257 To him also belongs, according to Albiruni, a work named Ahargana, corrupted by the Arabs into Arkand This Arkand, the Sindhends (i.e. the five Siddhantas), and the system of Ariabahr (Aryathata) were the works which, as already remarked, were principally studied and in part translated by the Arabs in the eighth and ninth centuries -On the other hand, the Arabs do not mention Varahu-Mihira, although he was prior to Brahmagupta, as the latter repeatedly alludes to him, and although he gathered up the teaching of these five Siddhantas in a work which is hence styled by the commentators Punchasidilidantila. but which he himself calls by the name Karana This work seems to have perished,289 and only the astrological works of Varaha-Mihira have come down to us-namely, the Samhitát and the Horá Sástra The latter, however, 18

Albirtud gives a notice of the contents of this recast it and the Paulia Saidhinta were the only two of these Saidhintas he was able to procure

cond MS of the labeland of a se

In a double edition as Brakat Samhiid and is Samasa Samhiid. Of the former Albirani gives us some extracts, see also my Cutal of the Sansk MSS in the Berl Lib yp 233-254. [For an excellent edition of the Britist Sambita (Bibl Ind., 1864-65) we are indebted to Kern. who is at o publishing a translation of it (chaps : -lazzir thus far) in the Journ R A S 1v - v1 (1870-74). There al o exists an excellent commentary on it by Bhattotpala, drawn up Sale 883 (a.b 966) and distin guished by its exceedingly copious quotations of parallel passages from vardha Mihira's predecessors. In the Bring Jatoka, 26 5, the latter calls himself the son of Adityaddsa and ar Aysunka or native of Avanta ı e , Ujjayınıl

incomplete, only one-third of it being extant.\* He men tions a great number of predecessors, whose names are in part only known to us through him, for instance, Maya and the Yavanas (frequently), Parasara, Manittha Saktipurva, Vishnugupta, Devasyamin, Siddhasena, Vajra Jivasarman, Satya,200 &c Of Aryabhata no direct mention is made, possibly for the reason that he did nothing for astrology in the Karana he would naturally be mentioned. While Aryabhata still computes by the era of Yudhishthira, Varaha Mihira employs the Sala-Idla, Saka-bhupa-kula, or Sakendra-kula, the era of the Saka king, which is referred by his scholiast to Vikrama's cra. Brahmagupta, on the contrary, reckons by the Sala-nripanta-which, according to him, took place in the year 3179 of the Kali age—that is to say, by the era of Salivaalready been given as the statements of the astronomers of to-day correspond with those current in Albiruni's time, we may reasonably take them as trustworthy, and accord-

This name I conjecture to re present Manetho author of the Apotolesmata, and in this Kern agrees with me (Pref. to Brib Samh., p 52)

† This is also a name of Chana kya, Dasakum, 183,5 ed. Wilson. (bor a complete list and examination of the names of teachers quoted in the Brihat Samhiti, among whom are Bidarayana and Karabhuj, see Kern's Preface, p 29 ff.]

Kern s Preface, p 29f.]

\*\*Skern Preface, p 51, remarks that, according to Utpala, he was also called Bhadatta but Aufrecht in his Catalogus, p 329° hs Bhadanta. In the Jyotury d doharan, Satya stands at the head of the sarce at Vikama's court geo ZD

M G, 111 722, 111 ,00

24 And as a matter of fact we find in Bhattoplah a quontum from the work in which he is men noned see hern, J. R. A. S. xx. §33, (1859). Bháu Dái, I. e., 400 in another such quotation Varidin Miner refers such quotation Varidin Miner refers and also to the flowaks Salidiatia and Fankis, Bháu Dái, p. 407

This statement of Cuebrooks

11 475 (428 ed Cowell), of also Lasses f AK is 50, is unfounded. According to Kern Preface, p. 6 ff. both in Varába-Mibira and Utpala, only the two-called era ff 0 wifeling is meant.

Namely, the Játaka portion (that relating to nativities) alone . and this in a double arrangement, as Laghu-Jataka and as Brikay-Idiaka the former was translated by Albirani into Arabic | The text of the first two chaps, was published by me, with translation, in I St , ii. 277 the remainder was edited by Jacobs in his degree dissertation (1872) It was also published at Bombay in 1867 with Bhattotpalas commentary similarly, the Britan Jutaka at Benares and Bombay Kerns Pref. p 26 The text of the first three chaps of the Yatra appeared, with translation in I St z. 161 ff. The third part of the Horá Sástra, the Viráka pajala, is still inedited.

ing to these he flourished in AD 503 <sup>203</sup> Now this is at variance, on the one hand, with the tradition which regards him as one of the 'nine genus' of Vikrama's court, and which identifies the latter with Ling Bhoga. Who reigned about AD 1050, <sup>205</sup> and, on the other hand, also with the assertion of the astronomer Satananda, who, in the introduction to his Bhosavati-karam, seemingly at knowledges himself to be the disciple of Mihura, and at the same time states that he composed this work \$Soke 1021 (~A.D. 1099). This passage, however, is obscuire, and may perhaps refer neerly to the instruction drawn by the author from Mihira's writings, \*otherwise we should have to admit the evistence of a second Varaha-Mihira, who flourished in the middle of the eleventh earthy, that is, contemporaneously with Albfunt. Strange in that case that the latter should not have mentioned him! After Voraha-Mihira and Brahmagupta various other

astronomers distinguished themselves. Of these, the most emment is Blasshara, to the question of whose age, however, a peruliar difficility attaches. According to his own account, he was born Sale 1036 (AD 1114), and completed the Siddhards aromani Sale 1072 (AD 1150), and the Karun-kutúhala Sale 1105 (AD 1183), and with this the modern astronomers agree, who assign to him the date Sale 1072 (AD 1150). But Albfundi, who wrote in AD

The Kern Preface, p 3, thinks this is perhaps his birth year the year of his death being given by Amaraja ascholiaston Brahmagupta, as Side 509 (AD 587)

This identification falls of course. If Variha Milhar really was one of the 'nine gems of Vikrains a court, then this particular Vikrama must simply have regimed in the aight century. But the pre-liminary question is whether he was one of these gems. See the state ments of the Jyoturnd dilharna.

l c 235 See eq., Aufrecht Catalogue, p 3275 3284 Moreover Satananda, at the

clues of his work—in a fragment of it in the Chambers collection (see my Chial of the Court MS3 Pol.

"" The "really the only possible way out of the didenms. Fither therefore, we have to think of that didents and the therefore, we have to think of that dident. Bakkara "who was at the head of the commendators of Arys boths, and are repeatedly cried by boths, and are repeatedly cried by antierior to the author of the Sirams, 'Colbrooke, in 470 (437 of Cowell), or class under Remanda (Cowell), or class under Remanda (A), and (A) are the sirams, 'Colbrooke, in 470 (437 of Cowell), or class under Remanda (A), but perhaps a Bakkara at All, but perhaps a Pushkara. It is certainly strange,

however that he should be styled and author of a Karana sara. Can it be that we have here to do with an interpolation in Alluminity

(eg, b-hy = bhurja, balb-hadr = balabhadra), and for the most part fauthfully preserves the length of the vowels, neither of these is here done in the case of Bashkar, where, moreover, the s is changed into sh

Bhaskara is the last star of Indian astronomy and After his day no further progress was made, and the astronomical science of the Hindus became once more wholly centred in astrology, out of which it had originally sprung In this last period, under the influence of their Moslem rulers, the Hindús, in their turn, became the disciples of the Arabs, whose masters they had formerly been \* The same Alkindi who, in the ninth century, had written largely upon Indian astronomy and arithmetic (see Colebrooke, ii 513, Remand, p 23) now in turn became an authority in the eyes of the Hindus, who studied and translated his writings and those of his suc-This results indisputably from the numerous Arabic teclinical expressions which now appear side by side with the Greek terms dating from the earlier period These latter, it is true, still retain their old position, and it is only for new ideas that new words are introduced, particularly in connection with the doctrine of the constellations, which had been developed by the Arabs to a high degree of perfection. Much about the same time, though in some cases perhaps rather earlier, these Arabic works were also translated into another language namely, into Latin, for the benefit of the European astrologers of the Middle Ages, and thus it comes that in their writings a number of the very same Arabic technical terms may be pointed out which occur in Indian works Such terruna technics of Indian astrology at this period are the follow-

tran-lations, as no Arako texts on astrology have been printed and the lexicons are very meagre in this respect. [Of now Otto I oth a tiern terious paper Al-Airad and Astrology in the Biorgrafiandiactic Friedmagen 1874, pp. 265-300 published in honour of Flusher a jubble ]

<sup>\*</sup> Thence is even taken the name for astrology itself in this period,—namely, topiks, topika tistra, which is to be traced to the Persian ... "Itself example of the Persian ... "Arabic"

<sup>+</sup> See I St, 11 263 ff Host of these Arabic terms I know in the meantime only from mediaval Latin

\* sextile aspect, tasse title aspect, further hadda גם fractio, musallaha isolac, thraidia livi perfectio, individra, plud deterioratio, utthistida and muthassila and musarinha and an oniunctio, tearaphiz and musarinha and perfection, gamaya isolacio, yamaya isolacio, yamaya isolacio, yamaya isolacio, yamaya isolacio, yamaya isolacio, yamaya isolacio, yaniama isolacio,

The doctrine of Omens and Portents was, with the Indians, intimately linked with astrology from the earliest times Its origin may likewise be traced back to the ancient Vedic, nay, probably to some extent even to the primitive Indo Germanic period It is found embodied, in particular, in the literature of the Atharva-Veda, as alwi 13 the Grihya-Sútras of the other Vedas 208 A promirent place is also accorded to it in the Samhitas of Varaha-Mihira, Narada, &c , and it has, besides, produced an independent literature of its own. The same fate has been shared in all respects by another branch of superstition-the arts, namely, of magic and conjuration. As the religious development of the Hindus progressed, these found a more and more fruitful soil, so that they now, in fact, raign almost supreme On these subjects, too, general treatmen exist, as well as tracts on single topics belonging to them Many of their notions have long been naturalised in the West, through the medium of the Indian fables and fairy tales which were so popular in the Middle Ages-those, for instance, of the purse (of Fortunatus), the league boots, the magic mitror, the magic ointment, the invisible cap. &c 200

<sup>&</sup>lt;sup>200</sup> Cf my paper, Zera ledische cap, for meianne are probablyt to be Texte other Genne und Poetents traved to old mythological supersit (18,4) containing the Adbbuta tous motions of the primitive Iedo Perfections and oddy Ziu of the Germene time. In the Efra Kandika Sutra.
Widsham Endmanded Everwell Fred Some of these the menable of Arthur the menable of the properties of the contained for the contained of the contained for the c

We have now to notice Medicine, as the fourth branch of the scientific literature

The beginnings of the healing art in Vedic times have been already planced at (pp. 20, 30). Here, again, it is the Atharva-Veda that occupies a special position in relation to it, and in whose literature its oldest fragments are found—fragments, however, of a rather corry description, and limited mostly to spells and incantions. The Indians themselves consider medicine as an Upa-veda, whence they expressly entitle it Agair-Veda,—by which term they do not understand any special work, as has been supposed. They derive it, as they do the Veda itself, immediately from the gods—as the oldest of human writers upon it they mention, first, Atreya, then Agairvés, then Charlado, "then Dhardwantars, and, lastly, his disciple

nator, p. 94, see Ltt C EL, 1874, pp. 424, 424.—Magne, further stands in a special relation to the excitana Tantra texts, as well as to the Yego on the sub-yet bear to name of Nigerousa, a name of high renova among the Berdchaits see eny Catal of the Berl Sand MSS, p. 270.

vatal mur p 256.

+ This was rightly insisted upon by Bentley in opposition to Cole brooke who had adduced, as an argum at to prove the ege of Va he is mentioned in the Panchatantra (this is the same put age which is also referred to in the Vikrama Charitra, see Roth, Journ Assat Oct 1845, p 304) [hern, it is true, in his Pref to the Brib Sambité. pp to 20 pronounces very decidedly against this objection of Bentley s but wrongly, as it seems to me for, according to Benfey a reacurches the present text of the Panchatantra is a very late production, of pp 221 240 above.

38th According to Tornous, Mudnerman, p. 254, sole the medical work there named in the test by the Singhalene king Boddhadésa (a.n. 339), crutical Sagatha Sangaha, and contractive (a. Sanghat, too) in Copion and in used by the nature Davids in the Transactions of the Davids in the Transactions of the

Phild Society 1815 pp 76 78.

The Tibetan landjur, according to the accounts given of it contains a considerable bumber of medical writings, a circumstance not with out importance for their chronology, Thue, Coma keross in the Journ 4s. Soc. Eur. January 1825, gives

miss, as belonging to the realm of dreams, the naive views that have quite recently been advanced as to the arc. for example, of the work bearing Susruta's name.\* In language and style, it and the works resembling it with which I am acquainted manifestly exhibit a certain affinity to the writings of Varaha-Mihira. 200 "If then "-here I make use of Stenzler's t words-" internal grounds should render it probable that the system of medicine expounded in Susruta has borrowed largely from the Greeks, there would be nothing at all surprising in such a circumstance so far as chronology is affected by it' 807 But in the meantame, no such internal grounds whatever appear to exist on the contrary, there is much that seems to tell against the idea of any such Greek influence In the first place, the Yavanas are never referred to as authorities, and amongst the individuals enumerated in the introduction as contemporanes of Susruta,I there is not one whose name has a foreign sound & Agun the cultivation of medicine

the contents of a Tibetan work on medicine, which is put into the mouth of Salyamuni and, to all appearance, is a translation of Su gruta or some similar work \* To wit, by Vullers and Hessler ,

by the former in an essay on Indian medicine in the periodical Janus, edited by Henschel , by the latter in the preface to his so called transla tion of Speruta [1844-50]

300 The Charaka Samhata has rather higher pretensions to antiquity, its prote here and there re minds us of the style of the Srauta-

4 From his examination of Vullers's view in the following number of Janus, 11 453 I may remark bere that Wilson s words, also quoted by Wise in the Preface to his System of Hindu Medicine (Calc 1844). P xvit, have been utterly migunder stood by Vullers. Wilson fixes "as the most modern hunt of our con jecture' the ninth or tenth century. se, AD, but Vollers takes it to be BOII [Cl now Wilson & Works 11) 273 ed Rost ] 27 This is cridently Poth gopinion

also (see Z D M C, xxrs 441, 1872) Here, after expressing a wish that Indian medicine might be thoroughly dealt with by competent scholars he of is the remark, that "only a comparison of the prin ciples of Indian with those of Greek medicane can enable us to judge of the origin, age and value of the former,' and then further on (p 448), apropos of Charaka s infunc tions as to the duties of the physi cian to his patient, he cite some remarkably corneident expressions

from the oath of the Ashlepads. # Hessier, indeed, does not per ceive that they are proper names, but translates the words straight off

& With the single exception per baps of Panshkalavata, a name which at least seems to point to the North West, to Househalles [We are further pointed to the North West of India (of the Kauslatohe) by the name of Bharadran Kapt shthala in the Charaka Sambite, which, moreover, assignato the neigh bourhood of the Himarant (refrice Himagotch subhe) that gathering of sages, out of which came the

is by Susruta himself, as well as by other writers, expressly assigned to the city of Kasi (Benares)-in the period, to be sure, of the mythical king Divodasa Dhanvantari, an incarnation of Dhanvantari, the physician of the gods And lastly, the weights and measures to be used by the physician are expressly enjoined to be either those employed in Magadha or those current in Kalinga, whence we may fairly presume that it was in these eastern provinces which never came into close contact with the Greeks, that medicine received its special cultivation,

Moreover, considerable critical doubts arise as to the authenticity of the existing texts, since in the case of some of them we find several recensions cited. Thus Atri, whose work appears to have altogether perished, is also cited as laghr-Atri, brihad-Atr., Atreya, similarly, as brihad-Atreya, araddha-Atreya, madhyama-Atreya, kanishtha-Atreya, Suśruta, also as vriddha-Suśruta, Vagbhata, also as vriddha-Vagbhata, Harita, also as vriddha-Harita, Bhoja, also as triddha-Bhoja-a state of things to which we have an exact parallel in the case of the astronomical Siddhantas (see pp 258, 259, and Colebrooke 11 391, 392), and also of the legal The number of medical works and authors is extraordinarily large. The former are either systems embracing the whole domain of the science, or highly special investigations of single topics, or, lastly, vast compilations prepared in modern times under the patronage of lings and princes The sum of knowledge embodied in their contents appears really to be most respectable. Many of the statements on dietetics and on the origin and diagnosis of diseases bespeak a very keen observation. In surgery, too, the Indians seem to have attained a special

instruction of Eharadvdia by Indra. Again, Agairesa is himself, ibid , 1 13 comm de cribed as Chandrabha gin, and so probably (of gana baated with the Chandrabhagd, one of the great rucra of the Panish Latly, there is also mentioned soid, 12 17 6, an ancient physican hankajana, probably the hankah or Lanka of the Araba (see Reman), > surfire p 314 ff), who is

expressly termed Váluka bhuhaj We have already met with his name (p 153 above) amongst the teachers of the Atharva Parassbian]

<sup>&</sup>quot; Suiruta is himself said, in the introduction, to have been a disciple of his. This assertion may, how ever, rest simply on a confusion of this Diany ntari with the Dhan vantars who is given as one of the \*nine gems of Vikrama s court,

proficiency, 203 and in this department European surgeons nught perhaps even at the present day still learn something from them, as indeed they have already borrowed from them the operation of rhinoplasty The information, again, regarding the medicinal properties of minerals (especially precious stones and metals), of plants, and animal substances, and the chemical analysis and decomposition of these covers certainly much that is valuable. Indeed, the branch of Materia Medica generally appears to be handled with great predilection, and this makes up to us in some mersure at least for the absence of investigations in the field of natural senence 905 On the diseases, &c., of horses and elephants also there exist very special monographs For the rest, during the last few centuries medical science has suffered great detriment from the increasing prevalence of the notion, in itself a very ancient one, that diseases are but the result of transgressions and sins committed, and from the consequent very general substitution of fastings. alms, and gifts to the Brahmans, for real remedies -An excellent general sketch of Indian medical science is given in Dr Wise's work Commentary on the Hindu System of

Medicine, which appeared at Calcutta in 1845 50.
The influence, which has been already glanced at, of Hindi medicine upon the Arabs in the first centuries of the Hijri was one of the very highest significance, and the Khalifs of Ragdad caused a considerable number of works upon the subject to be translated. \* Now, as Ara-

kind, since music was specially associated with dancing The earliest mention of the names of the seven notes of the musical scale occurs so far as we know at present in the so called Vedangas -in the Chhandas and the Siksha, and and they are further mentioned in one of the Atharvopanishads (the Garbha), which is, at least, not altogether modern. As author of the Gandharva-veda, te, of a treatise on music. Bharata is named, and, besides him, also Isvara, Pavana, Kalinatha,317 Narada, 318 but of these the only existing remains appear to be the fragments cited in

\$15 Bee on this 1 51 , vin. 259-272. The designation of the seven notes by the mitial letters of their names is also found here, in one recension of the text at least, and, p 256 According to Von Bohlen, Das alte Indien 11 195 (1830), and Benfey, Indien, p 299 (in Erich and Gruber s Encyclopædic, vol. xvil., 1840) this notation passed from the Hindus to the Persians, and from these again to the Araba and was introduced into European music by Guido d Arezzo at the beginning of the ele venth century Corresponding to the Indian sa of ga maps dia as we have in Persian, along with the de signation of the notes by the first seven letters of the alphabet (A-G), the scale da re ru fa sa la be, see Richardson and Johnson's Pers. Dict a. v Dury a mufarsal .- Does the Gandharvas or celestial musiciana. word gamma, gamut, Fr gamme, which has been in use since the time of Guido d'Arezzo to expresa the musical scale itself come from the equivalent houskpit term grdma (Prike gama), and so exhibit a direct trace of the Indian origin of the seven notes! See Ludwig Geiger s precisely opposite conjecture in his Ureprung der Spracht 1 458 (1868) The usual explanation of the word 12, of course, that it is derived from the I (gamma) which designates the first of the twenty one notes of Gordo's scale, and which was "known and in common if not uni versal use for more than a cen ary before his time, see Ambros

Geschichte der Musik is, 151 (1864) There being already a C and a g in the upper octaves, it was necessary to employ the equivalent Greek letter for the corresponding lowest note." The necessity for this is not bow ever, so very apparent, but, rather, in the selection of this term, and again in its direct employment in the sense of 'muncal scale a reminiscence of the Indian word may orannally have had some influence. though Guido himself need not have been cognisant of it.

3.5 And this not merely in the Sikaha attributed to Panini, but in the whole of the tracts belonging to thus category , see my Essay on the Pratitos Sairs, pp. 107-109, Haug. Accent, p 59

. Thu title is denved from the 317 This name is also written Kalls

noths (Kapila in Lasten, Il AK . tr 832, to probably a mistake), by Sir W Jones On the Musical Hodes of the Hendus in As Res. 114, 329, and by Aufrecht, Catalogus pi 210° Buhler, however, Catalogus pi 210° from Guy, 17 274, has the spelling given in the text. But, at any rate instead of Pavana, we must read 'Hanstoant, ton of Pavana." Eturata, see above p 231

I

St, v 148 xm 331
Through the recent researches of Fergusson, Cupmogham and Lestper the question has been raised whether Greek influence was not here also an amportant factor Highly remarkable in this regard are for example the parallels between an image of the sun god in his car on a column at Buddhagara and a well known figure of Phoebus Apollo as shown in Plate xxvii of Cunningham a Archaelomeal Survey of India. vol in 97 (1873) The same type is also exhibited on a com of the Bactman king Plato, lately described by W S W Vaux in the Auritem Chronicle xv 1-5 (1875)

instructions and treatises on the subject \*\* according to the accounts given of them, they deal for the most part with single topics, the construction of images of the gods for example, but along with these are others on geometry and design in general.

A far higher degree of development was attained by Architecture, of which some most admirable monuments still remain it received its chief cultivation at the hands of the Buddhists, as these required monasteries, topes (súpra) and temples for their cult. It is not, indeed, improbable that our Western steeples owe their origin to an imitation of the Buddhist topes. But, on the other hand, in the most ancient Hindú edifices the presence of Greek, influence = 1 suministakable = 2 (See Bentey, Indian, pp. 30–305). Architecture, accordingly, was often systematically

H Bg, also in Vardha Mibira's Brihat Sarbhik, one chapter of which, on the construction of statues of the gods, is communicated from Albironi by Reinaud in his Men auri Inde, p 419 ff See also I St.

mm 344-346 see In the fifth vol, which has just appeared, of his Archaeological Survey of India p 18; ff , Conning bam distinguishes an Indo Person style, the prevalence of which he assigns to the period of the Persian supremacy over the valley of the Indua (500-330) and three Indo Gre can styles, of which the Ionic pre, valled in Tatelula, the Counthian in Gandhara, and the Dorie in Kash mir Rajendra Lala Mitra, it is true, in vol 2 of his splended work. The Antiquities of Orisia (1875) holds out patriotically against the idea of any Greek influence whatever on the development of Indian architecture, &c (At p 25, by the way, my con pecture as to the connection between the Asura Maya, Turamaya, and Ptolemana see above, p 253 / St. 11 234, 18 stated in a sadly distorted form | Looking at his plates, how ever we lave a distinct suggestion of Greek art, for example in the two

fountain nymphs in Plate xvi., ho 46, while the Bryadere in Plate xvii., No 59 from the temple of Blurannévara, modile of seventh century (p. 31), seems to be resting her right hand on a dolphin beside which a Cupid (i) is crouding, and might therefore very well be an imitation of some representation of

Venus (Cf Raj L. M. p 59) Indians were not acquainted with stone building prior to the time of Alexander-an opinion which is confuted by Cunningham, I e, in 98. The painful minuteness, indeed, with which the erection of brick altars is described in the Vedio sic rificial ritual (of the Sulva Sútras) might lead us to suppose that such structures were still at that time rare Eut, on the one hand, thus would take us back to a much earlier time than we are here speaking of ; and, on the other, this scrapulous minuteness of description may simply be due to the circumstance that a specifically ascred structure is here in question, in connection with which therefore every single delail was of direct consequence "

treated of, 253 and we find a considerable number of such works cited, some of which, as is customary in India, purport to proceed from the gods themselves, as from Vávakarman 254 Sanatkumara, &c In the Samhita of Varaha-Mihira, too, there is a tolerably long chapter devoted to architecture, though manily in an astrological connection.

The skill of the Indians in the production of delicate woven fabrics, in the mixing of colours, the working of metals and precious stones, the preparation of essences, and in all manner of technical arts has from early times empyed world-wide celebrity and for those subjects also we have the names of various treatises and monographs Methion is likewise made of writings on cookery and every kind of requirement of domestic life, as dress, ornaments, the tyble, of games of very description, dice, for ex-

3-3 See Lassen, I 4K. 1V 877 Ram Raz a Lasay on the Architecture of the Hindus (1834) is specially based on the Managera in fifty eight adhydyan presumably composed in S India (p 9) Mayamata (Maya s system, on which see Raj L M , Notices, 11 306), Kasyapa, Vankha nasa, and the Sakaladhikara ascribed to Agastya were only secondarily consulted The portion of the Agui Purana published in the Bibl Ind. treats sat at, of the building of houses temples, &c. The Ratha Sutra and the Vésta Vidyá are given by Sankha (Schol on Katy, L 1 (1) as the special rules for the sathakdra. The word Satra dhara men suring line bolder, builder signi fies at the same time stage man ager and here perhaps we have to think of the temporary erections that were required for the actors spectatora &c . during the perform ance of dramas at the more unport ant fistivals. In this latter acceptation indeed the word might also possilly refer to the Nata Sunas the objectance of which had to be provided for by the Satra-dhara! See above, pp. 198 199

\* In I St., 1 10. I have translated. doubtless incorrectly the expression chatuhshanhiv-laid sistra (cited in the Prasthana-bheda as part of the Artha sastra) by 'treatise on chesa referring the 64 kalds to the 64 squares of the chess board whereas according to As Res 1 341 (Schlege) Relex sur l'Etude des Langu s Amat. p 112), it aignifies treatise on the 64 arts'? In the Dasakumára, however (p 140 ed Wilson) the chatuhshashti lalagama is expressly distinguished from the Artha sistra -See an enumeration of the 61 kalds from the Siva tantrain Radha kántsdern's Salda-lalpa-druma, e (On the game of Chatar-anga tee now my papers in the Monats ber der Berl Acad 1872 pp 60 ff 502 ff., 1873, p 705 ff., 1874, p 21 ff , and also Dr Ant van der des Sohacharnels (1874, 2 vol.)

ample, nay, even on the art of steahing—an art which in fact, was reduced to a regular and complete system [cf. Wilson, Dashhum, p 69, on Karmsuta, and Hindu Theair 163]. A few of these writings have also been admitted into the Thétan Twidur.

. rom Poetry, Science, and Art, we now pass to Law. Custom, and Religious Worship, which are all three com prehended in the term 'Dharma, and whose literature is presented to us in the Dharma-Sastras or Smriti-Sastras The connection of these works with the Gubya-Sutras of Vedic literature has already been adverted to in the introduction (see pp 19, 20), where, too the conjecture is expressed that the consignment of the principles of law to writing may perhaps have been called forth by the growth of Buddhism, with the view of neight and securely fixing the system of caste distinctions rejected by the new faith, and of shielding the Brahmanical polity generally from innovation or decay. In the most ancient of these works, accordingly-the Law-Book of Manu-we encounter this Brahmanical constitution in its full perfection The Brahman has now completely attained the goal from which, in the Brahmanas, he is not very far distant and stands as the born representative of Deny used, while, upon the other hand, the condition of the Sugra is one of the ntmost wretchedness and hardship. The circum stance that the Vaidehas and the Lichbavis, as issen an doubt rightly, conjectums for Nichlaris) are here num bered among the impure castes, is - as regards the former - certainly a sign that this work is long postenor to the Satapatha-Brahmana, where the Vaidebas appear as the leading representatives of Brahmanism The position allotted to this tribe as well as to the Lichhavis may, perhaps, further be connected with the fact that according to Buddhist legends, the Vaidebar and especially

this Lachhavi, family of them, exerused a material influence upon the growth of Buddhism. The postenionty of Mana, to the whole body of Vidie literature appears, besides, from tray other special indications, as, for instance, from the repeated mention of the several divisions of this literature, from the connection which subsists with some passages in the Upraisheds, from the completion of the Yuga system and the first of delites, as well as, generally, from the minute and nicely elaborated distribution and regulation of the whole of life, which are here mescated to us

I have likewise already remarked, that for judicial procedure proper, for the forms of justice, the connecting link 13 wanting between the Dharma-Sastra of Manu and Vedic literature That this code, however, is not to be regarded as the cylicst work of its kind, is apparent from the very nature of the case, since the degree of perfection of the judicial procedure it describes justifies the assumption tl at this topic had been frequently handled before " The same conclusion seems, moreover, to follow from the fact of occasional direct reference being made to the views of predecessors, from the word 'Dharma-Sastra' itself being familiar t as also from the circumstance that Patamiali. in his Mahabhashya on Panini, is acquainted with works bearing the name of Dharma-Sutras 203 Whether remains of these connecting links may yet be recovered, is, for the present at least, doubtful, For the demestic relations of the Hindus, on the contrary-for education, marriage, household economy, &c -- it is manifestly in the Grihva-Sutras that we must look for the sources of the Dharma-Sastras, and this, as I have also had frequent occasion

See Stenzl rin I St., 1 244 ff † let neither circumstance is strictly conclusive, as, considering the peculiar composition of the work, the several passages in question might perhaps be later additions.

to observe (pp 58, 84, 102, 143), is the expl-nation of the circumstance that most of the names current as authors of Grilya Stitas are at the same time given as authors of Dharma-Sastras. The distinction, as a commentator † remarks, is simply this, that the Grilya-Stitus confine themselves to the points of difference of the various schools whereas the Dharma-Sastras embody the precepts and obligations common to all:

\* In the case of Manu, too, there would seem to have existed a Manava Gribya Sutra as its basis (1), and the reference to the great an cestor Manu would thus appear to be only a subsequent one (!) [This surmise of mine, expressed with diffidence here, above at pp 19, 102, and in I St , 1. 69, has since been generally accepted, and will, it is hoped, find full confirmation in the text of the Man Gribyes, which has meanwhile retually come to light. I have already pointed out one in stance of agreement in language with the Yaius texts, in the word abhini mrulta, see I Str., 11. 200, 210.]

t Adirka on the Karms pradips of Katrajana.

32 In his Hist of die Sans? Let (1850) Max Muller gave some account of the Dharma Sutra of Apastamba, which is extant under the title Samaracharika Satra. He also characterized three of the Dhar ma Sátras printed at Calcutta (the Cautams, Vi hnu and Vasishtha) na being Dharma Sutrasof a similar kind, expressing himself generally to the effect (n 134) that all the metrical Dharma Sistras we possess are but "more modern texts of earlier Sutra works or hula-dbarmas belonging originally to certain Vedic Charanas.' (The only authority eited by him is Stenzler in / St. L. 232, who, however, in his turn re fers to my own earlier account, ibid. pp. 57, 69 \$43) Johantgen in Manu (186.) adopted precisely the some view (see, e.g., p 113) Bubler finally, in the Introduction to the

Digest of Hindu Law, edited by bun, jointly with R. leest frol 1. 1867), furnished us for the first time with more specific information as to these Dharma Sutras, which connect them elves with, and in part directly belong to, the Vedic Sutra stage. In the appendix to this work he likewise communicated various sections on the law of in heritance from the four Dharma Sutras above mentioned, and that of Landharana. He elso pullished reparately, in 1868, the entire Softra of Apastamia, with extracts from Haradatta s commentary and an index of words (1871) Satra, in point of fact, forme (ece above, notes 103 and 109) two pratnas of the Ap Stauta Sutra. and a similar remark applies to the Sutra of Baudhavana, Acrording to Bühlere exposition, to the fire Satras just named have to be added the small texts of this class consisting of prose and verse intermineled. which are ascribed to Usanas, Ra graps, and Budha, and, perhaps, alro the Smrittaof Harits and Southa All the other existing Smiths on the contrary, bear a name motern character, and are cuther (1) me " eal reductions of ancient Dasting-Saires, or fragments of such reductions (to these belone our Manu and I Amaralkya, as well as the Smritis of harada Parasara, Luhaspati, Samvarta) -or (2) secondary reduc tions of metrical Dharmanaletras,or (1) metrical vers ons of the Gribva Suiras -or lastly, (4) forgerica of the Handa seets - I be material in vol. 1 of Bubler and West sweet he to-u

As regards the existing text of Manu, it cannot, apparently, have been extant in its present shape even at the period to which the later portions of the Maha-Bharata belong For although Manu is often cited in the epic in literal accordance with the text as we now have it. on the other hand, passages of Manu are just as often quoted there which, while they appear in our text, yet do so with considerable variations. Again, passages are there ascribed to Manu which are nowhere found in our collection, and even passages composed in a totally different metre And, lastly, passages also occur frequently in the Maha-Bharata which are not attributed to Manu at all. but which may nevertbeless be read terbatim in our text. Though we may doubtless here assign a large share of the blame to the writers making the quotations (we know from the commentaries how often mistakes have crept in through the habit of citing from memory), still, the fact that our text attained its present shape only after having been. perhaps repeatedly, recast, is patent from the numerous inconsistencies, additions, and repetitions it contains support of this conclusion, we have, further, not only the fabulous tradition to the effect that the text of Manu consisted originally of 100,000 slokas, and was abridged, first to 12000, and eventually to 4000 flokast -a tradition which at least clearly displays a reminiscence of various remodellings of the text-but also the decisive fact that in the legal commentaries, in addition to Manu, a Vriddha-Manu and a Brikan-Manu are directly quoted 1 and must therefore have been still extant at the time of these com-But although we cannot determine, even approximately the date when our text of Manu received its present shape, 328 there is little doubt that its contents.

codes, Stenzler, from the preface to whose edition the foregoing information is taken, is of opinion that it is antecedent to all of them, 223 and that, therefore, it marks the

next stage after Manu.\*

But in addition to the Dharma-Sastras, which form the basis and chief part of the literature dealing with Law. Custom, and Worship, we have also to rank the great bulk of the epic poetry-the Maha-Bharata as well as the Ramayana -as belonging to this branch of literature, since in these works, as I remarked when discussing them, the didactic element far outweighs the epic. The Maha-Bharata chiefly embraces instruction as to the duties of kings and of the military class, instruction which is given elsewhere also, namely, in the Nita-Sastras and (apparently) in the Dhanur-Veda, but besides this, manifold other topics of the Hindu law are there discussed and expounded. The Puranas, on the contrary, chiefly contain regulations as to the worship of the gods by means of prayers, rows, fastings, votive offerings, guits, pious foundations, pilgrimages, festivals, conformably to the shape which this worship successively assumed, and in this they are extensively supported by the Upapuranas and the Tantras.

Within the last few centuries there has further grown up a modern system of jurisprudence, or scientific legal hierature, which compares and weighs one against another, the different views of the nuthors of the Diarna Sastras In particular, extensive compilations have been prepared, in great measure by the authority and under the auspices of various kings and princes, with a view to meet the prac-

Bubler's opinion (p. xxvii.) Manu and Tijnsvallya, although only "versifications of older Satria," may yet very well be of higher actiquity "than some of the Satrs works which have come down to our times."

<sup>23</sup> Miller has, it is true, claimed (see above note 277) if the Dharma(see above note 277) if the DharmaVal of the the Character of DharmaSutras and Dubber (see The Survey) and the Survey of the Survey of the Survey of Survey and to Henna Kafrana, a reterration three of Héstia and Sankha (Vain-tha belone; pro bubbr to the Dradyvena school of the Sana Ved. see pr 29 85 and Law as a sacontroll. tical want of a sufficient legal code <sup>832</sup> The English themselves, also, have had a digest of this sort compiled, from which, as is well known, the commencement of Sanshut studies dates. These compilations were mostly drawn up in the Dekhan, which from the eleventh century was the refuge and centre of hierary activity generally. In Hindustan thad been substantially arrested by the inroads and ravages of the Muhammadans, \* and it is only within the last three centures that it has gerun returned thicher, especially to Kaši (Benarcs) and Bengal. Some of the Mogul emperors, notably the great Ather and his two successors, Jehangu and Shah Jehan†—who together reigned 1556–1556—were great patrons of Hundul hierature.

This brings us to the close of our general survey of Sanskrit Iterature, but we have still to speak of a very peculiar branch of it, whose existence only became known some twenty or thirty years ago, namely, the Buddhistic Sanskrit works To this end, it is necessary, in the first place, to premise some account of the origin of Buddhism iterativa.

<sup>2</sup> Sec Colchrobles account of these in his two prefaces to the Dogst of Hand Law [1795] and the Two Treatiers on the Hindu Law of Inheritance (1810), now in Cowells edition of the Misc List 1 401 ft, also Buhlers Introduction, I c, p

<sup>334</sup> Cf C F Koppen s excellent work Die Leligion des Buddha [1857, 1859, 2 vols.].

Of the original signification of the word buddha, 'awakened' (se from error), 'enlightened,' as a complimentary title given to sages in general,\* I have already more than once spolen (pp 27, 167) I have also already remarked that the Buddhist doctrine was originally of purely philosophical tenor, identical with the system afterwards denominated the Samkhya, and that it only gradually grew up into a religion in consequence of one of its representatives having turned with it to the people † Buddhist tradition has itself preserved in individual traits a reminiscence of this origin of Buddha's doctrine, and of its postemonty to and dependence upon the Samkhya philosophy 235 Thus it describes Buddha as born at Kapila-vastu, the abode of Kapila, and uniformly assigns to Kapila, the reputed founder of the Samkhya system, a far earlier date, Again, it gives Máya-déví as the mother of Buddha, and here we have an unmistakable reference to the Maya of the Samkhya. 1854 Further, it makes Buddha, in his prior birth among the gods, bear the name Svetaketu 236-a name which, in the Satapatha-Brahmana, is borne by one of the contemporaries of Kapya Patamehala, with whom Kapil'i ought probably to be connected And, lastly, it distinctly ranks Panchasikha, one of the main propagators of Kapila's doctrine, as a demigod or Gandharva. Of the names belonging to the teachers mentioned in Buddhist legend as contemporaries of Buddha, several also occur in Vedic

there might perhaps actually be here an early complimentary allusion to fluidsha! A "Parishie (1) blakshur Atreysh" is maned shortly after "Da Mayá however, belongs not to the Samkhys, but specially to

the Vedanta doctrine

222 Can the leyend in the Maki-Bildrak an 235, have any connection herevill—to the effect that Svelaket in as drowned by his fater Udda'sha because of his being mainly syncha speclarin' 15—The maine Svela'sta further occurs mong the prior birth of Buddus, No 370 in Westergaards Catalogue, q. o., but surveyet these 523 yatal as pretty nearly excrytting alpears to be mettig red!

The name blagerant, which is also upplied to Buddan in particular, is likewise a general tule of honour, still preserved smong the Brahman to designate Habin of every locally on the between the proposition of the proposition of the proposition of the second person of Eq. 10 231, xiii 15, 532] + 38 of Eq. 1, 435, 435, and above,

literature, but only in its third or Sutra stage, eg, Katyayana, Katyayaniputra, Kaundinya Aguivesya, Maitrayaniputra Vatsiputra,\* Paushk nasadi, but no names of teachers belonging to the Brahman's period are found in these legends 237 This is all the more significant, as Buddhism originated in the same region and district to which we have to allot the Satapatha-Brahmana for instancethe country, namely, of the Kosalas and Videhas, among the Sakyas and Lichhavis The Sakyas are the family of which Buddha himself came according to the legend,t they had immigrated from the west, from Potala, a city on the Indus Whether this tradition be well founded or not, I am, at all events, disposed to connect them with the Sakayanins who are referred to in the tenth book of the Satapatha-Brahmans and also with the Sakayanyas of the Maitrayana-Upanishad, which latter work propounds precisely the Buddhistic doctrine of the vanity of the world &c (see above, pp 97, 137) \$38 Among the Kosala-Videhas this doctrine, and in connection with it the practice of subsistence upon alms as Pravrajaka or Bhikshu, had been thoroughly disseminated by Yajnavalkya and their king Janaka, and a fruitful soil had thereby been prepared for Buddhism (see pp 137, 147 237) The doctrines promul guted by Yajnavalkya in the Vrihad-Aranyaka are in fact completely Buddhistic as also are those of the later Atharropanishads belonging to the Yoga system. Nay, it would even seem as if Buddhist legend itself assigned Bud-

drone date, p 212 The truth of the legend may be questioned, but it not improbably intimates some connection with the Sakas or Indo-Stythians who were mattern of Pattalene subsequent to the Greek pruces of Burtra. The legend may possibly have been invented in the time of Kanejki one or these Saka kings, with a view to fatter him for the zeal he di-played on behalf of Buddhem

238 So, too, Johantgen Ueber das Gesetzbuch des Manu, p 112 refers the traces of Buddhistic notione exhibited in that work specially to the school of the Minakas from

which it sprang

<sup>+</sup> See Csoma Korosi, Journ As. Soc Benj, Aug 1833, Wilson,

dha to a period exactly coincident with that of Janaka and consequently of Yajuavalkya also, for it specifies a king Arátasatru as a contemporary of Buddha, and a prince of this name appears in the Vrihad-Aranyaka and the Kaushitaki-Upanishad as the contemporary and rival of Janaka 239 The other particulars given in Buddhist legend as to the princes of that epoch have, it is true, nothing analogous to them in the works just mentioned, the Ajatasatru of the Buddhists, moreover, is styled prince of Magadha, whereas he of the Vrihad-Aranyaka and the Kaushitaki-Upanishad appears as the sovereign of the Kasis (The name Autosatru occurs elsewhere also, eq. as a title of Yudhishthura.) Still, there is the further circumstance that, in the fifth kanda of the Satapatha-Brahmana, Bhadrasena, the son of Ajátasatru, is cursed by Arum, the contemporary of Janaka and Yajnavalkya (see L St. 1. 213), and, as the Buddhists likewise cite a Bhadrasenaat least, as the sixth successor of Alatasatru-we might almost be tempted to suppose that the curse in question may have been called forth by the heterodox antibrahmanical opinions of this Bhadrasena. Nothing more precise can at present be made out, and it is possible that the two Autasatrus and the two Bhadrasenas may simply be namesakes, and nothing more—as may be the case also with the Brahmadatta of the Vrihad-Aranyaka and the two lings of the same name of Buddhist legend -It is, at any rate, significant enough that in these legends the name of the Kuru-Panchalas no longer occurs, either as a compound or separately, 340 whilst the Pandavas are placed in Buddhe's time, and appear as a wild mountain tribe, living by marauding and plunder \* Buddhe's teaching was mainly fostered in the district of Magadha, which, as an extreme horder province, was perhaps never completely

mentioned by the Southern Bud dhusts, see I St, ut. 160 161 The allusion to the five Pandus in the introduction of the Lahta Vistara (Foucaux, p 26) isprobably, with the whole passage in which it occurs, an interpolation, being totally arreconcilable with the other

references to the Pandavas contained 12 the work.

<sup>330</sup> Highly noteworthy also is the peculiar agreement between Bud dhist legends and those of the Yrihad Aranyaka in regard to the ex teachers whom Ajátasatra and Janaka had before they were in structed by Buddha and Yájuaralkya respectively, see I St, 11t. 150, The Lurus are repeatedly

brahmanised, so that the native sublabitants always retunced a kind of influence and now gladly seried the opportunity to rid themselves of the brahmanical hierarchy and the system of caste. The bostile sellusions to these Migadhas in the Atharva-Samhuta (see p. 147—and in the thirtieth book of the Vajisaneyi-Samhuta? pp. 11, 112) might indeed possably refer to their anti-brahmanical tendencies in times antecedent to Buddhism. The similar albusions in the Sama-Shittan, on the contrary (see p. 79),<sup>34</sup> are only to be explained as referring to the actual flourishing of Buddhism in Magadha.

With reference to the tradition as to Buddha's age, the various Buddhist eras which commence with the date of his death exhibit the widest divergence from each other Amongst the Northern Buddhists fourteen different accounts are found, ranging from BC 2422 to BC 546, the eras of the Southern Buddhists, on the contrary, mostly agree with each other, and all of them start from BC 544 or 543 This latter chronology has been recently adopted as the correct one, on the ground that it accords best with historical conditions, although even it displays a discrepancy of sixty-six years as regards the historically authenticated date of Chandragupta. But the Northern Buddhists, the Tibetans as well as the Chinese-independently altogether of their era, which may be of later origin than this particular tradition t-agree in placing the reign of king Kanishka Kanerki, under whom the third (or fourth) Buddhist council was held, 400 years after Buddha's death, and on the evidence of coins, this Kanishka reigned down to A D 40 (see Lassen, J AK. 11. 412, 413), which would bring down the date of Buddha's death to about the year BC 370 Similarly, the Tibetans place Nagarjuna-who, according to the Raja-taramgini, was contemporaneous with Kanishka-400 years after the death of Buddha, whereas the Southern Buddhusts make him live 500 years after that event. Nothing like

the Haudhavana Sutra also, see note 126 For other points of contact in

positive certainty, therefore, is for the present attainable 312 A miors, however, it seems probable that the council which was held in the leigh of king Kanerki, and from which the existing shape of the sacred scriptures of the Northern Buddhists nominally dates, really took place 400. and not so much as 570, years after Buddha's death, It seems probable also that the Northern Buddhists, who alone possess these Scriptures complete, preserved more authentic information regarding the circumstances of the time of their reduction-and consequently also regarding the date of Nagariuna—than did the Southern Buddhists, to whom this reduction is unknown, and whose scriptures exist only in a more ancient form which is alleged to have been brought to Ceylon so early as BC 245, and to have been there committed to writing about the year BC 80 (Lassen, I AK, n 435) -Of these various eras, the only one the actual employment of which at an early period can at present be proved is the Ceylonese, which, like the other Southern erus, begins in BC 544 the period indicated is the close of the fourth century A.D. since the Dipavausa, a history of Ceylon in Pali verse, which was written at that date, appears to make use of this era, whereby naturally it becomes invested with a certain authority

If, now, we strap the secounts of Buddha's personalty of all supernatural accretion, we find that he was a king's son, who, penetrated by the nothingness of earthly things, and devote himself in the first place to contemplation, and thereafter to the instruction of his fellow-men. His doctance was, "that "men's lots in this life are conditioned and regulated by the actions of a previous erristence, that no evil deed remains without punishment, and nogood deed without reward. From this fate, which dominates the individual within the circle of transmigation, he can only

escape \* by directing his will towards the one thought of liberation from this circle, by remaining true to this aim, and striving with steadfast zeal after meritorious action only, whereby finally, having cast aside all passions, which are regarded as the strongest fetters in this prisonhouse of existence, he attains the desired goal of complete emancipation from re-birth" This teaching contains, in itself, absolutely nothing new, on the contrary, it is entirely identical with the corresponding Brahmanical doctrine, only the fashion in which Buddha proclaimed and disseminated it was something altogether novel and unwonted For while the Brahmans taught solely in their hermitages, and received pupils of their own caste only, he wandered about the country with his disciples, preaching his doctrine to the whole people, and-although still recognising the existing caste-system, and explaining its origin, as the Brahmans themselves did, by the dogma o rewards and punishments for prior actions-receiving as adherents men of every caste without distinction these he assigned rank in the community according to then age and understanding, thus abolishing within the community itself the social distinctions that birth en tailed, and opening up to all men the prospect of emancipation from the trammels of their birth. This of itself sufficiently explains the enormous success that attended his doctrine the oppressed all turned to him as their redeemer ! If by this alone he struck at the root of the Brahmanical hierarchy, he did so not less by declar-

ing secrificial working—the performance of which was the exclusive privilege of the Brahmans—to be utterly unavuling and worthless, and a virtuous disposition and virtuous conduct, on the contrary, to be the only real means of attaining final deliverance. He did so, further, by the fact that, wholly penetrated by the truth of his opinions, he claimed to be in possession of the highest enlightenment, and so by implication rejected the validity of the Veda is the supreme source of knowledge. These two doctrines also were in no way new, till then, however, they had been the possession of a few anchontes, never before had they been freely and publicly proclaimed to all.

Immediately after Buddha's death there was held, according to the tradition, a council of his disciples in Magadha, at which the Buddhist sacred scriptures were compiled These consist of three divisions (Pitalas), the first of which-the Sutras\*-comprises utterances and discourses of Buddha himself, conversations with his hearers, while the Vinaya embraces rules of discipline, and the Abhidharma, dogmatic and philosophical discussions A hundred years later, according to the tradition of the Southern, but a hundred and ten according to that of the Northern Buddhists, a second council took place at Pataliputra for the purpose of doing away with errors of discipline which had crept in. With regard to the third council, the accounts of the Northern and Southern Buddhists are at issue (Lassen, I AK, il 232) According to the former, it was held in the seventeenth year of the reign of Asoka, a year which we have to identify with BC 216-which, however, is utterly at variance with the equally traditional assertion that it took place 218 years after Buddha's death, se, m BC 326 At this council the precepts of the law were restored to their encient punty, and it vas at the same time resolved to send forth missionarres to propagate the doctrines of Buddha. The Northern Buddhists, on the contrary, place the third council 400 years after Buddha's death, in the reign of Kenishka, one

<sup>\*</sup> The name alone might suggest the Sitra, not in the Bullman, tot Dudaha himself flourahed in period.

of the Turushka (Saka) kings of Kashmir, who, as we have seen, is established, on numsmatue or idence, to have reigned until An 40. into the native Singhalese 343 Not until some 165 years later (1e, m BC 80) were they consigned to writing m that language, having been propagated in the interval by oral transmission only 344 After a further period of 500 years (namely, between A.D 410 and 432) they were at length rendered into the sacred Pali tongue (cf. Lasson, I AK, 11, 435), in which they are now extant, and from which in turn translations into several of the languages of Farther India were subsequently made \* As to the relation of these scriptures of the Southern Buddhists to those of their Northern co-religionists, little is at present known beyond the fact that both present in common the general division into three parts (Sútra, Vinaya, Abhidharma) In extent they can hardly compare with the latter, 215 nor even, according to the foregoing exposition of in authonticity 346 Unfortunately but little information has as yet

243 It was not the Pall text itself but only the oral commentary (art ha katha) belonging to it, which was translated into Singhalese (See the following notes) So at least it is stated in the tradition in the Mahavansa. For the rest, it is extremely doubtful how much of the present Tip taka may have actually been in existence then For if we compare the statements contained in the Lhabra missive-addressed by king P vades; to the synod of Magadha, which was then engaged in the ac commodation of schiems that had errung up-relative to the sacred texts (dhamma paligiyani) as they then stood a mighty difference be comes apparent! See Burnouf, Lotus p 724 ff , I St., 10 172 ff 344 See Mahayansa, chap xxxul p 207, Turnour, Preface, p xxix., Must Orey Sansk Texts, u. 69, 70

## BUDDHISTIC SANSKRIT LITERATURE

204

With respect now to the scriptures of the Northern .Buddhists, the Sanskrit originals namely-for it is these alone that concern us here-we must, in the first place. keep in view that, even according to the tradition, their existing text belongs only to the first century of our era. so that, even although there should be works among them dating from the two earlier councils, yet these were in any case subjected to revision at the third. In the next place, it is d prior improbable-nor is it indeed directly alleged-that the whole of the existing works owed their origin to this third council, and amongst them there must certainly be many belonging to a later period And lastly, we must not even assume that all the works translated in the Tibetan Kagyur were already in existence at the time when translations into Tibetan began to be made (in the seventh century), for the Kagyur was not completed all at once, but was only definitively fixed after a prolonged and gradual growth. From these considerations alone, it is abundantly plain how cautious we ought to be in making use of these works. But there is still more to be borne in mind For even supposing the origin of the most ancient of them really to date from the first and second councils.347 still, to assume that they were recorded in writing so early as this is not only prima facie questionable, but is, besides, distinctly opposed to analogy, since we are expressly informed that, with the Southern Buddhists. the consignment to writing only took place in the year BC 80, long subsequent to both councils The main purpoce of the third council under Kanishka may possibly just have been to draw up written records, had such records been already in existence, Buddhism could hardly have been split up thus early into eighteen different sects, as we are told was the case in Kanishka's time, only 400 years after Buddha's death Why, during all the eighteen centuries that have since elapsed no such amount of schism has sprung up, evidently because a written basis was then secured. Lestly, one important point which must not be

<sup>\*</sup> treerding to Csoma Koro 1, the Tib has tranglations date from the sementh to the thirteenth contines,

lost sight of in estimating the authenticity of the existing Buddhist scriptures is the circumstance that the sources from which they were drawn were in a different language True, we cannot make out with absolute certainty in what language Buddha taught and preached, but as it was to the people he addressed himself, it is in the highest degree probable that he spoke in the vernacular idiom Again, it was in Magadha that the first council of his disciples assembled, and it was doubtless conducted in the dirlect of this country, which indeed passes as the sacred language of Buddhism The same remark applies to the second council, as well as to the one which, according to the Southern Buddhists, is the third, both of which were likewise held in Magadha + Mahendra, who converted Ceylon in the year following this third council, took with him to that island the Magadhi language, afterwards called Pali this, too, is the dialect in which the inscriptions of this period, which at least bespeak Buddhistic influence, are composed 348 At the last council, on the contrary, which falls some 300 years later, and at which the existing scriptures of the Northern Buddhists are alleged to have

down to us officially under the name of Micadhi, and which presents special features of recemblance to that qualect rather which is em ployed in the inscriptions of Girnar The question has therefore been raised whether Pall is really entitled to the name Magadhi, which in the Pali I terature is applied to it, or whether it may not have received this title merely from motives of erele issuent policy, having reference to the sig nificauce of the land of Maradha in the history of Buddhi m Wester ganrdeven surmile (Ceb rdonālies en Zeitraum der indischen Geschichte p S7 n . (S02) that Pall is identical with the dialect of Univini, the mother tongue of Mahendra who was born there and I rust Kuhn (Bei.rag sur Pau Grammatil p 7 1875) adopts this opinion. Put Pischel (Jenaer L. Zeit 1875 p 315) and Childers (Pall Duck, Pre face p vii.) pronounce against it.

<sup>\*</sup> In the old capital (Rájagriha) + In the new capital (Pataliputra) That I ili could have been de

v loped in Ceylon from an imported Sanskrat as altogether anconcervable 348 The edicts of Psyadass present themselves to us in three distinct dialects One of these, that of Dhault exhibits a number of the peculiarities which distinctively be

ione to the Ardhamigadhi of the Jamas and the dialect designated Macadhi by the Prikrit grammari It is in : that the Bhabra missive addres ed to the third coupeil is composed -- a circums ance which conclusively promes that it was then the official language of Buddhism. and, in point of fact, Migadhi (since Dazula belongs prographically to \*his district) sec I &t in 180 and my Es.ay on the Bhagavati of the Jamus, 1, 396 Put then on the other hand this dialect di plays a particularly marked divergence from Pali, the ling -- a -hi h has come

been compiled, the language employed for this purpose was not Magadhi, but Sanskrit, although not the purest The reason of this lies simply in the locality For this concluding council was not held in Magadha, nor even in Hindustan at all, whose rulers were not then favourably disposed towards Buddhism, but in Kashmir, a district which-partly no doubt in consequence of its being peopled exclusively by Aryan tribes,\* but partly also (see pp 26, 45, 178) because, like the North-West of India generally. it has to be regarded as a chief seat of the cultivation of Indian grammar-had preserved its language purer than those Aryans had been able to do who had emigrated to India, and there mingled with the native inhabitants Those priests, therefore, who here undertook the compilation and recording in writing of the sacred scriptures were, if not accomplished grammarians, yet in all probability sufficiently conversant with grammar to be able to write passable Sanskrit!

Agreeably to what has just been set forth,349 it is in the highest degree risky to regard, as has hitherto been done.

\* The Greeks and Scythians were both too scanty in numbers, and too short a time in close contact with the natives, to exercise any influence in the way of modifying the language

† And it was evidently priests, educated men therefore, who formed the third council In the first two. laymen may have taken part, but the Buddhistic hierarchy had had time to develop sufficiently in the interval

2 Burnouf thinks differently, Hist du Buddh., pp 105, 106, as also Lassen, I Ak., n. 9 491-493 [but see I St , 11L 139, 179 ff ]

Bende the two branches of Buddhistic literature discussed in the foregoing pages—the Páir texts of the Southern and the Gansky . texts of the Northern Buddhiststhere stands a third group, occupy ing from its original constitution, a kind of intermediate place between the other two-namely, the Ardha migadhi texts of the Jamus The sect of the James is in all probability

to be regarded as one of the schis matic sects that branched off from Buddhum in the first centuries of its existence. The legendary narratives of the personal activity of its founder Mahivira, not only re fer at exclusively to the same district which Buddhism also recognises as its holy land, but they, moreover display so close an affinity to the accounts of Buddha's ministry that we cannot but reorgaise in the two groups of narratives merely varying forms of common rema acences. Another undication that the Jama sect arose in this way out of Eud dhism-although by some it has even been regarded as of pre Buddhistic origin-is affinded by the circum stance, amongst others, that its sarred texts are s'yled, not Samus, but Angas and consequently, in contra distinction to the oldest Buddhist texts which date from the Vedic Sutra period, belong tather to the Afiga stage, that is to say, to the period when the Afigas or Veddings

works posterior to the Vedic Sutras.

the dart yielded by a Buddhistic literature fashioned in this a yas a laid for the epoch of Buddha humself, which is removed from the last council by an interval of four, or, if we accept the Southern chronology, of nearly six, centuries of Trail traditions, committed to writing in a different language, after such a series of years, and more over only extant in a mass of writings that he several centuries apart, and of which the oldest portions have still to be entically sittled out, can only be used with extreme caution, and a pri ore the data they furnish serve, not so much to christicities the epoch about which they tell as rather the epoch, in particular, in which they result their present shape. But however doubtful, according to

were produced But there is a further carcumstance which is quite conclusive as to this point-ramely that the language in which these texts are composed and which, ac cording to the scholiasts, is Ardha magadhi, exhibits a more de veloped and considerably later phase than the language of the Pali texts, to which, in its turn, the Pali scholia expressly apply the designation Migadhi (At the same time there are also dia lectic differences between the two ) See my paper on the Bhagavati of the Jamas, pp 441, 373, 396 ff, 416 To the eleven principal Angre have to be added a large number of other writings styled Uparga, Mula Sutra, Kalpa Satra, Ac An enumeration of the entire set, showing a total of fifty works consisting of about 600 000 stoles may be soon in Rd endra Ld. a. Mitras Actives of Sunsayit MSS, un. 67 ff, 1874 Of the texts—our knowledge of the Jamas is otherwise d rived from Bruhmanic cources only -ali that has latherto been published is a fragment of the fifth Anga or Bhagara's Sutra, daring perhaps from the fret cen turnes of our era, ed ted by myself (1866-67) In I S , x 254 ff (1867), I have also given an account of the Eurya-praynapts, or seventh Updaga Sutra a commentary on

which is said to have been composed by Bhadrabáhusvámin suthor of the Kulpa-Sútrz, a work seemingly written in the goventh century Lastly, there is a translation by Stevenson (1848) of this Kalpa Sutra itself, which stands thurtieth in the list of the sacred texts Cf also S J Warren Over de codsdienst ige en wijngeerige Begrippen der James 1875 Thanks to G Buhler friendly exertions the Royal Library in Berlin has lately acquired powers sion of nearly all these fifty sacred texts, with or without commen taries, and in good o'd MSS, so that we may hope soon to be better informed regarding them — But the Jamas have al o a great sig nificance in connection with Sanskrit literature, more especially for gram mar and lexicography, as well as on account of the historical and levend ary matter which they have pre erved (see above, p 214 and of my paper on the Satrum, aya Maharmya 1858) One of their most honoured nam a is that of Hemschardra who flours hed in the time of the Gur Jura prince Kumárapála (1088–1172) Under the title Yoga Stra Lecom posed a compendium of the Jama doctrines in twelve gralities the first four of which, treating of their ethics have recently been edited and translated by Ernst Windisch (Z D M G xxviii , 18, ff., 1874).

this view, are the validity and authority of these writings in reference to the subjects which they have lutherto been taken to illustrate, they are nevertheless important, on the other hand, for the history of the inner development of Buddism itself, though even here, of course, their trustworthiness is altogether relative. For the many marvellous stories they recome both of Buddish himself and of his disciples and other adherents, as well as the extravagant mythology gradually developed in them, produce upon the whole the impression of a wild and formless chaos of fantastic in relations.

Our chief object must now, of course, be to establish a relative chronology and order of sequence amongst these various writings-a task which Burnouf, whose researches are our sole authority on the subject," also set himself, and which he has executed with great judgment and tolerable conclusiveness And, first, of the Sutras, or accounts of Buddha himself Burnouf divides these into two classes the sample Sútras, and the so-called Maháraspulya- or Mahdyana-Sútras, which he declares to be the more modern of the two in point of language, form, and doctrine As far as the latter point is concerned, he is no doubt right. For, in the first place, in the Mahavaipulya-Sútras Buddha appears almost exclusively surrounded by gods and Bodhisattvas (beings peculiar to the Buddhistic mythology), whereas in the simple Sutras it is human beings who mostly form his following, with whom gods are only now and then associated. And, in the second place, the simple Sutras do not exhibit any trace of those doctrines which are not common Buddhistic property, but belong to the Northern Buddhists only as, for example the worship of Amitabha, Manjusin, Avalokitesvara, Adıbuddha † and the Dhyanıbuddhas, and further, do not contain any trace of mystic spells and manc formulas, all of which are found, and in abundance, in the

<sup>&</sup>lt;sup>6</sup> I cannot refram from express ing here, in a few words at less, my sincere and profound sorrow that row, as the a sheets, which I would so gladly have submitted to his ludgment are passing through the press Eu ène Eurnouf has been taken from among us. His prems

ture death is an irreparable less to learning, as well as to all who knew him, and which is the same thing revered and loved him. † The word is found in a total y

different sense in those portions of the Mindukyopanishad which are due to Gundipids.

Mahavaipulya-Sútras only But whether the circumstance hat the language of the lengthy poetical pieces which are inserted with special frequency in these last, appears in a much more degenerated form-to wit, a medley of Sanskrit, Prakrit, and Pali-than is the case with the prove portions is to be taken as a proof of the posteriorit, of the Mahavapulya-Sutras, does not seem to be quite so certain as yet. Do these poetical portions, then, really agree so completely in form and substance, with the prose text in respect to the several points just instanced that they may be regarded as merely an amplification or recapitulation of it? Or are they not rather distinguished from it precisely in these points, so that we might regard them as fragments of older traditions handed down in verse, exactly like the analogous pieces which occur so often in the Brahmanas?\* In the latter case we should have to regard them as proof, rather that the Buddhist legends, &c, were not originally composed in Sanskrit out in vernacular dialects. From the account of the

. We mu t be content with simply sutting the question, as we are still unfortunately without the Sanskrit text of even a single one of these Salras, the sole exception being an insignificant fragment from the Lalita ve tara one of the Mahavar pulva Sutras, communicated by Pou caux at the end of his edition of the Tibetan translation of this work [The entire text of the Lahta vi tira, in twenty seven chapters has since appeared in the Bill Ind , edited by Rijendra Idla Mitra (1853 ff), the translation breaks off at chapter in Fourage pubhabed the fourth chapter or the Sad dharms-pundarika in 1852 and Loon Feer un Avadana, named Protederic, in 1867 Lastly, the Karanda ryuha a terribly inflated Mahdydna Sutra, in honour of Ava I k testara bas been edited by Satyavrota Amistami (Cale, 1873) A tra- a ion of the Latita vistars bigan hi S. Leimann in 1874, embrace o far the first five chap er, and is accompanied with

very comous notes -The conjecture expressed above as to the postcal portions had previously been advanced-although when I wrote I was not aware of the fact-in the Journ At Soc. Beng , 18,1 p 283, see I Et, 111 140 It was sub. quently worked out in greater detail by Lagendra L. Mitra, in a special es av on the dialect of these Gathas, likewise in Journ A. Suc Beng (1844, No 6) Here the date or their compus tion is even carried back to the period immediately aircreding Buddha's death, see huir, Ong S Texte 1 2 115 ff Kern Over de Jag-ull no p 105 E , c =3 not see in these Gathanany peral ar dialect, bu' merely later versions of stanzas originally compos 1 in pure Prakrit Lastly, Edward Mu'ler, in his tract, Der D clekt der Gatha des Lalita er tora (Werman 1874) per ceres in them the work of poets who were not quite at home in Sanskert and who ex ended to it the farners of their own verno e dar

Chinese tra eller, Fa Hian, who made a pilgrunage from China to India and back in AD 399-414, it would appear that the Mahavanpulya-Sutras were then already pretty widely diffused, since he mentions several of the doctrines peculiar to them as evtensively studied to

Of the simple Sútras, it is at least possible, in the an sence of evidence, that such as are concerned solely with Buddha's personality may be more ancient than those relating also to persons who lived some hundreds of years later, but beyond this we cannot at present determine anything Their contents are of a somewhat multifarious description, and for the several divisions we also find special technical designations \* They contain either simple legends, styled Ityul ta and Vyalarana (corresponding to

to The accounts of Fa Hisn are far surps led in moment by those of Higan Throng, who travelled over India in the years 629-645 a D Of special importance also are the Chinese translations of Buddhistic works, which are nearly all bred upon the texts of the Northern Buddhists and some of which pro fess to be very ancient. Of four such translations of the Lahta victors, the first is easd to have been made at a date so early as A D 70-76 the second in a D 308 and the third in 652, see on this 1 4, m 140 viti 326 Similarly, the Sad dharma pundari' a is said to have been thrice translated first 27 AD 280, next in AD 397-402, and again in AD 601-605 Leal, in the Indian Antiz , 17 90, 91, mentions no only a translation of the Brah ma,dla Sutra of the year AD 420 but al a whole set of firy Sutras (among tthem eg, the Samaja ala) translated at different dates from

AU 70 to 600 and by various s-ly lars, all of them from Sanskrit or Páli -ill, therefore, from the Indian original, whereas the trans istions of later times were mostly derived through the medium of the Tibetan For the criticism of the respective texts, fuller particulars of these, in part so ancient, transla

tions would of course be of great importance Of one of these works. B version of the Abhinish ramana Satra, a complete translation her recently less published by E .I, under the title The Romantic Le gend of Salva Buddha, 1875 The special points of relation here found to Christian legendane very striking The question which party was the borrower Beal properly leaves un determined, yet in all likelihood we have here simply a similar case to that of the appropriation of Christian legends by the worshippers of hr h na -Highly important for the his tory of Northern Buddhism is W Wa siljews work, drawn from Pibeto Chinese sources, Der Eud dhisrus, 1860 as also Taranátha's History of Buddhiers in India, a work romposed so late as 1603, but resting upon older, and in part Sandrit, authorities rendered into Russian by Wassiljew, - lahe'an teat, with German verson, by Schiefner, 1869 cL aust Lazzen

IAK, 11 6, note \* According to Spregel in his reavailed myself he e, of Burnoul a work, in the Jahrb fur wiss her in 1845, p 547, most of these Names are also found smong the Southern

the clergy—Like the Buddhast mythology the Buddhast interactly was a thung of gradual growth. Buddha, as we have seen, received all without distinction as disciples, and when ere long, in consequence of the great numbers, and of the practice of living constantly together, except in the winter season, so may be sufficiently to the great was required, it was pron the principle of age for ment? that this took place. As the Buddhast faith spread more and more, it became necessary to distinguals between those who devoted themselves entirely to the priestly calling, the bill-blank, monks, and billications, nues, on the one

\* The aged were called #Lanra, a word not unifrequently added to a proper name in the Brahmanical Stiras to dis inguish a parinchizary person from younger nameakes no atso of connection herewith are to a found in the Bribmungs also [Begarding the winter season see Children #Edi Decl. a v cotso]

† The venerable were styled or hear (dpxws), also a title bestowed noon teachers in the Brahmanas.

N ben Pánini speaks of Bhikshu Sutras, and gives as their authors Párainryn and Karmanda, teaching fiv 3 110, 111) that their respective ad herents are to be styled Parasarmas and Karmandina, and (iv 2 80) that the Sutra of the former is called Parasariya, the aliesion must be to Brahmanical mandicants, since these names are not mentioned in End dhistic writings. By Wilson too, in the second edition of his Dictionary. karmandia is given as bergar, reil leus mendicant, member of the fourth order ' [According to the St. Petersburg Dictionary, from Amara. 11 7 41, and Hemschandra, 809 ] But the circumstance must not be averlooked that, according to the Calcutta schouasts neither of these two rules of Panini is explained in the Mahabi ashya, and that possibly therefore, they may not be Panini s atali, but posterior to the time of Pa-tamiali | The Patasarino bhikaha vah a least, are really mentioned in the Bhashya to iv 2, 66 see I St. XIIL 340 ]-That menlicant

monks must, as a matter of rathave been purt u ariv namerous in Paning a time is apparent from the many rules he gives for the formation of words anth a connection ag. blakeldelura, 11 2. 17, blakeldle, ut. Z. 155 . Backahu, Ht. Z. 108 the Lake from blitche in the sense of bhiliphánán samhras, iv 2 33 Com pare, in careouth also self 70, where the formation of the name for fema's mendicants (framena, and, in the gana, pracrayita) is treated of which can only refer to Buildhistic female mendicinis [This has rule, which gives the enithe, 'virgin' as a secc.21 (not as an indispensable) quality of the frameri taken in connection with iv 1 127, can hardly be said to throw a very favourable light on the 'virginity of the class generally, cf. Mann, vist. 363 note 330 above The words sarringing. v 2. 0, and laulkutika, iv 4 6. likewise exhibit a very distinct Butdhistic colonnag, on this see I &., 140 ff. On Boddhistic mendicants at the time of the Bhashya, see the data codected in I St will. 340 ff.]-The entire institution of the fourth order rests essentially on the Sankhya decerne and its extention was certainly due to a large dish yellow garmeni (kashiyarasana) and the ton-ure (maxedyu) are the Propertyl badges of the Buddhis Cultians see a ore, pp 78, 217 On a commentary exant in India, on a Balkabit burn, es I S., L. 470.

hand, and the Buddhist laity on the other, upásukas and updsilds\* Within the priesthood itself, again, numerous shades of distinction in course of time grew up. until at length the existing hierarchy arose, a hierarchy which differs very essentially from the Brahmanical one, masmuch as admission to the priestly order is still, as in Buddha's time, allowed to members of the lowest castes on the same conditions as to any one else. Among the lasty the Indian castes still continue to exist wherever they existed in the past, it is only the Brahman caste, or priesthood by birth, that has been abolished, and in its place a clergy by choice of vocation substituted. The Buddhist cult, too, which now is second to none in the world for solemnity, dignity, pomp, and specialities was originally exceedingly simple, consisting mainly in the adoration of the image of Buddha and of his relics Of the latter point we are first informed by Clemens Alexandrinus Afterwards the same honour was paid to the relics of his most eminent disciples also, and likewise to princes who had deserved specially well of Buddhism. The story of the ashes of Menander, related by Plutarch (see Wilson, Arana, p 283), is doubtless to be understood in this sense! Now this relic-worship, the building of steeples-traceable, perhaps, to the topes (stipas) which

bha, who is uniformly placed in the western country Sukhavati, may be identical with Amputas, whose name appears as Amita on his coins, in the name Basil, too (in Schmidt's Deanglun p 331), he discovers the word flagiliers [But Schielner calls my attention to the circumstance, that as far back as 1852 in his Erganungen und Berichtigungen zu Schmidt's Ausgabe des Deanglun p 56 to p 256, 1 3 of the Tibe an text he withdrew the identification of Basili with Basileur his connec tion, too, of Amita with Amyntae, which, had been questioned by Kop nen, it 28, note 4, he now regards as doubtful ] The legend of the Western origin of the Sakyas I have already characterised (p 285) as per haps invented as a compliment to Kanishka

owe their cingin to this relic-worship—the system of monachism, the use of bells and rosanes, and many other details, offer such numerous features of resemblance to Christian ritual, that the question whether Christianity may not perhaps have been here the borrowing party is by no means to be summarily negatived, particularly as it is known that Buddhist missionaires penetrated at an early period, possibly even in the two centuries preceding our era, into Western countries as far as Ana Minor This is still, however, an entirely open question, and requires investigation.<sup>550</sup>

The third division of the Buddhist sacred samptures, the Abhidharma-Pijaka, contains philosophical, and especially metaphysical, discussions It is hardly to be imagined that Buddhish himself was not clearly cognisant of the philosophical basis of his teaching, and that he simply adopted this latter from his predecessors, so that the courage and energy pertaining to its public promulgation constituted his sole ment. But it seems just as certain that he was not concerned to propagate a philosophical system, and that his aim was purely a practical one, to

Afterwards adopted by the Bethnans also The very name rowry has possibly ansen from a consultant possibly ansen from a consultant possibly and and appendid, are my paper, Utien Kruines & Getartifett, pp. 340, 341, Koppen, Die Ridyon des Eud dha, 11 319, and also my letter in the Indian Antig. 17 250.

30 See Ind Shr. p 6, (1857), and the data from the Abba Burk and the data from the Abba Burk Tawries in Tibet in Köppen, 1, 55, 11 fd. According to the indexate in the Abba Burk and Index to the Abba Burk and Jamphat, one of the Sanisan and Jamphat Lambard La

feeted the growth of Buddh at ritual and worship, as they did that of the Boddhut legends, by any means to be dismissed out of hand. Indeed, quite spart from the off ventuated question as to the sizuiffernce of such influences in the further de velopment of Krishpa worship, there are legends connected with the Siva cult also, as to which it is not at all a far fetched hypothesis that they have reference to scattered Christian missionaries see / Et. 1. 421, 11 393, Z D M G, 22711. 160 (v 263) -That Western influene, bas played a part in Tibet finds support in a letter of Schiefner's, according to which, in a work of Danja Pandita, Galen is mentioned as the physicism of the Persians, and is said to have been consulted by the first Tibetan king, along with a celebrated Indian and a celebrated Chinese physician + Inthis conrage the circumstance that he belonged by both to the military easte finds expression,

awaken virtuous actions and dispositions. This is in accord with the circumstance, that whereas the Buddhists allege of the Sútra-Pitaka and the Vinas a-Pitaka that they were delivered by Buddha hin self, in the case of the Abhidharma-Pitaka, on the contrary, they start with the admission that it is the production of his disciples. According to Burnouf, the doctrines of the Abhidharma are m reality only a further development or continuation of the views here and there propounded in the Sutras, indeed, the writings in question often merely add single words to the thoughts expressed in the Sutras "but in any case there exists an interval of several centumes between the two, and that difference which distinguishes a doctrine still in its earliest beginnings from a philosophy which has arrived at its furthest development." In the Brahma-Sútra of Badarayana doctrines are repeatedly combated which, on Samhara's testimony, belong to two distinct schools of Buddhist philosophy, and consequently both of these, and perhaps also the other two schools which are ranked with them, belong to a period preceding the composition of this Brahma-Sutra.-The doctrines themselves cannot be recognised with perfect distinctness. and their affinity, although undemable, to the doctrines of the Samkhya system is still enveloped in some obscurit; \*\* On this point, however, so much is clear, that, although Buddha himself may actually have been in full harmony with the doctrines of Kapila, as they then existed, first his adherents developed these in their own fashion, in the

same way as the followers of Kapila also pursued their own puth, and so eventually that system arose which is now extant under the name Samkhya, and which differs essentially from the Buddhist philosophy\* To the four schools into which, as we have just seen, this philosophy was split up at a comparatively early period, four others were afterwards added-or perhaps these superseded the former-but neither have the doctrines of these later schools been as yet set forth with anything like sufficient certainty 2º2 The question, too, whether Buddhistic conof ptions may not perhaps have exercised a direct influence on the development of Gnostic doctrines, t particularly those of Basilides, Valentinian, and Bardesanes, as well as of Manes, must for the present be regarded as wholly undetermined, 263 it is mort intimately bound up with the question as to the amount of influence to be ascribed to Indian philosophy generally in the chaping of these doctrines The main channel of communication in the case of the latter was through Alexandria, the Buddhist missignames, on the contrary, probably mostly came from the Panjab through Persia.

Besides the three Pitakas, the Sanskrit manuscripts that have been procured from Nepal contain other works also, consisting, in part, of a large number of commentaries on and elucidations of the Pitakas in part, of a

most peculiar class of writings, the so-called Tantras, which are looked upon as especially sacred, and which stand precisely upon a level with the Brahmancal works of the same name. Their contents are made up of invocations of various Braddhas and Bodhinattwas, as also of their Saktis, or female energies, with a motley admixture of Sivaliu detices, to which are added longer or shorter prayers addressed to these beings, and directions how to draw the mystic diagrams and magic circles that secure their favour and protection <sup>524</sup>

<sup>\*\*\*</sup> Of Emil Schlagintweit's Bed-poetry, as to which see Klatt in Alas of twenty places,—Reconstly suchease of Chénakya, taken there-there theo come from Nepál from (1873)
Snakynt MSS containing works of

in the Brihaddevata, 3 24, between Rik-Samh. 1 73 and 74. For according to Meyer, their pratikas prove to be identical with those given by the scholiast on Sankh. Sr. 9. 20 14, for the 'trisatam suparnam' there mentioned in the text, which again is specified under this name in the Sankh. Br itself (18. 4) as part of the Asvina-sastra. Probably, too, the other portions of text, which, as stated by Meyer (! c, p xxv ff.), appear in the Brihaddevata as well as in the Rigvidhana, as belonging to the Rik-Samhitá, whereas they are found neither in the vulcatethe Sakals-Samhita-itself, nor in its khila portions, will have to be assigned to the Vashkalas In point of fact, the saminana khula also, to which (see above) the concluding verse of the Vashkala-Samhita belongs is mentioned in both texts (Meyer, p xxii.) An exact comparison of the Rik-verses cited in the Sankhayana texts will probably throw full light upon this point.-In Buhler's letter from Kashmir (published in I St. xiv 402 ft.) the interesting information was given that he had there discovered an excellent bhurra-MS, some five to six hundred years old, of the Rik-Samhita in the Sakala recension. This MS is accentrated, whereas the Kashmir Vedic MSS are not wont to be so, but the accent is denoted in a totally different manner from that customary in India, the adátta alone being marked by a perpendicular line, pre-cisely as, according to Haug, is usual in one of the two schools of the Mastrayani Samhita, and as we ourselves do, of my remarks in the Jenaer Lat Zeit, 1875, p 315 On this MS see now the detailed report of Buhler's journey in the Journal Bomb Br R A.S., 1877, extra No, pp 35, 36

Pp 35, 36, note § See also Myriantheus, Die Ascuss (Munich, 1876), and James Darmesteter, Ormazi et Akri-

man (Paris, 1877)

Mitra, em Beitrag zur Ezegue des Veda (Breslan, 1877)
P 43, note 
Max Miller's issue of the text alone of
the Rik has now appeared in a second edition (London
1877) Samhitá-prátha and pade-pátha are bre printed
on opposite pages. Respecting the latter it has to be
remarked that, as in Muller's previous editions, so again
to this one the so-tailed galiths are in no way marked,
the text which a particular passage shows the first time

it occurs being uniformly simply repeated, without any reference to what is done in the MSS themselves in these cases This is all the more surprising as, after I had pointed out this defect, in my review of the last volume of his large edition in the Int Cent Blatt, 17th April 1875, Muller himself, in an article which appeared in the same periodical a year and a half later (16th December 1876) fully recognised the critical importance of the galitas -Aufrecht's edition has also been reprinted (Bonn, 1877) the preface (comp desideratum at note 28) contains a variety of critical remarks -- Complete translations of the Rik-Samhita, by Alfred Ludwig (Prag, 1876) and Hermann Grassmann (Leipzig, 1876-77) have appeared - Very mentorious, also, is the edition of the Rik-Samhita which is appearing in monthly numbers at Bombay, under the title 'Vedarthayatna, with English and Mahrathi translation, as well as with Mahrathi commentary the latest No brings it down to 1 100. The name of the excellent editor, Shankar Pandit, is an open secret - Lastly, there remains to be mentioned M Haug's Vedische Rathselfragen und Räthselsprüche (Rik, 1 164, 1876)
P 48, note 338 Rájendra Iála Mitra's edition, in the

Bibl Indica of the Artareya-Aranyaka with Sayana's commentary, has now been completed. A MS acquired by Buhler in Kashmir shows a number of variations, see his

Report of Journey, l c, p 34.
P 50, 6 (cf p 285) Panchálachanda appears in a Pah Sutta among the mahasenapates of the Yakkhas, for the conclusions to be drawn from this see Jenaer Lit Zeit.

7th April 1877, p 221

P 56,8 The Sankh Grih (4. 10 3) inserts between Visvamitra and Vamadeva, the two representatives of the third and fourth mandalas, the name of Jamadagni, to whom in the Anukramani to the Sakala-Samhita only the last three verses of the third mandala (111, 62, 16-18) are in this place ascribed,-but in addition to these, also five entire hymns and four separate verses in the last three mandalas Have we here also to do with a divergence of the Vashkala school? (In Sankh Grih., 4. 5 8, however, there is no trace of this variation from the vulgate, rather, the verse ut 62 18 appears there as the concluding verse of the third mandala)

P 58, note 50 The Sankh Grihya has been published with translation and notes, by Herm Oldenberg, see I St ,xv 1-166 There exists also another recension of it. which is designated as Kaushitaka-Grihya, but which, according to Oldenberg, is rather to be understood as Sambavya-Grihya. Its text is 'nowise identical' with the Sinkh Grib, 'but it has borrowed from the latter by far the greatest part both of its matter and form' The last two books of the Sankh Grib, are not used in it, and a great deal is lacking besides

P 61, note \* On the Jyotisha a very mentorious work

has just appeared by G Thibaut. P 62, 6, 26 ff On the Brihaddevata and Rigvidhana see

R. Meyer's edition of the latter work (Berlin, 1877). P 65, 28 The forty-eighth Atharva-parisishta, see I St , 1v 432, gives indeed the came beginning, but a different concluding verse to the Sama-Samhita, namely, the last verse but one of the first part of the vulgate, accordingly, it did not reckon the second part as belonging to the Sam-

hits at all, while for the first part also it presents the discrepancy stated

P 65, note 60 The Aranys-Samhita, with Sajana's commentary, has been edited by Satysvrata Samasmmin, and that in a double form, namely, separately (Calcutta, 1873), and also in the second part of his large edition of the Sama-Samhita, p 244 ff.

P 65, note a This edition of the Sama-Sambita, in the Bibl Indica, has now reached, in its fifth volume, as

far as 2 8 2 5 Pp 73 74 The Talavakára- or Jauminiya-Bráhmana, to which the Kenopan belongs, has been recovered by Burnell (letter of 19th April) Also a Samaveda-Pratišakliva.

Pp 74, 75, notes n, 2 The Arsheya-Brahmans and Samhutopanishad-Brahmana have also been edited by Burnell (Mangalore, 1876, 1877), the former with a lengthy introduction containing an inquiry into the Ganas, the secondary origin of the Samhita from these, the chanting of the samans, &c On this compare A. Barth's detailed notice in the Revue Critique, 21st July 1877, pp 17-27 The Arsheya-Bryhmana has, further, just been issued a second time by Burnell, namely, in the text of the Jan

miniya school, which he had meanwhile recovered (Man-

galore, 1878)

Pp 99-101 According to the catalogue (1876) of M Haug's collection of MSS, there are now in the Royal Library at Munich, with which this collection was moorporated in the spring of 1877, not only two MSS of the Mautrayani Samhita, but also several more or less complete, but, unfortunately, in great part modern, copies of Apastamba, Manava, Bharadyaja, Baudhayana, Vaikhanasa, Hiranyakesin—The description (in notes 108, 100) of the Dharma-Sútras as part of the Siauta-Sutras is not quite correct, rather both are portions, possessing an equal title, of a collective Sútra-whole, to which in each case there also belonged a Griby a- and a Sulva-Sútra, and which we might perhaps designate by the name of Kalpa-Sútra -IThe North-Western origin of the Katha school (cf Kaθaia, I St, xiii 439) is also, in a certain measure, "ttested by the fact that, according to Bubler's letter from Kashmir (dated September 1875, published in I St, xiv 402 ft) on the results of his search for MSS in that province, this school is still in the present day the prevailing one in Kashmir The Biahmans there call themselves, it is true, chalurveds, but they follow the rules of the Kathaka-Gribya-Sutra of Laugakshi. Besides portions of all tle Vedas, the Bhattas learn by heart the Paddhati of Devapala, the commentary and prayoga to the Kathaka-Gribya. 'Of these Gribyas I have acquired several MSS, among them an old one on bhurja. To the Kathaka-Sutra are attached a Prayaradhyaya, an Arsha, the Charayaniya Siksha, and several other Panisishtas' - Additional note in econd German edition ] According to Buhler, Z D M G AMI. 327, the Dharma-Sutra of the Kathal a school is identical with the Vishnu-Smriti On this, and on the Kathaka school in Kashmir generally, see now Buhler, Report of Journey, 1 c, pp 20, 36, 37

P 103, note 116 The Taut. Pratifikhya has also been cuted in the Bill Indica by Rajendra Lala Mitra (1872)

Pp 117,118 The forty-eighth Atharva-Parisishta specifies a recension of the Vaj Samh, which begins with 1 1, but which ends with 23 32 See I St. 19 432

P 114 For the formul. Ambe ambile 'mbalike, which differs in all three Yajus texts, Panini (vi. 7 118)

has a fourth reading, on this and the other points of connection between Panini and the vocabulary of the Yajus texts, see I St . 19 432

P 138, 23. According to Mahavansa, p 9, 12, 15, the name of Buddha's wife was Bhadda- or Subhadda-Kach-

cháná i

P 139, note 147 Satap., 3. 1, 1-2 2, 1s translated in Brune Lindner's dissertation, Ueber du Dikahi (Leipzig, 1878), other portions in Delbruck's Altind. Wortfolge (1878).

P 142, note 155 The Paraskara has been edited by

Stenzler (1876)

P. 150, note 185 In the forty-eighth Atharva-Parisishts, the commencement of the Atharva-Samhita is given just as in the published recension, but it ends there with Book XVL, see I St. 19 432

P 151, note 155. With the deshapate compare the papman dourg in the Nrisinhop , see I St , ix 149, 150.

P 153 ff. Cf. Paul Regnaud Materiaux pour servir d l'Histoire de la Philosophie de l'Inde, 1876, and my review of this work in the Jenser Lit Zeit of 9th February 1878 P 182 note 193 The dates of the Nepalese MSS appa

rently reach back as far as AD 8831 See Dan. Wright,

History of Nepal, 1877, Jenaer Lit Zeil., 1877, p 412. Pp 187, 188, note and On Olshausen's explanation of

the word Pahlav-the basis of the Indian Pahlara-from Parthava, 'Parthians,' see now also Th Noldeke in Z D M G, xxx1, 557 ff.

According to Kern, Over de oud-P 180, note 204 Javaansche Vertaling van't Mahabharata (Amsterdam, 1877), p 7 ff., the Kavi translation of the Adi-part an, from which he there communicates the text of the Paushyacharita,

dates from the beginning of the eleventh century P 189, note 208 For the criticism of the Maha-Bharata, Holtzmann's researches (Indische Sagen, Preface, Stuttgart

1854) are also of great importance.
P 191, note 200 The Index to Hall's edition of Wilson's translation of the Vishnu-Purana (vol v part ii) appeared in 1877 The edition of the Agni-Purana in the Bibl Ind has now reached adhy 204.

P 195, 15 The identity of the author of the Raghu-vansa and Kumara-sambbara with the dramatist Kalidasa is contended for by Shankar Pandit in the Transactions of the Iondon Congress of Orientalists (London, 1876), p 227 ff

P 196, note 208 Bharavi and Kalidasa are mentioned together in an inscription of Pulakesi II, 'in the Saka year 507 (AD 585-6), at that date, therefore, they must have been already famous See Bhau Dan in Journ. Bomb Br R A S. IX. 315, and J F Fleet in Ind. Antro. v 68 -On the Kashmir poets Chandraka and Mentha, of about the fifth (?) century, Ratnakara of the minth, Kshemendra and Bilhana of the eleventh, Somadeva, Mankha, Kalhana, &c, of the twelfth century, see Buhler, Report of Journey, I c, p 42 ff.

P 100, note + For the text of these Suttas see now Grimblot, Sept suttas Palis (Paris, 1876), p 89, 'nachcham gilam ráditam pekkham akkhánam ti vá ti evarúpá rísúkudassaná (exhibitions, p 65, spectacles, pp 179, 215) From this it appears that the word here properly in question is not so much the general term visula as rather, specially, pekkha (prekshya), 'exhibition,' spectacle, translated by 'theatricals,' pp 65, 179, 'représenta-tions dramatiques,' p 215, comp. prekshanaka as the name of a species of drama in Bharata (Hall, Dasarupa, p 6), and drisya in the Sahitya-darpana as the name of dramatic poetry in general

Pp 200, 13, 205, 20. According to Hall, Vasavad., Introd, p 27. Bhayabhut, would have to be placed earlier than Subandhu, and if so, of course, & fortion, earlier than Bana the latter, however, does not allude to him in the classic passage in the introduction to the Harsha-chanta, where he enumerates his predecessors (Hall, ibid, pp. 13.

See also Ind Streefen, 1. 355

P 201, note | According to Lassen, I AK, m. 855 1163, Bhoja died in 1053 An inscription of his in the Ind Antiq, 1877, p 54, is dated in the year 1022 P 203, note. According to Buhler, Ind Antiq, v 112

(April, 1876), a grant of King Jayabhata is 'older than

the year 445 AD, and dated in the Vikrama era."

P 204, note 211 In Z D M G, xxx. 302, Jacobi cites from the Urvasi a (chronometrical) datum betokening Greek influence

P 207, note 118 Of new publications, &c., of Indian dramas have to be mentioned Bhandarl ar's edition of the

Malati-madhata (Bombay, 1876) Carpeller's edition of the Ratinavall (1877, in the second elition of Bohtingli's Sanskart-Christorraditio), the Bengall recension of the Saruntals, edited by Pischel (see Cappeller in the Jenar-Lit Zett, 1877, p. 121), the two latter dramas translated by Ludw Fritze, lastly, Regnaud's translation of the Mirchhakuta (Paris, 1876)—On the question as to the tarious recensions of Kalidasa's Sakuntala—discussed in f. St., xiv 161 iff—see also Buhler's Report of Journey, I. c, p. 1xxv if, where the first act of the Kashmír recension of this dama is printed.

P 210, note 22 To this place also belongs Savara's Subbishitavall of the fifteenth century, containing quotations from more than 350 poets, see Buhler, Report of Journey, I c., p 61 ff., further, the Subbishita ratinatar by Krishan Shastri Bhatavadekar (Bombay, 1872)—Here, too, have to be mentioned the four papers Zur Kristi und Erklärung verschiedener indiseler Werke, published by O Bohtlinck in vols via and vin of the Michanes Austinius

of the St Petersburg Academy (1875-76)

P. 212, note \*\*\* Comp. Henley's Introduction to Bicaells edution and translation of the 'Kalilag and Dammag' (Leipzig, 1876) It now appears doubtful whether the ancient Pahlavi version really rested upon eine individual work as its basis, or whether it is not rather to be regarded as an epitome of severel independent texts, see my notice of the above work in Lit O E, 1876, No. 31, Buller, Beport of Journey, p. 47, Prym in the Jenzer Lit Zett. 1878, Att 118

P 213, note 24 Read 'recast by Kshemendra.' It is only to Kshemendra that the statements from Buhlers letter, given in the next sentence, refer Buhler now places him in the second and third quarter of the eleventh

century, Report of Journey, 1 c, p 45 ff.

P 213 On the Raja-taramgini see now Buhler, Report of Journey, pp 52-60, lvn.-lxxxii (where an amended translation of 1 1-107 is given), and on the Nila-mata, of about the sixth or seventh century, 17-16, p 35 ff, lv ff.

P 214, note 25 The Harsha charita appeared at Calcutta in 1876, edited by Jivananda—On the Sinhasana-lvalindsha see now my poper in J St, xv 186 ff

P 215, note 27 In the interpretation of Indian inscrip-

tions, Buhler and Fleet also, in particular, have of late done very active service (especially in Ind Antig, vols v, vi.)
P 221, note 233 Goldstucker's 'facsimile' (comp note

196, p 100) edition of the Manavakalp is not 'photo-litho-

graphed, but lithographed from a tracing

P 226, note 228 Kielhorn has come forward with great vigour in defence of the Mahabhashya, first, in a lengthy article in the Ind Antiq, v 241 (August 1876), next in his Essay, Katyayana and Patamjali (Rombay, December 1876), which deals specially with the analysis of the work into its component parts, and, lastly, in his edition of the work itself, which exhibits the text critically sifted; in direct reference thereto (the first number, Bombay, 1878. gives the naidhnikam) Cf , further, two articles by Bhandarkar, On the Relation of Katyayana to Panin and of Patamjals to Katyayana in Ind Antiq , v 345 ff (December 1876), and on Goldstucker's Theory about Panini's Technical Terms (reprint of an earlier review of G's Panini), ibul . vi 107 ff To this place also belongs an article on the Mahabhashya, which was sent off by me to Bombay on oth October 1876, but which only appeared in the Ind Antio vi 301 ff in October 1877

P 225, note 20 On the antiquity of the Kasika sec now Bubler's Report of Journey, p 72 The issue of the work in the Pandit is perhaps by this time completed. It is to be hoped that it will appear in a separate edition ---Buhler's information regarding Vyadi, the Mahabhashya, Katantra, &c, is given in detail in his Report of Journey -On Burnell's essay, On the Aindra School of Sanskrit Grammarians (1875), which contains rich materials, see my critique in the Jenner Lit Zeit, March 1876, p 202 ff -Of Hemachandra's Prakrit Grammar Pischel has given us a new edition (Halle, 1877, text and good index of

words)

P 229, note † This note, according to Barth, Revue Critique, 3d June 1876, is to be cancelled, as paratire can only have the sense of 'seem' (schemen)

P 231, note 243 On Kahemendra's Loka-prakaja sec

Buhler, Report of Journey, p 75 P 231, 29 See note above to p 182

P 231, note 244 The translation of the Sahitya darpana in the Pobl Lidien is now finished -- For the rich information supplied by Bühler rejading the Alamkira literature in Kashnir, see his Report of Journey, p. 64 ff. According to this, the Alamkira-district of Ehatia Udhirta dates from the time of Jayapilla (779-813), whose subhipate the author was Vimana, too, in Buhler's opinion, belongs to the same period. Anandavardhana and Ratnákara belong to the nuth century, Multala to the tenth, Abhinavagupta to the beginning, Rudrata to the oud, of the cleventh, while Ruyyaka flourished at the commencement, and Jayaratia at the close, of the twelfth century, Mammata is to be placed still later

P 235, note 27 Of the Sarva-dursana samgraha there is now a trunslation, by Cowell and Gough, in the Pandit,

1875 ff
P 237, note to The Samkhya-tattva-pradip has been translated by Govindadevasastrin in the Pandit, Nos 98 ft

P 337, note <sup>23</sup> Abhunaugupta was still lung in An 1015, Buhler, Report of Journey, p 80—The Sava-Lastra in Kashmir, that, pp 27—52, is divided into two groups, of which the one connects itself with the Spanda-Sastra of Vasugupta (654), the other with the Pretyabhuna-Lastra of Somdannda (ab 200) and Uppin (ab 930) is not the latter—which appears to rest upon Samkara—

that Abhinavagupta is the leading representative

P 241, note 26 The last number of this edition of Sabarasamin brings it down to 10 2 73, the edition of the Jainning anyaya mala-vistan has just been completed by Cowell. The Jainnin-satin 13 being published in the Bombay monthly periodical, 'Shiddarsana chintanke,' begun in January 1877—text and commentary with a double translation, in English and Mahratih.

double translation, in English and Mahrathi.

P. 243, note 2. Vachaspatimism's Bladmatl, a gloss on Sarakana's commentary on the Vedanta-asitra, is in cource of publication in the BM Ind. edited by Belfastirin,—commenced in 1976—In the Pandat for 1876, p. 113, in the Preface to his edition of Srinui, isadasa Vadindr viasta-dipika, Ramamismistirin cites a passing from Ramfounga's Brahmasitra-bhishya, in which the latter 1 unitous the thapamal Bodhayana is his predecessor therein, and as separated from him by several generation of purish-dryer As sich purish-dryer Rammingan and processing the state of the processing the processing of the processing the process

designating them by the ep. nets matarshi and supre " atara By Srinivasadasa himself (p 115) the teachers are mentioned in the following order Vyasa, Bodhayana, Guhadeya, Bharuchi, Brahmanandi Dravidacharya, Sri-Parankusanatha, Yamunamuni, Yatisvara - Here is also to be mentioned the edition in the Pardit, by Vechanaramasastran, of two commentaries on the Vedanta sutra. viz, the Saiva-bhashya of Śrikantha Sivacharya (see Z. D. M G, xxvil 166), and the Vedanta kaustubha prabha of Kesava Kasmirablatta.-Further, in the second edition of his Eanstrit-Chrestomathie (1877) Bohtlingk has given a new translation of the Vedanta-sara, and the Vidvanmanoranimi of Ramatirtha, a commentary thereon, has been published, text with translation, in the Pandit by Gough and Govindsdevasastrin In the same journal has also appeared the Advasta-makaranda of Lakshmidhara,

P 245, note 254 A translation, by Keśavaśantin, of the Nyivy-darśana and of Vatsydyana's commentary thereon, has begun to appear in the Pandit (new series, vol 11) The fourth book, of Gangeś's Nyaya-d'untamanı with the communitary of Richdatta, has also been edited, thid

(Nos 66-93) by Balasastrm.

(Nos 00-93) by Chansistin.
P 247, note <sup>250</sup> Of importance and the names, communicated to me from Alburdui by Ed Sachau of the merdriu in Sogid and Kharazan, the list of which begins with throught, i.e., with kritist, and that under the name anneals in the interest of the second of the name which et and that in the Bundeless, whence it necessarily follows that the list of names in the latter is the adden one, commencing with distinst, see Irnar Let Est. 1877 (7th Aprill), p 221 Some of the names here cited is Alburian ere distinctly Indian, as frishtath, i.e., prohithapade, the ancient form of name consequently, (not backrapade). Here, too, presumably, as in the case of Jhina, the Buddhusts were the channel of communication Pp 250 251, note <sup>211</sup>. The proposition had down by

H Trooh in Z D M G xxx 306, that no Indian rings, which cumerate the planets in the order—Sun, Moon Mars, &c—can have been composed anies than the third century AD, has application to Yajivally a vell as to the Atharva-parishirts, which in point of fac

bready ob mathis enter ene / 9 x 317

P 253 note \* The absence of mention of the Romakee in the Ramayana may perhaps also rest upon geographical grounds, namely, on the probable ougm of the poem in the east of India in the land of the Kosulas, whereas the 'war-part' of the Maha-Bharata was in all likelihood composed in Central, if not in Western India.

P 256, note 22 Cf Thibaut's paper 'On the Sulvasutras' in the Journ As Soc Bengal, 1375 (minutely discussed by Mor Cantor in the hist lit, div of the Zatsch fur Math and Physil, vol van), and his edition of the Sulva-satra of Bandhayana with the commentary of Dyarakánathayayvan (text with translation) in the Pandit.

May, 1875-77

P 256, note \* The explanation of the Indian figures from the initial letters of the numerals has recently been rudely shaken, see Buhler in Ind Ant, v. 48,-through the deciphering, namely, of the ancient 'Nagari numerals' by Pandit Bhagvánlal Indran, ibid., p 42 ff These, it appears, turn out to be other letters, yet the derivation of the later figures from them can hardly be called in question What principle underlies these ancient numerals is. for the rest, sull obscure the zero has not yet a place among them, there are letter-symbols for 4-10 (1-3 being merely represented by strokes) for the tens up to 90, and for the hundreds up to 1000 Comp pp 222, note 2-3, and 257, note 284

P 260, note The remainder of the Yatra has now

seen edited by Kern in I St. xiv and xv

P 266 ff In complete opposition to the former dreams about the high antiquity of Indian medicine, Haas has recently, in Z D M G, xxx, 617 ff and xxx; 617 ff. characterised even the most ancient of the Indian medical texts as quite modern productions, to be traced to Arabian sources In the accounts given by the Arabs themselves of the high repute in which Indian medicine stood with them, and of the translation of works of the Lind, which are specified by name, from Sanskrit into Arabic, he recogmises hardly any value. As regards the latter point, however, there exists absolutely no ground for throwing doubt upon statements of so definite a character made by the old Arab chroniclers, while, with respect to the former point the languere of Sufruta, Charala &c. is distinctly

opposed to the assignment to them of so law a date. At the same time, ever real proof of the presence of Gueck (or even Arabian) conceptions in the vorks in question will have to be thinkfully received. But the early existence of medical knowledge in India would in no way be prejudited thereby, as its beginnings are well attested by evidence from the Vedre period, especially from the Atharaxaeta.

P 270, note <sup>810</sup> Churaka, as Buhler informs me, has now also been printed at Bombay, edited by Dr Anno

Mureshvar Kunte, Grant Medical College

P 271, note 315 The Kava translation of the Kamandak-nith probably belongs at the earliest, to about the same date as the translation of the Maha-Bharata, see remark above to note 201—Plogress has been made with the printing of Nirapeksha's commentary in the Bhb Indica

P 275, note <sup>29</sup> On modern Indian music, see now the numerous writings of Sourindro Mohun Tagore, Calcutta, 1875 ft, of Janar Lit Zut, 1877, p 487—Lit is possible that the nucestigation of the gánas of the Sama-veda, in cuse these are still in actual use and could be observed, myly yield some practical result for the ancient laukita music

P 274, noto 31 Ter such representations of Venus, supported on the tul of a dolphin or with a dolphin and Cupid behind her, see J J Bennoulli, Apphredit (Leipzg, 1873), pp 245 370, 405 See also numerous representations of the kind in the Muste de Sculphure par le Cerule R de Clarace (Paris, 1836-27), vol n. pl. 593, 607, 610.

612 615, 620, 622, 636-628, 634

P 2/8 note 327 Babler has also published a translation of Apactamba it is now being repinted in the series, of 'Sacred Books of the East' which is appearing under Mr. Mullers direction—Gautrum his been edited by Stenzler (London 1876), and is also comprised in Jivaniadus large collection 'Dhurmashistrisungrahı' (Cilcutta, 1876), vihich all Inaccuracies notwithsi unding, 13 yet a (xi) mentonious publication, on account of the abundance of material it contains. It embraces 27 large and small Suntit-taxts, namely, 3 Atris, 2 Vishnus, 2 Hautes Yeljana'sla, 2 U 1712' Angirus, Yena, Apa

stembs, Samvarts, Kátyáyana, Brihaspati, 2 Panánaz, 2 Vyásas, Sankha, Likhita, Dalaha, 2 Gautamaa, and 2 Vaasishkas—Márdas Simrit has been translated by Jelly (London, 1876), see also his papers, Uder du ræit tides Stellung der Frauen bet den Indern (Minneh, 1876), and Uder das reduces Schuldrecht (Minneh, 1877)

P 250, note 25 The Aruna-Smrit, Buller informs me, is quite a late production, probably a section of a Perant. P 251 As Ygnavalk; a enumerate sthe planets in their Greek order (1 295) the carlied date we can assign to this work is the third century AD (see remark above to p 251,

note 24, following Jacobi)
P 284, s. See remark on Panchalachanda above note

top 50

P 288 E. Senart, in his ingenious work, La Ugend du Buddha (Paris, 1875), trees the various legends that are narrated of Buddha and in part, identically, of Krishna also) to ancient solar myths which were only subsequently applied to Buddha, comp my detailed notice and partial reconder in the Janace Lat Zat. 1876 (2014 April). n 282 ff

rejoinder in the Jenaer Lit Zeit, 1876 (29th April), p. 282 ff P. 291, note † Schiefner's 'Indische Erzahlungen,' from the Kagyur, in vols vii and viii of the Helanges Assatiques of the St Petersburg Academy, embrace already

forty-seven such legends

F 292, note \*\* Whether the Buddhaghosh of this inscription is, as Stevenson assumes (p. 13), to be identified with the well-known B must still appear very doub'ful, as the princes mentioned in the rest of thece inscriptions belong to a far older period, see Bhadairar in the Transactions of the Lordon Congress of Orientalists (1876),

p 306 ff

F 203, note \* Sept exister Palis, tirks din Boharuldya, from the papers of Paul Grimblot, were published by his widow in 1876 (Paris), text with translation.—The second part of Fausboll's edition of the Jatria appeared in 1874—The Mahaparinibhan-sulta was edided in 1874 by Childers in the Journal R. A. S., vols via and vui a separate impression of it has just appeared. The same journal also contains an edition of the Patimold his by Dickson. An edition of the whole Viria-putal a by Herm Oldenberg is in the press.

P 297, note 349 A collected edition of the sacred Afigns

of the Jamas was published last year (1877) at Calcutta by Dhanapatisinhaji the text is accompanied with the commentary of Abhayadeva and a bháshá-explanation by Bhagvan Vijaya.

P 300, note 3.9 On this compare also S Beal The Buddhist Tripital a as it is krown in China on I Japan

(Decomport, 1876)

P 303, note † On possible points of connection between the Avesta and Buddinism see Jinaer Lit Zit, 1877, p 221

P 305, note ! In Gautama the word blik his appears expressly as the name of the third of the four dirarias. in place of it Manu has yet.
